

Contents at a Glance

<i>Introduction</i>	xix
Chapter 1 • What's New in Office 2003	1
Chapter 2 • Digging Out of the E-Mail Avalanche	25
Chapter 3 • Taking Control of Your Time and Tasks	61
Chapter 4 • Unleashing the Power of Outlook Contact Management	95
Chapter 5 • Beyond Text: Making an Impression with Multimedia	125
Chapter 6 • Adding Electronic Punch to Your Presentations	171
Chapter 7 • Pushing PowerPoint to the Limit	207
Chapter 8 • Collaborating on Documents	247
Chapter 9 • Streamlining Mailings and Messaging	285
Chapter 10 • Taming Complex Publications	319
Chapter 11 • Creating and Modifying Documents for the Web	341
Chapter 12 • Securing and Organizing Documents	373
Chapter 13 • Building Robust and Foolproof Workbooks	411
Chapter 14 • Designing and Building Data Sources	449
Chapter 15 • Creating Templates to Handle Your Repetitive Tasks	491
Chapter 16 • Constructing Forms for User Input	505
Chapter 17 • Dissecting, Importing, and Exporting Data	555
Chapter 18 • Tweaking Office to Fit the Way You Work	603
Chapter 19 • Using Macros to Do More with Office	619
Appendix: Speech and Handwriting Recognition Tools	649
<i>Index</i>	665

Contents

<i>Introduction</i>	xix
Chapter 1 • What's New in Office 2003	1
Editions of Office 2003	1
Professional Edition 2003	2
Small Business Edition 2003	2
Professional Enterprise Edition 2003	2
Standard Edition 2003	2
Basic Edition 2003	3
Student and Teacher Edition 2003	3
Stand-alone Products	3
New Features That Span Applications	4
New Look and Feel	4
Support for Tablet PCs	4
The Research Pane	4
Windows SharePoint Services	5
Support for XML	5
Information Rights Management	6
What's New in Word 2003	6
Reading Layout View	6
Compare Documents Side by Side	7
Support for XML	7
Enhanced Document Protection	8
More International Features	10
What's New in Excel 2003	11
The Enhanced List Functionality	11
Enhanced Statistical Functions	12
What's New in PowerPoint 2003	12
Package for CD	12
Updated Viewer	13
Improved Media Support	13
Support for Smart Tags	13
The Slide Show Toolbar	14
Save Slide Show Ink Annotations	14
What's New in Access 2003	14
View Dependencies between Objects	14
Automatic Error Checking in User-Interface Objects	15
Property Propagation of Table and Query Field Properties	16
Smart Tag Support	17
Windows SharePoint Services	18
Macro Security	18
Context-Based Help to Make SQL Easier	19

What's New In Outlook 2003	19
The Navigation and Reading Panes	19
The Go Menu	20
The Junk E-mail Filter	20
Search Folders	21
Open Multiple Calendars Side by Side	21
Message Arrangements	22
Quick Flags	23
Desktop Alerts	23
The Select Names Dialog Box	23
The Contacts Form Supports Image Files	23
Exchange Enhancements	24
Chapter 2 • Digging Out of the E-Mail Avalanche	25
It's a Brand New Outlook	25
Using the New Navigation Pane	26
Reviewing Messages in Your Inbox	28
Previewing E-Mail in the Reading Pane	28
Accessing Blocked Message Content	29
Composing and Sending Mail	29
Addressing Messages	30
Setting Message Options	34
Setting General E-mail Options to Simplify Formatting and Message Handling	37
Setting Tracking Options	38
Setting Format Options Including Custom Signatures	39
Inserting Files and Items into Messages	45
Inserting a Copy of a File	46
Inserting the Text of a File	46
Inserting a Hyperlink to a File	47
Inserting Outlook Items into an E-mail Message	48
Sending Your Message	48
Finding, Organizing, and Storing Messages	49
Organizing Using the Ways To Organize Inbox Pane	49
Filing Junk Mail Where It Belongs	52
Flagging Messages that Require Your Attention	55
Creating and Using Search Folders to Simplify Organization	55
Chapter 3 • Taking Control of Your Time and Tasks	61
Managing Your Time and Your Life	61
Navigating Through Time	62
Appointment Basics	64
Color-Coding Appointments for Quick Reference	71
Setting Up Your Work Day and Other Options	72
Scheduling Meetings	74
Managing Schedules for a Group	80
Scheduling Multiple Meetings with the Same People	81
Printing Calendars	83

