

Index

Note to the Reader: Throughout this index **boldfaced** page numbers indicate primary discussions of a topic. *Italicized* page numbers indicate illustrations. Page numbers prefixed with *chF* refer to the Bonus Reference VB.NET Functions, and page numbers prefixed with *chT* refer to the Bonus Reference Transact SQL. Both Bonus References are found on the accompanying CD-ROM.

A

- <A> tag, 1001, 1006
- Abort value, 213
- Abs function, 155–156, **chF29**
- abstract base classes, 382
- abstraction, **367–368**
- accent-sensitivity, 883
- Accept buttons, 187
- Accept or Reject Changes dialog box, 211
- AcceptButton property, **187**
- AcceptChanges method, 987, 990, 992
- AcceptsReturn property, **244**
- AcceptsTab property, **244–245**
- Access 2000, 870
- access keys, **225**
- access modes, 583
- access modifiers, 84
- access time of files, 581, 586
- accessing
 - files, **578–587, 594–610, 608**
 - folders, **570–578, 584–587**
- ACTION attribute, 1014
- Action property, 760
- action queries, **904–906**
- Activate events, **203**
- Activate method, 65, 437
- Activation property, **769–770**
- active child forms, **849, 854–855**
- active documents, 437–438
- active forms, 65
- Active Server Pages (ASP), 1002–1003
- Active state for controls, 423
- ActiveDocument objects, 437–438, 440
- ActiveDocument property, 435
- ActiveMdiChild property, 848
- ActiveX controls, **429–431, 430–431**
- Add Child button, 749
- Add command, 73
- Add Connection command, 878
- Add Dataset dialog box, 993, 993
- Add Existing Project dialog box, 67
- Add File Type command, 74
- Add Folder command, 73
- Add function, 163
- Add Item command, 24
- Add menu
 - Add Class command, 331
 - Add Existing Item command, 346
 - Add Item command, 840
 - File command, 73
- Add method
 - ArrayList collection, 490
 - Columns collection, **770–771**
 - Controls collection, 232
 - DateTime class, 555
 - Documents collection, 435, 437, 439
 - HashTable collection, 498
 - Images collection, 747
 - Items collection, 169, 773
 - ListBox controls, 264, **267–268**
 - Matrix class, 388–389
 - MenuItems, 228
 - Nodes collection, **751–752**
 - SortedList collection, 504
 - TimeSpan class, **566**
 - Web services, 1086–1088
 - Worksheets collection, 454
- Add New Project dialog box, 395
- Add Reference dialog box, 346, 395, 396, 434
- Add/Remove Programs utility, 77–78, 78
- Add Root button, 749
- Add Table dialog box, 908–909, 921
- Add value, 845
- Add Watch command, 805
- Add Web Reference dialog box, 21, *1088*
- AddACustomer stored procedure, **chT37**
- AddCategories_Click subroutine, 755
- AddColors_Click subroutine, 755
- AddCookie1_Click subroutine, 1042
- AddCustomer.SQL stored procedure, **chT36**
- AddDays method, 381, 556
- Added state, 986
- AddElement subroutine, 278
- AddExtension property, 298

