

Subject Index

- administration mode effects (see mode effects)
affect (see also rapport, relational communication)
 detecting users', 196, 199, 200, 203–207, 210
animated agents 50, 71–72, 84, 196–199, 210, 218
 (see also embodied conversational agents, interviewing agents)
anonymity, 100, 103, 186, 189, 243, 249–250
 and detecting repeat responders, 252
 perceived, 186, 189
audio conferencing, 222
Auto-Interviewer, 279
automated systems, 61, 127–129, 132, 195–197, 204
 dialogue module, 275–276
 vs. human interviewers, 139
automatic speech recognition, 142

body posture (see posture)

cell phone, 82 (see also mobile interaction)
cognitive interviewing, 32
communication environment, features of (see affordances)
communication mode (see mode of communication)
communication technology
 cell phone (see mobile interaction, cell phone)
 changes in use of, 3
 considerations for adopting for interviews, 23–34
 conversational agent (see embodied conversational agent), internet (see web)

obstacles to adopting for interviews, 16
speech, 119 (see also speech recognition, spoken dialogue systems)
video (see video conferencing, video telephony)
communication
 face-to-face (FTF), 7, 8, 10, 13, 23–26, 26, 198–202, 268
 non-verbal interaction, 8, 95–96, 110–111, 172, 174, 233, 236
 relational (see relational communication)
 taxonomy of situations, 6–7
 video mediated (see video conferencing)
comparison of survey technologies
completion rate (see also incentives to participate)
 break-offs, 13
 relationship to payment type, 245
composite multimodality, 144
computer assisted interviewing (CAI), 58, 61, 141
 audio-CASI, 60, 61, 63, 222, 227
 CAPI, 60, 61, 92, 269
 CASI, 5, 10, 23, 50, 55–56, 60, 61, 63, 100, 173–174, 178, 192, 194, 227–228, 238–239
 CATI, 4–5, 60, 61, 93, 126–127, 129–130, 132–133
 video-CASI, 142
conceptual misalignment, 123–124, 141, 142
confidentiality, 180–182, 240–253, 257–258
consent (see informed consent)
consumer price index, 140
control, 68–69
conversation analysis, 38, 50
conversational agents (see embodied conversational agents)

- conversational grounding, 8, 99–101, 139, 222–225, 270–271, 276–278
 - effects of culture and medium on, 225
- conversational practices, 40
- coverage error, 20, 80, 86, 179–180, 269, 271
- culture, 220, 221, 279–280
 - high versus low context, 221
- customization, 65–66 (see also user modeling)

- data integrity, 240–253
- data quality, 13, 54, 62–65, 78, 89–91, 108, 110, 114–115, 180, 182, 231–232
- data security, 240
 - anonymized data, 249–250
 - identified data, 248–249
 - planning protocols, 242–251
- deception, 10, 181–182
 - and survey response, 182–183, 188–190
 - detection of, 190–191
 - in digital media, 183–188
 - individual differences in likelihood, 186–187
 - and mode effects, 182–183
- dialogue systems, 195, 197 (see also automated systems, spoken dialogue systems)
 - design, 128, 133
- disclosure, 188–190

- ECA (see embodied conversational agent)
- embodied conversational agent, 169–171, 173–174, 197–199, 201, 202, 278
- ethics, 23–24
 - new challenges for survey interviewing, 254–266
 - respondent privacy and anonymity, 240–253

- face-threatening acts, 198, 199, 207
- face-to-face survey, 8, 26, 59
- facial expression, 6, 8–9, 101–102, 169, 171, 200–203, 206–207, 220–221, 225–226, 277–278
- formatted answer, 32, 44

- gaze, 8–9, 100–101, 103–104, 144–145, 167–171, 206, 226, 276–277
- gesture, 8, 101, 168, 170, 200–202, 224, 277
- gesture input, 144
- gesture recognition, 151
- Global Positioning System (GPS), 155
- GOMS model, 274–275
- graphical user interface, 140
- group decision support systems, 229

- HIV risk assessment, 240–253

- identified information, protecting, 248
- incentives to participate, 241, 244–245, 252
 - payment type and relationship to completion rate, 245
- informed consent, 24, 241–253, 262, 269
- interaction, respondent-interviewer (see interviewer-respondent interaction)
- interactive voice recognition and survey interviews, 119, 121, 122, 124–127, 132, 133
- interactive voice response (IVR), 60, 119–133 (see also spoken dialogue systems)
 - systems, 142
- intercept surveys, 155
- interviewer effects, 35–36, 50, 64–65, 70–71, 162–165, 167
- interviewer variance, 35, 36, 50
- interviewer characteristics
 - and media, 216
 - gender, 163
 - age, 163
 - physical characteristics, 162–164
 - race, 163
 - social class, 163
- interviewer-respondent interaction, 32, 37
 - state-transition network, 273
- interviewing agents: anthropomorphism, 24–25
- IP address matching, 252
- IVR (see interactive voice response)

- lies (see deception)

