Part I	Windows XP Overview, Installation, and Startup	1
	Chapter 1: What's New in Windows XP?	3
	Chapter 2: Stand-Alone Installations	15
	Chapter 3: Reaping the Rewards of Network, Automated, and Unattended Installations	31
	Chapter 4: Running Multiple Operating Systems on a Single PC	51
	Chapter 5: Gaining Control of Windows XP Startup and Shutdown	65
Part II	Running and Customizing Windows XP	87
	Chapter 6: Shortcuts for Working in Windows	89
	Chapter 7: Customizing the Interface	107
	Chapter 8: Controlling Windows Explorer	127
	Chapter 9: Controlling Printing	141
	Chapter 10: Command Console Survivor's Guide	159
	Chapter 11: Using and Customizing Help	175
Part III	Managing the System and Applications	187
	Chapter 12: Minimizing the Aches and Pains of Application Installation and Configuration	189
	Chapter 13: Yes, You Can Run Legacy and Non-Windows Applications in Windows XP	199

Chapter 14:	Adding and Removing OS Components	211
Chapter 15:	Using and Customizing MMC Consoles	219
Chapter 16:	It's All About Control: Tools and Techniques for Managing Services	229
Chapter 17:	Monitoring Events	243
Chapter 18:	Monitoring Performance	259
Chapter 19:	Auditing the System	271
Chapter 20:	Using Disk Quotas	285

Part IV	Hardware	297
----------------	-----------------	------------

Chapter 21:	Understanding and Managing the Registry	299
Chapter 22:	Working with Device Manager	313
Chapter 23:	Configuring Hardware	323
Chapter 24:	Using Hardware Profiles	337
Chapter 25:	Managing the File System	343

Part V	Communications and Networking	383
---------------	--------------------------------------	------------

Chapter 26:	Modem and Dial-Up Networking Configuration	385
Chapter 27:	Choosing a Network Topology	405
Chapter 28:	Configuring LAN Connections	415
Chapter 29:	Configuring and Optimizing TCP/IP	433
Chapter 30:	Troubleshooting and Monitoring TCP/IP Connections	455
Chapter 31:	Remote Access, Monitoring, and Management	471
Chapter 32:	Configuring and Sharing Internet Connections	497
Chapter 33:	Supporting Wired or Dial-Up Incoming Connections	511
Chapter 34:	Optional Networking and Management Components	523

Part VI	Internet Applications and Services	535
	Chapter 35: Optimizing Internet Explorer	537
	Chapter 36: Outlook Express	553
	Chapter 37: Hosting Websites	561
	Chapter 38: FrontPage Server Extensions	585
	Chapter 39: Hosting FTP Sites	597
	Chapter 40: Setting Up a Telnet Server	613
Part VII	Managing Users	623
	Chapter 41: Managing Users and Groups	625
	Chapter 42: Understanding Group and Local Policies	639
	Chapter 43: Reining in Users with Policy Restrictions	649
	Chapter 44: Managing User Data and Settings	659
Part VIII	Backup and Disaster Recovery	669
	Chapter 45: Backup	671
	Chapter 46: System Recovery Tools	685
	Chapter 47: Recovery Console	703
Part IX	Security	715
	Chapter 48: Managing Certificates	717
	Chapter 49: Encrypting File System	735
	Chapter 50: IPSec	747
	Chapter 51: VPN Connections	759
	<i>Index</i>	771

Introduction

xxxv

Part I	Windows XP Overview, Installation, and Startup	1
Chapter 1	What's New in Windows XP?	3
	Major Differences between Home Edition and Professional	3
	Access Control	3
	Centralized Administration	4
	Encrypting File System	5
	Group and Local Policies	6
	Multilingual User Interface Add-On	6
	Offline Files	6
	Remote Desktop	7
	Remote Installation Services	8
	Roaming User Profiles	9
	Scalable Processor Support	10
	Software Installation and Maintenance	10
	Major Differences for Windows 9x and Me Users	10
	Security	10
	Multiuser Support and Remote Desktop Connection	11
	Support for Group Policies	12
	Major Differences for Windows NT and 2000 Users	13
	Where to Go for More Details	14
Chapter 2	Stand-Alone Installations	15
	Understanding Upgrade Options	15
	Analyzing and Prepping the System	17
	Using Upgrade Advisor	17

