

Index

Note to the Reader: Throughout this index **boldfaced** page numbers indicate primary discussions of a topic. *Italicized* page numbers indicate illustrations.

A

- access control
 - HTTP Server, **148**
 - Internet environment, 310
 - OID, 371–372
 - Portal, 244
 - Portlet Repository, **240**
- access control lists (ACLs)
 - for OID, 371
 - for Portal, 317
- access-log parameter, 284
- access logs
 - in default-web-site.xml, 284
 - for HTTP Server, **154**
 - for Web Cache, 212
- Access tab, 244
- AccessFileName directive, 140
- Account Management privilege, 425
- accountability, **309**
- accounts
 - groups and users. *See* groups and group accounts; users and user accounts
 - ias_admin, 46, 71, 72, **380–381**
 - root, 29
- ACLs (access control lists)
 - for OID, 371
 - for Portal, 317
- actions for self-registration, **253–256**
- Active Requests statistic, 148
- Activity Log tables and Activity Log views, 230
- activity reports, 230
- Add Partner Applications page, 404, *404*
- Add Portlets page, 240, 242, 245, 249
- admin_id parameter, 404
- admin_info parameter, 404
- Administer Partner Applications page, 406
- administration model in OID, 373–377
- Administration page
 - for HTTP Server, 142, *143*
 - for Portal, 412, *413*
 - for Web Cache content invalidation, 210, *210*
- Administration section for Portal, 229
- administrative groups in OID, 376–377
- administrative portlets, **230–231**
- Administrator Email field, 406
- Administrator Information field, 406
- administrator role, **400–401**, *400*
- administrators
 - in OID, 373–377
 - for partner applications, 406
 - passwords for, 46, 71, 72, **190–191**, *190–191*, **380–381**
 - for self-registration actions, **254–256**, *254*
 - in SSO, **400–401**, *400*
- Advanced Caching Instructions page, 204–205, 205
- Advanced Server Properties link, **156–157**, *157*
- Alias directive, 164
- aliases
 - for documents, 164
 - for Web Cache sites, 200
- Aliases setting, 200
- AliasMatch directive, 164
- All at the same time, all must approve option, 255
- All at the same time, only one must approve option, 255
- all flag in pltconfig, 260
- All Metrics link, 229
- Allow DAS configuration privilege, 425
- Allow User Editing option, 255
- Allow User to Log On option, 236–237
- AllowOverride directive, 140, 161, **164**
- ALTER DATABASE command, 469
- alternating text in regular expression classes, 438
- anchors in regular expression classes, 438
- anonymous authentication, 358

488 Apache HTTP Server 2.0 – backslashes (\) in regular expression classes

- Apache HTTP Server 2.0, 157–158
 - append parameter, 366
 - application-auto-directory attribute, 281
 - Application Development Framework, 8
 - Application Name setting, 408
 - Application Server Control. *See* AS (Application Server) Control
 - Application Server Metadata Repository, 228
 - Application server tier, 13
 - application-specific roles, 373
 - application.xml file
 - for EAR files, 272
 - for OC4J, 282–284
 - applications
 - deploying. *See* deploying applications
 - for Web Cache content invalidation, 211
 - Approval Required option, 254–255
 - Approved Certificate Information page, 330
 - aqxml.conf file, 141
 - architecture, 13, 14
 - AS Control, 92, 94–95
 - DAS, 414–415
 - deployment, 17, 17
 - Developer Kits, 16
 - HTTP Server, 131–132, 132
 - Infrastructure installation types, 15–16, 15
 - J2EE, 271–272
 - Middle-Tier installation types, 14, 15
 - OCA, 319–320
 - products and installation types, 14, 14
 - Web Cache, 182–184
 - ARCHIVELOG mode, 467–468, 471
 - AS (Application Server) Control, 4, 14, 89
 - architecture, 92, 94–95
 - comparing tools for, 89–92
 - components of, 90
 - for Infrastructure Components, 52–53, 53–54
 - Log Viewer, 104–105, 105–106
 - new features for, 447–448
 - for OC4J, 285–291, 286–290
 - pages, 95–96
 - component, 100
 - Farm, 96, 96
 - home, 12–13, 12
 - host computer, 99–100, 99
 - instance, 97–98, 97–98
 - performance metrics for, 101, 101
 - for Portal
 - instances, 227–230, 228–229
 - passwords, 232
 - SSL for, 108–110, 110
 - starting and stopping, 100, 101, 107–108
 - Topology Viewer, 102–104, 103
 - for virtual hosts, 171, 171
 - for Web Cache, 186–187, 186–187
 - ASM (Automatic Storage Management), 454, 462
 - asterisks (*) in regular expression classes, 439
 - Attribute for Login Name setting, 418
 - Attribute for RDN setting, 418
 - attributes, user, 422–424, 423
 - AuthConfig option, 161, 164
 - AUTHENTICATED_USERS group, 234
 - authentication
 - in DAD files, 297
 - for external applications, 395, 409, 411–412, 412
 - in Internet environment, 310
 - in OCA, 331
 - in OID. *See* Oracle Internet Directory (OID)
 - passwords for, 309
 - for self-registration, 255
 - in SSO, 394–396, 395–396
 - Authentication page, 329
 - Authorization module, 319
 - authorization services, 310
 - automatic recovery service, 447

