

# INDEX

- appreciative system 49
- Benefits Payment Card 138–55
- boundary 50–1
- CAPSA 71–91
- closed system 52–3
- communications 59–60
- control 60–7
- classical feedback control 62–5
  - controllability 66–7
  - feedforward control 65–6
  - modern feedback control 65
- critical factors 190–6
- critical failure factors 194
  - critical success factors 190–6
- electronic patient record (EPR) project 170–87
- environment 50–1
- failure
- as organizational phenomenon 207–9
  - definition of 16–17
  - failures analysis cycle 93–4
  - in IS projects 17–19
- Formal System Model 115–36
- CAPSA comparison 123–5, 126–8
  - Project A comparison 129, 131–2
  - Project B comparison 130, 133–4
  - project-specific form 211–12
  - use in electronic patient record project 176–9, 181–3
- groupthink 53–5
- hierarchy 51–2
- holism 50
- information system
- definition of xi–xii
  - embedded nature in organizations 5, 19–21
  - projects 17–19, 26
- interaction perspective on IS failure 196–8
- interpretive approaches to IS failure 198–201
- Libra *see* Project Libra
- medical records 169–70
- National Audit Office 137
- risk management requirements 213
- organizational learning 5–9
- capacity to learn 7
  - double loop 6
  - knowledge acquisition 8
  - single loop 6
- Project A 29–31, 33–7
- Project B 31–3, 37–44
- Project Libra 155–67
- sensemaking 60, 61, 62
- stakeholder mapping 211, 213–14

- success
  - definition of 13–15
  - framework for examining 15
- systematic 56
- systemic 56
- systems concepts 47–69
  - appreciative system 49
  - boundary 50–1
  - closed system 52–3
  - communications 59–60
  - control 60–7
  - environment 50–1
  - groupthink 53–5
  - hierarchy 51–2
  - holism 50
  - systematic 56
  - systemic 56
  - weltanschauung* 49
- systems development life cycle (SDLC)
  - 21–2
- systems diagrams
  - influence diagrams 107, 109, 110
  - input–output diagrams 106–7
  - multiple-cause diagrams 100, 103
  - relationship diagrams 100, 102
  - rich pictures 99–100, 101, 111–12
  - spray diagrams 98–9
  - systems maps 107, 108, 113, 114
- systems evolution 24–5
- Systems Failures Approach 93–136
  - Formal System model 115–36
  - identifying significant failures 103–5
  - iteration 135
  - modelling systems 105–10
  - notional view 8
  - pre-analysis 97–103
  - selecting a system 103–5
  - synthesis 135–6
- triangle of dependences 201–5
- weltanschauung* 49
- work system life cycle (WSLC) 22–3