Meeting Deadlines for Yourself and Others	85
Creating a Task	86
Setting Up Recurring Tasks	90
Delegating Tasks	90
Creating Tasks from Other Outlook Items	94
Completing a Task	94
Chapter 4 • Unleashing the Power of Outlook Contact Management	95
Creating a Contact	95
Entering Names, Job Titles, and Companies	97
Entering Contact Telephone Numbers	98
Entering Contact Addresses	99
Entering Web Information	103
Entering Contact Comments	103
Associating Contacts with Other Contacts	103
Grouping Contacts with Categories	104
Adding Details	106
Tracking Activities	107
Viewing Certificate Information	108
Viewing All Fields	108
Saving a Contact	109
Deleting a Contact	109
Finding Contact Information When You Need It	110
Searching Using Find and Advanced Find	110
Using Predefined Views to View Contacts	112
Creating Custom Views	114
Printing Phone Lists and Directories	116
Dialing a Contact	118
Creating a Letter to a Contact	119
Mail Merging Contacts with Word Documents	119
Sharing Department or Workgroup Contacts	122
E-Mailing a Contact	122
Sharing a Contacts Folder	122
Creating Contacts from Other Sources	123
Chapter 5 • Beyond Text: Making an Impression with Multimedia	125
Organizing Your Clips with Microsoft Clip Organizer	126
Searching for the Clip You Want	127
Finding Similar Clips	128
Exploring Your Clip Collection	128
Creating a New Collection	131
Assigning Keywords to Clips	131
Improving Your Clip Collection	133
Gaining Control of Digital Photos with Microsoft Picture Manager	136
Locating and Managing Your Photo Collections	136
Editing Photos	136
Sharing Photos and Other Images	138
Changing Image Size	138

Adding Art to Enhance Documents	140
Resizing Clip Art	141
Gaining Control of Positioning and Wrapping	141
Modifying Pictures with the Picture Toolbar	143
Incorporating Photos and Scanned Images into Your Work	144
Inserting Scanned Graphics and Digital Photos	146
Creating Your Own Drawings and Diagrams with Microsoft Draw	146
Working with the Drawing Canvas	147
Inserting AutoShapes	149
Creating Flowcharts	150
Adding Line Art Objects	152
Designing WordArt	154
Formatting Objects	156
Constructing Diagrams and Organizational Charts	162
Taking PowerPoint to the Next Level	165
Creating Custom PowerPoint Backgrounds from Your Photos	165
Orchestrating the Soundtrack	166
Chapter 6 • Adding Electronic Punch to Your Presentations	171
Preparing a Presentation	172
Getting Started with PowerPoint	173
Starting from a Blank Presentation	174
Creating a Presentation from a Design Template	176
Using the AutoContent Wizard to Design a Presentation for You	178
Creating a Presentation Using Existing Content	180
Creating a Photo Album Presentation from Digital Photos	182
Switching Slide Views	183
Normal View	184
Working in the Notes Pane	185
Working in the Outline Pane	185
Working in the Slide Pane	189
Slide Sorter View	190
Slide Show View	191
Working with the Slide Masters	192
Modifying Master Slides	193
Adding Slide Footers	195
Customizing and Refining a Presentation's Design	196
Changing a Presentation's Color Scheme	196
Customizing the Background of a Presentation	197
Creating Custom Backgrounds from Your Photos	199
Formatting and Checking Text	200
Aligning Text	201
Replacing Fonts	201
Adjusting Line Spacing	202
Adjusting Tabs and Indents	202
Using the Style Checker	204