 user limits in installation, 33
 User Name/ID Field Name setting, 408
 User Object Class parameter, 360
 User Search Base parameter, 360, 419
 usernames and user IDs

- in DAD, 297
- for external applications, 395
- falsifying, 309
- for partner applications, 394
- for SSO, 393
- for WebDAV portals, 257

 userPassword attribute, 378
 users and user accounts

- attributes for, 422–424, 423
- creating, 29–30
- DAS for, 422–424, 423
- in OID, 374–376, 374–376

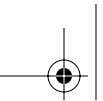

- in Portal, 233–234
 - creating, 236
 - lists of values for, 239–240
 - for portals, 231
 - privileges for, 239
 - profiles for, 236–238
- privileges and roles for, 424–425
- searching for, 424
- for Ultra Search, 453
- for Web Cache, 191

V

- \v in regular expression classes, 440
- verifying
 - listener ports, 33
 - listener status, 52
- vertical tabs in regular expression classes, 440
- virtual hosts
 - httpd.conf file, 139–140
 - working with, 169–171, 171
- Virtual Hosts page, 142
- virtual paths, 169–170
- VirtualHost directive, 169–170
- virtualhost parameter, 404

W

- \w in regular expression classes, 440
- wallets and Wallet Manager, 312, 318
 - downloading, 341
 - exporting, 340–341
 - OCA, 320
 - OWM for, 332–334, 333–335
- WAR (Web Archive) files, 247, 272
- Warn logging level, 151–152
- watchdog process, 95
- wc flag in pltconfig, 260
- WCLF (Web Cache log format), 212–215
- web-app parameter, 284
- Web Archive (WAR) files, 247, 272
- Web-based Distributed Authoring and Versioning (WebDAV), 256–257
- Web Cache, 11, 181–182
 - administering, 185
 - architecture, 182–184
 - clustering, 184
 - compressed content in, 206
 - content invalidation for, 208–211, 209–210
 - exam essentials, 215–216
 - expiring content in, 206–211, 207–210
 - logs for, 212–215
 - new features for, 448
 - origin servers for, 196–198, 197, 200
 - performance of, 192–194, 193
 - and Portal, 238, 261, 317
 - ports for, 194–196, 195
 - review questions, 217–223
 - rules for, 201–205, 202–205
 - security for, 189–192, 190–191, 314–315, 314
 - site definitions for, 199–200, 199–200
 - SSL for, 314, 346
 - starting and stopping, 185–189, 186–187
 - summary, 215
- Web Cache log format (WCLF), 212–215
- Web Cache tool, 13
- web modules, 247, 288, 289
- web provider registration in Portal, 247–249
- Web Service for Remote Portlets (WSRP)
 - providers, 243–244, 246–247
- Web Services, 8
- Web Services Description Language (WSDL), 246–247
- Web tier, 13
- webcache.xml file, 261
- webcachectl utility, 13
- WebDAV (Web-based Distributed Authoring and Versioning), 256–257
- Webopedia site, 312
- Website security, 158–160
- Welcome page
 - HTTP Server, 56, 57
 - Infrastructure installation, 35, 35
 - Portal, 78, 78
- white space characters in regular expressions, 437
- Wikipedia site, 312
- Wireless infrastructure, 10
- Wireless option, 65, 67, 68
- wireless web modules, 288, 289
- WKPROXY account, 453

510 WKSYS account – XML Developer Kit (XDK)

WKSYS account, 453

WSDL (Web Services Description Language), 246–247

WSRP (Web Service for Remote Portlets) providers, 243–244, 246–247

X

x-auth-id field, 214

x-cache field, 214

x-cookie field, 214

x-date-start field, 214

x-ecid field, 214

x-esi-info field, 214

x-os-timeout field, 214

x-protocol field, 214

x-req-type field, 214

x-time-delay field, 214

x-time-start field, 214

XML-based providers, 316
