# Contents

*Introduction* . . . . . xv

**Chapter 1 • Cleaning for the Novice** . . . . . 1

Before You Begin Cleaning . . . . . 2

    Backing Up Your Hard Drive . . . . . 2

    Creating a System Restore Point . . . . . 4

    Applying All Required Patches . . . . . 4

An Overview of Tasks to Perform Immediately . . . . . 5

    Cleaning Your Hard Drive . . . . . 5

    Clearing the Cobwebs from Memory . . . . . 6

    Tuning Your Applications . . . . . 6

Potentially Hazardous Cleaning Aids . . . . . 7

    Getting Bit by the Registry . . . . . 7

    Avoiding the Pitfalls of Programming . . . . . 8

    Zapping Important Application Settings . . . . . 8

    Dodging the Command Line . . . . . 8

Oops, I Made a Mistake . . . . . 9

Let's Start Cleaning . . . . . 10

**Chapter 2 • A Gentle Introduction to Windows Washing** . . . . . 11

Is Your GUI Goey? . . . . . 11

    Considering the Effects of Too Many Running Applications . . . . . 12

    Working with Newer Applications . . . . . 13

    Understanding the Need to Archive Old Data . . . . . 14

    Tuning with User Experience in Mind . . . . . 14

There Is No Magic Bullet . . . . . 15

Performance Isn't Just Speed . . . . . 15

    Considering Usability . . . . . 16

    Adding Reliability . . . . . 17

    Using Resources Efficiently . . . . . 19

    Making the Application Fast . . . . . 19

Sources of Grime . . . . . 20

    Locating Dirty Hard Drives . . . . . 20

    Detecting the Ever-growing Registry . . . . . 22

    Assessing Overloaded Memory . . . . . 24

Let's Start Cleaning . . . . . 25

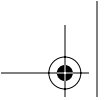

<b>Chapter 3 • Cleaning the Hard Drive . . . . .</b>	<b>27</b>
Finding Where Excess Files Hide . . . . .	27
Windows Explorer Lies to You . . . . .	28
Indexing the Drive . . . . .	33
Using the Command Prompt to Your Advantage . . . . .	37
Command Line Utilities You Should Know About . . . . .	38
Taking Out the Internet Explorer Trash . . . . .	46
Getting Rid of Cached Data . . . . .	47
Killing the Cookie Monster . . . . .	48
Forgetting History . . . . .	49
Controlling a Voracious Drive Space Appetite . . . . .	49
Taking Back Your Identity . . . . .	51
Controlling Multimedia . . . . .	51
Scrapping Temporary Files . . . . .	52
Choosing the <i>Del</i> Command over Windows Explorer . . . . .	53
Eliminating Files Beginning with ~ . . . . .	54
Zapping TMP and BAK Files . . . . .	54
Looking for LOG Files . . . . .	55
Discovering Who Created a File . . . . .	55
Choosing a Paging File Size . . . . .	56
Understanding NTFS . . . . .	58
Let's Start Cleaning . . . . .	59
<b>Chapter 4 • Performance Tuning Applications . . . . .</b>	<b>61</b>
Controlling Microsoft Additions You Don't Want . . . . .	61
Modifying the <i>Sysoc.INF</i> File . . . . .	62
Removing Unneeded Applications . . . . .	64
Removing Application Installation Crumbs . . . . .	67
Discovering Setup Files . . . . .	68
Removing Temporary Data . . . . .	71
Removing Sticky Applications . . . . .	73
Stopping the Errant Application . . . . .	73
Removing the Application from Your Drive . . . . .	74
Searching the Registry for Remains . . . . .	77
Discovering Application Uninstall Remains . . . . .	78
Archiving Your Personal Settings . . . . .	78
Removing Unneeded Folders and Files . . . . .	79
Tweaking Application Feature Sets . . . . .	81
Removing Demonstration Programs . . . . .	81
Deleting Training Programs and Sample Files . . . . .	82
Considering the Features That You Really Use . . . . .	83
Discovering When You Get Too Much Help . . . . .	84

