Part I: Robotics Developer Studio Fundamentals **1**

Chapter 1: Exploring Microsoft Robotics Developer Studio **3**

Microsoft Does Robots?	4
Microsoft Robotics Developer Studio Components	5
Concurrency and Coordination Runtime (CCR)	5
Decentralized Software Services (DSS)	6
Visual Simulation Environment	6
Visual Programming Language (VPL)	7
Robotics Samples	8
Packages	9
Support for MRDS	12
The SubjuGator	12
Prospect 12	13
The uBot-5	13
KUKA Educational Framework	14
Setting Up Your System	15
System Requirements	15
Prerequisites	16
Installing MRDS 1.5	16
Robotics Studio 1.5 Directory Structure	19
Installing the Packages	20
Installing the Sample Code for This Book	21
Verifying the Installation	21
Additional Resources and Support	27
www.Microsoft.Com/Robotics	27
Tutorials and User Guides	27
Online Forums	27
Channel 9	28
Summary	28

Contents

Chapter 2: Concurrency and Coordination Runtime (CCR)	29
Overview of the MRDS Framework	30
The Need for Concurrency	30
Services — The Basic Building Blocks	31
Orchestration — Putting Services Together	31
Setting Up for This Chapter	32
Using the CCRExamples Project	33
Entering the Code Manually	34
Tips for Coding with MRDS	37
Coordination and Concurrency Runtime	38
Concurrent Execution	39
Ports and Messages	50
Receivers and Arbiters	55
Dispatchers and Dispatcher Queues	65
Implementing Common Control Structures	68
Sequential Processing	68
Scatter/Gather	69
State Machines	70
Last Message	70
Time Delays	71
Periodic Events	73
Setting Limits with Timeouts	75
Asynchronous I/O	75
Blocking I/O	76
Throttling	76
Error Handling	77
Causalities	77
Success/Failure Ports	79
Interoperation with Legacy Code	81
Traps for New Players	81
Summary	82
Chapter 3: Decentralized Software Services (DSS)	83
Overview of DSS	84
Contracts	86
State	87
Behavior	91
Execution Context	93
DSSP Service Operations	94
Generic Contracts	98

Running a DSS Node	98
Directory Structure of a DSS Node	99
Starting DssHost	100
Exploring the DSS Web Pages	101
Running a Robot Service	109
Creating a New Service	112
Building a Service from Scratch	112
Examining the Service Source Files	116
Compiling and Running Services	121
Compiling a Service	121
Setting Up References	122
Proxy Assemblies	123
Running Services	123
Using the Debugger	125
Defining Service State	127
Persisting Service State	129
Loading State from a Configuration File	129
Saving the State to a Config File	131
Modifying Service State	132
Replace	132
Update	133
Service Initialization	136
Composing and Coordinating Services	137
Starting and Stopping Services Programmatically	137
Using the Partner Attribute to Start Services	144
Modifying Manifests Manually	146
DSS Tools	149
Modifying Manifests Using the DSS Manifest Editor	149
DssInfo: Examining Contract Information	150
DssProjectMigration: Migrating Services	151
Deploying Services	151
Sharing Source Code	152
Distributing Executables	154
Viewing the Contents of a Package	155
Summary	155
Chapter 4: Advanced Service Concepts	157
Setting Up for This Chapter	157
Hardware Setup	159
Creating the Service	160

Contents

Subscribing and Notifying	163
Subscribing to State Changes	164
Unsubscribing from State Change Notifications	167
Building in Support for Subscriptions and Notifications	167
User Interfaces	170
Using Windows Forms	171
Using Web Forms	185
Using a Camera	205
Adding a Camera to a Service	206
Setting Up a WinForm for the Video Feed	207
Processing Video Frames	212
Inheriting from Abstract Services	215
Implementing a Generic Service	215
Building Virtual Services	217
More on Debugging	219
Read the Documentation First	219
Use the Visual Studio Debugger	219
Examine the State of a Node and Services	220
Traditional Debugging Techniques	220
Using Trace Level and Logging	220
Where to Go from Here	221
Summary	222
Part II: Simulations	223
Chapter 5: The MRDS Visual Simulation Environment	225
The Advantages of Simulation	226
The Difficulties with Simulation	226
Prerequisites	227
Hardware Requirements	227
Software Requirements	228
Starting the Simulator	230
Using the Simulator	231
Navigating the Simulation Environment	232
The Status Bar	234
The Help Menu	235
The Camera Menu	235
The Rendering Menu	236
Graphics Settings	240
The Physics Menu	241
Saving and Loading Scenes	243