- AddHandler statement, 239
- AddHours method, 556
- adding
 - ArrayList items, 490–491
 - classes, 331, 332
 - color values to collections, 524
 - contacts, 366
 - controls, 232, 235–238, 235
 - DataSets, 993
 - Items items, 773
 - ListBox items, 169, 267–268
 - ListView items, 772
 - menu commands, 73, 77, 227–228
 - project items, 346
 - SortedList items, 504
 - time spans, 566
 - TreeView items, 749–754, 749, 763–765
- addition
 - of dates, 555–556, **chF34–chF35**
 - shorthand notation for, 85
- AddMilliseconds method, 556
- AddMinutes method, 556
- AddMonths method, 556
- AddNamedColors subroutine, 402
- AddNamesToList subroutine, 169
- AddOrder stored procedure, **chT37–chT40**
- AddProductsRow method, 991
- AddRange method, 491
- AddRemoveProgramsIcon property, 72
- AddressOf operator, 228
- AddSeconds method, 556
- AddShapes_Click subroutine, 755–756
- AddTicks method, 556
- AddYears method, 556
- ADO, 926–927
- ADO.NET, 869, 925–926, 963
 - architecture of, 926–928
 - Command objects in, 956–957
 - DataAdapter objects in, 951–956, 952, 954
 - DataForm Wizard in, 970–978, 970–973
 - DataGrid controls in, 931–941, 932, 934–941
 - DataReader object in, 956–958
 - DataSets in. *See* DataSet objects
 - LookupCustomers project in, 946–948, 947
 - StoredProcedure project in, 958–961, 959
 - transactions in, 978–982
 - update operations in, 983–992
 - and XML, 928
- Advanced Options dialog box, 937
- AfterCollapse events, 760
- AfterExpand events, 760
- AfterSelect events, 475, 760
- aggregate functions, 897–899
- Alarm controls, 416, 416
 - interface for, 416–418, 418
 - member implementation in, 418–421
 - testing, 416–417
- AlarmTime property, 416, 419
- ALIGN attribute
 - for tag, 1010
 - for <TABLE> tag, 1011–1012
- Align enumeration, 408
- Align menu, 323
- alignment and Alignment property
 - controls, 38, 46–47, 61
 - Excel cells, 456
 - HTML tables, 1011–1012
 - images, 1010
 - Label3D controls, 406, 408
 - RichTextBox controls, 311
 - StringFormat type, 658
 - strings, 543–544, **chF28–chF29**
 - TextBox controls, 242–243
- AlignmentBox_SelectedIndexChanged subroutine, 411
- AlignmentChanged events, 413
- All method, 233
- AllContacts project, 473–476, 473
- AllInvoices stored procedure, **chT7–chT9**
- Allow Nulls field and property 882–883
- Allow Selection property, 304
- AllowColumnReorder property
 - ListView controls, 769
 - SubItems collection, 775
- AllowCustomPaging property, 1075
- AllowFullOpen property, 293
- AllowPaging property, 1075
- AllowPrintToFile property, 304
- AllowScriptChange property, 295
- AllowSimulations property, 295
- AllowSomePages property, 304
- AllowVectorFonts property, 295
- AllowVerticalFonts property, 295
- alpha blending, 684–686, 685–686
- ALT attribute, 1010
- Alt key, 225, 262
- Alt property, 168, 263
- AltDirectorySeparatorChar property, 587
- ALTER PROCEDURE statement, **chT8**
- alternate spellings, 449
- alternate text for images, 1010
- AlternatingItemTemplate objects, 1062
- AM/PM designator, 559
- ampersands (&)
 - for access keys, 225
 - for concatenation, 106

