Introduction	xxiii
Part I: Launching Your Website as a Software Project	
Chapter 1: Keeping It Simple	3
Getting with the “Program”	4
Starting with a Map for Business Vision and Scope	7
Who’s Going to Use the Site?	8
What Are They Going to Use It For?	9
What Needs to Be Done So They Can Do That?	10
When Should You Do That?	12
What Should It Look Like?	13
Making Sure You’re Getting What You Really Want	13
Turning Over the Helm	14
Information Architecture and an Agile Approach for the Rest of Us	15
The Example Used throughout This Book	15
Summary	16
Chapter 2: Taking Baby Steps	17
Creating an Initial Environment	18
Installing Drupal as a “One-Click” Pre-Installed Script	19
Installing Drupal Right	22
Whipping up the Initial Prototype	31
Implementing Roles	31
Implementing the Business Objects	33
Putting the First Role to Work (Initial Basic CMS Workflow...)	47
Summary	50
Chapter 3: Getting Organized	53
Reviewing the Initial Environment	53
Housekeeping the SVN Repository and Trac Instance	55
Main Directory Structure for Drupal	56
Main Directory Structure for the Repository	61

Contents

Initial Import of the Codebase into the Repository	62
Getting the Test Site up and Running	63
Building on Your Initial Prototype	69
Creating the literary_piece Content Type	70
Enabling Comments for the literary_piece Content Type	71
Creating Some Magazines and Books	73
Setting up Some Forums	78
Setting up Blogs	79
Completing the Primary Menu	80
Committing to the Repository and Tagging the Initial Prototype	81
Deploying to the Test Site	82
Getting Initial Feedback from the Client	84
Summary	85
Chapter 4: Getting up to Speed	87
Finishing the User Stories with the Client	87
Planning the Project	89
Doing It on the Dining Room Table	89
Doing It with Trac	90
Doing It	95
Committing, Deploying to Test, Testing, Tracking	99
Working on the Architectural Baseline	101
Getting the Team Organized and with the Program	103
Whom Do You Need?	103
“Who You Gonna Call?”	104
Elaboration Phase Cleanup	104
Summary	105
Part II: Getting Your 5.x Site Up-To-Date	
Chapter 5: Finishing up the Elaboration Phase	109
Creating an Initial Environment	109
How Can I Easily Update the Drupal Release?	110
How Can I Update Modules Easily and Cleanly?	111
Whipping up the Initial Prototype	117
A Workshop Leader Can Manage Affinity Groups	119
A Workshop Leader Can Broadcast Messages to Members	125
What’s Left?	126
Working on the Architectural Baseline	126
Summary	127

Chapter 6: Pushing the Envelope	129
You've Got Mail!	129
Using Your Own dev Affinity Group	130
Rolling Your Own Document Case and Index	136
Implementing the Document Case	137
Views-Sorting Tweak	140
Now, Where Were We?	141
Creating the Menus and Navigation Blocks	144
Browsing and Filtering Views of Literary Pieces	145
Example: The Beta Milestone	146
Allowing Filtered HTML Formatting in the Text Area	149
The Tagadelic Module	149
Creating the View Itself	150
Using Exposed Filters with the View	152
Using Categories and Tag Clouds for Project Management	153
Summary	154
Chapter 7: Becoming an Expert Drupal Themer	155
On to Theming	155
Dividing and Conquering Complexity	156
Dynamic Content	160
Specifying Structure	161
Specifying Style	173
Synching Your Work with the Repository and the Test Site	174
Weak and Strong Points in Separation of Concerns with Drupal	178
Standing on the Shoulders of Giants — Reusing the Zen Theme	178
Creating Subthemes	179
Applying the Subtheme to the Quotation Block	181
Summary	183
Part III: Upgrading Your Drupal Site	
Chapter 8: Upgrading to Drupal 6	187
Recommended Reading	187
Upgrading — The Basic Process	188
Step 1: Shifting Everything over to a Test Site	188
Installing Using a Complete Backup from Your Hosting	189
Quick and Dirty on the Command Line	189
Step 2: Updating to the Latest Drupal 5.x Version Available	191

Contents

Updating to 5.x Steps	191
The Sad State of My Modules	194
Doing What I Did	195
Step 3: Testing Everything in the Upgraded 5.x Version	199
Step 4: Making a Module Inventory	200
Step 5: Switching to the Default Drupal Theme	201
Step 6: Disabling All Contributed Modules	202
Step 7: Updating the Drupal Core	202
Step 8a: Enabling the Modules	205
Step 8b: Upgrading the Theme	206
Step 9: Re-running All Site Acceptance Tests	211
Step 10: Deploying	211
Summary	211
Chapter 9: Upgrading to Drupal 6 Revisited	213
Shifting Everything over to a Test Site	214
Update Everything to the Latest Drupal 5.x Version	214
Module Inventory for the On-Line Literary Workshop	215
Preparatory Steps before the Point of No Return	216
Physically Replacing the Drupal 5 Contributed Modules	216
Update Drupal Core and Run the Update Script	217
Solving Problems with Organic Groups	218
Escaped PHP Showing up in My Groups View	219
Group Home Pages No Longer Showing the Group's Posts	222
Getting the Old Views Back	226
Installing the Advanced Help Module	227
Upgrading Your Zen Theme to Drupal 6.x	229
The All-New Devel Module	231
Committing and Deploying to the Test Site	234
Summary	235
Part IV: Getting the Most out of Drupal 6.x	
Chapter 10: Installing and Using Drupal 6 Fresh out of the Box	239
Step 1: Installing Drupal — Easier Than Ever Before	240
Downloading Drupal	240
Unzipping and Preparing Files for Upload	240