Removing Fonts You Don't Need .....	84
Using the Fonts Folder .....	85
Using FontView .....	87
Using Font Runner .....	88
Using FontFrenzy .....	89
Controlling Processing Cycle Usage .....	90
Let's Start Cleaning .....	92
<b>Chapter 5 • Saving Data for Later .....</b>	<b>93</b>
Compressing Data Files .....	94
Setting Compression Options for a Drive .....	94
Compressing Individual Files .....	95
Locating Hidden Data Compression Features .....	96
Long-Term versus Short-Term Storage .....	98
The Amazing Disintegrating CD .....	99
Speed Issues Using Tape Drives .....	100
Reliability Issues Using Hard Drives .....	101
Temporary Storage Online .....	103
Cataloging and Archiving Data .....	103
Using the MakeCab and Expand Utilities .....	105
Using ZIP or Other Files .....	112
Understanding Alternatives Like WinRAR .....	114
Preventing Email Overload .....	114
Organizing and Categorizing Your Email .....	115
Archiving Email Files .....	116
Restoring Email Files .....	117
Using Free Email Accounts .....	118
Let's Start Cleaning .....	118
<b>Chapter 6 • Detecting Registry Leftovers .....</b>	<b>119</b>
Using the Registry Editor .....	119
Exploring the Registry Editor .....	120
Exporting Data .....	121
Importing Data .....	123
Understanding the Data Types .....	124
Securing the Registry .....	125
An Overview of Interesting Registry Sections .....	127
Working with Application Entries .....	127
Running Applications Automatically .....	129
Working with Components .....	131
Following the Flow of Registry Entries .....	133
Looking for Simple Files .....	133
Looking for Complex Files .....	134

Removing Application Tidbits .....	136
Deleting Old Setup Data .....	136
Reassigning File Associations .....	138
Avoiding Common Application Cleansing Mistakes .....	139
Relying on Registry Cleaning Products .....	140
Using RegClean .....	140
Using Registry Mechanic .....	141
Using TweakNow RegCleaner .....	142
Performing Registry Tweaks that Make Sense .....	143
Disabling the Paging File .....	143
Setting Internet Explorer Automatic and Optional Searches .....	144
Choosing between Security and Shutdown Speed .....	145
Clearing the Open With List .....	145
Let's Start Cleaning .....	146
<b>Chapter 7 • Memory Hogs and Other Vicious Beasts .....</b>	<b>147</b>
Understanding How Much an Application Costs .....	147
Using Task Manager .....	148
Using the TaskList Utility .....	152
Using System Monitor .....	156
Using Performance Logs and Alerts .....	160
Using the TypePerf Utility .....	166
Using MSCONFIG .....	169
Understanding the MSCONFIG Basics .....	169
Understanding <i>SYSTEM.INI</i> .....	170
Understanding <i>WIN.INI</i> .....	171
Avoiding <i>BOOT.INI</i> .....	172
Selecting Services .....	172
Exercising Startup Options .....	172
Clearing Unnecessary Services .....	173
Modifying Network Connections .....	175
Working with Device Drivers .....	177
Removing Gizmos from Your Systems .....	178
Understanding Themes .....	178
Understanding Screen Savers .....	179
Let's Start Cleaning .....	180
<b>Chapter 8 • Keeping Your Windows Clean .....</b>	<b>181</b>
Rolling Back Bad Installations .....	181
Verifying You Can Create a Restore Point .....	183
Defining a System Restore Point .....	184
Restoring the System .....	184

Performing Regular Maintenance .....	186
Using Disk Cleanup .....	186
Scanning Hard Drives for Errors .....	187
Performing Backups .....	190
Defragmenting the Drive .....	194
Using Dr. Watson .....	196
Using jv16 Power Tools .....	198
Utilities You Didn't Know About .....	199
Techniques for Discovering Unknown Utilities .....	199
Some Utilities Don't Work .....	200
Using DriverQuery .....	201
Using OpenFiles .....	202
Using Net .....	204
Using FSUtil .....	206
Using SystemInfo and WinMSD .....	208
Working with the Windows PowerToys .....	209
When a PowerToy Becomes a Useless Toy .....	209
Using TweakUI .....	210
Knowing That Updates Change Settings .....	213
Using and Cleaning the Event Log .....	214
Viewing Event Log Entries .....	215
Setting the Event Log Options .....	217
Removing Old Event Log Entries .....	218
Let's Start Cleaning .....	218
<b>Chapter 9 • Controlling the User .....</b>	<b>219</b>
Multiple Users Means More Garbage .....	220
Actively Soliciting the User's Help .....	220
Removing Excess Personal Settings and Data .....	223
Defining Excess Personal Settings and Data .....	223
Creating a Personal Data Archive .....	224
Removing Personal Applications .....	225
Developing Standards from Personal Settings and Data .....	226
Auditing User Actions .....	228
Avoiding a Big Brother Reputation .....	228
Deciding between Permanent and Temporary Audits .....	229
Creating a Security Audit .....	230
Creating a Drive, Folder, Application, or File Audit .....	231
Processing the Audit Results Manually .....	234
Using Automation to Process the Audit Results .....	236
Setting Quotas .....	240
Saving Space for the System .....	240
Setting Reasonable Quotas .....	242
Creating the Quotas .....	242
Let's Start Cleaning .....	244