- as data type identifier, 102
 - in HTML, 1020
 - for shortcut keys, 195
 - in URLs, 1044
- Anchor property, 198–200
- anchor tags, 1006
- anchoring forms, 198–202, 199–203
- AND operator, 96, 892
- angle brackets (<>)
 - for attributes, 399
 - in HTML, 1004
- annuities, interest payments for, **chF36–chF37**
- anti-aliased text, 635, 636, 738
- AntiAlias value, 634–635, 635–636
- antilogarithms, **chF30**
- AnyColor property, 293
- AOL property, 1039
- AppActivate function, **chF54**
- Append method, 545, 550
- Append value
 - FileMode enumeration, 582
 - OpenMode enumeration, **chF41–chF42**
- AppendFormat method, **546**
- appending
 - characters to strings, **545–546**
 - to files, 578
 - strings to TextBox controls, 247
- AppendText method
 - File class, 578
 - TextBox controls, 242, 247
- Application objects, 434, 453
- ApplicationPath property, 1039
- applications
 - collaboration functions for, **chF53–chF54**
 - Console, **11, 30–32, 30**
 - distributing, 69–70
 - Solution Explorer buttons for, 73–75, 73–74
 - Windows installers for, 70–76, 71–72, 75–76
 - MDI. *See* MDI (Multiple Document Interface) applications
- Apply button
 - for FontDialog controls, 296–297
 - in RTFPad project, 323
- AppointmentItem objects, 464
- approximate data types, **chT13**
- AppWinStyle enumeration, **chF53**
- Archive attribute, 580
- arctangent of angles, **chF29**
- Area function, 374–375
- Area method, 373
 - Circle class, 376
 - Shape class, 374, 377
 - Square class, 375
 - Triangle class, 376
- ArgumentException exceptions, 579
- ArgumentNullException exceptions, 579
- ArgumentOutOfRangeException exceptions, 797–798
- arguments, 35, 154–155, 159–161
 - for constants, 121
 - for event-handlers, 165–168
 - for multiple results, 164–165
 - named, 170–171
 - objects as, 165
 - passing
 - with events, 349–350
 - by reference, 163–164
 - unknown number of, 168–170
 - by value, 161–163
 - stacks for, 830–831
 - for stored procedures, **chT30–chT31**
 - in Transact-SQL, **chT30–chT31**
- Arrange property, 769
- ArrangeIcons value, 843
- ArrayList collection, 429, 489
 - adding items to, 490–491
 - copying items in, 492–494
 - creating, 489–490
 - extending, 369–372
 - iterating, 497, 510
 - removing items from, 491–492
 - searching in, 496
 - for serialization, 367
 - sorting, 371, 494–495
 - for TreeView controls, 783–789, 784
- arrays and Array class, 122, 330, 382, 479–480
 - as arguments, 165
 - of arrays, 129–130
 - copying, 488
 - declaring, 122–124
 - dynamic, 128–129
 - filters for, **chF21**
 - initializing, 124
 - for joining strings, **chF22**
 - limits of, 124–125, 488–489
 - multidimensional, 125–128, 126–127
 - of records, 111
 - as return values, 175–177, 176
 - reversing, 487–488
 - searching, 484–487, 485
 - sorting, 480–484, 482
 - for splitting strings, **chF22**
 - testing for, 115, **chF12**
- ArraySearch project, 485–487, 485
- ArrayStats function, 175–177
- arrow keys, 314
- AS keyword
 - in Dim statement, 83

