

# Contents

Preface	vii
1 An Introduction to Stiquito, the Book, and the Kit <i>James M. Conrad</i>	1
2 Stiquito: A Small, Simple, Inexpensive Hexapod Robot <i>Jonathan W. Mills</i>	12
3 Building Stiquito II and Tensipede <i>Jonathan W. Mills</i>	60
4 Increasing Stiquito's Loading Capacity <i>John K. Estell, Thomas A. Owen, and Craig A. Szczublewski</i>	98
5 Boris: A Motorless Six-Legged Walking Machine <i>Roger G. Gilbertson</i>	104
6 A PC-Based Controller for Stiquito Robots <i>Jonathan W. Mills</i>	121
7 An M68HC11 Microcontroller-Based Stiquito Controller <i>James M. Conrad and Mohan Nanjundan</i>	152
8 An M68HC11-Based Stiquito Colony Communication System <i>James M. Conrad, Gregory Lee Evans, and Joyce Ann Binam</i>	162
9 A General-Purpose Controller for Stiquito <i>Shyamsundar Pullela</i>	177
10 SCORPIO: Hardware Design <i>John K. Estell, Timothy A. Muszynski, Thomas A. Owen, Steven R. Snodgrass, Craig A. Szczublewski, and Jason A. Thomas</i>	183
11 SCORPIO: Software Design <i>John K. Estell, Christopher A. Baumgartner, and Quan D. Luong</i>	191
12 Łukasiewicz' Insect: The Role of Continuous-Valued Logic in a Mobile Robot's Sensors, Control, and Locomotion <i>Jonathan W. Mills</i>	197
13 Stiquito, a Platform for Artificial Intelligence <i>Matthew C. Scott</i>	212

14	Cooperative Behaviors of Autonomous Mobile Robots	227
	<i>Susan A. Mengel, James M. Conrad, Lance Hankins, and Roger Moore</i>	
15	The Simulation of a Six-Legged Autonomous Robot Guided by Vision	256
	<i>Paulo W.C. Maciel</i>	
16	The Future for Nitinol-Propelled Walking Robots	267
	<i>Mark W. Tilden</i>	
Appendixes		
A	Author Biographies	283
B	An Analog Driver Circuit for Nitinol-Propelled Walking Robots	293
C	Sources of Materials for Stiquito	297
D	Technical Characteristics of Flexinol Actuator Wires	301
	Index	310
