<b>Foreword</b> <i>David B. Fogel</i>	<b>xvii</b>
<b>Preface</b>	<b>xix</b>
 Editor's Introduction to Chapter 1	 <b>1</b>
 <b>1 INTRODUCTION TO FUSION OF SOFT COMPUTING AND HARD COMPUTING</b>	 <b>5</b>
<i>Seppo J. Ovaska</i>	
1.1 Introduction / 5	
1.1.1 Soft Computing / 5	
1.1.2 Fusion of Soft-Computing and Hard-Computing Methodologies / 7	
1.2 Structural Categories / 9	
1.2.1 Soft Computing and Hard Computing Are Isolated from Each Other / 10	
1.2.2 Soft Computing and Hard Computing Are Connected in Parallel / 11	
1.2.3 Soft Computing with Hard-Computing Feedback and Hard Computing with Soft-Computing Feedback / 12	
1.2.4 Soft Computing Is Cascaded with Hard Computing or Hard Computing Is Cascaded with Soft Computing / 12	
1.2.5 Soft-Computing-Designed Hard Computing and Hard-Computing-Designed Soft Computing / 13	
1.2.6 Hard-Computing-Augmented Soft Computing and Soft-Computing-Augmented Hard Computing / 14	

1.2.7	Hard-Computing-Assisted Soft Computing and Soft-Computing-Assisted Hard Computing / 15	
1.2.8	Supplementary Categories / 16	
1.2.9	General Soft-Computing and Hard-Computing Mapping Functions / 19	
1.3	Characteristic Features / 19	
1.3.1	Proportional Integral Derivative Controllers / 20	
1.3.2	Physical Models / 20	
1.3.3	Optimization Utilizing Local Information / 21	
1.3.4	General Parameter Adaptation Algorithm / 22	
1.3.5	Stochastic System Simulators / 22	
1.3.6	Discussion and Extended Fusion Schemes / 22	
1.4	Characterization of Hybrid Applications / 24	
1.5	Conclusions and Discussion / 25	
	References / 27	
<b>Editor's Introduction to Chapter 2</b>		<b>31</b>
<b>2</b>	<b>GENERAL MODEL FOR LARGE-SCALE PLANT APPLICATION</b>	<b>35</b>
	<i>Akimoto Kamiya</i>	
2.1	Introduction / 35	
2.2	Control System Architecture / 36	
2.3	Forecasting of Market Demand / 37	
2.4	Scheduling of Processes / 39	
2.4.1	Problem Decomposition / 39	
2.4.2	Hybrid Genetic Algorithms / 42	
2.4.3	Multiobjective Optimization / 43	
2.5	Supervisory Control / 45	
2.6	Local Control / 47	
2.7	General Fusion Model and Fusion Categories / 49	
2.8	Conclusions / 51	
	References / 51	
<b>Editor's Introduction to Chapter 3</b>		<b>57</b>
<b>3</b>	<b>ADAPTIVE FLIGHT CONTROL: SOFT COMPUTING WITH HARD CONSTRAINTS</b>	<b>61</b>
	<i>Richard E. Saeks</i>	

- 3.1 Introduction / 61
- 3.2 The Adaptive Control Algorithms / 62
  - 3.2.1 Adaptive Dynamic Programming / 63
  - 3.2.2 Neural Adaptive Control / 64
- 3.3 Flight Control / 67
- 3.4 X-43A-LS Autolander / 68
- 3.5 LoFLYTE<sup>®</sup> Optimal Control / 73
- 3.6 LoFLYTE<sup>®</sup> Stability Augmentation / 76
- 3.7 Design for Uncertainty with Hard Constraints / 82
- 3.8 Fusion of Soft Computing and Hard Computing / 85
- 3.9 Conclusions / 85
- References / 86

## Editor's Introduction to Chapter 4 89

## **4 SENSORLESS CONTROL OF SWITCHED RELUCTANCE MOTORS 93**

*Adrian David Cheek*

- 4.1 Introduction / 93
- 4.2 Fuzzy Logic Model / 95
  - 4.2.1 Measurement of Flux Linkage Characteristics / 95
  - 4.2.2 Training and Validation of Fuzzy Model / 97
- 4.3 Accuracy Enhancement Algorithms / 101
  - 4.3.1 Soft-Computing-Based Optimal Phase Selection / 102
  - 4.3.2 Hard-Computing-Based On-Line Resistance Estimation / 104
  - 4.3.3 Polynomial Predictive Filtering / 105
- 4.4 Simulation Algorithm and Results / 108
- 4.5 Hardware and Software Implementation / 109
  - 4.5.1 Hardware Configuration / 109
  - 4.5.2 Software Implementation / 110
- 4.6 Experimental Results / 111
  - 4.6.1 Acceleration from Zero Speed / 112
  - 4.6.2 Low-Current Low-Speed Test / 113
  - 4.6.3 High-Speed Test / 114
  - 4.6.4 Test of Step Change of Load / 118
- 4.7 Fusion of Soft Computing and Hard Computing / 119
- 4.8 Conclusion and Discussion / 122
- References / 122