- in SELECT statement, 894
 - in T-SQL, 919–921
 - Asc function, **chF16**
 - ASCII function, **chT22**
 - AscW function, **chF16**
 - ASP (Active Server Pages), 1002–1003
 - ASP.NET, 5
 - objects
 - Page, 1037
 - Request, 1039–1040
 - Response, 1038–1039
 - Server, 1040–1041
 - Web applications and services, 11–12, 1089
 - assigning variables, 83, 111
 - associating file types, 74
 - asterisks (*)
 - in SQL, 892
 - in T-SQL, 920
 - asynchronous operations, 354
 - at symbols (@)
 - as data type identifier, 102
 - for SqlDataAdapter, 930
 - in T-SQL, 919, **chT14**
 - Atan method, **chF29**
 - attributes
 - for files, 580–581, **chF6–chF7**
 - for FocusedTextBox controls, 400
 - in HTML, 1001, 1005
 - for properties, 399–400
 - Attributes property, 585, 593
 - Attributes value, 611
 - Author property, 73
 - Authors table, 875
 - Auto command, 735
 - Auto option, 863–864
 - Auto value, 191
 - AutoFlush method, 599
 - AutoFormat command, 933
 - AutoGenerateColumns property, 1068
 - automation, 433–434
 - Excel. *See* Excel application
 - Outlook. *See* Outlook application
 - Word. *See* Word application
 - AutoPostBack property
 - DropDownList controls, 1051
 - ListBox controls, 1055
 - TreeView controls, 1033
 - AutoScale property, 188
 - AutoScroll property, 186, 188
 - AutoScrollMargin property, 188
 - AutoScrollMinimize property, 189
 - AutoScrollPosition property, 189
 - AutoSelectWord property, 314
 - AutoSize value, 620, 629
 - auxiliary forms, 392
 - AVG function, 898
- ## B
- tag, 1004, 1008
 - BackColor property
 - Color objects, 638
 - ListViewItem objects, 772
 - TextBox controls, 9, 243
 - BackColorChanged events, 28
 - background
 - in HTML, 1005
 - Label3D controls, 412
 - Listview controls, 772–773
 - in printing, 438
 - TextBox controls, 9, 243
 - TreeNode objects, 751
 - BACKGROUND attribute, 1005
 - BackgroundColor property, 412
 - BackgroundImage property, 412
 - BackgroundSounds property, 1039
 - BackImage property, 243
 - backslashes (\)
 - for nodes, 760
 - for path separators, 761
 - in RTF, 307
 - BackwardDiagonal value, 642, 661
 - bas relief, 694
 - base classes, 369
 - base of natural logarithm, **chF30**
 - basic colors, 682
 - BasketForm form, 1072–1074
 - baskets, shopping. *See* shopping, Web
 - BDate property, 338
 - Beep statement, **chF56**
 - BeforeCollapse events, 760
 - BeforeExpand events, 760
 - BeforeSelect events, 760
 - BEGIN keyword, 919, **chT17–chT18**
 - BEGIN TRANSACTION statement, **chT33**
 - Begin value, 597
 - BeginPrint events, 710
 - BeginTransaction method, 980
 - BeginUpdate method, 264, 268
 - BegOfPeriod constant, 34–35
 - belongs to relations, 743
 - benchmarking, 568
 - Beta property, 1039
 - BETWEEN keyword, 903
 - Bezier curves, 421, 653–655, 654
 - BGCOLOR attribute, 1005

- bigint variables, **chT11**
- Bin folder, 69
- binary files, 68, **594–595**, **chF40**
- binary numbering system, 90
- binary search algorithm, **487**
- Binary value
 - CompareMethod enumeration, **chF17**
 - OpenMode enumeration, **chF41**
- binary variables, **chT14**
- BinaryFormatter class, 522–523
- BinaryReader class, 595, **605–607**
- BinarySearch method
 - for array searches, 480, 484–487
 - for ArrayList searches, 495–496
 - for custom comparers, 521
- BinaryWriter class, **604–605**
- binding, 104–105
 - to ComboBox controls, **946–951**, *947–948*
 - to DataSets, **942–946**, *942*, **1053**
 - in updating, 991
 - to Web controls. *See* data-bound Web controls
- BindingContext objects, **944–946**
- bit variables, **chT11**
- bitmap images, 595, 619–620, **681–682**
 - alpha blending for, **684–686**, *685–686*
 - color for, **682–686**, *683*, *685–686*
 - diffusing, **695–697**, *696*
 - embossing, **694–695**, *694*
 - in ImageList controls, **746–747**, *746*
 - printing, **733–735**, *734–735*
 - processing, **686–689**, *688*
 - sharpening, **692–693**, *692*
 - smoothing, **689–691**, *689*
- bitwise operators, 96
- block-level scope, 117
- blurring bitmaps, 690
- Bmp value, 627
- BODY section in HTML, 1004
- Bold property, 639
- bold text
 - in HTML, 1004, 1008
 - in RTF, 308–309
- BookSearch procedure, **chT31–chT33**
- Boolean variables, 48, **96–97**
- BORDER attribute, 1010
- borders
 - DataGrid controls, 1070
 - forms, **189–190**
 - images, 1010
- Borders tab, 1070
- BorderStyle property, 121, **189–190**, 212
- Bottom property, 709, 711
- BOTTOM value, 1011
- Bounds property, 707
- BoxedText subroutine, 658
- braces ({})
 - for array elements, 124
 - in RTF, 307–308
- brackets ([]) in SQL, 893, 895
- BREAK keyword, **chT19**
- breakpoints, 25, 52, **803–805**, *804*
- Browser objects, 1039
- Browser property, 1039
- brushes and Brush objects, 206, 632, **641–642**
 - methods for, 647
 - vs. Pen objects, 639
- bttnAdd_Click subroutine, 366
- bttnAdd1_Click subroutine, 271
- bttnAddNode_Click subroutine, 763–764
- bttnBasket_Click subroutine, 1071
- bttnBold_Click subroutine, 309
- bttnBoxedText_Click subroutine, 667
- bttnClear_Click subroutine, 49, 631
- bttnClippedImage_Click subroutine, 667–668
- bttnCopy_Click subroutine, 631
- bttnDelete_Click subroutine, 365–366
- bttnDrawCube_Click subroutine, 673–674
- bttnEnumerate_Click subroutine, 777
- bttnEquals_Click subroutine, 51, 58
- bttnFile_Click subroutine, 304
- bttnFind_Click subroutine, 258, 274, 325, 856–857
- bttnFindNext_Click subroutine, 325, 857
- bttnGame_Click subroutine, 65
- bttnGradientText_Click subroutine, 663
- bttnInverse_Click subroutine, 55
- bttnItalic_Click subroutine, 309
- bttnIterate_Click subroutine, 780
- bttnListContinents_Click subroutine, 765
- bttnListCountries_Click subroutine, 765
- bttnLoad_Click subroutine, 631
- bttnLog_Click subroutine, 56
- bttnMapFolder_Click subroutine, 827
- bttnMath_Click subroutine, 64–65
- bttnMoveDest_Click subroutine, 272
- bttnNegate_Click subroutine, 54–55
- bttnOK_Click subroutine, 219
- bttnPaste_Click subroutine, 631
- bttnPathGradient subroutine, 665
- bttnPeriod_Click subroutine, 49
- bttnPlus_Click subroutine, 51
- bttnPrevious_Click subroutine, 944–945
- bttnProcessSelected_Click subroutine, 762–763
- bttnReadShared_Click subroutine, 216–217
- bttnRemoveOption_Click subroutine, 228
- bttnRemoveSelDest_Click subroutine, 272
- bttnRemoveSelSrc_Click subroutine, 272