Backing Up Your Data	18	
Preparing the System	21	
Tips for Running Setup	22	
Installing on a Blank System	22	
Understanding Setup Switches	23	
Migrating Applications Manually	24	
Cloning an Existing Installation	26	
Updating the System	27	
Configuring Windows Update	27	
Using the Corporate Update Site	28	
Windows Product Activation	29	
Chapter 3	Reaping the Rewards of Network, Automated, and Unattended Installations	31
Taming Setup with Switches	32	
Specifying the Location of Source Files and Destination	34	
Copying Folders During Setup	35	
Executing Commands After Setup	36	
Prepping a Drive for Another System with /syspart	36	
Managing Dynamic Update	37	
Miscellaneous Switches	37	
Customizing Setup	38	
Overview of Automated and Unattended Setup	38	
Tools for Creating Custom Setup Files	40	
Run Commands with Cmdlines.txt	42	
Running Applications Once after Setup with [GuiRunOnce]	42	
Using Sysprep	43	
Integrating Service Packs in a Slipstream Installation	44	
Deploying Windows XP with RIS	45	
More Information on RIS	47	
Other Installation Methods	47	
Systems Management Server (SMS)	47	
Symantec Ghost	48	
PowerQuest DeployCenter	49	
Chapter 4	Running Multiple Operating Systems on a Single PC	51
Understanding Advantages and Limitations	52	

File System Considerations	53
FAT32 Issues	53
Converting and Resizing Partitions	54
NTFS Issues	54
Reading NTFS Volumes from Windows 9x and Me	54
Choosing the Installation Order	55
Where Should You Install?	55
Cloning Existing OS Installations	56
Global Registry Search and Replace	57
Cloning Windows 9x or Me	57
Cloning Windows NT or 2000	59
Configuring Boot Options	60
Using Third-Party Boot Managers	61
PowerQuest BootMagic	61
V Communications System Commander 7	61
Running Multiple Operating Systems	61
VMware	63
Connectix Virtual PC	63
Chapter 5	
Gaining Control of Windows XP Startup and Shutdown	65
Configuring Boot and Recovery Options in the GUI	66
Setting System Startup Options	66
Setting System Failure Options	68
Setting Startup and Failure Options Remotely	69
Setting Startup Options in Boot.ini Manually	71
Modifying Boot.ini	71
Modifying Boot.ini Settings	72
Modifying Boot.ini with Bootcfg	76
Working with the Startup Folder	77
Defining the Location of the Startup Group	77
Bypassing the Startup Group	81
Alternatives to the Startup Folder	82
Startup and Shutdown Scripts	82
Controlling Script Execution	84
Restricting Shutdown	85

Part II	Running and Customizing Windows XP	87
Chapter 6	Shortcuts for Working in Windows	89
	Working with Shortcut Files	89
	Changing the My Computer Icon Label	90
	Preventing a Name Change	91
	Working with Applications	91
	Registry Changes to Affect Startup Behavior	92
	The System Configuration Utility	93
	Making Quick Interface Changes	94
	Customizing the Send To Menu	94
	Customizing the Places Bar in the Open Dialog Box	96
	Using Command Keys with Folders	98
	Using the Ctrl and Shift Keys	99
	Using the Windows Key	100
	Adding Context Menu Items	100
	Working with the Recycle Bin	101
	Eliminating Confirmation of Delete Operations	102
	Changing the Size of the Recycle Bin	104
	Shortcut Grab-Bag	104
	Speeding Up Menu Display	105
	Putting Familiar Icons Back Where They Belong	105
	Changing the Contents of Details Shown	106
Chapter 7	Customizing the Interface	107
	The Start Menu	107
	Going Back to the Classic Start Menu	110
	Rearranging the Start Menu	110
	Adding Other Content to the Start Menu	115
	Making Changes to Context Menus	116
	The Taskbar	116
	Customizing the Taskbar and Toolbars	117
	Modifying Taskbar Display Options	118
	Mapping a Drive with the Toolbar	121
	The Desktop	121
	Changing the Look and Feel of the Desktop	122
	Choosing a Desktop Theme	122