Saving and Loading Manifests	243
Other File Menu Items	243
The Simulation Editor	244
Selecting Entities	245
Manipulating Selected Entities	246
The Entities Menu	247
Modifying Entity State	248
Other Common Entity Properties	250
Built-in Simulation Entities	252
Sky and Ground Entities	253
Lights and Shadows	257
General-Purpose Entities	259
Robot Entities	263
Summary	267
Chapter 6: Extending the MRDS Visual Simulation Environment	269
Simulation DLLs and Types	270
RoboticsCommon.DLL	270
SimulationCommon.DLL	271
SimulationEngine.DLL	272
SimulationEngine.Proxy.DLL	274
PhysicsEngine.DLL	274
Microsoft.Xna.Framework.DLL	274
Using Statements and DLL References	275
Building Your Own SRS-Robo-Magellan Simulation	276
Simulation Services	276
Creating a Simulation Service	277
Defining a Custom Robot Entity	281
The Drive Methods	293
The SimulatedQuadDifferentialDrive Service	296
Tuning the Corobot Entity	313
Adding a Camera	322
Adding Infrared Distance Sensors	323
Summary	336
Chapter 7: Using Orchestration Services to Build a Simulation Scenario	337
The Robo-Magellan Referee Service	338
Customizing the SimulationTutorial1 Service	339
Starting a Service from the Browser	339
Building the World and Adding Cameras	340
Adding a Sky, Sun, and Ground	340

Contents

Adding Barriers	341
Building a Better Traffic Cone	343
The Robo-Magellan Orchestration Service	347
Generating the SimMagellan Service	347
Creating a Manifest with the Manifest Editor	349
Adding a Windows Forms User Interface	351
Creating the Form	351
Connecting the Service to the Form	352
How to Make a Robot Behave	354
Defining Behavior States	355
Implementing the Behavior for Each State	356
Processing Camera Frames	362
The Wander Behavior	367
The Approach State	369
The Final Approach State	371
The Back Away State	372
The Finished State	373
The Avoid Collision State	373
Using the SimMagellan Service	374
Future Directions	374
Summary	375
Chapter 8: Simulating Articulated Entities	377
The Joint Class	377
The Joint Frame	378
Joint Properties	378
A Joint TestBench	382
Building a Simulated Robotic Arm	394
The Physical Model of the Arm Entity	394
Running the Arm Service	405
Moving the Arm	405
A Fly in the Ointment	407
Inverse Kinematics	410
Using the Arm User Interface	412
Summary	418
Chapter 9: Adventures in Simulation	419
Simulating a Sumo Competition	419
SimulatedSumo	420
The Simulated Sumo Referee	421
Communicating with the Sumo Referee Service	423

The Sample Sumo Behavior	425
Creating a New Sumo Player	427
Where to Go from Here	430
Building a Six-Legged Walker	430
The Hexapod Entity	431
The Hexapod Differential Drive Service	438
Where to Go from Here	443
Implementing a Soccer Strategy	444
The MRDS Simulated Soccer Environment	444
Changing the Players on the Field	446
Building a Better Soccer Player	449
Where to Go from Here	457
Exploring Virtual Worlds	457
Background	458
The Modified DifferentialDrive Service	459
The Maze Simulator	461
The ExplorerSim Application	464
Where to Go from Here	466
Summary	467

Part III: Visual Programming Language 469

Chapter 10: Microsoft Visual Programming Language Basics 471

What Is a Data Flow Language?	471
The VPL Development Environment	473
A Simple VPL Diagram	474
Creating a VPL Diagram	474
Running a VPL Diagram	475
Inputs, Outputs, and Notifications	478
Basic Activities	479
VPL Variables	480
Looping and Conditionals in VPL	482
The VPL Execution Model	484
Debugging a VPL Diagram	485
Creating Custom Activities	487
Defining a ForLoop Custom Activity	488
Improving the ForLoop Custom Activity	491
Using Lists and Switch Activities	493
An Example Using List Activities	495
The PluralNouns Activity	496
The Phrases Activity	497
The GetRandom Action	498

