# Contents

<i>Introduction</i> .....	.xx
<b>Part I      The Basics</b>	<b>1</b>
<b>Chapter 1    The Basics of System Administration</b> .....	<b>3</b>
Your Role as a System Administrator .....	4
Tasks of a System Administrator .....	5
Configuring Hardware .....	5
Installing the Operating System .....	6
Installing Application Software .....	6
System Security .....	6
Configuring the Kernel .....	7
Creating Users and Groups .....	7
Software Updates .....	7
Performance Tuning .....	8
Disaster Recovery .....	8
Capacity Planning .....	8
Network Administration .....	9
“When You Have a Minute...” .....	9
Tools of the Linux Administrator .....	9
Commands .....	10
System Logbook .....	11
Communicating with Users .....	13
Working on the System as Root .....	15
Becoming the Root User .....	16
In Sum .....	18
<b>Chapter 2    Installing Linux</b> .....	<b>19</b>
Benchmarks .....	19
Selecting Hardware .....	20
Minimal Acceptable Hardware .....	21
CPU Performance .....	21
Random Access Memory .....	23
Selecting Hardware by Intended Usage .....	23

Specialized Hardware Performance Solutions	26
Types of Hardware to Avoid	32
Selecting a Linux Distribution	34
Red Hat Linux	35
Mandrake	36
Caldera	37
SuSE Linux	37
Slackware Linux	38
Debian	38
The Choice Is Yours	40
Installing Red Hat Linux	40
Preparing for Installation	40
Choosing a Partitioning Scheme	41
Installing a Server	43
Installing a Workstation	53
Tying Up Loose Ends	54
In Sum	55
<b>Chapter 3 Startup and Shutdown</b>	<b>57</b>
The Linux Boot Process	58
The Master Boot Record	59
Boot Loaders	59
GRUB: Definition and Configuration	59
LILO: Definition and Configuration	63
Creating a Boot Floppy	67
Creating a LILO Boot Floppy	67
Creating a Boot Floppy without a Boot Loader	68
Using LOADLIN	68
Single-User Mode	69
Initialization and Startup Scripts	71
The Red Hat Model	71
The Debian Model	76
User Initialization Files	81
Modifying the Startup Procedure	82
Startup Log Files	86
Shutdown	87
Warning Users	88
Shutdown Log Files	88
In Sum	89

---

<b>Chapter 4</b>	<b>Tools of the Trade</b> .....	<b>91</b>
	Locating Help Resources .....	91
	Man Pages .....	92
	Info Pages .....	96
	Technical Support .....	97
	Configuration Support .....	98
	Tailored Linux Development .....	99
	General Web Support .....	99
	Webmin .....	100
	Command-Line Tools .....	101
	The Bash Shell .....	101
	Basic Commands .....	108
	In Sum .....	128
<b>Part 2</b>	<b>Managing Users, Processes, and Files</b>	<b>129</b>
<b>Chapter 5</b>	<b>Creating and Maintaining User Accounts</b> .....	<b>131</b>
	User Accounts .....	132
	The <i>/etc/passwd</i> File .....	132
	Shadowed Passwords .....	135
	Adding New Users .....	137
	Modifying User Accounts .....	140
	Disabling User Accounts .....	144
	Deleting User Accounts .....	145
	Groups .....	147
	The Function of Groups .....	147
	The <i>/etc/group</i> File .....	148
	Adding New Groups .....	150
	Modifying Groups .....	153
	Deleting Groups .....	154
	In Sum .....	155
<b>Chapter 6</b>	<b>Filesystems and Disk Management</b> .....	<b>157</b>
	Linux Filesystem Support .....	158
	Locating Filesystems .....	158
	Linux Native Filesystems .....	160
	Foreign Filesystems .....	165
	Network Filesystems .....	169

Filesystem Design . . . . .	170
The Physical Structure . . . . .	170
Inodes and Directories . . . . .	171
Accessing Filesystems . . . . .	172
Mounting and Unmounting Filesystems . . . . .	172
Using Removable Media . . . . .	181
Using Swap Space . . . . .	187
Updating and Maintaining Filesystems . . . . .	188
Disk Partitioning . . . . .	189
Creating a Filesystem . . . . .	194
Adding a Disk . . . . .	195
Replacing a Disk . . . . .	197
Checking Filesystem Integrity . . . . .	198
In Sum . . . . .	200
<b>Chapter 7 Linux Files and Processes . . . . .</b>	<b>201</b>
The Filesystem Hierarchy Standard . . . . .	202
Directory Layout . . . . .	204
File Characteristics . . . . .	207
Determining a Linux File's Type . . . . .	208
File Types Defined . . . . .	210
Processes . . . . .	215
The Concept of Multitasking . . . . .	215
Types of Processes . . . . .	216
Parent Processes and Their Children . . . . .	220
The <i>init</i> Process . . . . .	222
Managing Processes . . . . .	222
Terminating/Restarting with the <i>kill</i> Command . . . . .	225
Terminating/Restarting Processes Using Scripts . . . . .	226
In Sum . . . . .	228
<b>Chapter 8 Software Administration . . . . .</b>	<b>229</b>
Installing Binary Packages . . . . .	230
Installing an RPM . . . . .	230
Installing a Debian Package . . . . .	234
Installing a Tarball . . . . .	237
Compiling Source Code . . . . .	238
Compiling from Packages . . . . .	238
Compiling Tarballs . . . . .	240

