A

AC. *See* Alternating current (AC); Alternating current (AC) system

AC/DC standards war, 4

Adams, E. D., 114

Aeneid (Virgil), 7

Alt, Whitey, 144, 145

Alternating current (AC): accidental deaths attributed to, 88–89, 92, 107, 116, 119; author's childhood experience with, 1–2; Brown's claims linking execution to, 117, 118; Brown's writings on dangers of, 89–90, 107–108, 116–117; compared to, DC, 66, 80; demonstration of animal-killing power of, 108–110; Edison's opinion of, 66–67, 77, 84–85, 118–120, 131, 170; experiments on relative dangers of DC vs., 90–91, 92–95, 97–106; long-distance transmission of, in Germany, 130–131; patents for, purchased by Edison's company, 120; recommended use of, to execute criminals, 110–112; reliance of modern life on, 3, 173–174; as standard by 1930s, 173; Tesla's Columbian Exposition demonstration of, 138–139

Alternating current (AC) system: first power plant using, 82; Gaulard-Gibbs, 66, 81; increasing number of power plants using, 91, 108, 114, 130–131; installed at hydroelectric power plants, 129–130, 140, 141–142; national-scale conceptualization of, 121; proposal to limit voltage in, 89–90, 117, 119–120; technical papers as defense for, 108; Westinghouse's development of, 81–83; winning in marketplace, 108, 114, 131

Amber, 7, 9

Animal experiments: on calves, 108–109, 115; on dogs, 90–91, 92–95, 97–106, 115; on horses, ii, 109–110, 115

Ansonia Brass & Copper Company, 63

Arc lamps, 41–42, 88

Automobile, electric, 155–158, 159–161

B

Bantu tribesmen, view of lightning, 8

Batchelor, Charles, 75

Batteries: in Computer Age, 177–178;

Edison's "A," 159–161; Edison's continued work on, 168; Edison's "E," 155–158; efforts to increase longevity of, 178; first rechargeable, 156; invention of, 22

Baum, Frank L., 136

Bible, on lightning, 8

Black Elk, 8–9

Blount, J. F., 144

Boxing Cats (film), 152

Brown, Harold: background of, 87–88; demonstrated AC's power to kill animals, ii, 108–110, 115; demonstrated electrical resistance, 96–97; described DC-powered utopia, 117; linked AC to execution, 117, 118; procured AC generators for death chair, 115–116; relationship with Edison, 87, 88, 91–92, 102, 103, 112, 119, 123, 171; showed danger of DC vs. AC with dog experiments, 90–91, 92–95, 97–106; on stand in Kemmler execution case, 122–123; verbal sparring between Westinghouse and, 95, 112–113, 123; wrote about dangers of AC, 89–90, 107–108, 116–117

Brush Electric Company, 88

C

- Calves, Brown's experiments on, 108–109, 115
- Capacitors, 11
- Charge, 9–10; conservation of, 17; negative vs. positive, 9, 16–17, 22
- Chicago World's Fair. *See* Columbian Exhibition
- Cleveland, Grover, 136
- Cockran, W. Bourke, 121–124
- Coffin, Charles, 134
- Collinson, Peter, 14, 16, 17
- Columbian Exhibition, 134–139; competition to provide power and light to, 134–136; electricity-related exhibits at, 136–139; Kinetoscope at, 149–150
- Commutator, 73
- Condensers, 22
- Conductors, 9, 22
- Conservation of charge, 17
- Continuous current. *See* Direct current (DC)
- Corbett, "Gentleman Jim," 150

D

- Davy, Humphrey, 22
- DC. *See* Direct current (DC); Direct current (DC) system
- De Magnete* (On the Magnet) (Gilbert), 9
- Death by electricity. *See* Electrocutation (of criminals)
- Diary and Sundry Observations of Thomas Alva Edison* (Edison), 188
- Dickson, W.K.L., 149, 151
- Direct current (DC): author's early experience with, 3; Brown's description of utopia powered by, 117; compared to AC, 66, 80; Edison's development of incandescent lamp using, 41–53, 58; experiments on relative dangers of AC vs., 90–91, 92–95, 97–106; in fuel cells, 179–180; introduced into AC power grids, 176–177; Lord Kelvin's preference for, 139, 140; reliance of modern life on, 4, 177; Westinghouse's business ventures with, 79–80. *See also* Batteries; Incandescent lamp
- Direct current (DC) system: debut of, 61–62; early problems with, 63–64; Edison lamp as key element of, 57–58, 59; first American power station using, 59–62, 65; gas companies' attacks on,

- 56–57; Gaulard-Gibbs system vs., 66; increasing number of power plants using, 67, 91, 114; marketing of, 57–58, 65; meter for measuring consumption from, 62–63; safety of, 64; small-town conceptualization of, 121
- Dogs, Brown's experiments on, 90–91, 92–95, 97–106, 115
- Dunkins, Horace, 127
- Durston, Charles, 122
- DVD standards war, 182–183, 185–186
- Dyer, Frank Lewis, 188
- Dynamo: for incandescent bulb, 51; invention of, 12; for Pearl Street power station, 61