Chapter 7 • Pushing PowerPoint to the Limit	207
Adding Objects	207
Using Slide Layouts with Object Placeholders	208
Inserting Objects	208
Inserting Media Clips from Clip Organizer	212
Inserting Other Sound and Video Files	213
Customizing Bullets	214
Modifying and Adding Transitions	215
Setting Transition Speed and Sound	217
Adding Animation	217
Adding Custom Animation	218
Changing Speed, Timing, and Other Custom Animation Settings	223
Using Charts in Presentations	227
Animating Charts	228
Animating Video and Sound	230
Hiding Slides	230
Adding Links to Other Slides	230
Preparing Handouts and Notes	232
The Handout Master	232
Printing in PowerPoint	234
Creating Handouts in Word	235
Setting Slide Timings	236
Automated vs. Manual Advance	236
Setting Automatic Timings	236
Customizing Shows for Different Audiences	238
Setting Up the Slide Show	239
Viewing on Two Screens	239
Adjusting Performance	240
Displaying the Slide Show	241
Online Presentations	242
Drawing on Slides	242
Packing a Presentation for CD	243
Chapter 8 • Collaborating on Documents	247
Saving Versions of Word Documents	247
Tracking Changes in Documents, Worksheets, and Presentations	250
Tracking Changes in a Word Document	250
Choosing a Display for Review	253
Working with Changes in the Reviewing Pane	254
Accepting or Rejecting Changes	255
Printing Tracked Changes	255
Collaborating on Excel Workbooks	256
Sharing Workbooks	256
Working in a Shared Workbook	257
Merging Workbook Changes	259
Incorporating Feedback into a PowerPoint Presentation	260

Adding Your Two Cents through a Comment	262
Making Comments in Word	262
Commenting in Excel	265
Adding Comments to Presentations	265
Sending Documents, Workbooks, and Presentations for Review	266
Sending Files for Review	266
Using a Routing Slip	267
Using Compare and Merge	269
Collaborating Online	270
Holding a Virtual Meeting	270
Using a Windows SharePoint Site for Team Collaboration	272
Exploring a Windows SharePoint Services Site	273
Chapter 9 • Streamlining Mailings and Messaging	285
Making Sense of Mail Merge	285
Creating or Specifying the Main Document	286
Selecting Recipients	288
Using an Existing Data Source	288
Creating a New Data Source in Word	291
Using Outlook As a Data Source	298
Using a Word Table As a Data Source	299
Adding Merge Fields to a Main Document	300
Previewing the Merged Document	305
Creating Directories	306
Creating Envelopes and Labels	309
Preparing Labels	309
Preparing an Envelope	310
Using a Mail Merge Template for a Main Document	312
Using E-mail As Main Documents	312
Merging Documents	313
E-mailing to a Group	315
Addressing Mail to a Group or Distribution List	317
Chapter 10 • Taming Complex Publications	319
Documenting with Footnotes and Endnotes	319
Revising Footnotes and Endnotes	323
Deleting Notes	323
Using Bookmarks	323
Creating Cross-References	325
Hyperlinking Cross-References for On-Screen Viewing	327
Inserting Hyperlinks to Make Navigation Easy	328
Indexing for Easy Reference	331
Generating a Table of Contents	335
Managing Large Documents	338
Creating Master Documents and Subdocuments	338
Printing Master Documents	340

