

TABLE OF CONTENTS

HOW TO USE THIS BOOKxii
1 INTRODUCING JAVASCRIPT	2
Introduction to JavaScript	2
Enter a JavaScript Statement into the Address Bar	4
Embed JavaScript in an HTML Document	6
Link an External JavaScript File	8
Present Content to Non-JavaScript Enabled Browsers	10
Add a Comment to JavaScript Code	12
Protect the Source Code	14
2 USING VARIABLES AND ARRAYS	16
Understand Variable Types	16
Declare Variables	18
Assign Values to Variables	19
Display Integers	20
Display Floating-Point Numbers	21
Display Booleans	22
Display Strings	23
Determine Variable Type	24
Convert Strings to Numbers	26
Convert Numbers to Strings	27
Declare an Array	28
Declare a Multidimensional Array	30
Determine the Number of Elements of an Array	32
Convert an Array into a String	34
Sort an Array	36
Remove Elements from an Array	38
Add Elements to an Array	39
3 CREATING EXPRESSIONS	40
Using the Arithmetic Operator	40
Increment and Decrement Values	42
Create Comparison Expressions	44
Create Logical Expressions	46

Identify Numbers	48
Evaluate an Expression	50
Inform the User with an Alert Dialog Box	51
Enable User Input with a Prompt Dialog Box	52
Enable User Decisions with a Confirm Dialog Box	54

4 HANDLING EVENTS56

JavaScript Events	56
Detect a Mouse Click	58
Create Rollover Buttons	60
Detect a Key Press	62
Detect a Modifier Key Combination	64
Set and Remove Focus	66
Onchange Event	68
Handle the Page Load and Onunload Operations	70
Execute a JavaScript Statement from an HTML Link	72
Attach an Event to an Object	73
Determine the Element That Received the Event	74
Determine Which Mouse Button Was Pressed	76
Cancel Browser Events	77

5 CONTROLLING PROGRAM FLOW78

Limit Executions with If-Else Statements	78
Using Conditional Operators	80
Optimize Performance with a Switch Statement	81
Create a For Loop	82
Continue and Break Loops	83
Handle While Loops	84
Create a Timed Interval	86
Set a Regularly Timed Interval	88
Declare and Call a Function	90
Handle Global and Local Variables	91
Pass Parameters to a Function	92
Return a Value from a Function	93
Increase Script Performance	94

TABLE OF CONTENTS

6 UTILIZING STRINGS	96
Determine the Length of a String	96
Select Portions of a String	98
Change the Case of a String	100
Extract Characters from a String	102
Escape a Text String	104
Encode a URI	105
Regular Expression	106
Match the Character in a String	108
Replace Characters in a String	110
7 WORKING WITH HTML FORMS	112
Develop HTML Forms	112
Reference Form Elements	113
Validate a Text Box Value	114
Validate a Password Field	116
Work with a Hidden Element	118
Validate Text Area Input	120
Work with a Button Element	121
Apply Reset and Submit Buttons	122
Alter Check Box Properties	124
Determine Selected Radio Button	126
Work with a Selection List	128
Basic Form Validation	130
Create a Select Element Navigation Menu	132
Block an Enter Key Invoked Form Submission	134
Advance the Text Field Focus with the Enter Key	136
8 WORKING WITH DATES AND TIMES	138
Use the Date Object to Display Dates	138
Get the Date and Time Components	140
Set the Date and Time Parts	142
Convert Dates to Strings	144
Check If a Date Is in a Range	146
Convert Between Time Zones	147
Create a Countdown Timer	148
Create a Running Clock with Images	150

9 USING THE MATH OBJECT	152
Employ Mathematical Constants	152
Apply Trigonometric Functions	154
Square Root and Power	156
Find Minimum and Maximum Values	157
Generate Random Numbers	158
Round Numbers Using Methods	160
Format Large Numbers with Commas	162
10 EXPANDING FUNCTIONALITY WITH THE WINDOW OBJECT	164
Write Content to the Window	164
Create a Pop-Up Window	166
Detect If a Pop-Up Window Is Open	168
Reference Information from Multiple Windows	169
Close Pop-Up and Parent Windows	170
Set Window Size and Placement	172
Maximize the Browser Window	174
Center the Window on the Screen	176
Utilize an IE Modal Window	178
Create Content in a Pop-Up Window	180
11 CONTROLLING THE FRAME OBJECT	182
Create Frames	182
Reference Individual Frames	184
Determine the Frame Dimensions	186
Print Individual Frames	187
Break In and Out of Frames	188
Resize the Frames	190
Write Content to a Frame	192
Understand Frame Security	194
12 CREATING AND MANIPULATING OBJECTS	196
Reference Objects with the Document Object Model (DOM)	196
Create Custom Objects	198
Develop a Custom Object Method	200

TABLE OF CONTENTS

Create a Pseudo Hash Table	202
Manage Images with the Image Object	204
Locate All Links	206
Dissect the Location Object	207
Create a Bread Crumb Navigation Menu	208
Explore the Page History of the Browser	210
Disable the Back Button	211

13 DETERMINING ENVIRONMENT PROPERTIES212

Detect the Browser Brand Name	212
Determine the Operating System	214
Distinguish the Default Native Browser Language	216
Identify the JavaScript Version Support	217
Verify If a Method or Object Is Supported	218
Set a Cookie Value	220
Retrieve a Cookie Value	222
Delete a Cookie Value	224
Create a Query String	226
Convert a Query String into Variables	228

14 CREATING CASCADING STYLE SHEETS230

Link Style Sheets to a Web Page	230
Create Rules in a Style Sheet	232
Add Compliance Declaration	234
Attach Multiple CSS Rules	235
Override Rule Properties with Style Attribute	236
Modify Border Properties	237
Customize a Link Style	238
Center Content on the Web Page	240
Add a Background Image to the Document	241
Add and Alter Elements to a Web Page	242
Create a Scrollable DIV	244
Add an iFrame to the Web Page	245
Add Transparency to an Element	246
Change Style Sheet After the Page Loads	248
Turn Style Sheet Off or On	250

15 CREATING INTERACTIVE WEB PAGES WITH DHTML	.252
Reference an HTML Element	252
Create New HTML Elements	254
Use innerHTML	256
Set an Element Position	257
Find Nonpositioned Element Positions	258
Show and Hide Elements	260
Find Browser Dimensions	262
Find the Mouse Position	263
Animate Elements	264
Create a Draggable Element	266
Create a Cross-Browser Layer Modal Window	270
Create a Custom Alert or Confirm Dialog Box	272
16 ADDING DYNAMIC CONTENT	.276
Insert and Remove Items in a Selection List	276
Create a Double Combo Selection List	278
Add New Table Rows	280
Develop an Image Gallery	282
Produce an Autoscrolling Window	284
Construct a Navigation Tree	286
Generate a Navigation Drop-Down Menu	290
Insert Page Transition Effects	294
Incorporate Sound with a Button	296
CHAPTER 17: DEBUGGING JAVASCRIPT ERRORS	.298
Detect a JavaScript Error	298
Debug through the Alert Dialog Box	300
Solve Problem with Page Onload Handlers	302
Locate Common Errors	304
Avoid Errors with Try/Catch Statements	305
Test JavaScript Code for Errors	306
APPENDIX	.308
INDEX	.312
