<i>Introduction</i>	<i>xxvii</i>
<i>Assessment Test</i>	<i>xxxvii</i>
Chapter 1	Network Design and Concepts
	1
General Routing Concepts	2
Static vs. Dynamic Routing	2
Interior vs. Exterior Routing Protocols	3
Distance Vector vs. Link-State Routing Protocols	3
OSI Reference Model	4
Physical Layer (OSI Layer 1)	4
Data-Link Layer (OSI Layer 2)	4
Network Layer (OSI Layer 3)	5
Transport Layer (OSI Layer 4)	5
Session Layer (OSI Layer 5)	6
Presentation Layer (OSI Layer 6)	6
Application Layer (OSI Layer 7)	6
Hierarchical Topologies	7
Benefits of Hierarchical Topologies	7
The Three-Layer Hierarchical Model	8
Scalable Internetworks	10
Reliability and Availability	10
Responsiveness	11
Efficiency	11
Adaptability	12
Accessible but Secure	13
Fault-Tolerant Topologies	13
Redundant LAN Configurations	14
Redundant WAN Connections	16
Performance: Load Balancing	18
Fault Tolerance on Multiaccess Segments	19
Internet Control Message Protocol (ICMP) Redirects	19
Proxy ARP	20
Binary, Decimal, Hexadecimal Conversion	22
Binary to Decimal Conversion	22
Binary to Hexadecimal Conversion	23
Summary	24
Exam Essentials	24
Key Terms	25
Review Questions	26
Answers to Review Questions	28

Chapter 2	Configuration and IOS Commands	29
	Cisco Router User Interface	30
	Cisco Router IOS	30
	Command Line Interface (CLI)	31
	The Configuration Register	54
	Changing the Configuration Register	56
	Password Recovery	57
	Managing Flash Files	59
	Flash Partitions	62
	Configuring Boot Files	64
	Using a Cisco Router as a TFTP Host	66
	Cisco Discovery Protocol (CDP)	67
	Changing the CDP Timers	68
	Turning Off/On CDP	69
	CDP Commands	70
	Using an ACL to Control Vty Access	75
	Terminal Access Server	76
	Terminal Access Server Functionality	77
	Using a Reverse Telnet Session	77
	Out-of-Band Management	78
	Terminal Access Server Configuration	79
	Terminal Access Server Troubleshooting	80
	Summary	81
	Exam Essentials	81
	Key Terms	82
	Review Questions	83
	Answers to Review Questions	85
Chapter 3	WAN Technologies and Configuration	87
	Physical Layer Technologies	88
	Synchronous Lines (T1/E1)	88
	SONET and SDH	90
	Dynamic Packet Transport (DPT)/Spatial Reuse Protocol (SRP)	91
	Data-Link Technologies	92
	Packet Switching and X.25	92
	High-Level Data Link Control (HDLC) Protocol	96
	Point-to-Point Protocol (PPP)	96
	Frame Relay	98
	Configuring HDLC on a Cisco Router	104
	Physical Connectivity	104
	HDLC Configuration Commands	105

	Configuring PPP on a Cisco Router	105
	PPP Configuration Commands	106
	Configuring Frame Relay on a Cisco Router	106
	Frame Relay Switch Configuration Command	107
	Frame Relay Router Configuration Commands	110
	Troubleshooting Frame Relay	117
	Summary	125
	Exam Essentials	125
	Key Terms	126
	Review Questions	127
	Answers to Review Questions	129
Chapter 4	Asynchronous Transfer Mode (ATM)	131
	The ATM Protocol Model	132
	The ATM Physical Layer	135
	The ATM Layer	136
	The ATM Adaptation Layer	136
	Introduction to LAN Emulation	138
	LANE Components	139
	The LAN Emulation Client	140
	The LANE Server	141
	The LAN Emulation Configuration Server	142
	The Broadcast and Unknown Server	143
	LEC Communication	144
	Configuring ATM	147
	Configuring ATM Permanent Virtual Circuits (PVCs)	149
	Configuring PVC Auto Discovery	154
	Configuring ATM Switched Virtual Circuits (SVCs)	155
	Troubleshooting ATM	161
	Summary	161
	Exam Essentials	162
	Key Terms	163
	Review Questions	164
	Answers to Review Questions	166
Chapter 5	Token Ring	167
	Token Ring Operation	168
	Token Ring Frame Format	169
	Token Ring Specialized Components	176
	Active Monitor	177
	Standby Monitor(s)	178
	Ring Parameter Server	178
	Configuration Report Server	178

xiv Contents

	Station Insertion	179
	Hard and Soft Errors	180
	Token Ring Configuration	180
	Token Ring Troubleshooting	181
	Summary	182
	Exam Essentials	183
	Key Terms	184
	Review Questions	185
	Answers to Review Questions	187
Chapter 6	Ethernet LAN Technologies	189
	Ethernet	190
	Carrier Sense Multiple Access with Collision Detect (CSMA/CD)	191
	Ethernet Addressing	192
	Ethernet Frames	193
	Broadcasts	197
	Full-Duplex Ethernet	198
	Fast Ethernet	200
	Gigabit Ethernet	200
	10 Gigabit Ethernet (802.3ae)	201
	Wireless Ethernet IEEE 802.11b	202
	Configuring the Catalyst 5000 and 3550 Switches	206
	Catalyst Configuration Commands	206
	Troubleshooting the Catalyst Switch	249
	Summary	250
	Exam Essentials	251
	Key Terms	252
	Review Questions	253
	Answers to Review Questions	255
Chapter 7	Building the Layer 2 Network	257
	Lab Equipment List	259
	Layer 2 Configuration Task 2.1	262
	Solution 2.1: Frame Relay Switch (FS) Configuration	263
	Solution 2.1: Router Configurations	265
	Solution 2.1: Catalyst Switch Configuration	270
	Solution 2.1: Testing the Configuration	273
	Troubleshooting	273
	Layer 2 Configuration Task 2.2	273
	Solution 2.2: Frame Relay Switch (FS) Configuration	274
	Solution 2.2: Router Configurations	276

