List of Contributors	xiii
Series Preface	xv
Notes on Contributors	xvii
Acknowledgements	xxiii
1 Introduction and Overview	1
<i>Peter P. Belobaba and Amedeo Odoni</i>	
1.1 Introduction: The Global Airline Industry	1
1.1.1 <i>Deregulation and Liberalization Worldwide</i>	5
1.1.2 <i>Recent Industry Evolution</i>	6
1.1.3 <i>Looking Ahead: Industry Challenges</i>	12
1.2 Overview of Chapters	13
References	17
2 The International Institutional and Regulatory Environment	19
<i>Amedeo Odoni</i>	
2.1 Introduction	19
2.2 Background on the International Regulatory Environment	20
2.2.1 <i>The Chicago Convention</i>	20
2.2.2 <i>“Freedoms of the Air”</i>	21
2.3 Airline Privatization and International Economic Regulation	24
2.3.1 <i>Airline Privatization</i>	24
2.3.2 <i>Types and Critical Aspects of Air Service Agreements (ASAs)</i>	25
2.3.3 <i>Typical Content of Bilateral and Multilateral ASAs</i>	26
2.3.4 <i>The Unified European Union Market and Other Major Developments</i>	30
2.4 Airports	32
2.4.1 <i>Restrictions on Airport Access</i>	33
2.4.2 <i>Airport Ownership and Management</i>	36
2.5 Air Traffic Management	39
2.6 Key Organizations and Their Roles	40

2.6.1	<i>International Organizations</i>	41
2.6.2	<i>Organizations in the USA</i>	43
2.7	Summary and Conclusions	45
	References	46
3	Overview of Airline Economics, Markets and Demand	47
	<i>Peter P. Belobaba</i>	
3.1	Airline Terminology and Definitions	47
3.1.1	<i>Basic Airline Profit Equation</i>	49
3.2	Air Transportation Markets	51
3.2.1	<i>Typical Air Passenger Trip</i>	51
3.2.2	<i>Spatial Definitions of Airline Markets</i>	53
3.3	Origin–Destination Market Demand	55
3.3.1	<i>Dichotomy of Airline Demand and Supply</i>	56
3.3.2	<i>Factors Affecting Volume of O-D Demand</i>	57
3.3.3	<i>Quality of Service Factors</i>	58
3.3.4	<i>Total Trip Time and Frequency</i>	59
3.4	Air Travel Demand Models	60
3.4.1	<i>Elasticity of Air Travel Demand</i>	61
3.4.2	<i>Air Travel Demand Segments</i>	62
3.4.3	<i>O-D Market Demand Functions</i>	65
3.5	Airline Competition and Market Share	67
3.5.1	<i>Market Share/Frequency Share Model</i>	68
3.5.2	<i>S-curve Model Formulation</i>	70
3.6	Chapter Summary	70
	References	71
4	Fundamentals of Pricing and Revenue Management	73
	<i>Peter P. Belobaba</i>	
4.1	Airline Prices and O-D Markets	74
4.1.1	<i>Regulated vs. Liberalized Pricing</i>	74
4.1.2	<i>Theoretical Pricing Strategies</i>	75
4.1.3	<i>Price Discrimination vs. Product Differentiation</i>	77
4.2	Airline Differential Pricing	78
4.2.1	<i>Market Segmentation</i>	79
4.2.2	<i>Fare Product Restrictions</i>	80
4.2.3	<i>Traditional Airline Fare Structures</i>	82
4.2.4	<i>Recent Trends in Airline Pricing</i>	84
4.3	Airline Revenue Management	88
4.3.1	<i>Computerized Revenue Management Systems</i>	90
4.3.2	<i>Flight Overbooking</i>	93
4.3.3	<i>EMSR Methods for Flight Leg Revenue Optimization</i>	98
4.3.4	<i>Network Revenue Management</i>	101
4.3.5	<i>Revenue Management for Less Restricted Fare Structures</i>	108
	References	111