	Changing Fonts	123
	Changing the Background	124
Chapter 8	Controlling Windows Explorer	127
	What Is Windows Explorer?	127
	Working with Explorer Views	129
	Understanding the New Views	130
	Using the Same View for All Folders	132
	Sorting Icons	133
	Opening Explorer for Specific Targets	133
	Controlling the Explorer Bar's Contents	134
	The Search Bar	134
	The Favorites Bar	135
	The Media Bar	135
	The History Bar	136
	The Folders Bar	136
	Navigating the Folder Structure	136
	Configuring Toolbars	137
	Customizing Explorer	138
	Using Tweak UI	139
	Using Windows Blinds	139
	Using Microsoft Plus! for Windows XP	140
Chapter 9	Controlling Printing	141
	Printing Primer	141
	Quick Printing Tips	144
	Managing Printers	144
	Hours of Availability	146
	Pooling and Priority	146
	The Print Queue	147
	Spooling	148
	Network Printing	149
	Making a Printer Available on the Network	149
	Connecting to a Network Printer	150
	Setting Permissions on Network Printers	151
	Network Interface Printing	152
	Redirecting Print Jobs	154
	Internet Printing	154

Chapter 10	Command Console Survivor's Guide	159
	Getting Started with the Command Prompt	159
	Using the Command Prompt's Online Help	161
	The Difference between Using cmd.exe and command.com	162
	Tips for Using Console Commands	162
	The dir /x Command	163
	The dir /q Command	163
	The dir /t Command	163
	The dir /o Command	164
	Using AutoComplete	164
	Controlling Command Execution	166
	Setting Console Properties and Startup	167
	The Command Console and the Clipboard	171
	Tips for Specific Console Commands	172
	Command-Line Recovery Tools	172
	Using the tree Command	173
	Changing the Prompt	173
Chapter 11	Using and Customizing Help	175
	Working with the Help And Support Center and Adding and Customizing Content	175
	The Home Page	176
	The Toolbar	178
	The Scenic Route	180
	Customizing the Appearance of the Help and Support Center	180
	Getting Help on the Web	182
	Adding New Content	183
	Creating Custom Content	184
Part III	Managing the System and Applications	187
Chapter 12	Minimizing the Aches and Pains of Application Installation and Configuration	189
	Tips for Installing and Uninstalling Applications	190
	Cleaning Up Improperly Uninstalled Applications	191
	Using the Files and Settings Transfer Wizard	193

	Moving Applications Between Computers Manually	196
	Deploying Applications with IntelliMirror	196
	What Do You Need?	198
Chapter 13	Yes, You Can Run Legacy and Non-Windows Applications in Windows XP	199
	Using the Program Compatibility Wizard	199
	Basic Compatibility Options	200
	Advanced Compatibility Options	201
	Compatibility Modes	202
	Customizing and Extending Compatibility Features	203
	Using Virtual Machines to Run Applications	209
	Accessing Unix and Linux Hosts	209
Chapter 14	Adding and Removing OS Components	211
	Adding and Removing Components	211
	Adding Components	212
	Removing Components	212
	Extending the List of Components in the Windows Component Wizard	213
	Installing Service Packs and Updates	214
	Using Windows Update	214
	Running Windows Update Manually	217
	Preventing Users from Using Windows Update	218
Chapter 15	Using and Customizing MMC Consoles	219
	Working with the MMC	220
	Creating a Custom MMC Console	221
	User Mode versus Author Mode	223
	Creating and Using Taskpads	225
Chapter 16	It's All About Control: Tools and Techniques for Managing Services	229
	Overview of Services	229
	Tips for Working in the Services Console	230
	Managing the View	231
	Exporting the List of Services	232
	Configuring Service Startup	232