Chapter 11 • Creating and Modifying Documents for the Web	341
Filling Your Web Design Toolbox	342
Introducing the Best Web Tools	343
Setting Web Publishing Options	344
General Options	344
Browser Options	344
File Options	345
Picture Options	346
Encoding and Font Options	346
Saving Documents as Web Pages	347
Saving a Single File Web Page	348
Saving vs. Publishing	348
Managing Published Web Pages	349
Creating Web Pages with Word	350
Applying Themes	350
Adding Content to a Web Page	351
Creating Hyperlinks	351
Inserting Graphics	353
Using the Web Tools Toolbar	355
Viewing a Word Web Page in a Browser	358
Creating Web-Based Forms	358
Working with Frames	362
Making a Website Available for Others to View	364
Creating Web Pages with Excel	365
Publishing the Active Sheet	366
Appending to an Existing Web Page	368
Preparing Presentations for the Web	369
Saving a Presentation as a Web Page	369
Publishing a Web Presentation	369
Chapter 12 • Securing and Organizing Documents	373
Strategies for Document Protection	373
Saving a Document as Read-Only	374
Password Protection in Word, PowerPoint, and Excel	378
Protecting Excel Workbooks, Worksheets, and Ranges	380
Securing Access Databases	387
Organizing and Securing Outlook Items	388
Saving Outlook Items as Items	388
Creating Outlook Folders	389
Using Rules to Tame Your Wild Inbox	391
Using the Out of Office Assistant	399
Granting Other Users Permissions to Your Outlook Folders	402
Understanding Protection with Information Rights Management (IRM)	406
IRM Technology in Outlook	406
Using IRM in Word, Excel, and PowerPoint	408

Chapter 13 • Building Robust and Foolproof Workbooks 411

Changing Workbook Layout 411
 Changing the Number of Sheets in a New Book 411
 Inserting and Deleting Sheets 412
 Moving and Copying Within a Workbook 412
 Moving and Copying between Workbooks 413
 Working with Excel's Functions 414
 Relative and Absolute Cell References 415
 Using Logical, Lookup, and Information Functions 416
 Decision Making with IF 417
 Using Lookups 424
 Using VLOOKUP 426
 Using LOOKUP 428
 Using MATCH and INDEX 429
 Creating Complex Lookups Quickly 431
 Trapping Errors with Logical Functions 435
 Manipulating Dates with Functions 436
 Using Names 440
 Naming a Range Using the Name Box 441
 Using the Define Name Dialog Box 441
 Creating Names from a Row or Column 442
 Using Names 442
 Stretching Names to the Max 444

Chapter 14 • Designing and Building Data Sources 449

Storing Data in Office 449
 Features to Look For in a Data Source Application 450
 Storing Relational Data 451
 Importing, Exporting, and Linking 451
 Working with Word Data 453
 Converting Text to Tables 454
 Sorting Word Tables 455
 Converting Word Tables to Excel 457
 Building and Using Excel Lists 457
 Quick Data Entry in Excel Lists 458
 Sorting in Excel 460
 Filtering an Excel List 461
 Filtering on Complex Criteria 465
 Using the New Create List Feature 467
 Creating and Modifying Access Tables 470
 Choosing (or Not) a Primary Key for a Table 472
 Creating a Table Using the Table Wizard 472
 Creating a Table in Design View 474
 Validation: Making Sure Data is Correct 476
 Validating Data in Excel 476
 Validating Data in Access 483