Editor's Introduction to Chapter 5 125

**5 ESTIMATION OF UNCERTAINTY BOUNDS FOR LINEAR AND NONLINEAR ROBUST CONTROL** **129**

*Gregory D. Buckner*

- 5.1 Introduction / 129
- 5.2 Robust Control of Active Magnetic Bearings / 130
  - 5.2.1 Active Magnetic Bearing Test Rig / 132
- 5.3 Nominal  $H_\infty$  Control of the AMB Test Rig / 133
  - 5.3.1 Parametric System Identification / 133
  - 5.3.2 Uncertainty Bound Specification / 135
  - 5.3.3 Nominal  $H_\infty$  Control: Experimental Results / 137
- 5.4 Estimating Modeling Uncertainty for  $H_\infty$  Control of the AMB Test Rig / 138
  - 5.4.1 Model Error Modeling / 140
  - 5.4.2 Intelligent Model Error Identification / 141
  - 5.4.3 Uncertainty Bound Specification / 146
  - 5.4.4 Identified  $H_\infty$  Control: Experimental Results / 147
- 5.5 Nonlinear Robust Control of the AMB Test Rig / 148
  - 5.5.1 Nominal Sliding Mode Control of the AMB Test Rig / 148
  - 5.5.2 Nominal SMC: Experimental Results / 150
- 5.6 Estimating Model Uncertainty for SMC of the AMB Test Rig / 151
  - 5.6.1 Intelligent System Identification / 151
  - 5.6.2 Intelligent Model Error Identification / 155
  - 5.6.3 Intelligent SMC: Experimental Results / 156
- 5.7 Fusion of Soft Computing and Hard Computing / 159
- 5.8 Conclusion / 162
- References / 162

Editor's Introduction to Chapter 6 165

**6 INDIRECT ON-LINE TOOL WEAR MONITORING** **169**

*Bernhard Sick*

- 6.1 Introduction / 169
- 6.2 Problem Description and Monitoring Architecture / 172
- 6.3 State of the Art / 176
  - 6.3.1 Monitoring Techniques Based on Analytical Models / 176

6.3.2	Monitoring Techniques Based on Neural Networks /	178
6.3.3	Monitoring Techniques Based on Fusion of Physical and Neural Network Models /	181
6.4	New Solution /	184
6.4.1	Solution Outline /	184
6.4.2	Physical Force Model at Digital Preprocessing Level /	185
6.4.3	Dynamic Neural Network at Wear Model Level /	187
6.5	Experimental Results /	189
6.6	Fusion of Soft Computing and Hard Computing /	192
6.7	Summary and Conclusions /	194
	References /	195

Editor's Introduction to Chapter 7	199
------------------------------------	-----

<b>7 PREDICTIVE FILTERING METHODS FOR POWER SYSTEMS APPLICATIONS</b>	<b>203</b>
--	------------

*Seppo J. Ovaska*

7.1	Introduction /	203
7.2	Multiplicative General-Parameter Filtering /	205
7.3	Genetic Algorithm for Optimizing Filter Tap Cross-Connections /	207
7.4	Design of Multiplierless Basis Filters by Evolutionary Programming /	211
7.5	Predictive Filters for Zero-Crossings Detector /	213
7.5.1	Single 60-Hz Sinusoid Corrupted by Noise /	213
7.5.2	Sequence of 49-, 50-, and 51-Hz Sinusoids Corrupted by Noise /	217
7.5.3	Discussion of Zero-Crossings Detection Application /	222
7.6	Predictive Filters for Current Reference Generators /	223
7.6.1	Sequence of 49-, 50-, and 51-Hz Noisy Sinusoids /	225
7.6.2	Sequence of 49-, 50-, and 51-Hz Noisy Sinusoids Corrupted by Harmonics /	229
7.6.3	Artificial Current Signal Corrupted by Odd Harmonics /	230
7.6.4	Discussion of Current Reference Generation Application /	232
7.7	Fusion of Soft Computing and Hard Computing /	233
7.8	Conclusion /	234
	References /	237
	Appendix 7.1: Coefficients of 50-Hz Sinusoid-Predictive FIR Filters /	239