- machine learning algorithms, 143
- MATCH system, 146–151
- measurement error, 45–45, 49, 58, 64, 72, 77–79, 88–90, 217
 - in mobile web surveys, 89–90
 - interviewer related, 21
 - mode, 21
 - respondent related, 22
- media affordances (see affordances)
- misalignment cues, 141, 143, 153
- mixed initiative dialogue, 142
- mobile interaction, 84–86, 89–90, 146, 155
- mobile internet, 83
- mobile-only population, 80
- mode effects, 153
 - and deception, 182–183
- mode of communication, 8, 12
 - comparability, 18

SUBJECT INDEX

- multimedia survey introductions, 84
- multimodal dialogue manager, 151
- multimodal integration, 144
- multimodal interface assistants for the survey
 - interviewer, 154
- multimodal output generation, 145
- multimodal surveys
 - computer-assisted interviews, 151
- multimodal user interfaces for surveys, 151

- natural language understanding, 150
- nonresponse error, 13, 20–21, 78, 88
 - and response rates, 241
- nonverbal interaction (see communication, nonverbal)

- online survey security, recommendations, 251

- paradata, 6, 24–25, 91, 141, 191, 196, 200, 258, 271, 276–278
- paradigmatic question-answer sequence, 38–40, 43, 49
- pen input, 144
- personality perception and media, 228
- persuasion and media, 229
- posture, 168–169, 175, 200, 204–206, 226, 268
- privacy, 23–24, 72, 100, 102–103, 105, 115, 141, 146, 155, 216, 228, 240–253, 257
 - policies, 240–253
 - relation to deception and disclosure, 187–188, 190
 - and protection against external monitoring, 244
- probing by interviewer, 43–46
- problematic dialog detection, 143
- prosody, 140, 275–276

- questions
 - content, 19
 - format, 19
 - sensitive, 10, 46, 58–59, 63, 104–105, 180–182, 240, 268
 - types, 89

- rapport
 - between respondents and interviewers, 23, 99, 106–108, 165–166, 168, 170, 219, 226, 278
 - between respondents and ECAs, 172–173
 - and video conferencing, 106
 - and usability, 23
 - vs. social desirability, 162, 174 (see also small talk)
- recordability (see affordances)

- relational communication, 226
 - through media, 227
- reliability, 33, 36, 39
- reports by respondents, 32, 43–49, 51
- respondent burden
- response accuracy, 13, 37
- response effects, 21–22
- response rates (see non-response error)
- response times (see paradata)
 - Goldilocks range, 141, 153

- sampling error, 13, 20, 87, 269
- satisficing, 9–10, 98, 129, 174, 184
- scientific colonialism, 254
- security protocol, 242
- self-administered questionnaires (SAQ),
 - 58, 59, 63–64, 216, 219, 225, 231, 232, 269
 - vs. interviewer administration, 3–6, 17–18
- semiotics, 280
- sensitive questions (see questions, sensitive)
- sensitive topics (see questions, sensitive)
- server protection, 245
- simultaneous multimodality, 144
- small talk
 - with ECAs, 171–172
 - role in establishing trust and rapport, 170
- smart phone, 82
- social agency, 196–199
- social control, 254
- social desirability, 72, 168–169, 173–174, 182
 - and video conferencing, 105–106
 - vs. rapport, 162, 174
- social intelligence, 196–197, 207–209
- social presence, 10–11, 69–71, 88, 101–102, 127–129, 132, 232, 270
- socially-desirable responding (see social desirability)
- speech input, 144
- speech recognition, 119–121, 127–129, 131
 - data-driven understanding techniques, 143
- spoken dialog systems, 143
- standardized interviewing, 4, 25–26, 33–37, 91, 109, 139, 218, 273
- support vector machines , 143
- surveillance
 - agent, 256
 - nonreciprocal flow of information, 256
 - role relationship, 256
- survey costs
 - subject validation, 13, 15, 252

- survey enterprise, critiques of, 255
- survey interviews: phases, 16
- survey technologies (see communication technology, computer assisted interviewing)
 - comparison of, 156
- system initiative dialogue, 142

- tablet computing, 146
- tablet device, 146
- task performance: 230
- technology, 58–59, 61–63, 71–72
 - effect on survey response, 241
 - (see also communication technology)
- telephone survey, 60, 81
- threatening questions (see questions, sensitive)
- trust and media, 230
- types of questions (see questions, types)
- types of surveys
 - cross sectional vs. longitudinal, 14–15
 - government versus commercial, 14
 - household versus establishment, 13–14

- uncanny valley, 279
- user modeling, 11–12

- validity, 33, 37, 39, 50
- video conferencing
 - affordances, 8, 18, 21, 222–223, 269
 - and survey interviewing, 223
 - co-presence, 185
 - recordability, 185, 189
 - impacts of technological features, 110–114
 - systems, 96–98
 - vs. face-to-face interactions, 103–105
 - vs. telephone interactions, 101–102
- video telephony, 88
- virtual agents, 119
- virtual human (see embodied conversational agent)
- visual cues in interactions, 98–99
- voice over IP (VOIP), 137,151

- web surveys, 61, 62, 64, 140
 - ethical issues in, 240–253
 - privacy, 240–253