<b>Chapter 10 • Guarding against Outside Dirt: Keeping Adware, Spyware, and Nuisances at Bay . . . . .</b>	<b>245</b>
Sources of Outside Dirt and Grime . . . . .	246
Understanding Adware and Spyware . . . . .	247
Understanding Viruses . . . . .	249
Defining Unwanted Downloads . . . . .	250
Defending against Known Sources of Dirt . . . . .	253
Determining When a Feature Is Unwanted . . . . .	257
Discovering Nasty Intruders . . . . .	258
Using PestPatrol . . . . .	259
Using SmartFix . . . . .	260
Using SpyBot Search and Destroy . . . . .	260
Setting Applications to Deter Outsiders . . . . .	261
Adopting a Positive Attitude . . . . .	261
Using the Four Security Zones in Internet Explorer . . . . .	262
Optimizing Outlook Express Usage . . . . .	265
Creating Security Buffers . . . . .	266
Let's Start Cleaning . . . . .	268
<b>Chapter 11 • Automating Cleanup Tasks . . . . .</b>	<b>269</b>
Creative Uses for Batch Files . . . . .	269
Controlling Execution Using <i>If</i> . . . . .	271
Giving the User Options Using <i>Choice</i> . . . . .	273
Executing a Command Multiple Times Using <i>For</i> . . . . .	275
Using the Task Scheduler . . . . .	275
Starting Task Scheduler . . . . .	276
Setting the Task Scheduler Options . . . . .	277
Creating Tasks . . . . .	279
Modifying Tasks . . . . .	280
Deleting and Renaming Tasks . . . . .	282
Using the AT Utility . . . . .	282
Listing Jobs Using AT . . . . .	283
Creating a Job with AT . . . . .	283
Deleting a Job with AT . . . . .	283
Combining the AT Utility with Task Scheduler . . . . .	284
Relying on Scripts . . . . .	284
Using CScript and WScript . . . . .	285
Configuring the Host and Property Page Options . . . . .	287
Accessing Common Windows Objects . . . . .	288
Using Custom Scripts for Common Tasks . . . . .	293
Scripting the Command Line and System Environment . . . . .	293
Scripting the Registry . . . . .	296
Let's Start Cleaning . . . . .	297

**Chapter 12 • When You Make a Mistake . . . . . 299**

Fixing Operating System and Disk Problems . . . . . 300

    Performing a Diagnostic . . . . . 300

    Relying on Backups . . . . . 301

    Relying on Restore Points . . . . . 302

Repairing Application Settings . . . . . 303

    Restoring Settings Files . . . . . 304

    Using Registry Settings Exports . . . . . 308

    Manually Changing Settings . . . . . 312

Undoing Temporary Changes . . . . . 313

Restoring DLLs and Other Executables . . . . . 314

    Getting Copies of Files . . . . . 314

    Restoring DLL Registration . . . . . 316

Restoring One Too Many Service Changes . . . . . 316

Let's Start Fixing . . . . . 318

**Appendix A • Additional Cleaning Tools . . . . . 319**

Playing with Faber Toys . . . . . 319

Modifying the Windows Boot Cycle with Startup Mechanic . . . . . 321

Tracking System Activity with Process Explorer . . . . . 322

Using the Microsoft Baseline Security Analyzer . . . . . 323

Using the IIS Lockdown Tool . . . . . 328

Examining Applications with Dependency Walker . . . . . 330

    Determining Which DLLs Your Application Uses . . . . . 330

    Profiling an Application . . . . . 332

**Appendix B • 52 Quick Tips for Cleaning Windows . . . . . 335**

**Glossary . . . . . 343**

*Index . . . . . 363*