Editor's Introduction to Chapter 8 241

**8 INTRUSION DETECTION FOR COMPUTER SECURITY 245**

*Sung-Bae Cho and Sang-Jun Han*

- 8.1 Introduction / 245
- 8.2 Related Works / 247
  - 8.2.1 Neural Computing / 248
  - 8.2.2 Genetic Computing / 249
  - 8.2.3 Fuzzy Logic / 251
  - 8.2.4 Probabilistic Reasoning / 253
- 8.3 Intrusion Detection with Hybrid Techniques / 253
  - 8.3.1 Overview / 254
  - 8.3.2 Preprocessing with Self-Organizing Map / 254
  - 8.3.3 Behavior Modeling with Hidden Markov Models / 256
  - 8.3.4 Multiple Models Fusion by Fuzzy Logic / 259
- 8.4 Experimental Results / 261
  - 8.4.1 Preprocessing / 261
  - 8.4.2 Modeling and Intrusion Detection / 263
- 8.5 Fusion of Soft Computing and Hard Computing / 267
- 8.6 Concluding Remarks / 268
- References / 270

Editor's Introduction to Chapter 9 273

**9 EMOTION GENERATING METHOD ON HUMAN-COMPUTER INTERFACES 277**

*Kazuya Mera and Takumi Ichimura*

- 9.1 Introduction / 277
- 9.2 Emotion Generating Calculations Method / 279
  - 9.2.1 Favorite Value Database / 280
  - 9.2.2 Calculation Pleasure/Displeasure for an Event / 282
  - 9.2.3 Favorite Value of Modified Element / 284
  - 9.2.4 Experimental Result / 285
  - 9.2.5 Complicated Emotion Allocating Method / 286
  - 9.2.6 Dependency Among Emotion Groups / 294
  - 9.2.7 Example of Complicated Emotion Allocating Method / 296
  - 9.2.8 Experimental Results / 297

- 9.3 Emotion-Oriented Interaction Systems / 298
  - 9.3.1 Facial Expression Generating Method by Neural Network / 298
  - 9.3.2 Assign Rules to the Facial Expressions / 301
- 9.4 Applications of Emotion-Oriented Interaction Systems / 302
  - 9.4.1 JavaFaceMail / 302
  - 9.4.2 JavaFaceChat / 307
- 9.5 Fusion of Soft Computing and Hard Computing / 308
- 9.6 Conclusion / 310
- References / 311

Editor's Introduction to Chapter 10 313

**10 INTRODUCTION TO SCIENTIFIC DATA MINING:  
DIRECT KERNEL METHODS AND APPLICATIONS 317**

*Mark J. Embrechts, Boleslaw Szymanski, and Karsten Sternickel*

- 10.1 Introduction / 317
- 10.2 What Is Data Mining? / 318
  - 10.2.1 Introduction to Data Mining / 318
  - 10.2.2 Scientific Data Mining / 320
  - 10.2.3 The Data Mining Process / 321
  - 10.2.4 Data Mining Methods and Techniques / 322
- 10.3 Basic Definitions for Data Mining / 323
  - 10.3.1 The MetaNeural Data Format / 323
  - 10.3.2 The "Standard Data Mining Problem" / 326
  - 10.3.3 Predictive Data Mining / 329
  - 10.3.4 Metrics for Assessing Model Quality / 333
- 10.4 Introduction to Direct Kernel Methods / 335
  - 10.4.1 Data Mining and Machine Learning Dilemmas for Real-World Data / 335
  - 10.4.2 Regression Models Based on the Data Kernel / 338
  - 10.4.3 Kernel Transformations / 339
  - 10.4.4 Dealing with Bias: Centering the Kernel / 340
- 10.5 Direct Kernel Ridge Regression / 342
  - 10.5.1 Overview / 342
  - 10.5.2 Choosing the Ridge Parameter / 343
- 10.6 Case Study #1: Predicting the Binding Energy for Amino Acids / 344

- 10.7 Case Study #2: Predicting the Region of Origin for Italian Olive Oils / 346
- 10.8 Case Study #3: Predicting Ischemia from Magnetocardiography / 350
  - 10.8.1 Introduction to Magnetocardiography / 350
  - 10.8.2 Data Acquisition and Preprocessing / 351
  - 10.8.3 Predictive Modeling for Binary Classification of Magnetocardiograms / 351
  - 10.8.4 Feature Selection / 358
- 10.9 Fusion of Soft Computing and Hard Computing / 359
- 10.10 Conclusions / 359
- References 360

**Editor's Introduction to Chapter 11** **363**

**11 WORLD WIDE WEB USAGE MINING** **367**

*Ajith Abraham*

- 11.1 Introduction / 367
- 11.2 Daily and Hourly Web Usage Clustering / 372
  - 11.2.1 Ant Colony Optimization / 372
  - 11.2.2 Fuzzy Clustering Algorithm / 374
  - 11.2.3 Self-Organizing Map / 376
  - 11.2.4 Analysis of Web Data Clusters / 377
- 11.3 Daily and Hourly Web Usage Analysis / 378
  - 11.3.1 Linear Genetic Programming / 379
  - 11.3.2 Fuzzy Inference Systems / 382
  - 11.3.3 Experimentation Setup, Training, and Performance Evaluation / 387
- 11.4 Fusion of Soft Computing and Hard Computing / 389
- 11.5 Conclusions / 393
- References 394
