

Index

- Activities, 126, 156–158, 329–330
- Americans' Changing Lives (ACL) panel study
- age and reliability, 218–220, 223–227
 - attrition, 135–146, 155
 - measures, 126–127
 - question position, 174–175
 - reliability, 155–162, 175–179, 181–210, 217–227, 303
 - sample, 119, 121
 - sample weights, 130
 - schooling and reliability, 221–227, 247, 261
 - use of Don't Know option, 199
- AMOS software package, 84, 140–144, 229, 298, 369
- Assets and Health Dynamics (AHEAD) study, 231–261, *see* Health and Retirement Study
- Accessibility of information, xi, 12, 22, 25–26, 213, 218
- Age, 13, 44, 157, *see also* reliability and age
- Agree-disagree questions, *see* Likert-type questions
- Architecture of questionnaires, 14, 165–171, 179–180, 319–320
- Assets, 184, 329
- Attenuation, 9, 71, 100–101, 192, 298, 299, 307, 310, 315, 323
- Attitudes, 1, 11, 12–13
- definition, 122–124
 - Don't Know option, 196–200
 - measurement, 44, 118, 120, 126–127, 186, 188–190
- Attitudes (*continued*)
- nonattitudes, *see* nonattitudes
 - reliability estimates, 131–136, 153–162, 168–171, 177–179, 346–351
 - unipolar vs. bipolar, 195–196
- Attrition, 13–14, 116, 119, 121, 135–148
- Batteries, 13, 45, 57, 76, 79, 163, 234–235, *see also* series
- characteristics, 168–169
 - definition, 167–168
 - introduction length, 177–179
 - location, 172–175
 - position in batteries, 175–177
 - reliability, 171–172, 175–179, 184–191, 203–211, 318–321, 324
- Beliefs, 11, 12
- definition, 122–124
 - Don't Know option, 196–200
 - measurement, 120, 126–127, 186, 188–190, 268–271, 280–286
 - reliability estimates, 131–136, 153–162, 168–171, 177–179, 336–346
 - unipolar vs. bipolar, 195–196
- Bennington College study, 28–29
- Bias
- due to attrition, 135–146
 - in reliability estimation, 60, 101, 109, 128, 272, 305, 307
 - measurement bias, 18, 20, 27–29, 46, 48–49
 - survey bias, 5, 6
 - statistical bias, 32–33, 91, 233, 292–299, 302, 315

- Bipolar questions, 183, 185, 186–187, 188, 190–191, 195–197, 199, 211, 321–323
- Birth cohorts, 121, 223, 233, 235
- Body weight, 8, 156–157, 234–238, 241, 258, 318, 327
- Bureau of Census data, 18, 150, 302–303
- Categorical variables, 14, 28, 44, 45, 57, 116, 129, 257, 263–287, 317
- Church attendance, 20, 156–157, 330
- Classical test theory, *see* classical true score theory
- Classical true-score theory (CTST), 35–42
 composite score theory, 51–53, 308–315,
see Cronbach's alpha
 CTST and latent class models, 263–265,
 271–272, 286–287
 CTST and longitudinal design, 101–116
 CTST and MTMM, 67–79, 80–82, 91–93,