btnReplace_Click subroutine, 259, 858
 btnReplaceAll_Click subroutine, 259
 btnRotate_Click subroutine, 671
 btnSave_Click subroutine, 298
 btnScanTree_Click subroutine, 767
 btnSearch_Click subroutine, 486
 btnSend_Click subroutine, 476
 btnSetShared_Click subroutine, 217
 btnShowPayment_Click subroutine, 39–40, 40, 42–43
 btnTranslate_Click subroutine, 671
 btnTranslateRotate_Click subroutine, 671
 Buffer property, 1038
 buffers, 599, 605, 612
 Build menu, 22

- Build SimpleClass command, 345
- Build Solution command, 68
- Configuration Manager command, 69, 345
- Rebuild Solution command, 68

 built-in functions, 155–157
 BulletIndent property, 312
 bullets, 312
 business rules, **chT34–chT35**
 BusinessAddress property, 464
 button values, chF4–chF5
 Button1_Click subroutine, 14
 Buttons property, 166
 BuyForm form, 1074–1075
 BY keyword, chT5–chT6
 ByRef keyword, 163–164
 Byte data type, 95–96
 ByVal keyword, 162–164

C

C character for formatting, 133–134
 Calculate method, 453, 463
 CalculateCarPayment function, 812
 calculated columns, 913–914
 calculated fields, 896–899, 897
 calculated properties, 339
 CalculateHomePayment function, 812
 calculations, Excel for, 462–463
 CalculatorForm form, 64–65
 calculators. *See* Loan Calculator; Math Calculator
 Calculators project, 63–64, 64
 Calculators solution, 67–69
 CalculatorsForm class, 65
 calendar controls, 1031–1033, 1031
 Calendar folder, 463–464
 Calendar1_SelectionChanged subroutine, 1031
 Call statement, 160
 CallByName function, chF56
 calling functions, 159–160
 CallType enumeration, chF57
 Cancel argument for events, 353–354
 Cancel buttons, 187, 212
 Cancel value, 213
 CancelButton property, 187
 CancelCurrentEdit method, 945
 CanDuplex property, 707
 CanPaste property, 315
 CanRead property, 596
 CanRedo property, 314
 CanSeek property, 596
 CanUndo property, 251, 314
 CanWrite property, 596
 capacity and Capacity property