Chapter 15 • Creating Templates to Handle Your Repetitive Tasks	491
Understanding Templates in Your Organization	491
Creating Presentation Templates in PowerPoint	492
Saving the Template with a Custom Name	493
Modifying the Template	493
Creating Templates in Excel	495
Saving a Template in Excel	495
Editing a Template	496
Creating Templates for Other Users	496
Creating Document Templates in Word	499
Storing Templates in Word	500
Applying a New Template to an Existing Document	501
Finding Templates Online	501
Chapter 16 • Constructing Forms for User Input	505
Which Application to Use?	505
Creating Word Forms	506
Building the Basic Form for Structured Data	507
Understanding the Word Form Controls	508
Using Tables as Your Form's Foundation	508
Providing User Clues with Borders and Shading	509
Adding Form Controls	511
Creating Forms for Unstructured Data	516
Building Forms in Excel	518
Creating an Excel Form	518
Creating Outlook Forms	527
Choosing a Form to Customize	527
Creating the Customized Membership Application	528
Assigning an Outlook Form as the Folder Default	537
Changing Items' Message Class	538
Creating Access Forms	539
Selecting a Form Layout	540
Creating AutoForms	542
Printing Forms	542
Creating Forms for Multiple Tables	543
Creating Forms with the Form Wizard	545
Modifying Access Form Design	546
Working with Form Controls	548
Adding and Formatting Labels and Controls	549
Relative Sizing and Alignment	551
Aligning, Sizing, and Spacing Controls	551
Rearranging the Tab Order	552
Formatting Subforms	552
Adding Controls to Existing Forms	553
Changing Properties of Forms and Controls	553
Changing Property Settings on Multiple Fields	554
Hiding Form Features	554

Chapter 17 • Dissecting, Importing, and Exporting Data	555
Answering Questions with Excel's Analysis Tools	556
Understanding Data Tables	556
Using the Forecasting Tools	557
Building a Good Worksheet Model	558
Using Goal Seek to Find a Specific Value	558
Solving Complex Business Problems	560
Making Your Case with Scenarios	566
Summarizing Scenarios	569
Totaling and Subtotaling Excel Lists	570
Using Functions with Lists	574
Summarizing Based on a Condition	574
Using the Database Functions	575
Creating Pivot Tables and Pivot Charts to Analyze Lists	576
Creating a Table with the Wizard	578
Changing PivotTable Layout	580
Changing the Summary and Format for Data Fields	583
Setting Pivot Table Options	583
Applying a Format	585
Using External Data Sources	586
Keeping Your Pivot Table Updated	587
Using Custom Calculations in Pivot Tables	588
Drilling Down in a Pivot Table	589
Creating Separate Pivot Tables	589
Creating Pivot Charts	590
Importing and Exporting Data in Office	591
Importing and Exporting in Word	591
Importing and Exporting in Access	593
Importing and Exporting in Excel	597
Parsing Imported Data with the Text Import Wizard	598
Using Refreshable Text Importing	599
Importing and Exporting in Outlook	600
 Chapter 18 • Tweaking Office to Fit the Way You Work	 603
Adding Shortcuts to Office 2003 Applications	603
Adding a Shortcut to the Quick Launch Bar	603
Adding a Shortcut to the Start Menu	604
Customizing Application Menus and Toolbars	605
Changing Toolbar Options	605
Adding Commands to Toolbars and Menus	607
Setting Application Options	612

Chapter 19 • Using Macros to Do More with Office	619
Creating Macros Using the Macro Recorder	620
Recording a Macro in PowerPoint	620
Recording a Macro in Excel	622
Recording a Macro in Word	626
Running Macros	629
Changing Macro Security Settings	629
Running Macros from the Macro Dialog Box	631
Viewing and Modifying Your VB Code	632
Finding Your Way Around the VB Editor	633
Unpacking the Code	633
Making Macros Easy to Use	636
Designing the User Interface	636
Adding Macros to Command Bars	636
Running a Macro from a Button	644
 Appendix: Speech and Handwriting Recognition Tools	 649
Preparing to Use Office 2003's Speech Recognition Tools	649
Setting Up Your Microphone	650
Training the Speech Recognition System	651
Using the Speech Recognition System	652
Dictating in Office 2003	652
Giving Voice Commands in Office 2003	654
Tweaking the Speech Recognition System	656
Creating a New Profile on Your Computer	658
Removing Speech Recognition Services	658
Working with the Language Bar	659
Handwriting Recognition	660
Using On-Screen Keyboards	660
Drawing On-Screen	661
Using Handwriting to Input Text	662
Finding Help for Speech and Handwriting Recognition	664
 <i>Index</i>	 665
