

INDEX

Note: Subentries under the entry for cognitive load theory evolution are listed chronologically.

A

- Abstracts, 82–83
- Activation of prior knowledge, 37, 41
- Adaptive learning, 276, 282–287; benefits and drawbacks of, 285–287; lack of technology for, 305–307
- Adaptive training, 275, 276–277, 281; tips for applying, 287
- Animations, 167, 171, 180–181, 184, 207–208
- Architecture, human cognitive, 327–329
- Architectures of instruction, 162, 174–176; directive, 174–175, 178–179, 186, 267–270; exploratory, 171, 174; guided discovery/whole task, 174, 176–180, 185, 267–270; receptive, 174
- Asynchronous e-learning, 133–135, 275; audiovisuals and, 73, 303; e-Lessons for, 45, 311; and instructional planning, 297, 301–302; learner support in, 308
- Atkinson, R. K., 65, 202, 211, 229, 230–231, 242, 324, 325
- Attention, 37, 77–105; cues and signals and, 78–83; definition of, 78; delivery format and integrated presentation for, 95–102; e-Lessons on, 41, 103–104; tips for supporting, 102–103; and working memory, 78. *See also* Split attention
- Audio narration, 61–75; backups for hearing-impaired learners, 75; design tips for, 73; e-Lesson on, 74; for experienced learners, 126–127; in explaining diagrams, 61–70; extraneous, 119–120; followed by text, 130–131, 133; and high complexity content, 75–77; integrated materials and, 86–90, 127; for novices, 69, 126–127; and self-explanatory visuals, 125, 127; sequencing on-screen text after, 130–131, 133; when to avoid, 133–135; when to use, 66–73, 131–133
- Audiovisuals. *See* Audio narration; Visuals

- Auditory centers, 33–34, 43, 48–49
- Auditory content, extraneous, 119–120
- Automaticity: automating new knowledge and skills, 233–235; definition of, 234; mental rehearsal and, 235–236, 239; repetitive practice and, 235; when to build, 235; as working memory bypass, 39
- Ayres, P., 250, 273, 324
- B**
- Backwards fading, 197–203, 208
- Baddeley, A., 49
- Basche, P., 258
- Bassock, M., 196, 227
- Benjamin, M., 82–83
- Berman, T. R., 177
- Bove, W., 111–112, 113
- Brown, J. S., 177
- Brunken, R., 325
- Bryman, A., 111–112, 113
- C**
- Carlson, R., 54–56
- Carroll, J. M., 109–110
- Catrambone, R., 325
- Cerpa, N., 97, 99–100, 101, 105, 134, 152
- Chandler, P., 16, 17, 18, 21, 54–56, 62, 63, 64, 67, 68, 69, 75, 79, 85, 86–88, 97, 98, 99–100, 101, 105, 122–125, 126–127, 128–129, 130–131, 132–133, 134, 148–149, 150, 152, 169–173, 183, 184, 187, 199, 201, 206, 207, 211, 236–237, 250, 262–266, 268–269, 273, 319, 321, 322, 324, 325, 327
- Chase, W. G., 29, 30, 31
- Cheat sheets, 141
- Chi, M.T.H., 196, 227, 242
- Clark, R. C., 41, 59, 64, 74, 93, 148, 163, 169, 174, 178, 183, 211
- Classroom lectures. *See* Lectures
- Coding. *See* Encoding
- Cognitive architecture, human, 327–329
- Cognitive learning process. *See* Learning
- Cognitive load, 9–10, 34–36; balancing of, 13; and expertise, 250–254; extraneous (irrelevant) load, 12–13, 34–35, 95–102; germane (relevant) load, 11, 34, 216–242; intrinsic load, 9–11, 44, 162, 321–322; management tips for, 185; pacing and, 180–185; performance aids and, 146–157; relativity of, 14–15; segmenting and sequencing and, 161–173; training design and, 162; whole task learning and overload, 176–180, 185; worked examples and, 203–208. *See also* Extraneous cognitive load; Germane cognitive load
- Cognitive load theory, 293–311; application to instructional planning, 294–302; application to training implementation, 307–309; definition of, 7–9; delivery media and, 300–302; e-Lessons on application of, 290–291, 311; and efficiency in learning, 5–14, 23–24, 40–41; evidence for, 16–19; human learning and, 15, 28, 327–329; instructional content and, 298–300; instructional guidelines and, 8; internationalization of, 322–325; software challenges in implementing, 304–307; target audience considerations for, 294–298; training development and, 302–304
- Cognitive load theory evolution, 313–329; origins, 314–315; early years: problems with problem solving, 315–317; middle years: importance of failed experiments, 317–322; recent years: internationalization, 322–325; current work, 325–329
- Cognitive motivation, 116–118
- Coherence of text, 254–257, 261
- Collins, A., 177
- Comparison group experiments, 252–253
- Completion examples, 194–197, 208; backwards fading and, 197–199; definition of, 194; psychology of, 196–197; research on, 195–196
- Complexity: audio narration and, 67–69; cognitive load and, 44, 162; in computer learning, 99–101; of content, 13, 78, 102, 162; cues and, 102; diagrams and, 56; instructional planning and, 298–300; learning and, 14, 16; redundancy and, 122. *See also* Content; Text