- ArrayList collection, 489–490
- SortedList collection, 504
- StringBuilder class, 544–545
- TextBox controls, 245

 Caption property, 409
 CaptionChanged events, 413
 capturing keystrokes, 260–263
 cardinal splines, 652
 carets (^) in SELECT statement, 895
 carved text, 406–407
 Carved value, 407
 CarvedHeavy value, 407
 Cascade delete related records option, 885–886
 Cascade update related fields option, 885
 Cascade value, 843
 Case Else statement, 139–140
 case-sensitivity

- of HashTable keys, 500
- in searches
 - arrays, 485
 - ListBox controls, 273
 - RichTextBox controls, 316, 324
 - Server Explorer, 883
 - for substrings, 540
 - TextBox controls, 246, 257–258
- in sorts, 266
- in SQL, 889
- of variable names, 84

 Case statement, 139–140, **chT17–chT18**
 Cast Exception message, 42, 42

 - as separators, 534
- Exclude From Project command, 24, 345, 361
- .exe extension, 69
- executable files, 68–69

Execute command, 891

Execute method

- Response objects, 1044–1045
- Server objects, 1040
- in Word, 447–448

EXECUTE statement, chT9

ExecuteNonQuery method, 957, 980

ExecuteReader method, 957–958

ExecuteScalar method, 957, 977

ExecuteXMLReader method, 957

executing command strings, chT9

exhaustive tests, 808

Exif value, 627

existence

- files, 298, 580, chF10
- folders, 572

Exists method

- Directory class, 572
- File class, 580

Exit command, 841, 844–845

Exit statements, 146, 148

Exit Do statement, 148

Exit For statement, 148

Exit Function statement, 148

Exit Sub statement, 148, 153

Exit While statement, 148

Exp method, chF30

Expand method, 755

ExpandAll method, 761

Expires property, 1038

ExpiresAbsolute property, 1038

Explicit option, 102–105, 103

Explorer project, 780–783, 781

exponent notation, 134

expressions

- in Excel, 453, 462–463
- functions in, 160

extending classes, 330, 368–372

Extensible HTML (XHTML1), 1001

Extension property

- FileInfo class, 586
- FileSystemInfo class, 585

extensions

- default, 299
- for files, 585–586, 588–589
- for folders, 585
- in Open and Save dialog boxes, 298–299
- in paths, 589–590

external events, 346

ExtractFileName method, 356–357

ExtractPathName method, 356–357

F

f and F characters for formatting, 133, 135, 556

FACE attribute, 1008

Factorial function, 813–817, 814, 816

@@FETCH_STATUS variable, chT14

fields

- SQL, 892, 896–899, 897
- TimeSpan class, 563

FIFO (first in first out) structures, 508

File class, 570, 578–584

File controls, 1035

File menu

- Add Project menu
 - Existing Project command, 67
 - New Project command, 70, 395
- in MDI applications, 840–841, 844–846, 851–853
- New menu
 - Blank Solution command, 67
 - Project command, 5
- in RTFPad project, 319–321
- Save All command, 26
- in ScrollingPictureBox project, 861–862

file mode, chF48–chF49

file numbers, chF40–chF41

File Types Editor button, 74

File Types On Target Machine option, 74

FileAccess enumeration, 583

FileAttr function, chF48–chF49

FileAttribute enumeration, chF6

FileClose_Click subroutine, 853

FileClose function, chF40, chF43

FileCopy function, chF11

FileDateTime function, chF8

FileExit_Click subroutine, 859

FileGet function, chF45–chF47

FileInfo class, 570, 586

UPPER function, **chT23**

Upper setting, 10

uppercase characters

- converting to, 15–16, 534, **chF16**, **chT23**
- testing for, 533
- in TextBox controls, 249, 255