	Solution 2.2: Catalyst Switch Configuration	283
	The Issue of Frame Relay and Inverse ARP	284
	Solution 2.2: Testing the Configuration	285
	Summary	285
Chapter 8	IP Addressing and Subnetting	287
	TCP/IP and the DoD Model	288
	The Internet Layer Protocols	290
	The Host-to-Host Layer Protocols	296
	The Process/Application Layer Protocols	301
	IP Addressing	304
	IP Terminology	305
	The Hierarchical IP Addressing Scheme	305
	Private IP Addresses	312
	Subnetting	313
	Subnet Masks	314
	Subnetting Class C Addresses	314
	Subnetting Class B Addresses	316
	Subnetting Class A Addresses	320
	Supernetting	321
	Creating a Supernet	322
	Applying Supernets to Cisco Routers	324
	Classless Inter-Domain Routing (CIDR)	324
	Cisco and CIDR	325
	Configuring Subnet Mask Display Formats	326
	Variable Length Subnet Masking (VLSM)	327
	IP Version 6 (IPv6)	330
	IPv6 Address Allocation	331
	Summary	332
	Exam Essentials	332
	Key Terms	334
	Review Questions	335
	Answers to Review Questions	337
Chapter 9	IP Interior Gateway Protocols	339
	Static Routing	340
	Static Route Configuration	340
	Administrative Distance for All Routing Protocols	342
	Classful vs. Classless	343
	Distance Vector Operation	344
	Defining a Maximum	344
	Rule of Split-Horizon and Route Poisoning	345
	Holddown Timers	346
	Triggered Updates	347

xvi Contents

Routing Information Protocol (RIP)	347
RIP Timers	347
RIP Version 1 (RIPv1)	348
Manipulating Routes with RIP	350
Configuring RIP Version 1	351
RIP Version 2 (RIPv2)	352
Configuring RIP Version 2	356
Interior Gateway Routing Protocol (IGRP)	357
The Five Path Vector Metrics for IGRP	358
IGRP Timers	361
IGRP: Classful (FLSM) Example	362
Manipulating Routes with IGRP	364
Rule of Split-Horizon for IGRP	365
Unequal-Cost Load-Balancing Traffic	365
Configuring IGRP on a Router	365
Default Network	366
IGRP Troubleshooting	368
Enhanced Interior Gateway Routing Protocol (EIGRP)	369
Differences between EIGRP and IGRP	370
The Five Path Vector Metrics for EIGRP	372
Manipulating Routes with EIGRP	383
Rule of Split-Horizon for EIGRP	384
Load-Balancing Traffic	384
Configuring EIGRP on a Router	386
EIGRP Authentication	387
Summarizing Addresses	388
Default Network	389
EIGRP Troubleshooting	392
Intermediate System-to-Intermediate System (IS-IS)	392
Network Entity Title (NET)	394
Configuring IS-IS	396
Interface Authentication	398
Default Route Propagation	399
IS-IS Interarea Default Routes	400
Address Summarization for IS-IS	402
Narrow-Style Metrics vs. Wide-Style Metrics	402
Understanding the Network Types	403
Route Leaking	404
IS-IS Troubleshooting Commands	407
Open Shortest Path First (OSPF)	408
OSPF Interface Cost	408
Shortest Path First	409
OSPF Areas	412
OSPF Link-State Advertisements	413

OSPF Hello Packet	415	
OSPF Network Types	416	
OSPF Designated Router (DR)	419	
OSPF Router ID (RID)	419	
Activating OSPF Interfaces	420	
OSPF Routers and Areas	421	
Summary Addressing in OSPF	423	
Configuring OSPF Authentication	426	
Configuring OSPF Virtual Links	430	
Configuring OSPF on the Router	434	
Summary	438	
Exam Essentials	438	
Key Terms	439	
Review Questions	440	
Answers to Review Questions	442	
Chapter 10	Protocol Redistribution and NAT	443
Basic Redistribution	444	
Controlling Redistribution	445	
RIP Redistribution	446	
IGRP Redistribution	450	
EIGRP Redistribution	450	
OSPF Redistribution	452	
IS-IS Redistribution	455	
Redistributing between Classful and Classless Routing		
Protocols	457	
Classless Routing Protocol with a Longer Mask		
Redistributing Routes into a Classful Routing Protocol	457	
Classless Routing Protocol with a Shorter Mask		
Redistributing Routes into a Classful Routing Protocol	459	
Mutual Redistribution	463	
Network Address Translation (NAT)	464	
The Advantages of NAT	465	
The Disadvantages of NAT	466	
NAT Traffic Types	466	
NAT: Inside Source	468	
NAT: Outside Source	469	
NAT: Overloading or Port Address Translation (PAT)	470	
NAT: TCP Load Sharing	472	
NAT: Overlapping Subnets	473	
Troubleshooting NAT	476	
Summary	477