Configuring Service Logon	234
Configuring Recovery Options	235
Service Failure Options	236
The Run A Program Option	236
The Restart The Computer Option	237
Managing Services Remotely	237
Configuring Remote Service with the Services Console	238
Managing Remote Services from a Console	238
Managing Services with Remote Desktop Connection	239
Using Remote Assistance to Manage Services	240
Managing Services from a Console	240
Managing Services in a Windows XP Session	240
Managing Services from Recovery Console	241
Chapter 17	Monitoring Events
	243
Tips for Working in the Event Viewer	243
Managing the View	246
Filtering the List	247
Using Multiple Views of a Log	247
Managing Log Settings	248
Managing Log Files	249
Clearing and Saving Logs	249
Exporting Logs to Other Programs	250
Troubleshooting STOP Messages	251
Third-Party Event Management Applications	252
Using Dr. Watson	253
How It Works	253
Installing Debugging Symbols	254
Configuring Dr. Watson	255
Collecting and Submitting the Data	257
Chapter 18	Monitoring Performance
	259
Before You Monitor Performance	260
Using System Monitor to Check Real-Time Performance	260
Configuring System Monitor	261
Using Performance Logs And Alerts	264
Setting Up Counter Logs	264

Setting Up Trace Logs	265	
Setting Up Alerts	266	
Monitoring for Specific Performance Issues	267	
Third-Party Monitoring and Performance Tuning Applications	268	
Get the Right Tool for the Tuning Job	268	
Optimization Tool Profile	269	
Chapter 19	Auditing the System	271
<hr/>		
Understanding Auditing	271	
Enabling Auditing	273	
Auditing Object Access	275	
Auditing Folder and File Access	275	
Auditing Printer Access	278	
Auditing Registry Access	278	
Tips for Effective Auditing	280	
What to Audit for Optimum Security	281	
Dictionary, Hybrid, or Brute-Force Password Attack	281	
Entry Using a Stolen Password	282	
User Using a Computer They're Not Authorized to Use	282	
Misuse of User Privileges	282	
Misuse of Administrator Privileges	282	
File Security Breaches	283	
Printer Efficiency and Security	283	
User Running Unauthorized Programs/User Monitoring	283	
Virus Threat	283	
Chapter 20	Using Disk Quotas	285
<hr/>		
Applying Quotas to a Disk	285	
Setting Global Quota Settings	286	
Setting Quota Limits for a User	288	
Copying Quotas from Volume to Volume	289	
Setting Quotas on Remote Volumes	290	
How Compression Affects Quotas	290	
How Conversion Affects Quotas	290	
How Ownership Affects Quotas	291	
Applying Folder-Specific Quotas with Mounted Volumes	291	

Chapter 23	Configuring Hardware	323
	Working with Drivers	323
	Understanding Drivers	324
	Viewing Device Driver Properties	324
	Getting Device Information with driverquery	325
	Driver Compatibility	328
	Updating/Replacing Device Drivers	328
	Rolling Back after an Upgrade	329
	Uninstalling a Driver	329
	Signed vs. Unsigned Drivers	330
	Stopping and Starting Device Drivers	332
	Managing Plug and Play	332
	PnP Device Installation	333
	Managing Devices	334
	Enabling and Disabling Devices	334
	Device Resource Use	334
	Managing Hidden Devices	336
Chapter 24	Using Hardware Profiles	337
	Working with Hardware Profiles	337
	Changing Profile Properties	338
	Creating Profiles	339
	Enabling and Disabling Devices for a Specific Profile	340
Chapter 25	Managing the File System	343
	Choosing the Best File System	344
	File Allocation Table (FAT)	344
	New Technology File System (NTFS)	345
	Configuring Disks and Volumes	347
	Understanding Basic and Dynamic Disks	348
	Converting Between Basic and Dynamic Disks	349
	Creating and Activating Partitions	350
	Changing Drive Letter or Path	351
	Formatting Volumes	351
	Converting Between FAT and NTFS	353
	Optimizing Disk Performance	355
	Disk Capacity and Fragmentation	356