 unipolar vs. bipolar, 195–196
- Self-ratings of health, *see* self-reported health
- Self-reported health, 126, 157, 233–261
- Self-reports, 13, 18, 19, 20, 26, 48–49, 123, 125–127, 142, 149–150, 152–153, 156–162, 168–169, 170, 172–175, 233–236, 316–319, 324, 327–362
- Series, 13, 57, 163
 characteristics, 168–169
 definition, 167–168
 introduction length, 177–179
 location, 172–175
 position in series, 175–177
 reliability, 171–172, 175–179, 184–191, 203–211, 318–321, 324–325
- Sex, 263, 277–278
- Simplex models, xvi, 112, 255, 302–304, *see also* quasi-simplex models and quasi-simplex Markov models
- Social activities, *see* activities
- Social and political trust, 120, 127, 268–272, 280–286
- Social desirability, 20
- Social interactions, 127, 157, 329
- Social relationships, 127, 336–337
- Social sciences, xi, xvi, 1–2, 291
- Source of information, 149–153
- Split-ballot experiments, 50
- Stand-alone questions, 167–180, 204, 207, 210, 211, 320, 321, 324, 325
- Standards of measurement, 8
- Stata statistical program, 298
- Statistical Analysis Software (SAS), 142, 371
- Statistical bias, *see* bias
- Statistical sampling, 291
- Structural equation models (SEM), 9, 11, 36, 46, 57, 61, 70, 84, 102–110, 128, 140–146, 217, 229, 242, 257, 264
- Study of American Families (SAF)
 attrition, 135–146, 155
 measures, 126–127
 proxy reports, 152–153
 question position, 174–175
 reliability, 153–162, 217–228, 303
 samples, 119, 121–122, 130
 schooling and reliability, 221–227, 247, 261
 use of Don't Know options, 199
- Survey bias, *see* bias
- Survey errors, 3–6, 117, 289
 nonobservational errors, 5
 observational errors, 5
- Survey measurement error, 1–3, 6–8, 15–33, *see also* measurement error
- Survey nonresponse, 3–6, 289
- Survey research, 1–2, 6, 8–9, 10, 11–14, 117, 152, 165, 167, 172, 181–185, 210–212, 261–262, 289–290, 315–325
- Tim-equivalent measures, 40–41, 43, 52, 62, 111, 309, 315
- Telephone interviews, 2, 79, 121, 202, 302
- Test-retest design, 46, 96–102, 110, 216–217, 301–304
- Test-retest reliability, *see* test-retest design
- Tetrachoric correlations, 44–45, 128, 135
- True-score validity, *see* validity of measurement
- True scores
 classical true scores, *see* classical true score theory (CTST)
 platonic true scores, 20, 23, 48
- Unipolar questions, 183, 185, 186–187, 188, 190–191, 195–197, 199, 211, 321–323
- Unit length, 175–177
- Univocal measures, 26, 36–38, 43, 53, 54, 57, 62–67, 74, 76, 95, 110–111, 154, 216, 299, 307
- Univocity, *see* univocal measures

- Validity of measurement, xi, xv, 3, 15–16, 18, 21–24, 46–50, 59, 67–70, 80–91, 114–115, 117, 289–290, 291–292, 304, 307, 316
- content validity, 22, 47, 213, *see also*, question adequacy
 - construct validity, 22–23, 47, 49, 60, 70, 80, 90, 292
 - convergent validity, 68, 70–71
 - criterion validity, 22, 47, 49, 54, 64, 80, 292
 - discriminant validity, 68, 70–71
 - indicator validity, 82, 86–91, 228–232
 - predictive validity, *see* criterion validity
 - record validity, 48
 - true-score validity, 82, 86–91, 228–232
- Validity coefficient, 47, 80–91, 228–232
- Validity values, *see* convergent validity
- Values
- definition, 122–124
 - don't know option, 196–200
 - measurement, 126–127
- Values (*continued*)
- reliability, 131–136, 153–162, 168–171, 186, 190, 196–197, 331–335
 - unipolar vs. bipolar, 195–196
- Variance
- components of reliability, *see* classical true-score theory (CTST)
 - survey errors, 5–6
 - measurement error variance, *see* CTST
 - decomposition of MTMM variance, 80–82
 - true-score variance, *see* CTST
- Verbal labeling, 13, 30, 83, 84, 91, 163, 183, 190, 200–202, 211, 318, 321, 323
- Voting, 20, 48, 156–157, 219, 273–275, *see also* political behavior and attitudes
- Weighted least squares, 45, 242
- Wisconsin Longitudinal Study (WLS), 303–308