- Computer applications and teaching: delivery formats and, 95–102, 133–135; guidelines for, 296–297, 299; integrated performance aids and, 150–155; integrated presentation for, 95–102, 103; manuals for, 97–98, 110, 133–135, 180, 299; performance aids and, 142, 147, 150–155; redundancy and, 133–135; research on, 97–101; speed of integrated approach to, 99–101
- Computer software challenges, 304–307
- Concise materials, 109–114, 120, 135
- Constructivism, 323
- Content: complexity and attention support, 78, 82; complexity and cognitive load/ applications, 162, 296, 298–299; complexity and signal use, 82, 83; instructional planning and, 298–300; management tips for, 185; motivational/emotional, 116–118; paring down to essentials in, 108–114; redundancy in, 121–135; segmentation and sequencing of, 162–167, 184, 185; tips for developing lean lessons in, 135–136; tips for imposing gradually, 185; type, in applications, 296; use of text format and, 70
- Convergence principle, 219
- Cooper, G., 236–237, 317, 327, 192
- Cooper, M., 52, 74, 147, 319
- Copper, C., 355
- Course architectures. *See* Architectures of instruction
- Course design: content, 298–300; delivery media, 300–302; evaluation of, 309–310; instructional planning, 294–302; software challenges, 304–307; target audience, 294–298; training development materials, 302–304; training implementation, 307–309
- Craig, S. D., 21, 65
- Cross-sectional design. *See* Comparison group experiments
- Cues and signals, 78–83; as attentional support, 41, 102; e-Lessons on, 103–104; limitations of cueing options, 305; research on, 79–82; for verbal information, 79–83; for visual displays, 79; when to use, 82, 102; for worked examples displays, 207–208
- ## D
- Deeper learning, 57–61, 94
- Delivery format: attentional support for, 78, 83; dynamic, 83; and instructional planning, 297; paring down, 109; redundancy in, 121, 133–135; and sequencing/segmenting, 167; single, for integrated presentations, 95–102; and use of audio, 66
- Derry, S. H., 211
- Deterding, R., 178
- Diagrams: audio narration and, 61–70; and deeper understanding, 57–61; diagrams-alone for experienced learners, 262–265; effectiveness of, 59–60; for novices, 57–61; as performance aids, 50–54; psychology of, 60–61; representative versus explanatory visuals, 59–60; for spatial manipulation tasks, 50–54; and spatial relationship rules, 54–57; when to eliminate, 265, 271; when to use, 69–73
- Directive course architectures, 174–175; e-Lesson on, 186; software for the classroom, 178–179; use for novices, 267–270; versus guided discovery, 268–270
- Discovery learning, 323
- Disordinal interaction, 248–249
- Dolezalek, H., 6
- Dow, G. T., 21
- Driscoll, D. M., 21, 65
- Driskell, J. E., 355
- Dual encoding, 60–61
- Dual modalities, acceleration of expertise, 48–50
- Dual task experiments, 34
- ## E
- E-learning: adaptive training and, 275, 276–277, 281, 287; asynchronous, 73, 133–135, 297, 301–302, 308; cognitive load theory applied to, 7, 301–302; in exploratory course architecture, 174; individual differences in expertise and, 270, 281–285; instructional