5	Airline Operating Costs and Measures of Productivity	113
	<i>Peter P. Belobaba</i>	
5.1	Airline Cost Categorization	114
	5.1.1 <i>Administrative vs. Functional Cost Categories</i>	114
	5.1.2 <i>Cost Drivers by Functional Category</i>	119
5.2	Operating Expense Comparisons	119
	5.2.1 <i>Percentage Breakdown of Operating Expenses</i>	120
	5.2.2 <i>Legacy vs. Low-Cost Airlines</i>	122
	5.2.3 <i>Flight Operating Cost Comparisons</i>	132
5.3	Comparisons of Airline Unit Costs	136
	5.3.1 <i>Total Operating Costs vs. Unit Costs</i>	136
	5.3.2 <i>Legacy vs. Low-Cost Airline Unit Costs</i>	138
	5.3.3 <i>Unit Cost Comparisons in Europe, Asia and Worldwide</i>	142
5.4	Measures of Airline Productivity	146
	5.4.1 <i>Aircraft Productivity</i>	146
	5.4.2 <i>Labor Productivity</i>	148
	References	150
6	The Airline Planning Process	153
	<i>Peter P. Belobaba</i>	
6.1	Fleet Planning	153
	6.1.1 <i>Airline Fleet Decisions</i>	154
	6.1.2 <i>Fleet Planning Methods</i>	159
6.2	Route Planning	162
	6.2.1 <i>Hub Economics and Network Structure</i>	163
	6.2.2 <i>Route Planning and Evaluation</i>	168
6.3	Airline Schedule Development	173
	6.3.1 <i>Frequency Planning</i>	174
	6.3.2 <i>Timetable Development</i>	175
	6.3.3 <i>Fleet Assignment and Aircraft Rotations</i>	178
6.4	The Future: Integrated Airline Planning	180
	References	180
7	Airline Schedule Optimization	183
	<i>Cynthia Barnhart</i>	
7.1	Schedule Optimization Problems	184
7.2	Fleet Assignment	185
	7.2.1 <i>The Fleet Assignment Model</i>	188
	7.2.2 <i>Fleet Assignment Solutions/Impacts</i>	192
	7.2.3 <i>Extending Basic Fleet Assignment Models</i>	192
7.3	Schedule Design Optimization	197
	7.3.1 <i>Modeling the Optimization of Flight Retiming and Fleet Assignment Problems</i>	199
7.4	Crew Scheduling	201
	7.4.1 <i>The Crew Pairing Problem</i>	202
	7.4.2 <i>Crew Scheduling Problem Solutions and Impacts</i>	206

7.5	Aircraft Maintenance Routing and Crew Pairing Optimization	207
7.5.1	<i>Modeling and Solving the Enhanced Crew Pairing Problem</i>	208
7.6	Future Directions for Schedule Optimization	210
	References	210
8	Airline Flight Operations	213
	<i>Alan H. Midkiff, R. John Hansman and Tom G. Reynolds</i>	
8.1	Introduction	213
8.2	Regulation and Scheduling	214
8.2.1	<i>General Regulatory Requirements</i>	214
8.2.2	<i>Flight Crew Regulation</i>	214
8.2.3	<i>Flight Crew Scheduling</i>	216
8.3	Flight Crew Activities During a Typical Flight	217
8.3.1	<i>Flight Crew Sign-in</i>	217
8.3.2	<i>Operations/Planning</i>	218
8.3.3	<i>Pre-flight</i>	223
8.3.4	<i>Pre-departure</i>	230
8.3.5	<i>Gate Departure</i>	231
8.3.6	<i>Taxi-out</i>	233
8.3.7	<i>Takeoff</i>	233
8.3.8	<i>Terminal Area Departure</i>	234
8.3.9	<i>Climb</i>	236
8.3.10	<i>Cruise</i>	237
8.3.11	<i>Descent</i>	240
8.3.12	<i>Terminal Area Arrival</i>	242
8.3.13	<i>Final Approach</i>	243
8.3.14	<i>Landing and Rollout</i>	246
8.3.15	<i>Taxi-in</i>	246
8.3.16	<i>Parking</i>	247
8.3.17	<i>Post-flight</i>	248
8.4	Summary	249
8.5	Appendix: List of Acronyms	250
	References	251
9	Irregular Operations: Schedule Recovery and Robustness	253
	<i>Cynthia Barnhart</i>	
9.1	Introduction	253
9.2	Irregular Operations	254
9.2.1	<i>Managing Irregular Operations: Airline Operations Control Centers</i>	256
9.2.2	<i>Options for Schedule Recovery from Irregular Operations</i>	257
9.2.3	<i>Schedule Recovery from Irregular Operations: Objectives and Process</i>	259
9.2.4	<i>Evaluating the Costs of Recovery Options: The Challenges Imparted by Uncertainty and Downstream Effects</i>	268