UpperCase command, 255

Url property, 1040

UrlDecode method, 1041

UrlEncode method, 1041

UrlPathEncode method, 1041

UrlReference property, 1040

URLs (Uniform Resource Locators)

- in HTML, 1000, 1005–1006
- in RichTextBox controls, 317

Use Existing Stored Procedures option, 938

Use Optimistic Concurrency option, 937

USE statement

- in SQL, 891
- in Transact-SQL, **chT9**

UseAntiAlias property, 738

UseCase property, 359–360

UseDelimiter property, 359–360

UsedRange objects, 458

UsePadding property, 359

user-defined data types, 110–112, 110–111

user-defined formatting

- numbers, **chF25–chF26**
- strings, **chF27**
- time and date, **chF24–chF25**

user-drawn controls, 391, 405–407, 405, 416, 416

Changed events for, 413

designing, 407–411

initializing, 412

interface for, 416–418, 418

member implementation in, 418–421

in other projects, 415

raising events in, 413–415

specifications for, 406–407

testing, 411–412, 416–417

user-friendliness, 16–19, 17
 USER function, chT30
 USER_ID function, chT30
 User Interface Editor button, 74
 user interfaces, 393

- Alarm controls, 416–418, 418
- Loan Calculator, 35–38, 36
- Math Calculator, 45–47
- Query Builder, 907–909

 USER_NAME function, chT30
 User Names field, 879
 user names in Server Explorer, 879
 UserControl objects, 392, 412
 UserHostAddress property, 1040
 UserHostName property, 1040
 UserLanguage property, 1040

V

Val function, 51, chF29
 ValidateNames property, 300
 ValidatePassword function, 536
 validating

- data, 41–45, 42
- passwords, 536

 validation controls, 1027–1031, 1029
 ValidationSummary controls, 1027–1028
 VALIGN attribute, 1011
 VALUE attribute

- <INPUT> tag, 1017
- <SELECT> tag, 1016
- Text controls, 1015

 Value variables, 336
 ValueChanged events, 236

- ScrollBar controls, 279, 281–282
- TrackBar controls, 284

 ValueMember property, 960
 values and Value property

- comparing, 341
- equality of, 340
- HttpCookie objects, 1042
- IDictionaryEnumerator objects, 511
- Multiple Selection controls, 1016
- Parameters collection, 960
- passing arguments by, 161–163
- ScrollBar controls, 280–281
- SortedList collection, 504–506
- for variables, 80

 Values property, 498, 510
 ValueToCompare property, 1028
 varbinary variables, chT14
 varchar variables, chT11

variables, 79–81, chF14

- Boolean, 48, 96–97
- character. *See* Char data type and class; characters as class instances, 329
- in classes, 331
- conversions. *See* conversions, data type
- data type identifiers for, 101–102, 103
- dates. *See* dates and Date data type
- declaring, 50, 81–84, 115–116, chF55, chT9
- determining, 114–115
- displaying, 804–809, 804
- environment, chF56
- examining, 113–114
- in expressions, 453
- initializing, 82, 84–85, 98, 113, 120
- lifetime of, 119–120
- names of, 80, 84
- numeric. *See* numbers and numeric data type objects, 105–107, 130–132
- scope of, 116–119
- for Session objects, 1025
- sharing, 210–211
- for SqlDataAdapter, 930
- Strict and Explicit options for, 102–105
- strings. *See* strings and String data type
- in subroutines, 15, 50, 153
- in Transact-SQL, 919, chT9
 - global, chT14–chT16
 - local, chT10–chT14
 - user-defined, 110–112, 110–111

 variants, 105
 VariantType enumeration, chF14
 VarType function, chF14
 VBScript language, 1002
 VBScript property, 1039