- planning for, 297, 301–302; and learner control, 181, 184; rapid testing/assessment and, 281–285; tips for applying adaptive instruction in, 287
- Eduainment, 116
- Effect size, 18, 339–340
- Efficiency: cognitive load theory and, 5–14; diagrams and, 56; evaluation of, 309–310; quantification of, 19–23
- Efficiency graph, 22–23, 332–337
- Efficiency metric, 22, 332–337
- Elaboration of information, 37
- Elaboration-rehearsal. *See* Rehearsal
- Electronic performance support systems (EPSS), 142
- Element interactivity, 10, 48
- Emotional motivation, 116–118
- Encoding, 36, 60–61; dual, 60–61; e-Lesson on, 41
- Enquiry-based learning, 323
- EPSS (electronic performance support systems), 142
- Etneir, J. L., 236
- Evaluation of courseware for efficiency, 309–310
- Evidence-based practice, 15–19
- Examples. *See* Completion examples; Worked examples
- Excel Course: content for, 300; delivery media for, 301–302; target audience for, 298
- Experienced learners, 126–127, 297. *See also* Expertise; Experts
- Experimental designs, 252
- Expertise, 243, 247–273; acceleration of, with dual modalities, 48–50; acceleration of, with worked examples, 193; accommodating differences in, 271–272; cognitive load changes with, 250–254; coherent text and, 254–257; diagrams-alone presentation and, 262–265; directive designs and, 267–270; e-Lessons on, 245, 272; experimental design and, 252–254; learning styles and, 248; measuring, 326; problem assignments and, 265–267; rapid testing and, 281–285; reading interruptions and, 257–259; redundancy and, 122, 259–265; redundant content elimination recommended for, 259–265; schema substitutes and, 250–251; text-alone presentation and, 260–261; worked examples and, 193, 197, 199–201, 203, 265–267. *See also* Expertise reversal; Experts; Novices
- Expertise reversal, 32, 243, 247, 250–254, 261
- Experts: applications of cognitive load theory to, 295; audio narration and, 126–127; in mixed audiences, 127, 297–298; preexisting schemas and, 32, 41; subject-matter experts, 209; visuals without narration and, 126–127. *See also* Expertise
- Explanatory visuals, 59–60, 73
- Exploratory course architectures, 174, 181
- Extraneous cognitive load, 12–13, 34; cues and signals to minimize, 78–83, 102; e-Lessons on, 45, 103–104, 136–137, 186, 210, 311; guidelines for minimizing, 43–44, 311; inefficient learning and, 36; integrated presentation and, 95–102; split attention and, 78, 84–93. *See also* Working memory
- Extraneous content and text, 109–115, 116–119
- Extraneous visuals and audio, 115–120
- ## F
- Faded worked examples, 197–203, 208, 303–304
- Fading: backwards, 197–203; of performance aids, 156
- Fajen, B. R., 90, 91
- Far transfer, 219–221, 296, 299
- Freitas, P., 167
- Fuat, A., 7
- Funding for schools, 16
- Fusion Diagram, 128–129
- ## G
- Gallini, J. K., 260–261, 265
- Gerjets, P., 325

- Germane cognitive load, 11, 34, 213–242;
 automating new knowledge/skills and,
 233–235; beneath the cover story on, 221;
 definition of, 218; e-Lessons on, 215, 241;
 far transfer and flexible schemas in,
 221–222; mental rehearsal and, 235–239;
 self-explanations and, 226–233; shifting
 from extraneous load to, 218; tips for
 design of lessons on, 240–241; transfer
 of learning and, 218–226; varied context
 examples, 222–226; worked examples
 and, 218–226
- Gholson, B., 21, 65
- Gick, M. L., 219–220, 221
- Gillespie, G., 90, 91
- Gilroy, L., 120
- Ginns, P., 236
- Glaser, R., 196, 227
- Global Knowledge, 153–155
- Grosse, C. S., 229, 242
- Gruber, H., 229
- Guided discovery course architectures, 174,
 176–180, 267–270
- Gyselinck, V., 59–60
- H**
- Hacker, W., 232
- Harp, S. F., 117
- Hartley, J., 82–83
- Haskell, R. E., 220
- Hayes, J. R., 234
- Hearing-impaired learners, 66, 67
- Hegarty, M., 167
- Heiser, J., 117, 130
- Hmelo-Silver, C. E., 179, 186
- Hoffman, B., 176, 178
- Hojat, M., 339
- Holyoak, K. J., 219–220, 221
- Howe, W., 314
- Hugge, S., 120
- Human cognitive architecture, 327–329
- Hummel, H.G.K., 178
- Hungin, A.P.S., 7
- I**
- Imagination effect. *See* Mental rehearsal
- Inefficient learning, costs of, 6–7
- Information Fatigue Syndrome, 6
- Instruction goals, 218
- Instructional architectures. *See* Architectures
 of instruction
- Instructional guidelines: cognitive load theory and,
 8; five essential learning processes and, 36–37
- Instructional materials: concise, 109–115;
 effective summary of, 112, 113–114; lean
 approach to, 109; memory support
 embedded in, 142; redundancy in, 121–122;
 tips for developing, 135–136; for training,
 143–144, 155–156, 308–309. *See also*
 Performance aids
- Instructional planning, 294–302
- Integrated methods, 297, 299; integrated
 media and, 95–102, 103; split attention
 and, 84–93
- Integrated text, 84–93, 204
- Interaction, 248–250; disordinal, 248–249
- Interactivity, element, 10, 48
- Intrinsic cognitive load, 9–11, 44, 162, 321–322
- Irrelevant load. *See* Extraneous cognitive load
- J**
- Jackson, J., 114–115, 181–182
- Jeung, H., 79, 207
- Jonassen, D. H., 176, 178
- K**
- Kalyuga, S., 69, 126–127, 128–129, 130–131,
 132–133, 184, 199, 201, 250, 262–266,
 268–269, 273, 277–278, 280, 282,
 283–285, 288, 324, 325, 326