Tips for Defragmenting Disks	357
Using Disk Compression on NTFS Volumes	358
Working with Zipped Folders and Files	361
Managing Volumes from a Console	362
The fsutil Command	362
The diskpart Command	365
Using Mounted Volumes	368
Creating and Managing Advanced Volumes	370
Managing Spanned Volumes	370
Managing Striped Volumes	373
Understanding and Implementing Sharing	373
Understanding File Sharing Options	373
Sharing and Securing Folders and Files	376
Hiding Shares	380
Command-Line Tools for Sharing	381

Part V Communications and Networking 383

Chapter 26	Modem and Dial-Up Networking Configuration	385
	Modem Configuration Tips	385
	The Standard Modem	386
	Performing Diagnostics and Logging	386
	Using Additional Configuration Strings	389
	Configuring Dial-Up Connections	390
	Setting Dialing Rules	390
	Choosing Authentication Settings	395
	Scripting	400
	Using Callback for Security and Cost	401
	Improving Performance with Multilink	402
	Setting Up a Multilink Connection	402
	Dynamic Multilink Connections with BAP/BACP	403
Chapter 27	Choosing a Network Topology	405
	Wired Options and General Network Considerations	405
	Wireless Options	409
	Networking for Internet Performance	410

Hardware Considerations	411	
Network Interface Cards (NICs)	411	
Hubs and Switches	412	
Tips and Tools for Cabling	413	
Chapter 28	Configuring LAN Connections	415
<hr/>		
Managing the Network Connections Folder	415	
Changing the View	416	
Simplifying the Folder for Multiple Adapters	417	
Configuring Adapters	418	
Choosing Protocols	419	
NetBEUI	420	
TCP/IP	420	
IPX/SPX	421	
Working with Network Clients	421	
Client for Microsoft Networks	422	
Client Service for NetWare	423	
Setting Advanced Network Properties	424	
Controlling Bindings	424	
Setting Provider Order	425	
Bridging Connections	426	
Securing a Wireless Network	428	
Chapter 29	Configuring and Optimizing TCP/IP	433
<hr/>		
TCP/IP Overview	433	
Configuring TCP/IP	434	
Internet Protocol Addressing	435	
IP Address Types	436	
IP Address Assignment Methods	437	
Manual IP Addressing	438	
Automatic IP Addressing	440	
Configuring for a Default Gateway	442	
TCP/IP-Based Name Resolution	443	
Using DNS	444	
Using WINS	445	
Using a HOSTS File	447	
Using an LMHOSTS File	447	

Other TCP/IP Properties and Tools	448	
Using Multiple Gateways	448	
Using TCP/IP Filtering	448	
Using Class IDs	449	
Using IPConfig	450	
Switching between Network Settings	452	
Chapter 30	Troubleshooting and Monitoring TCP/IP Connections	455
Internet Control Message Protocol (ICMP)	456	
TCP/IP Commands	457	
ping	458	
pathping	459	
tracert	461	
arp	461	
netstat	462	
hostname	464	
route	464	
nbtstat	466	
netsh	467	
Third-Party TCP/IP Monitoring and Troubleshooting Utilities	468	
Chapter 31	Remote Access, Monitoring, and Management	471
Remote Access Overview	472	
Managing and Securing Remote Access	472	
Adding the Terminal Services Snap-In	473	
Requiring Password Authentication	474	
Choosing Encryption	475	
Disabling Redirection	475	
About Firewalls and Remote Access	475	
Remote Desktop Connection	476	
Remote Desktop Connection Requirements	477	
Installing Remote Desktop Connection Manually	477	
Configuring Remote Desktop Connection	478	
Loading Remote Desktop Connection	481	
Adding and Removing Users to Remote Desktop Connections	481	
Managing Remote Systems Using Terminal Services	483	

