Acknowledgments	xvii
Introduction	xix
Part I: XNA Framework Basics	1
Chapter 1: Introducing XNA	3
Introduction to the XNA Framework	3
XNA Game Studio Express	4
Application Model	6
Content Pipeline	8
Get the Free XNA Game Studio Express	10
Requirements	10
Installing	11
What about Visual Studio 2005 Professional?	12
Configuring Your Xbox 360	13
Getting Started	15
Your First Project	15
F5 and Go	16
Changing the Code	17
Notes about XNA	21
Important Links	21
Is C# Good for Game Development?	22
Getting Used to the Content Pipeline	24
Differences with MDX	24
Additional Tools and Tips	24
Troubleshooting	25
Summary	26
Chapter 2: Creating Your First Game: Pong	27
Game Ideas	28
Write Down Your Ideas!	28
Agile Methodology	30
Solving Initial Difficulties	32
Creating Some Textures	33

Contents

Let's Write Pong	34
Sprites	34
Unit Testing in Games	35
Adding the Ball and Paddles	40
Handling Player Input	43
Collision Testing	47
Adding Sound	52
How This Looks on the Xbox 360	56
Challenge: Improve the Pong Game	57
Troubleshooting	58
Summary	59
Chapter 3: Helper Classes	61
Managing the Content Pipeline	62
Supported File Formats	63
Advantages and Disadvantages	64
Handling Content Directories	65
Importing and Accessing Content	66
Logging Error Messages	68
Unit Testing in XNA	70
NUnit and TestDriven.Net	70
Starting Unit Tests	71
Golden Rules	73
RandomHelper Class	73
Generate Random Vectors	74
StringHelper Class	74
Extracting Filenames	75
Writing Lists	76
Other Helpers	77
SpriteHelper Class	77
EnumHelper Class	79
ColorHelper Class	80
The Breakout Game	81
Unit Testing in Breakout	83
Breakout Levels	83
The Game Loop	85
Drawing Breakout	87
Collision Testing	89
Challenge: Improve the Breakout Game	90
Summary	90

Chapter 4: Game Components	93
The Game Class	94
Game Components	95
More Helper Classes	97
TextureFont Class	97
Input Class	99
Sound Class	100
Tetris, Tetris, Tetris!	101
Rendering the Background	102
Handling the Grid	103
Block Types	104
Gravity	107
Handling Input	109
Testing	112
Challenge: Create the NextBlock Game Component	113
Summary	113
Part II: Basic Graphics Engine	115
Chapter 5: Writing Your Own XNA Graphics Engine	117
What Should Your Engine be Able to Do?	118
The Engine Unit Test	119
3D Models	121
Rendering of Textures	123
Line Rendering	125
3D Programming	130
Model Unit Test	134
Testing Other Models	138
Plugging in More Game Components	139
Simple Camera Class	140
ScreenshotCapturer Class	141
Making Sure Games Run on the Xbox 360	142
Downloading the XNA Game Launcher	143
Xbox 360 Setup and Deploying Games	144
Console Debugging and Tools	145
Challenge: Write a Game Component	145
Summary	146

Contents

Chapter 6: Shader Management	147
Shader Overview	148
History	148
Shaders Everywhere in XNA	149
Example Games	150
Step-by-Step Shader Tutorial	152
FX Composer	153
FX File Layout	155
Parameters	157
Vertex Input Format	159
Vertex Shader	161
Pixel Shader	163
Importing the Shader into Your Engine	166
Compiling Shaders	167
Using Parameters	168
Vertex Formats	169
Rendering with Shaders	169
Testing the Shader	171
Challenge	172
Summary	172
Chapter 7: Realism through Normal Mapping	175
Adding Detail to Objects	176
Problems	179
Asteroids! Wrong Game or What?	180
So How Do Shaders Work?	184
Vertex Shaders and Matrices	187
Pixel Shader and Optimizations	189
ShaderEffect Class	191
TangentVertex Format	193
Normal Mapping Unit Test	195
Adding Tangent Data with a Custom Processor	197
Final Asteroid Unit Test	201
More Shaders	203
Offset Mapping	203
Glass Shader	204
Reflection and Water	205
Challenge: Add Parallax Mapping	206
Summary	207