---

Kernel Compilation	.242
Why Compile Your Kernel?	.242
Obtaining a Kernel	.243
Kernel Configuration Options	.244
Compiling the Kernel	.250
Installing the Kernel and Modules	.251
Testing Your New Kernel	.253
Checking for OS Updates	.254
The Importance of OS Updates	.254
Locating Updates for Your Distribution	.255
Update Utilities	.257
In Sum	.258
<b>Chapter 9 Backup and Restore</b>	<b>.259</b>
Backup Strategies	.260
Combining Full and Incremental Backups	.260
Including Differential Backups	.261
Data-Specific Backups	.262
Backup Media	.263
Tapes	.263
CD-R and CD-RW	.269
Other Alternatives	.270
Media Storage	.271
Backup Commands and Utilities	.272
CD-R and CD-RW Backup Tools	.275
Linux Backup and Restore Tools	.280
<i>dump</i>	.281
<i>restore</i>	.284
<i>tar</i>	.286
<i>cpio</i>	.292
<i>afio</i>	.294
Third-Party Tools	.296
Tips while Restoring	.299
Backing Up the Operating System	.300
Minimal Backups	.300
Complete Backups	.301
Disaster Recovery Techniques	.302
Single-User Mode	.302

Using a Boot Floppy .....	303
Rescue Mode .....	304
Third-Party Recovery Software .....	306
In Sum .....	307

**Part 3      Communications and Networking      309**

**Chapter 10    Printers and the Spooling Subsystem      311**

Printer Basics .....	312
Types of Printers .....	312
Printer Interfaces .....	316
The Linux Printing Process .....	317
Tools of the Printing Trade .....	318
The LPRng Print Spooler .....	320
Alternative Printing Utilities .....	325
Configuring Printers Using Red Hat's Printconf .....	327
Configuring Printers in Webmin .....	330
Printing with Other Distributions .....	330
Debian .....	330
SuSE .....	331
Slackware .....	331
Kernel Support .....	332
Parallel-Port Printers .....	332
RS-232 Serial Devices .....	333
USB Devices .....	334
Remote Printing .....	334
In Sum .....	338

**Chapter 11    Serial Communications, Terminals, and Modems      339**

Understanding Serial Devices .....	340
Standard Serial Devices .....	340
Unusual Serial Devices .....	345
Configuring Terminals .....	346
Understanding Terminals .....	347
Configuring a <i>getty</i> Program .....	348
Using a Serial-Port Console .....	350
Configuring Modems .....	351
Dial-out Modem Uses .....	352
Dial-in Modem Uses .....	362

	Configuring Serial Printers . . . . .	366
	Special Considerations for Serial Printers . . . . .	367
	When to Use a Serial Printer . . . . .	367
	In Sum . . . . .	368
<b>Chapter 12</b>	<b>TCP/IP Linux Networking . . . . .</b>	<b>369</b>
	Understanding TCP/IP Networking . . . . .	370
	Network Stacks . . . . .	370
	Network Addresses . . . . .	372
	Ports . . . . .	375
	TCP/IP Configuration . . . . .	376
	Configuring Network Hardware . . . . .	376
	Using DHCP for Configuration . . . . .	378
	Manually Configuring TCP/IP . . . . .	380
	Testing the Setup . . . . .	386
	File Sharing . . . . .	387
	Sharing with Unix or Linux: NFS . . . . .	388
	Sharing with Windows: Samba . . . . .	391
	Internet Servers . . . . .	398
	Available Servers . . . . .	399
	Using a Super Server . . . . .	401
	In Sum . . . . .	405
<b>Chapter 13</b>	<b>The X Window System . . . . .</b>	<b>407</b>
	X Concepts . . . . .	408
	X as a Network Protocol . . . . .	408
	X Security . . . . .	410
	X Virtual Consoles . . . . .	413
	Configuring an X Server . . . . .	414
	XFree86 4.x . . . . .	415
	XFree86 3.3.x . . . . .	417
	Using an X Configuration Tool . . . . .	418
	Starting X Automatically . . . . .	421
	Configuring a Font Server . . . . .	422
	Adding Fonts to a Font Server . . . . .	422
	Configuring a New Font Server . . . . .	425
	Unusual Font Servers . . . . .	426
	Building a User Interface atop X . . . . .	426
	Window Managers . . . . .	427

Widget Sets	430
Desktop Environments	430
X Applications	433
In Sum	434

**Chapter 14 Setting Up Your Mail Server 435**

Understanding E-Mail Protocols	436
Push and Pull Protocols	436
SMTP	438
POP	440
IMAP	442
Configuring Sendmail	443
Configuring Domains	444
Sendmail Configuration Files and Procedures	446
Address Masquerading	446
Configuring Relays	448
Receiving Mail	452
Configuring POP and IMAP	453
Running POP and IMAP Daemons	454
Setting Up Mail-Only Accounts	455
Using Fetchmail to Acquire Mail from an ISP	456
Anti-Spam Measures	459
The Problem of Spam	460
Preventing Outgoing Spam	460
Stopping Incoming Spam	463
In Sum	466