Remote Desktop Web Connection	488	
Installing Remote Desktop Web Connection	489	
Configuring Remote Desktop Web Connection	490	
Using Remote Desktop Web Connection	491	
Troubleshooting Remote Desktop	493	
Can't Logon	494	
Remote Desktop Can't Find XP System	494	
Can't Run Programs Remotely	494	
Third-Party Remote Control Applications	495	
Using pcAnywhere	495	
Using Virtual Network Computing (VNC)	496	
Chapter 32	Configuring and Sharing Internet Connections	497
<hr/>		
Options for Sharing Internet Connections	498	
Internet Connection Sharing	498	
Sharing through a Router	502	
Configuring Clients to Access the Shared Connection	504	
Assigning Addresses	504	
Configuring Client Timeout	504	
Firewalls, NAT, and Security Planning	505	
Windows XP's Built-In Firewall	505	
Third-Party Software-Based Firewalls	508	
Hardware-Based Firewalls	509	
Enabling Routing on a Multihomed System	510	
Chapter 33	Supporting Wired or Dial-Up Incoming Connections	511
<hr/>		
Configuring Incoming Dial-Up Connections	511	
Understanding the Security Risks	512	
Setting Up the Connection and Using Callback	513	
Controlling Access to the Network	515	
Configuring Incoming Hardwired Connections	516	
Network Adapters and Crossover Cables	517	
USB-to-USB Connections	517	
Serial or Parallel Port Connections	517	
Using Infrared Devices and Connections	521	
Using an Infrared Link	521	
Using an Infrared Direct Connection	522	

Chapter 34	Optional Networking and Management Components	523
	RIP Listener	524
	Simple TCP/IP Services	526
	SNMP Service	526
	Installing the SNMP Services	527
	Configuring SNMP	527
	Setting SNMP Properties with Group Policy	531
	Print Services for Unix	532
	Universal Plug and Play	532
Part VI	Internet Applications and Services	535
Chapter 35	Optimizing Internet Explorer	537
	Optimizing IE Advanced Settings	537
	Working with AutoComplete	538
	Configuring Advanced Settings	540
	Optimizing Internet Explorer Security	541
	Content Zones and Security Settings	541
	Working with Advanced Security Settings	544
	Managing Cookies	544
	Adjusting Cookie Security	545
	Overriding Windows XP Cookie Management	546
	Working with Content Advisor	547
	Enabling and Configuring Content Advisor	548
	Resetting a Lost Content Advisor Password	549
	Internet Explorer Add-Ons	550
Chapter 36	Outlook Express	553
	Account Management in Outlook Express	553
	Importing Accounts and Messages	553
	Using and Managing Identities in Outlook Express	556
	Using Outlook Express for Special Mail Accounts	557
	Using Outlook Express with Your Hotmail Account	558
	Using Outlook Express with Your Online Service Mail Accounts	559

Chapter 37	Hosting Websites	561
	Overview of Internet Services in Windows XP	562
	The World Wide Web Service	562
	File Transfer Protocol Service	562
	SMTP Service	563
	Hosting a Website	563
	Installing IIS	563
	Setting Up the Site	564
	Setting Up Multiple Sites	569
	Providing Site Security	571
	General Site Security	571
	Anonymous Versus Authenticated Access	572
	Restricting Access to Specific Pages or Folders	573
	Restricting Access by Address or Domain	573
	Using SSL to Secure a Site	574
	Using Custom Error Pages	579
	Using Counters	580
	Using Perl and Other Server-Side Applications	580
	E-Mailing Form Results	582
	E-Mail Forms from FrontPage	582
	E-Mail from Non-FrontPage Sites	583
Chapter 38	FrontPage Server Extensions	585
	Why FrontPage Extensions?	585
	The FrontPage MMC and Other Administrative Tools	587
	Installing and Configuring FrontPage Server Extensions	589
	Using Web Folders	591
	Administering the FrontPage Server Extensions	593
	Alternatives to FrontPage	594
Chapter 39	Hosting FTP Sites	597
	Hosting an FTP Site	597
	Configuring the Default FTP Site	598
	Adding Virtual Directories	606
	Providing Site Security	607
	Tips for Dealing with Miscreants	609
	Third-Party FTP Applications	610

