Acknowledgments	x
Introduction	xix
Chapter 1: Key Concepts	1
Themes in Community Server 2007	1
Theme Portability	1
Standard Control Features	2
Theme File Reduction	2
Types of Themes	2
SiteUrls and URL Rewriting	3
Chameleon	3
Request to Rendering Diagram	4
Dynamic Configuration	5
Content Scrubbing	5
Summary	6
Chapter 2: Getting Started	7
Required Software	7
Selecting a Database Server	8
Selecting an Integrated Development Environment	8
Downloading Community Server	9
Installing Community Server	9
Understanding the Installation File Structure	10
Setting Up a Development Environment	11
Previewing Themes	12
Summary	14
Chapter 3: URL Rewriting	15
URL Rewriting	15
SiteUrls.config File	17
Locations	18
url Element	19
Transformers	21
Navigation and Links	22
Summary	24

Contents

Chapter 4: Adding New Pages to SiteUrls.config	25
Modifying SiteUrls.config through Overrides	25
Remove Override Example	27
Update Override Example	27
Add Override Example	28
Change Override Example	28
New Override Example	29
Overrides File Review	29
Adding a Simple URL	29
Adding a URL with Query Strings	31
Summary	31
Chapter 5: Basics of Chameleon	33
Implicit Data Binding	33
Contextual Data Binding in Action	34
Base Control Types	35
Single-Value Controls	35
Defining Wrapping Markup	36
Defining Render Conditions	38
Formatting API-Related Single-Value Controls	39
API-Related Single-Value Controls Naming Conventions	44
List Controls	44
List Control Templates	45
Defining Query Overrides	47
API-Related List Controls	48
API-Related Single-Value Controls Naming Conventions	50
Pager Controls	50
Pager	50
PostBackPager	55
CallbackPager	56
ScrollingPager	56
PagerGroup	58
Form Controls	59
ValidationGroup	59
Properties for Child Control IDs	60
Properties for Completion Actions	61
Subform Controls	61
Subform Naming Conventions and Host Form Support	63

Contents

Condition Controls	63
Conditions	63
Property and Value Comparison Condition	65
Property Comparison Condition	67
ControlVisibilityCondition	69
UserInRoleCondition	70
SectionPermissionCondition	70
CurrentSiteUrlCondition	70
CurrentUserIsAccessingUserCondition	71
Action Controls	71
ExecuteScriptAction	72
GoToCurrentContentAction	72
GoToCurrentPostAction	72
GoToModifiedUrlAction	72
GoToReferralUrlAction	73
GoToSiteUrlAction	74
SetVisibilityAction	74
CustomAction	74
Actions	75
Utility Controls	75
ConditionalAction	75
ConditionalContent	76
ModifiedUrl	77
PlaceHolder	77
ThemeImage	77
ThemeScript	78
ThemeStyle	78
SiteUrl	78
Page Controls	79
Summary	79
Chapter 6: Implementing Blog Themes	81
Blog Theme Files	81
Creating a Custom Blog Theme	82
Creating a Basic theme.config File	82
Creating a Master Page	83
Creating Postlist.aspx	86
Creating a Stylesheet	88
Summary	94

Contents

Chapter 7: Implementing Site Themes	95
Site Theme Files	95
Blog-Specific Theme Files	97
Forum-Specific Theme Files	97
Photo Gallery-Specific Files	98
File Gallery-Specific Theme Files	99
Extending Existing Themes	99
Creating a Site theme.config File	101
Creating a Site Master Page	102
Creating the Site Homepage	102
Summary	104
Chapter 8: Theme Considerations	105
Interaction with ASP.NET AJAX	105
Installing ASP.NET AJAX	106
ASP.NET AJAX Example	106
Interaction with External Scripts	109
Interaction with Silverlight	110
Packaging Your Theme for Distribution	115
Summary	116
Chapter 9: Basics of Dynamic Configuration Options	117
Theme Configuration Pages	117
Configuration Form	118
Preview	118
Save	119
Export	119
Import	120
Restore Defaults	120
The theme.config File	121
Theme node	121
Property Groups	122
id	123
resourceName, resourceFile, and text	123
descriptionResourceName, descriptionResourceFile, and descriptionText	123
orderNumber	123
visible	124
Unrecognized Attributes	124

