

Contents

<i>Introduction</i>	<i>xiv</i>
Chapter 1 • The Computer's Brain: Processors and Memory	1
Processor Performance	2
Processor Types: A First Look	2
Deciphering Processor Terminology	3
The Intel Processor Lineup	4
Factors Affecting Performance	5
History of Intel Chips	6
The First Generation: 8086 and 8088	7
The Second Generation: 80286	7
The Third Generation: 80386	8
The Fourth Generation: 80486	9
The Next Generations: The Pentium Family	9
Stacking Up the Competition	13
Advanced Micro Devices (AMD)	13
Cyril	14
PowerPC	15
Alpha	15
Using Multiprocessor Computers	16
Physical Memory	17
Random Access Memory (RAM)	18
Read-Only Memory (ROM)	18
RAM Types	18
RAM Speed	20
Other ROM Types	20
Bus Architecture	21
Bus Types	22
Chapter 2 • Storing Your Files: Data Storage	27
Keys to Data Storage	28
Understanding Hard Drive Basics	30
Selecting a Hard Drive	30
Performance with IDE Drives	31
IDE Interface Standards	34
Performance with SCSI Drives	36
SCSI Standards	37
SCSI Termination	38

Organizing Disks	39
Understanding Partition Types	41
Active and Boot Partitions	41
Primary Partition	41
Extended Partition	41
A Primer on Disk Drive Configurations	42
Volume Set	43
Disk Stripe Set	44
Mirrored Set	46
Stripe Set with Parity Drive	47
Stripe Set with Parity Stripe	47
Types of Offline Data Storage	49
Floppy Drives	50
Removable Disk Drives	50
Compact Discs	51
Digital Videodiscs	53
Tape Drives	54
Chapter 3 • Data Movement: Input/Output Devices	59
Understanding Serial Ports	60
Understanding Parallel Ports	61
Understanding USB Ports	62
How USB Works	62
Understanding Monitors	63
Video Display Adapter Standards	64
Liquid Crystal Display	65
Using a Keyboard	66
Using a Mouse	67
Making Remote Connections	68
Analog Modems	69
Digital Subscriber Line (DSL)	70
Cable Modems	72
ISDN	73
Choosing a Printer	74
Laser Printers: The Workhorses	75
Choosing PC Cards	76
Bus Standards	76

Chapter 4 • Hardware Configuration	81
Installing Hardware	82
Installing Software Drivers	83
Handling Interrupts	84
Using Base Memory	86
Identifying System Resources	87
Using I/O Memory	88
Using DMA	90
Chapter 5 • Desktop Operating Systems: A Comparison	95
Understanding DOS	96
DOS 1.x	96
DOS 2.x	96
DOS 3.x	97
DOS 4.x	97
DOS 5.x	97
DOS 6.x	97
Understanding Windows	98
Windows 95	99
Windows 98	100
Windows Me	101
The Business Solution: Windows NT Workstation 4	101
Windows 2000 Professional	102
The Latest Generation: Windows XP Home Edition and XP Professional	103
Understanding Unix and Linux	105
Unix	105
Linux	105
Dual-Booting between OSs	106
Tips for Creating a Dual-Boot Configuration	107
Chapter 6 • DOS 101: DOS Basics Every MCSA and MCSE Should Know	111
Organizing Your Disks	112
Partitioning Your Hard Drive	113
Formatting Your Disks	114
Preparing a Boot Disk	115
Creating a Directory Structure	116

Manipulating the Directory Structure	116
Listing Directories, Subdirectories, and Files	117
Creating and Deleting Directories	118
Changing Directories	119
Manipulating Files	120
Creating a Text File from the Console	120
Displaying the Contents of a File	121
Editing Text Documents	122
Deleting a File	123
Renaming a File	124
Using the DOS Wildcards	125
Copying and Moving Files	126
Setting File Attributes	128
Changing the Time and Date	130
Using Some Timesavers	131
Using the DOS Configuration Files	132
CONFIG.SYS	133
AUTOEXEC.BAT	133
BOOT.INI	134
Chapter 7 • Graphical Interface: Windows Basics	139
A Quick Introduction	140
Introduction to the Windows XP Professional Desktop	142
Using the Start Button	144
All Programs	145
Search	145
Help and Support	146
Run	147
Log Off	148
Shut Down	148
Managing the Computer's Settings: Appearance and Themes	148
Accessing the My Computer Window	154
Accessing Network Resources	157
Using the Recycle Bin	157
Creating Shortcuts	158
Using Wizards	159
Using Windows Explorer	159