Chapter 40	Setting Up a Telnet Server	613
	Setting Up a Telnet Server	613
	Starting the Service	614
	Setting the Logon Banner	614
	Changing the Home Directory	615
	Running User-Specific Startup Scripts	616
	Configuring System Security	617
	Protecting Your System	618
	Setting Up Accounts	618
	Using the Telnet Administrator	619
	Managing Sessions	619
	Configuring the Server	620
	Managing a Remote Server	621
	Third-Party Telnet Applications	622

Part VII	Managing Users	623
-----------------	-----------------------	------------

Chapter 41	Managing Users and Groups	625
	Understanding Groups	626
	Local and Domain Groups	626
	Creating and Managing Local Users and Groups	628
	Creating and Managing Groups	628
	Creating and Managing User Accounts	631
	Other User Management Tasks	633
	Recovering from Lost Passwords	635
	Managing Users and Groups from a Console	637
	Fast User Switching	638
Chapter 42	Understanding Group and Local Policies	639
	Overview of Group and Local Policies	639
	Working with the Group Policy Console	641
	Computer Configuration	645
	Software Settings	645
	Windows Settings	645
	Administrative Templates	646

User Configuration	647	
Windows Settings	647	
Administrative Templates	648	
Chapter 43	Reining in Users with Policy Restrictions	649
<hr/>		
Applying System and Hardware Restrictions	650	
Disk Quotas	650	
Remote Assistance	651	
System Restore	651	
Simple Network Management Protocol (SNMP)	652	
Windows Explorer	652	
Microsoft Management Console (MMC)	653	
Windows Update	653	
Ctrl+Alt+Delete	653	
Applying Software Restrictions	654	
NetMeeting	654	
Internet Explorer	654	
Windows Installer	655	
Windows Messenger	655	
Media Player	655	
Applying Desktop and Environment Restrictions	655	
Start Menu and Taskbar	656	
Active Desktop	656	
Control Panel	656	
Offline Files	657	
Network Connections	657	
Configuring Time	657	
Chapter 44	Managing User Data and Settings	659
<hr/>		
Redirecting Folders	659	
Redirection Options	660	
Setting Up Redirection	661	
Working with User Profiles	663	
Understanding Profiles	663	
Setting Up a Roaming Profile	664	
Setting Up a Mandatory Profile	665	

Applying Logon and Logoff Scripts	665
Where to Store the Scripts	665
Policy-Based Scripts	666
Account-Based Scripts	667
Controlling Script Execution	667
Alternatives to Logon Scripts	668

Part VIII Backup and Disaster Recovery 669

Chapter 45 Backup 671

Backup Utility Basics	671
What About Transferring Backups to a CD?	672
What About Backing Up Directly to a CD?	673
Where Is the Backup Utility in Windows XP Home Edition?	674
Creating an Automated System Recovery Disk	674
Backing Up System State Data	675
Automating Backup	676
Importing Other Backup Sets	677
Using System Restore	678
Using Third-Party Backup Applications	680
Planning a Disaster Recovery Strategy	682
How IntelliMirror Can Provide Easy Recovery	683

Chapter 46 System Recovery Tools 685

Which Recovery or Repair Tool Should You Use When?	685
Recovering Data from a Backup Set	687
Rolling Back a Driver	689
Uninstalling and Reinstalling Programs	689
Using System Restore	689
Who Can Run System Restore	689
When Restore Points Are Created	689
When Restore Points Are Deleted	690
What's Protected and What's Not	691
System Restore Quirks	691
Taming the Disk Hog	692
Examining Your Restore Points	692
Locking Down System Restore	693