Chapter 8: Post-Screen Shaders and the Rocket Commander Game	209
Handling Post-Screen Shaders	210
Pre-Screen Sky Cube Mapping	210
Writing a Simple Post-Screen Shader	216
Improvements	220
Implementing Post-Screen Shaders	221
RenderToTexture Class	222
PostScreenDarkenBorder Class	223
Unit Test Result	226
More Post-Screen Shaders	227
Motion Blur	229
Color Correction	230
Menu Effects	233
Rocket Commander Game	234
Performance in XNA	234
Moving from MDX to XNA	236
Using Threads to Improve Performance	237
Result and Screenshots	237
Challenge: Write an Edge Detection Shader	239
Summary	241
Part III: Improving Your Game Engine	243
<hr/>	
Chapter 9: Adding Sound with XACT	245
No DirectSound	246
Handling .wav Files	247
Using XACT	250
Creating Projects	251
Creating Your Wave Bank	252
Compressing Music Data	254
Sound Banks	256
Cue Variables	258
Other Effects	259
Sound Class	261
Rocket Motor Sound	264
Whoosh, What Was That?	265
Menu Sounds	265
Challenge: Create Your XACT Project	266
Summary	266

Contents

Chapter 10: Player Input and the User Interface	269
Input Class	270
The Update Method in the Input Class	272
Mouse Rectangles	274
Entering Text in XNA	276
Game Screens	279
Help Screen	282
In-Game User Interface	283
Tips	286
Cameras	289
Space Camera	290
Challenge: Write a Free Camera Class	294
Summary	294
Chapter 11: Creating XNA Shooter	297
Putting It All Together	298
Sounds	299
User Interface	300
Textures	302
3D Models	303
Animated Textures	304
Billboards	307
Landscape Rendering	310
Base Texture and Normal Map	311
Height Map	313
Adding Objects	315
XNA Shooter Game	317
Game Logic	319
3D Effects	321
Unit Class	323
Projectile Class	325
Item Class	328
Final Screenshot	330
Challenge: Write a Game with Your Engine	330
Summary	331

Part IV: Writing a Racing Game	333
Chapter 12: Generating Landscapes and Tracks	335
Game Comparisons	336
Gran Turismo	337
Need for Speed	338
Trackmania	339
XNA Racing Game	339
Landscape Rendering	340
Textures	341
Rendering	342
Optimizing Tips	348
Tracks	351
Unit Testing to the Rescue	352
Interpolating Splines	355
More Complex Tracks	356
Importing the Track Data	358
Generating Vertices from the Track Data	360
Final Result	366
Challenge: Create a New Unit Test Track	367
Summary	368
Chapter 13: Physics	371
Newton's Laws of Motion	372
Keep It Simple	374
Gravitation	379
Physics Engines	382
PhysX	384
Havok	384
ODE	385
Other	385
Implementing Physics	387
Handling Loopings	387
Spring Physics	390
Collision Detection	393
PhysicsAsteroidManager	394
Car Collision	397
Challenge: Figure out the Road Collision	401
Summary	402

Contents

Chapter 14: Fine-Tuning and “Modding” the Racing Game	405
Game Concept	407
Game Idea	409
Additional Features	412
Game Screens	414
Splash Screen	415
Main Menu	418
Game Screen	420
Highscores	422
Final Unit Testing and Tweaking	424
Tweaking the Track	426
Shadow Mapping	428
Final Testing on Windows	434
Final Testing on the Xbox 360	436
Additional Ideas	439
More Cars	440
Online Highscore List	440
More Shaders and Effects	441
More Game Modes	442
Multiplayer Mode	443
Challenge: Write Your Own Mod!	444
Example Game: Speedy Racer	444
Summary	449
Appendix A: Resources	451
Index	463