Contents

A Final ForLoop Improvement	499
Summary	500
Chapter 11: Visually Programming Robots	501
VPL Activities and Services	501
Compiling Diagrams to Services	502
Service Compilation Options	502
A Service Compilation Example	503
Configuring Activities	508
Setting the Configuration for a Diagram	509
Starting the SimpleDashboard Service Upon Execution	511
Modifying the Diagram to Use a Real Robot	512
VPL in the Driver's Seat	513
Using VPL to Read Sensors	517
The Laser Range Finder	518
Controlling Multiple Robots	520
Summary	522
Chapter 12: Visual Programming Examples	523
VPL Explorer	523
Interfacing with the Xbox Controller	524
Reading the LRF Data	525
VPL Sumo	529
The VPL Sumo Main Diagram	529
The PlayerOne Start Action	530
Reading Data from the Infrared Sensors	532
Reading the Create Bumper Sensors	532
The Manouver Message	533
Arm Mover	534
The ArmMover Activity	535
The SetPollInterval Action	536
Moving the Arm	539
Line Follower	542
The LineMesh Utility	542
Building a Brightness Sensor	547
Building the Simulation Environment	549
The Line-Follower VPL Diagram	551
Ball Follower	554
Building the Simulation Environment	554
The BallFollower VPL Diagram	556
Summary	559

Part IV: Robotics Hardware	561
Chapter 13: Using MRDS with Robotics Hardware	563
Safety Considerations Before Starting	564
Types of Robots	564
Tethered Robots	565
Autonomous Robots	572
Buying Your First Robot	573
General Recommendations	574
Robots Discussed in This Book	574
Other Robots Supported under MRDS	580
Fundamental Concepts: Sensors, Actuators, and Controllers	584
Sensors	585
Contact Sensors	586
Range Sensors	586
Light Sensors	589
Video/Image Sensors	590
Other Sensors	590
Actuators	592
Motors	592
Servo Motors	592
Digital Outputs	592
Sound and Voice Synthesis	593
Controllers	593
Understanding a Closed-Loop Control System	593
Behavior-Based Control	594
Summary	597
Chapter 14: Remotely Controlling a Mobile Robot	599
Remote Control and Teleoperation	599
Setting Up Your Robot	600
Using a LEGO NXT Tribot with MRDS	601
Using a Parallax Boe-Bot with MRDS	611
Using the Dashboard	615
Creating a Manifest	616
Running the Manifest	621
Using a Joystick or Gamepad	623
Creating a Shortcut to Run Your Robot	624
Making a Robot Dance	625
Building a New Service	626
Partnering with a Robot Using a Manifest	630

Contents

Reviewing the Results	635
Improving the Behavior	636
Flashing and Beeping	640
Exploring Using Sensors	643
Reading from the Sensors	643
Making a LEGO NXT Wander Around	644
Making a Boe-Bot Wander Around	647
Summary	653
Chapter 15: Using a Robotic Arm	655
Introduction to Articulated Arms	656
Servo Basics	657
Controlling Joints: Speed and Travel Constraints	658
Forward Kinematics	661
Inverse Kinematics	664
Setting Up a Lynxmotion L6 Arm	665
Building the Lynxmotion L6 Arm	666
Starting the Lynxmotion L6 Arm	666
Controlling the L6 Arm	667
Using the Generic Arm Contract	668
Recording Motions	671
Pick and Place	677
Logjam	679
Using an Overhead Camera	679
Summary	680
Chapter 16: Autonomous Robots	681
PC-Based Robots	681
Windows XP-Based PCs	682
Onboard Laptops	682
PDAs	682
Embedded PCs	683
The Development Environment	684
Setting Up a Stinger Robot	685
Setting Up Your PDA	686
Driving a Stinger Remotely	690
Code Overview	691
Wandering Using Sensors	703
Handling the IR Sensors	703
Defining Wander Modes	704
Running the Wander Code	707

Creating a CF Version of the Service	708
Deploying a Service to a PDA	709
Debugging a Service on a PDA	711
Setting Up the eBox	713
Booting the eBox for the First Time	714
Setting Up the Serial Port	719
Setting Up Visual Studio	720
Transferring Files to the eBox	723
Building a Windows CE System Image	724
Running a Service on WinCE	725
Setting Up the Service	726
Testing Operation of the Service	727
Autonomous Operation	728
Where to Go from Here	729
Summary	730
Chapter 17: Writing New Hardware Services	731
<hr/>	
Integrating New Hardware	731
Microcontrollers	732
Chips with Built-in BASIC Interpreters	733
MRDS Support from Other Vendors	734
Creating a Generic Brick Service	734
Terminology	735
Design	736
Brick State	740
Brick Operations	748
Additional Components	750
The Integrator Robot	754
Integrator Robot Monitor Program	756
Creating the Integrator Robot Services	763
Creating a New Drive Service	775
Testing a Generic Brick Robot	785
The Hemisson Robot	786
Hemisson Brick Service	787
Hemisson Drive Service	791
Where to Go from Here	797
Summary	798
Index	799