“Restoration Incomplete” Error Message	693	
How System Restore Handles Passwords	694	
Checking that System Restore Is Running	694	
When Restoration Fails	694	
Last Known Good Configuration	694	
Performing a Clean Boot	695	
Recovery with ASR	696	
Creating Your ASR Backup Set	696	
Using ASR	697	
What the ASR Disk Contains	697	
Recreating an ASR Disk	697	
Recovering Systems Remotely	698	
Manual Recovery Methods	699	
Installing a Parallel Copy of Windows XP	699	
Disabling Problem Services	699	
Reinstalling Windows XP	699	
Restoring Files with the Recovery Console	701	
Chapter 47	Recovery Console	703
<hr/>		
Overview of Recovery Console	703	
Launching Recovery Console	704	
Before You Use Recovery Console	705	
The Two Ways to Launch Recovery Console	705	
Using Recovery Console	707	
Recovery Console Commands	708	
Examples of Recovery Console Command Usage	710	
Administering Recovery Console through Policy Setting	711	
Part IX	Security	715
<hr/>		
Chapter 48	Managing Certificates	717
<hr/>		
Understanding Certificates	717	
What Is a Certificate?	717	
What Is a Certification Authority?	717	
How Do Certificates Work?	718	
What Does a Certificate Prove?	718	
Weaknesses of Digital Certificates	719	

What Are Certificates Good For?	721	
Where Are Certificates Stored?	721	
Using the Certificates Console	721	
Viewing the Certificate Stores	722	
Finding a Certificate	723	
Managing Certificates with Internet Explorer	723	
Viewing a Certificate	724	
Editing a Certificate	726	
Obtaining a Certificate	726	
Obtaining a Certificate from a Public CA	727	
Obtaining a Certificate from a Company CA	729	
Exporting and Importing Certificates	730	
Certificate File Formats	730	
Exporting a Certificate	731	
Importing a Certificate	732	
Updating the Root Certificates	732	
Chapter 49	Encrypting File System	735
Overview of EFS	735	
How Does EFS Work?	735	
What You Can and Can't Encrypt	736	
How Encrypted Files and Folders Behave	736	
(Why) Should You Use EFS?	737	
Why Must You Be Careful with EFS?	737	
Tips for Implementing EFS for Maximum Protection	738	
Encrypting Files and Folders	740	
Encrypting and Decrypting with the Cipher Command	741	
Sharing Encrypted Data	742	
Sharing an Encrypted File with Other Users	742	
Using Your Encrypted Files from Another Computer	743	
Disabling and Enabling EFS	743	
Planning and Implementing an EFS Recovery Policy	743	
Creating a Recovery Agent Certificate	744	
Designating a Recovery Agent	744	
Keeping Your Encryption and Recovery Certificates Safe	745	
Recovering Encrypted Data	745	

Chapter 50	IPSec	747
	Understanding IPSec	747
	What IPSec Is	747
	How to Use IPSec	748
	When to Use IPSec	748
	Requirements for Using IPSec	749
	Overview of Preconfigured Policies	751
	Modifying Existing IPSec Policies	751
	Creating New IPSec Policies	754
	Assigning IPSec Policies	755
	Managing Global Filters	755
	Using TCP/IP Filtering	756
Chapter 51	VPN Connections	759
	Understanding Virtual Private Network Connections	759
	What VPN Connections Are	759
	How VPN Connections Work	759
	What VPN Connections Are Used For	760
	Creating Outgoing VPN Connections	761
	Connecting to a VPN Connection	762
	Configuring Incoming VPN Connections	762
	Incoming Connection on an XP Computer with an Internet Connection	763
	Incoming PPTP Connection via ICS	765
	Incoming Connection on a Windows 2000 Server	765
	Implementing Optimum Security on Your VPN Connections	766
	Restrict VPN Users to a Minimum	766
	Prefer L2TP to PPTP	766
	Close All Unnecessary VPN Ports	766
	Require Encryption on Passwords and Data	767
	Use Strong Authentication—Preferably EAP	767
	Use DHCP or Configure a Static IP Address Pool	767
	Create Input and Output Filters	767
	<i>Index</i>	771