Contents

Property Subgroups	124
id	124
resourceName, resourceFile, and text	125
descriptionResourceName, descriptionResourceFile, and descriptionText	125
orderNumber	125
visible	125
Unrecognized Attributes	125
Properties	126
id	126
resourceName, resourceFile, and text	126
descriptionResourceName, descriptionResourceFile, and descriptionText	127
descriptionImageUrl	127
orderNumber	127
dataType	127
defaultValue	130
editable	131
visible	131
controlType	131
Unrecognized Attributes	132
Property Values	132
value	133
resourceName, resourceFile, and text	133
orderNumber	133
Unrecognized Attributes	133
Property Rules	133
type	134
processImmediately	134
Unrecognized Attributes	134
Built-In Property Controls	135
CssValueSelectionControl	135
HtmlTextSelectionControl	136
ImageSelectionControl	138
MultilineStringControl	140
HtmlEditorStringControl	141
SiteFileUrlControl	142
BlogFileUrlControl	142
Built-In Property Rules	143
ValueAutomationRule	143
Using Theme Configuration Data	144
Using Theme Configuration Controls	144
Using Theme Configuration Data in Code	146
Summary	149

Contents

Chapter 10: Adding Dynamic Configuration Options to a Theme	151
Adding a Simple Configuration Option	151
Site Background Color Configuration	152
Site Font Configuration Example	154
Image Background Configuration Example	156
Previewing Configuration Changes	157
Adding a CSS Previewable Configuration Option	157
Adding a Conditional Rendering Option	158
Defining a Custom Property Rule	159
Summary	162
Chapter 11: Content Scrubbing	163
Markup Safety and the HtmlScrubber	163
Configuring the HtmlScrubber	164
Well-formed Markup and the HtmlNestingCorrectionModule	167
Configuring the HtmlNestingCorrectionModule	168
Summary	169
Chapter 12: Creating Custom Chameleon Controls	171
Using Implicit Data Binding	171
Custom Single-value Controls	173
Abstract Members of WrappedContentBase	173
Utility Members of WrappedContentBase	173
Implementing the PostExtendedAttributeLink Control	177
Custom List Controls	181
Abstract Members of PreTemplatedListBase	181
Utility Members of PreTemplatedListBase	181
Implementing the GroupList Control	185
Custom Form Controls	191
Abstract Members of WrappedFormBase	192
Utility Members of WrappedFormBase	192
Implementing the SendEmailForm Control	195
Custom SubForm Controls	202
Abstract Members of WrappedSubFormBase	202
Utility Members of WrappedSubFormBase	202
Implementing the ExtendedAttributeSubForm Control	203
Custom Condition Controls	208
Abstract Members of ConditionBase	208
Utility Members of ConditionBase	208
Implementing the CurrentTimeCondition Control	208

Contents

Custom Action Controls	210
Abstract Members of ActionBase	210
Implementing the IncludeStyleAction Control	211
Distributing Custom Controls	213
Summary	213
Chapter 13: Creating Custom Dynamic Configuration Controls and Rules	215
<hr/>	
Custom Property Controls	215
IPropertyControl	216
IPropertyValuesControl	217
Implementing the RadioButtonListPropertyControl	218
Custom Property Rules	223
IPropertyRule	223
Implementing the AcceptableIntRangeRule	224
Summary	225
Chapter 14: Creating a Custom Editor	227
<hr/>	
Editor Overview	227
Existing Editors	228
Custom Editor Example	229
Installing an Editor	236
Summary	236
Chapter 15: Creating a Custom Browseable List	237
<hr/>	
Browseable List Overview	237
Existing Browseable Lists	238
Installing a Browseable List	238
Custom Browseable List Example	239
Summary	246
Appendix A: SiteUrls.config Reference	247
<hr/>	
Appendix B: Chameleon Controls — Common	251
<hr/>	
Appendix C: Chameleon Controls — Blogs	279
<hr/>	
Appendix D: Chameleon Controls — Forums	291
