Editors' Notes 1

Ron Fairchild, Gil G. Noam

Executive Summary 5

1. Summer learning and its implications: Insights from the Beginning School Study 11
Karl L. Alexander, Doris R. Entwisle, Linda Steffel Olson
The Beginning School Study, which allows for comparison of achievement gains between the school year and the summer months, revealed a gap in growth in achievement when school is not in session.
2. Childhood body mass index gain during the summer versus during the school year 33
Douglas B. Downey, Heather R. Boughton
During summer vacation, children's body mass index, a measure of health, increases approximately twice as quickly as during the school year.
3. Characteristics of effective summer learning programs in practice 45
Susanne R. Bell, Natalie Carrillo
Effective summer programs successfully accelerate participants' academic performance and support positive youth development.
4. Summer programming in rural communities: Unique challenges 65
Ruthellen Phillips, Stacey Harper, Susan Gamble
Drawing on the success of Energy Express, a rural summer reading and nutrition program, the authors share how other rural communities can overcome major challenges to provide high-quality summer programming.
5. Collaboration: Leveraging resources and expertise 75
Anne Byrne, Jane Hansberry
Components of successful collaborations include shared organizational priorities, combined resources, mutual institutional support and political will, and shared clarity of expectations.

6. Summer library reading programs 85

Carole D. Fiore

For over a century, libraries have offered summer reading programs, which help students practice skills learned during the school year, promote intrinsic enjoyment of reading, and aid in cultural literacy acquirement.

7. Using evaluation to improve program quality based on the BELL model 99

Earl Martin Phalen, Tiffany M. Cooper

Effective evaluation practices drive continuous program improvement and result in satisfied stakeholders and strong outcomes for the students served.

8. Finding the resources for summer learning programs 109

M. Jane Sundius

Two strategies are needed for all young people to have access to high-quality summer learning opportunities: a national public advocacy campaign and extensive local public-private planning.