9.3	Robust Airline Scheduling	269
9.3.1	<i>Robust Schedule Design</i>	270
9.3.2	<i>Robust Fleet Assignment</i>	270
9.3.3	<i>Robust Aircraft Routing</i>	271
9.3.4	<i>Robust Crew Scheduling</i>	272
9.4	Directions for Ongoing and Future Work on Schedule Recovery from Irregular Operations	273
	References	274
10	Labor Relations and Human Resource Management in the Airline Industry	275
	<i>Jody Hoffer Gittel, Andrew von Nordenflycht, Thomas A. Kochan, Robert McKersie and Greg J. Bamber</i>	
10.1	Alternative Strategies for the Employment Relationship	276
10.2	Labor Relations in the US Airline Industry	277
10.2.1	<i>Regulatory Framework for US Labor Relations</i>	278
10.2.2	<i>US Airline Responses to Cost Pressures Post-deregulation</i>	281
10.2.3	<i>US Labor Relations Post-9/11</i>	285
10.3	Labor Relations in the Airline Industry in Other Countries	287
10.3.1	<i>The International Regulatory Framework for Labor Relations</i>	288
10.3.2	<i>Summary of Airline Labor Relations Strategies: What Works?</i>	296
10.4	Human Resource Management at Airlines	297
10.4.1	<i>Hiring and Training for Relational Competence</i>	301
10.4.2	<i>Flexible Boundaries Between Jobs</i>	302
10.4.3	<i>Supervisory Coaching and Feedback</i>	302
10.4.4	<i>Performance Measurement at the Process Level</i>	303
10.4.5	<i>Conflict Resolution</i>	304
10.4.6	<i>Boundary Spanning Roles</i>	305
10.4.7	<i>Partnering with Other Key Players</i>	306
10.5	Conclusions	307
	References	308
11	Aviation Safety and Security	313
	<i>Arnold Barnett</i>	
11.1	Safety	314
11.1.1	<i>Measuring Air Safety: Some Hazards</i>	314
11.1.2	<i>The Q-statistic</i>	316
11.1.3	<i>Some Calculated Q-values</i>	317
11.1.4	<i>More Calculated Q-statistics</i>	318
11.1.5	<i>Are Some Airlines Safer Than Others?</i>	319
11.1.6	<i>A Collision Risk Assessment</i>	321
11.1.7	<i>Midair Collision Risk</i>	324
11.2	Security	325
11.2.1	<i>September 11 in Context</i>	325
11.2.2	<i>Some Costs of Aviation Security</i>	326
11.2.3	<i>Some Security Procedures</i>	327