Contents

Uploading Files	240
Creating the Database and User for the Drupal Installation	241
Running the Drupal Install Wizard	241
Step 2: Designing and Building the Architecture	244
Application Scope and Domain	244
Creating Roles and Users	245
Installing and Enabling Modules	247
Making the Site Bilingual	248
Step 3: Creating the Business Objects	252
Step 4: Creating the Workflows	256
Implementing the Registration Workflow	257
Implementing the Client's Workflow	261
Implementing the Translator Team Leader's Workflow	268
Implementing the Translator's Workflow	272
Summary	278
Chapter 11: Full Swing Agile Approach to Drupal Development	279
Honing the Project Tools	280
Adding an Acceptance Test Node	280
Make a View to List User Stories	281
Making the User List Available	283
Creating a Block Menu to Easily Access the New View	288
Implementing the User Stories	289
Workshop Member: Starting an Affinity Group with Its Own Forums	289
A Publisher Can Browse Public Content	292
A Publisher Can Select Content for Inclusion in a Publication	298
A Publisher Can Manage a Publication	298
A Publisher Can Broadcast a Call for Pieces to be Submitted for a Publication	301
Initial Theming	303
On-Line Blog Functionality	316
Implementing Service Links	318
Implementing the Author Info Block for Individual Blogs	319
Implementing Recent Posts Block	320
Implementing the Blogroll	320
Summary	321
Chapter 12: The jQuery Chapter	323
Anatomy of a Rich Internet Application Framework	323
The Basics	323
Getting at the DOM with CSS	325
Getting at the DOM with JavaScript	327

Contents

Anatomy of jQuery and Its Plug-Ins	330
jQuery Itself	330
Our <code>onload()</code> Example Implemented with jQuery	331
A Theming Example	332
Plug-Ins	335
Drupal 5.x Uses of jQuery and Other JavaScript Libraries	336
jstools	336
Prototype and <code>script.aculo.us</code>	337
Drupal 5.x UI	338
The jQuery Update Module	338
Advanced Drupal 5.x Examples	339
Reusing the Collapsible Widget	339
Dependent Autocomplete Fields	342
Making Use of Hierarchical Select (Drupal 5.x)	345
Validate, Validate, Validate!	347
Drupal 5.x Thread	347
Drupal 6 Thread: An Ajax-Validated Application Form	349
Drupal 6.x jQuery Breakthrough	354
An Example jQuery Ajax Alarm Module for Drupal 6.x	355
Summary	362

Part V: Drupal 7 and the Road Ahead

Chapter 13: From Drupal 6 to Drupal 7 and Beyond	365
What's Changed in Drupal 6?	365
Killing the Webmaster	367
Understanding the Drupal Blueprint from Drupal 7 On	368
Making the Historic Decision to Postpone the Drupal 7 Code Freeze	369
Listing the Drupal 7 Features	370
Drupal 7 Architectural Style	371
Drupal 7 Database API	371
Going PHP 5	372
Considering Usability Concerns, Usability Sprints	372
Projecting Drupal 7 Contributed Module Battle Plans	376
Installing Drupal 7	377
Developing a Minimalist On-Line Literary Workshop in Drupal 7	378
Creating Literary Pieces	381
Summary	383

Chapter 14: Deploying your Application as a Drupal Installation Profile	385
Leveraging the Advanced Help Module	385
Analyzing the Components of the Views 2 Help System	386
Planning the On-Line Literary Workshop Help System	387
Implementing the On-Line Literary Workshop Help System	388
Installing Profiles! Kill the Webmaster!	392
What Are Installation Profiles?	392
Analyzing Drupalbin: An Example Installation Profile	392
Writing the On-Line Literary Workshop Installation Profile	395
Starting with a Clean Drupal Installation Tarball	395
Copying in the Modules and the Theme	396
Abstracting out the Views into the litworkshop Module	397
Preparing the ./profile Directory	399
Caveats	410
Creating the Drupal Installation Tarball Itself	410
Summary	410
Chapter 15: Acquia Drupal as an Enterprise-Ready Alternative	411
Trying out Acquia Drupal	412
Step 1: Creating a Subscription	412
Step 2: Setting up Acquia Drupal	413
Step 3: Registering Your Website with the Acquia Network	417
Step 4: Getting Support	421
Exploring the New Acquia Drupal Website Installation	421
Installing Updates	423
Introducing the Acquia Marina Theme	426
Checking out Mollom	427
Using the Acquia Partner Program	429
Summary	430
Index	431