Chapter 8 • A Communications Framework	163
Understanding OSI Model Basics	164
Data Transfer in the OSI Model	166
Layer 1: The Physical Layer	168
Physical Layer Technologies	169
Physical Layer Hardware	169
Layer 2: The Data-Link Layer	170
Frame Description	170
Sublayers of Data-Link	171
Data-Link Layer Devices	171
Layer 3: The Network Layer	172
Network Layer Example	172
Layer 4: The Transport Layer	173
Other Transport Layer Functions	174
Network and Transport Layer Technologies	174
Layer 5: The Session Layer	175
Creating a Connection	175
Transferring Data and Using Dialog Control	176
Terminating a Connection	176
Layer 6: The Presentation Layer	176
Character Code Translation	177
Data Encryption	177
Data Compression and Expansion	178
Layer 7: The Application Layer	178
Service Advertisement	179
Service Processing	179
Chapter 9 • Network Models	183
Considering Peer-to-Peer Networks	184
When Appropriate	185
Common OS Examples	185
Viewing Network Configurations for	
Windows XP Computers	186
Considering Client-Server Networks	189
When Appropriate	190
Common OS Examples	191
Considering the Domain Model	191
When Appropriate	192
Common OS Examples	193

Considering the Directory Services Model	193
When Appropriate	195
Chapter 10 • Data-Link and Network Layer Protocols	199
Introduction to Topologies	200
Star Topology	200
Bus Topology	202
Ring Topology	203
Ethernet Communication Architecture	204
Benefits	205
Drawbacks	205
Ethernet Standards	206
Ethernet Hardware	208
Using TCP/IP	209
IP Addressing	212
IP Configuration	213
The Function of DHCP in an IP Network	214
The Function of DNS in an IP Network	215
Using IPX/SPX	216
Chapter 11 • Network Operating Systems: A Comparison	221
Introduction to an NOS	222
What to Look for in an NOS	222
Windows NT 4 Server	223
When to Choose NT 4 Server	224
Windows 2000 Server	224
When to Choose Windows 2000 Server	225
Windows Server 2003	225
When to Choose Windows Server 2003	226
Novell NetWare	226
NetWare 3.x	226
NetWare 4.x	227
NetWare 5.x and 6.x	227
When to Choose NetWare	228
Unix Servers	228
When to Choose Unix	228
Linux	229
When to Choose Linux	229

Chapter 12 • Windows Server 2003 Origins and Platforms	233
Understanding the Origins of Windows NT	234
Provide Flexibility in OS Code	234
Offer High Performance	234
Be Reliable	235
Use Portable Code	235
Be Compatible with Existing Standards	235
Understanding NT 3.x	236
NT 3.1	236
NT 3.5	236
NT 3.51	237
Understanding NT 4	238
NT Server 4	238
NT Server/E 4	239
Understanding Windows 2000	240
Understanding Windows Server 2003	241
Windows Server 2003 System Requirements	242
Windows Server 2003 Server Family Features	243
Chapter 13 • Windows Server 2003 Active Directory	247
Features of the Active Directory	248
Structure of the Active Directory	249
Windows 2000 and Windows Server 2003 Domains	251
Organizational Units (OUs)	252
Trees and Forests	253
Windows 2000 and Windows Server 2003 Trusts	256
The Physical Network	258
Sites	259
Domain Controllers	259
Specialized Domain Controllers	261
Chapter 14 • Account Management	267
Structuring the Active Directory	268
Organizational Units	268
Groups	269
Types of Groups	270
Creating a Group	273
Configuring a Group	273

User Accounts	274
Creating User Accounts	275
Configuring User Accounts	277
Chapter 15 • File and Print Management	281
Sharing Folders	282
Creating a New Share	283
Applying Permissions for Accessing Folders	284
Assigning Permissions to Users and Groups	284
Applying Share Permissions	285
Using NTFS	287
Selecting a File System	288
Understanding the Basics of NTFS	289
Assigning NTFS Permissions	290
Applying NTFS Permissions	292
Understanding Share and NTFS Permission Interaction	294
Accessing Resources	295
Sharing Printers	296
Understanding Network Printing Basics	296
Creating a Printer	298
Configuring Printer Properties	299
Establishing Print Permissions	301
Appendix A • Answers to Review Questions	305
Chapter 1	306
Chapter 2	307
Chapter 3	308
Chapter 4	308
Chapter 5	309
Chapter 6	310
Chapter 7	311
Chapter 8	311
Chapter 9	312
Chapter 10	313
Chapter 11	313
Chapter 12	314
Chapter 13	315

Contents

Chapter 14	315
Chapter 15	316
Appendix B • Glossary	317
Appendix C • Common Acronyms	335
<i>Index</i>	<i>340</i>