11.2.4	<i>Is It Worth It?</i>	332
11.2.5	<i>Two Economic Paradigms</i>	332
11.2.6	<i>A European Dilemma</i>	334
11.2.7	<i>More Security Dilemmas</i>	336
11.2.8	<i>Final Remarks</i>	340
	References	341
12	Airports	343
	<i>Amedeo Odoni</i>	
12.1	Introduction	343
12.2	General Background	345
12.3	Physical Characteristics	349
12.3.1	<i>Airside Design Standards</i>	349
12.3.2	<i>Geometric Configuration on Airside</i>	352
12.3.3	<i>Typology of Passenger Buildings</i>	355
12.3.4	<i>Assessing Passenger Building Concepts</i>	357
12.3.5	<i>Ground Access</i>	358
12.4	Capacity, Delays and Demand Management	360
12.4.1	<i>Airside Capacity</i>	360
12.4.2	<i>Airside Delays and Mitigation</i>	362
12.4.3	<i>Landside Capacity and Level of Service</i>	364
12.5	Institutional, Organizational and Economic Characteristics	367
12.5.1	<i>Airport Ownership and Management</i>	367
12.5.2	<i>Airport User Charges</i>	368
12.5.3	<i>Economic Regulation, Single Till and Dual Till</i>	372
12.5.4	<i>Financing Capital Projects</i>	374
	References	375
13	Air Traffic Control	377
	<i>R. John Hansman and Amedeo Odoni</i>	
13.1	Introduction	377
13.2	The Generic Elements of an ATC System	378
13.2.1	<i>Communications Systems</i>	378
13.2.2	<i>Navigation Systems</i>	379
13.2.3	<i>Surveillance Systems</i>	384
13.2.4	<i>Flight and Weather Information Systems</i>	387
13.3	Airspace and ATC Structure	387
13.4	ATC Operations	389
13.5	Standard Procedures	392
13.6	Capacity Constraints	393
13.7	Congestion and Air Traffic Management	398
13.8	Future ATC Systems	403
	References	403

14	Air Transport and the Environment	405
	<i>Karen Marais and Ian A. Waitz</i>	
14.1	Introduction	405
14.2	Limiting Aviation's Environmental Impact: The Role of Regulatory Bodies	407
14.3	Airport Water Quality Control	408
	<i>14.3.1 Effects of Deicing Fluids</i>	409
14.4	Noise	412
	<i>14.4.1 Effects</i>	414
	<i>14.4.2 Noise Measurement</i>	415
	<i>14.4.3 Noise Trends</i>	417
	<i>14.4.4 Noise Controls</i>	419
	<i>14.4.5 Emerging Issues</i>	420
14.5	Surface Air Quality	421
	<i>14.5.1 Effects</i>	424
	<i>14.5.2 Emissions Measurement</i>	425
	<i>14.5.3 Emissions Trends</i>	425
	<i>14.5.4 Emissions Controls</i>	429
	<i>14.5.5 Emerging Issues</i>	430
14.6	Impact of Aviation on Climate	431
	<i>14.6.1 Effects</i>	431
	<i>14.6.2 Measurement</i>	433
	<i>14.6.3 Greenhouse Emissions Controls</i>	434
14.7	Summary and Looking Forward	435
	References	436
15	Information Technology in Airline Operations, Distribution and Passenger Processing	441
	<i>Peter P. Belobaba, William Swelbar and Cynthia Barnhart</i>	
15.1	Information Technology in Airline Planning and Operations	441
15.2	Airline Distribution Systems	444
	<i>15.2.1 Evolution of Computer Reservations Systems</i>	445
	<i>15.2.2 Terminology and Capabilities of Reservation Systems</i>	447
	<i>15.2.3 Alternative Airline Distribution Channels</i>	450
	<i>15.2.4 Impacts of Alliances and Code Sharing on Distribution</i>	452
	<i>15.2.5 IT Challenges of Evolving Distribution Channels</i>	453
15.3	Distribution Costs and E-commerce Developments	455
	<i>15.3.1 Internet Distribution Channels</i>	458
	<i>15.3.2 Electronic Ticketing</i>	461
	<i>15.3.3 Implications for Airlines and Consumers</i>	462
15.4	Innovations in Passenger Processing	463
	References	465

16	Critical Issues and Prospects for the Global Airline Industry	467
	<i>William Swelbar and Peter P. Belobaba</i>	
16.1	Evolution of US and Global Airline Markets	468
	16.1.1 <i>Implications for the Global Airline Industry</i>	470
	16.1.2 <i>Government Policy and International Liberalization</i>	471
	16.1.3 <i>Evolution of Global Airline Markets</i>	471
16.2	Looking Ahead: Critical Challenges for the Global Airline Industry	473
	16.2.1 <i>Strategies for Sustained Profitability</i>	473
	16.2.2 <i>Infrastructure and the Environment</i>	476
	References	478
