Preface	xi
Acknowledgements	xvii
About the Author	xix
1 Introduction	1
1.1 Discrete Distributions in General	1
1.2 Multivariate Discrete Distributions	4
1.3 Binomial Distribution	5
1.4 The Multinomial Distribution	8
1.5 Poisson Distribution	10
1.6 Negative Binomial Distribution	13
1.7 Hypergeometric Distribution	17
1.7.1 Negative hypergeometric distribution	19
1.7.2 Extended hypergeometric distribution	20
1.8 Stirling's Approximation	23
2 Maximum Negative Binomial Distribution	25
2.1 Introduction	26
2.1.1 Outfitting the ark	29
2.1.2 Medical screening application	30
2.2 Elementary Properties	33
2.2.1 Shapes of the distribution	34
2.2.2 Moments of the distribution	36
2.2.3 Modes of the distribution	38
2.3 Asymptotic Approximations	39
2.3.1 Large values of c and $p \neq 1/2$	40
2.3.2 Large values of c and $p = 1/2$	42
2.3.3 Extreme values of p	43
2.4 Estimation of p	44
2.4.1 The likelihood function	45
2.4.2 The EM estimate	49
2.4.3 A Bayesian estimate of p	52

2.5 Programs and Numerical Results 53

2.6 Appendix: The Likelihood Kernel 55

3 The Maximum Negative Hypergeometric Distribution 57

3.1 Introduction 57

3.2 The Distribution 60

3.3 Properties and Approximations 61

3.3.1 Modes of the distribution 65

3.3.2 A gamma approximation 66

3.3.3 A half-normal approximation 67

3.3.4 A normal approximation 68

3.4 Estimation 68

3.5 Appendix 72

3.5.1 The half-normal approximation 72

3.5.2 The normal approximate distribution 73

4 Univariate Discrete Distributions for Use with Twins 77

4.1 Introduction 79

4.2 The Univariate Twins Distribution 80

4.3 Measures of Association in Twins 84

4.4 The Danish Twin Registry 88

4.4.1 Estimate of the effect 90

4.4.2 Approximations 92

4.5 Appendix 93

4.5.1 The univariate twins distribution 93

4.5.2 Approximating distributions 94

4.6 Programs for the Univariate Twins Distribution 97

5 Multivariate Distributions for Twins 103

5.1 Introduction 103

5.2 Conditional Distributions 105

5.2.1 Univariate conditional distribution 105

5.2.2 Conditional association measure 109

5.3 Conditional inference for the Danish twins 111

5.4 Simultaneous Multivariate Distributions 115

5.5 Multivariate Examination of the Twins 118

5.6 Infinitesimal Multivariate Methods 119

5.6.1 Models with no dependence 120

5.6.2 Models for dependence 121

5.6.3 The infinitesimal data 124

5.7 Computer Programs 125

5.7.1 Conditional distribution and association models in SAS . . 125

5.7.2 Fortran program for multivariate inference 132

6	Frequency Models for Family Disease Clusters	141
6.1	Introduction	142
6.1.1	Examples	143
6.1.2	Sampling methods employed	146
6.1.3	Incidence and clustering	147
6.2	Exact Inference Under Homogeneous Risk	148
6.2.1	Enumeration algorithm	151
6.2.2	Ascertainment sampling	152
6.3	Numerical Examples	153
6.3.1	IPF in COPD families	153
6.3.2	Childhood cancer syndrome	154
6.3.3	Childhood mortality in Brazil	155
6.3.4	Household <i>T. cruzi</i> infections	156
6.4	Conclusions	157
6.5	Appendix: Mathematical Details	158
6.5.1	The distribution of family frequencies	158
6.5.2	A model for covariates	160
6.5.3	Ascertainment sampling	161
6.6	Program for Exact Test of Homogeneity	161
7	Sums of Dependent Bernoulli's and Disease Clusters	173
7.1	Introduction	173
7.2	Conditional Models	176
7.2.1	General results for conditional models	176
7.2.2	Family history model	179
7.2.3	Incremental risk model	183
7.2.4	The exchangeable, beta-binomial distribution	186
7.2.5	Application to IPF example	188
7.3	Exchangeable Models	189
7.3.1	Exchangeable family history	195
7.3.2	Exchangeable incremental risk model	200
7.4	Applications	203
7.5	Appendix: Proof of Exchangeable Distribution	206
8	Weighted Binomial Distributions and Disease Clusters	209
8.1	Weighted Models and Clustering	209
8.2	The Altham Distribution	212
8.3	Application to Childhood Mortality Data	218
8.4	A Log-linear Weighted Distribution	224
8.5	Quadratic Weighted Distributions	227
8.6	Weighted Distributions in General	230
8.7	Family History Log-linear Model	233
8.8	Summary Measures and IPF Example	234
8.9	SAS Program for Clustered Family Data	235

9 Applications to Teratology Experiments	243
9.1 Introduction	243
9.2 Dominant Lethal Assay	246
9.3 Shell Toxicology Experiment	250
9.4 Toxicology of 2,4,5 T	255
Complements	265
References	267
Index	273
