

CONTENTS

Preface	ix
Acknowledgments	xi
Introduction to the First Edition: An Accident Waiting To Happen	xiii
Introduction to the Second Edition: Invasive Data	xvii
1 Things People Do with Censored Data that Are Just Wrong	1
Why Not Substitute—Missing the Signals that Are Present in the Data	3
Why Not Substitute?—Finding Signals that Are Not There	8
So Why Not Substitute?	10
Other Common Misuses of Censored Data	10
2 Three Approaches for Censored Data	12
Approach 1: Nonparametric Methods after Censoring at the Highest Reporting Limit	13
Approach 2: Maximum Likelihood Estimation	14
Approach 3: Nonparametric Survival Analysis Methods	17
Application of Survival Analysis Methods to Environmental Data	17
Parallels to Uncensored Methods	21
3 Reporting Limits	22
Limits When the Standard Deviation is Considered Constant	23
Insider Censoring—Biasing Interpretations	29
Reporting the Machine Readings of all Measurements	33
Limits When the Standard Deviation Changes with Concentration	34
For Further Study	36
4 Reporting, Storing, and Using Censored Data	37
Reporting and Storing Censored Data	37
Using Interval-Censored Data	41
Exercises	42

5	Plotting Censored Data	44
	Boxplots	44
	Histograms	46
	Empirical Distribution Function	47
	Survival Function Plots	49
	Probability Plot	52
	X – Y Scatterplots	59
	Exercises	61
6	Computing Summary Statistics and Totals	62
	Nonparametric Methods after Censoring at the Highest Reporting Limit	62
	Maximum Likelihood Estimation	64
	The Nonparametric Kaplan–Meier and Turnbull Methods	70
	ROS: A “Robust” Imputation Method	79
	Methods in Excel	86
	Handling Data with High Reporting Limits	86
	A Review of Comparison Studies	87
	Summing Data with Censored Observations	94
	Exercises	98
7	Computing Interval Estimates	99
	Parametric Intervals	100
	Nonparametric Intervals	103
	Intervals for Censored Data by Substitution	103
	Intervals for Censored Data by Maximum Likelihood	104
	Intervals for the Lognormal Distribution	112
	Intervals Using “Robust” Parametric Methods	125
	Nonparametric Intervals for Censored Data	126
	Bootstrapped Intervals	136
	For Further Study	140
	Exercises	141
8	What Can be Done When All Data Are Below the Reporting Limit?	142
	Point Estimates	143
	Probability of Exceeding the Reporting Limit	144
	Exceedance Probability for a Standard Higher than the Reporting Limit	148
	Hypothesis Tests Between Groups	151
	Summary	152
	Exercises	152

9	Comparing Two Groups	153
	Why Not Use Substitution?	154
	Simple Nonparametric Methods After Censoring at the Highest Reporting Limit	156
	Maximum Likelihood Estimation	161
	Nonparametric Methods	167
	Value of the Information in Censored Observations	178
	Interval-Censored Score Tests: Testing Data that Include (DL to RL) Values	180
	Paired Observations	183
	Summary of Two-Sample Tests for Censored Data	192
	Exercises	192
10	Comparing Three or More Groups	194
	Substitution Does Not Work—Invasive Data	195
	Nonparametric Methods after Censoring at the Highest Reporting Limit	196
	Maximum Likelihood Estimation	199
	Nonparametric Method—The Generalized Wilcoxon Test	209
	Summary	215
	Exercises	216
11	Correlation	218
	Types of Correlation Coefficients	218
	Nonparametric Methods after Censoring at the Highest Reporting Limit	219
	Maximum Likelihood Correlation Coefficient	224
	Nonparametric Correlation Coefficient—Kendall's Tau	227
	Interval-Censored Score Tests: Testing Correlation with (DL to RL) Values	230
	Summary: A Comparison Among Methods	232
	For Further Study	234
	Exercises	235
12	Regression and Trends	236
	Why Not Substitute?	237
	Nonparametric Methods After Censoring at the Highest Reporting Limit	239
	Maximum Likelihood Estimation	249
	Akritis–Theil–Sen Nonparametric Regression	258
	Additional Methods for Censored Regression	264
	Exercises	266

13	Multivariate Methods for Censored Data	268
	A Brief Overview of Multivariate Procedures	269
	Nonparametric Methods After Censoring at the Highest Reporting Limit	273
	Multivariate Methods for Data with Multiple Reporting Limits	288
	Summary of Multivariate Methods for Censored Data	296
14	The NADA for R Software	297
	A Brief Overview of R and the NADA Software	297
	Summary of the Commands Available in NADA	300
	Appendix: Datasets	303
	References	309
	Index	321
