1 Introduction: Suitability Issues in Mass Appraisal Methodology 1
Tom Kauko and Maurizio d’Amato

PART I MASS APPRAISAL PRACTICE AND RECOMMENDATIONS 25

2 Data Issues Involved with the Application of Automated Valuation Methods: A Case Study 27
John F. Thompson, Jr

3 The Modified Comparable Sales Method as the Basis for a Property Tax Valuations System and its Relationship and Comparison to Spatially Autoregressive Valuation Models 49
Richard A. Borst and William J. McCluskey

4 Automated Valuation in the Dutch Housing Market: The Web-Application ‘MarktPositie’ Used by NVM-Realtors 70
Dree Op ‘t Veld, Emma Bijlsma and Paulien van de Hoef

5 Using Fuzzy Numbers in Mass Appraisal: The Case of the Belarusian Property Market 91
Maurizio d’Amato and Nikolai Siniak

PART II CURRENT ADVANCED METHODS 109

François Des Rosiers and Marius Thériault

7 Residuals Analysis for Constructing ‘More Real’ Property Value 148
Małgorzata Renigier

8 The Hierarchical Trend Model 164
Marc K. Francke
PART III  EMERGING METHODS  181

9  Developing Mass Appraisal Models with Fuzzy Systems  183
Marco Aurélio Stumpf González

10  Utterly Unorthodox Modelling for the Purposes of Mass Appraisal: An Approach Based on Patterns and Judgments  203
Tom Kauko

11  Rough Set Theory as Property Valuation Methodology: The Whole Story  220
Maurizio d’Amato

PART IV  COMPARISON OF TOOLS USING A SET OF SPECIFIC CRITERIA  259

12  Technical Comparison of the Methods Including Formal Testing of Accuracy and Other Modelling Performance Using Own Data Sets and Multiple Regression Analysis  261
Richard A. Borst, François Des Rosiers, Małgorzata Renigier, Marco Aurélio Stumpf González, Tom Kauko and Maurizio d’Amato

13  Property Market Classification and Mass Appraisal Methodology  280
Maurizio d’Amato and Tom Kauko

PART V  CONCLUSION  305

14  Automated Valuation Methods, Empirical Modelling of Value, and Systems for Market Analysis  307
Tom Kauko