E

- Eastman, George, 148
- Edison, Charles, 168
- Edison, Mary, 47
- Edison, Nancy, 25, 27
- Edison, Samuel, 25, 26
- Edison, Thomas Alva: background of, 25–26; battery development by, 156–158, 159–161, 168; changed attitude of, toward General Electric, 168–169; contrast between Tesla and, 69–70, 76, 77–78, 165–166; deafness of, 28–31, 158; death of, 171–172; declining influence of, 131–134; detested Westinghouse, 84, 114; early inventions of, 35–37; early work experiences of, 28, 31–35; education of, 26–28, 29; electrical resistance demonstration by, 96–97; films made by, 150–151, 152–153, 154, 158, 188; fire at laboratory of, 168; "frozen on the circuit" experience of, 34–35; future predicted by, 39, 44, 62, 151, 170; Kemmler execution case testimony by, 123–124; lawsuit against Westinghouse by, for Columbian Exposition light bulb, 135–136; motion picture camera invented by, 146, 147–150; Niagara power plant role of, 139–140; opinion of AC, 66–67, 77, 84–85, 118–120, 131, 170; phonograph invented by, 37–39, 41; present at Brown's demonstration of AC's animal-killing power, 108, 110; Rat Paralyzer invented by, 34; relationship with Brown, 87, 88, 91–92, 102, 103, 112,

- 119, 123, 171; retired from experimenting, 170; sources of information on, 187–188, 189; stubbornness of, 25–26, 120, 133, 151, 155; suggested term “Westinghoused” for executions, 126; as technical adviser on electrocution of elephant, 143, 145–146; Tesla’s work with, 69–70, 75, 76, 77, 84; vacuum tube discovered by, 58–59; working style of, 30, 46–47, 76, 158. *See also* Direct current (DC) system; Incandescent lamp
- Edison: A Biography* (Josephson), 187
- Edison effect, 59
- Edison Electric Light Company: AC patents purchased by, 120; formation of, 45; leasing of DC system of, throughout U.S., 67; New York City electricity generation and distribution system of, 55–65; reduced value of shares of, 50
- Edison General Electric Company: formation of, 131; merged with Thomson-Houston, 131–132, 133–134. *See also* General Electric Company (GE)
- Edison, His Life and Inventions* (Dyer and Martin), 188
- Edison Kinetoscopic Record of a Sneeze, January 7, 1894* (film), 150
- Edison lamp. *See* Incandescent lamp
- Edison Medal, 161–162, 165
- Edison meter, 62–63
- Edison National Historic Site, 189
- Edison Pioneers, 171
- Edison—The Invention of the Movies (1891–1918)* (DVD set), 188
- Education: of Edison, 26–28, 29; Edison’s work on, 169–170; of Tesla, 72–73
- Electric attraction, 9
- Electric car, storage battery for, 155–158, 159–161
- Electric chair: botched electrocutions by, 126–127; film reenacting execution by, 152; Medico-Legal Society’s recommendations on design of, 111–112; Westinghouse AC generators used in first, 115–116. *See also* Electrocution (of criminals)
- Electric field, 10
- Electric force, 9
- Electric motor, DC, 73–74; invention of, 23; Tesla’s AC induction, 74–75, 82–83, 168
- Electric pen, 87
- Electrical current, defined, 5
- Electrical engineer, early use of title, 88
- Electrical resistance, demonstration of, 96–97
- The Electrical Writings of Benjamin Franklin* (Franklin), 187
- Electricity: accidental deaths due to, 3, 88–89, 92, 107, 116, 119; early scientific studies of, 9–11; exhibitions related to, at Columbian Exhibition, 136–139; origin of term, 7, 9; sensation of, in human body, 1–2, 16, 34–35, 139; static, 7, 10–11; universal prevalence of, 5
- Electricity distribution. *See* Alternating current (AC) system; Direct current (DC) system; North American power grid
- Electrocuting an Elephant* (film), 152–153, 154, 188
- Electrocution (of criminals): Brown’s claims linking AC to, 117, 118; first incidence of, 124–126; legal case preceding first, 121–124; New York commission investigating implementing, 96–97, 106–107, 108–112, 115; New York’s law mandating, 96, 114–115; states adopting, 126, 127; term “Westinghoused” suggested for, 126. *See also* Electric chair
- Electrocution (of elephant), 145–146, 152–153, 154, 188
- Electrocution of Czolgosz* (film), 152
- Elephant. *See* Topsy the elephant
- Etruscans, beliefs about lightning, 7–8
- The Execution of Mary, Queen of Scots* (film), 152
- Execution. *See* Electrocution (of criminals)
- Experiments and Observations on Electricity* (Franklin), 19

F

- Faraday, Michael, 22–23, 34, 35
- Ford, Henry, 160–161
- Francis, Willie, 126
- Franklin, Benjamin, 13–22; on beneficial uses of electricity, 23; described sensation of electricity in body, 1–2, 16; electrical stunts of, 14–15; electricity experimentation by, 13–14, 15–17, 21; inscription describing, at Columbian

Exposition, 136–137; lightning experiments by, 13, 17–21; source of information on, 187; at Spencer's demonstrations of "electric magic," 11, 14; terms coined by, 16–17, 22
 "Frozen on the circuit," 2, 34–35
 Fuel cells, 178–179
 Fuller, Melville, 124

G

Gas companies: attacked Edison electrical system, 56–57; Edison's study of, 43–44
 Gaulard, Lucien, 66
 Gaulard-Gibbs system, 66, 81
 General Electric Company (GE): at Columbian Exposition, 135, 137, 138; Edison's changed attitude toward, 168–169; formation of, 133–134; growth of, 173–174; Niagara power plant project role of, 140–141. *See also* Edison General Electric Company
 Generator. *See* Dynamo
George Westinghouse, His Life and Achievements (Leupp), 189