**Part 4 System Optimization and Improvement 467**

**Chapter 15 Security 469**

Types of Attacks	470
Trojan Horse	471
Back Door	472
Trusted Host	473
Buffer Overflow	473
Scanning or Sniffing	473
Spoofing	474
Denial of Service	474
Password Cracking	475

---

	Social Attacks	476
	Physical Attacks	476
	Types of Security	478
	Securing the Authentication Process	479
	Hashing Passwords	480
	Shadow Passwords	482
	Pluggable Authentication Modules (PAM)	483
	File Permissions	489
	Protecting against Network Intrusion	490
	Firewalls	491
	TCP Wrappers	511
	<i>xinetd</i>	513
	Detecting Intrusion	514
	Applications for Detecting Intrusion	515
	In Sum	517
<b>Chapter 16</b>	<b>Performance Tuning</b>	<b>519</b>
	The Elements of Performance	519
	Hardware Performance	520
	Software Performance	522
	Measuring Performance	522
	Finding Bottlenecks	524
	Using <i>top</i> to Find the Bottleneck	524
	<i>traceroute</i>	527
	Tuning the System	528
	<i>nice</i> and <i>renice</i>	528
	Virtual Memory Tuning	529
	Serial Port Tuning	531
	Filesystem Tuning	531
	Eliminating Unnecessary Processes	536
	Compiling for Efficiency	537
	Tuning the X Window System	540
	Upgrading	541
	In Sum	542
<b>Chapter 17</b>	<b>Making Your Job Easier with Scripts</b>	<b>543</b>
	Common Scripting Features	544
	Identifying a Script	544
	Variables	545

Control Statements	.546
Commands	.547
The Bash Shell Scripting Language	.547
Variables	.547
Conditional Expressions	.549
Loops	.551
Other Types of Scripts	.554
Perl Scripts	.554
Python Scripts	.556
<i>awk</i> and <i>sed</i> Scripts	.557
System Initialization Scripts	.560
Writing an Initialization Script	.560
Tailoring the <i>rc.local</i> Script	.566
Using the <i>cron</i> Facility	.569
Running a Script at a Specific Time	.571
Commands Often Used in Shell Scripts	.572
<i>cat</i>	.572
<i>cut</i>	.572
<i>echo</i>	.574
<i>sort</i>	.574
<i>xargs</i>	.575
Using Pipes	.575
In Sum	.576
<b>Chapter 18 Troubleshooting Your Linux System</b>	<b>.577</b>
General Troubleshooting Techniques	.578
Boot Problems	.580
FDISK Doesn't Recognize GNU/Hurd Partition	.581
Making a New Boot Floppy to Replace a Lost One	.581
GRUB Is Installed but Just Hangs	.581
LILO Messages and Their Meanings	.582
Making the System Boot a New Kernel	.583
Hardware Not Detected at Boot	.585
Dual-booting with Another OS Like Windows	.585
Can't Remove Boot Loader from the Master Boot Record	.586
Kernel Won't Load or Loads Only Partially	.587
Login Problems	.587
Lost Password	.587

Login Incorrect after Entering Username . . . . .588  
 System Flashes Quick Message and Drops Back to *login* Prompt . . .588  
*Login incorrect* Message Logging in as root . . . . .589  
 Network Problems . . . . .589  
     *Unknown* Host Message . . . . .589  
     *Network Unreachable* Message . . . . .590  
 Kernel Compilation . . . . .590  
     *make menuconfig* Generates an Error about *ncurses.h* . . . . .590  
     Signal 11 Error . . . . .591  
     Do I Need to Reconfigure the Kernel with Every Upgrade? . . . . .591  
     ld: unrecognized option *-qmagic* . . . . .592  
 Filesystem Problems or Questions . . . . .592  
     Creating a Linux Filesystem on a Floppy Disk . . . . .592  
     Creating a Windows Filesystem on a Floppy Disk . . . . .592  
     */proc/kcore* . . . . .593  
     Which Interrupts Are Available? . . . . .593  
 X Window System Problems . . . . .594  
     Booting into X, Login Prompt Disappears When Anything Is Entered . .594  
     Cannot Allocate Colormap Entry . . . . .594  
     Bypassing X . . . . .595  
     The System Runs Very Slowly When Running X or Making a Kernel . . .595  
 Odds and Ends . . . . .595  
     You've Deleted the Red Hat Package Manager and Can't Reinstall It . . .595  
     Shutting Down a System on the Network Remotely . . . . .596  
     Permission Denied When Attempting NFS Mount . . . . .596  
     The *free* Command Reports Less Memory Than the Machine Has . .597  
     Determining Which Packages Are on the System . . . . .598  
     *modprobe* Can't Locate Module *module-name* . . . . .598  
     The "You don't exist. Go away" Error Message . . . . .598  
     The Screen Is Full of Gibberish . . . . .598  
 In Sum . . . . .599

*Index* . . . . .600
