

# Index

---

- \* (asterisk), as multiplication operator, 302, 304
  - @ (at sign), Lotus 1-2-3, 72, 92, 298
  - : (colon), 125, 131, 302
  - , (comma)
    - assigning to numbers after inputting, 94
    - Excel 2007 equivalent to Formatting toolbar, 39
    - Home tab command button, 39, 141, 143
    - as Number Format style option, 165–166
    - as union operator, 302
    - when inputting data into cells, 94
  - & (concatenation operator), 302, 303, 304, 430–431
  - { } (curly braces), in array formulas, 316, 317, 318, 319, 397, 421
  - . (decimal point)
    - inserting automatically, 69, 103–104
    - overriding, 104
    - when inputting data into cells, 94
  - \$ (dollar sign)
    - in absolute cell references, 313, 314
    - in custom number format codes, 149
    - when inputting data into cells, 94
  - = (equal-to operator), 302, 304
  - ^ (exponentiation operator), 302, 304
  - / (forward slash)
    - for activating Ribbon hot keys, 73
    - as division operator, 302, 304
  - > (greater-than operator), 302, 304
  - >= (greater-than-or-equal-to operator), 302, 304
  - < (less-than operator), 302, 304
  - <= (less-than-or-equal-to operator), 302, 304
  - (minus sign)
    - as subtraction operator, 302, 304
    - when inputting data into cells, 94
  - \* (multiplication operator), 302, 304
  - <> (not-equal-to operator), 302, 304
  - # (number symbol), in custom number format codes, 149
  - () (parentheses)
    - in Excel functions, 302
    - order of operator preference, 304–306
    - when inputting data into cells, 94
  - % (percent sign)
    - in custom number format codes, 149
    - as operator, 302, 304
    - when inputting data into cells, 94
  - + (plus sign)
    - as addition operator, 302, 304
    - when inputting data into cells, 94
  - “ (quotation marks), adding to dates in formulas, 96
  - ? (question mark), in custom number format codes, 149
  - ;(semicolon)
    - in array formulas, 316
    - in custom number format codes, 148, 149, 153
  - 1904 date system, 72, 95
- 
- ## A
- 
- absolute cell addresses, 312–314
  - Accept or Reject dialog box, 488–489
  - Access data tables, retrieving data from, 635–636
  - Accounting Number Format button, 39, 141, 143
  - ACCRINTM function, 382

- active cell, defined, 124, 125
- Add Constraint dialog box, 672–673
- add-ins. *See also* Analysis ToolPak
  - activating, 75
  - built-in, 73
  - Conditional Sum Wizard, 75
  - defined, 73
  - downloading, 73
  - Euro Currency Tools, 75, 76
  - Excel 2007 equivalent to Excel 2003
    - Add-Ins command, 35
  - Excel Microsoft Save As PDF or XPS program, 515
  - included with Excel 2007, 75–76
  - installing, 73–74
  - Internet Assistant VBA, 75
  - loading, 73–74
  - Lookup Wizard, 75
  - Solver, 75, 669–677
  - storing, 74–75
  - third-party, 73, 76
  - types, 73
  - unloading, 74
- Add-Ins dialog box, 735–736
- Add Scenario dialog box, 662–664
- addition operator (+), 302, 304
- ADDRESS function, 419
- addresses. *See* cell addresses
- Adobe Reader, 515
- Adobe Systems. *See* PDF files
- Advanced Filter dialog box, 624–631
- After Pressing Enter, Move Selection option, 69
- alignment
  - aligning charts, 542
  - aligning graphic objects, 565
  - altering, 153–155
  - Bottom option, 141, 143, 154
  - Center Across Selection option, 154
  - Center option, 141, 142, 153, 154
  - Decrease Indent button, 141, 142
  - default option, 153
  - defined, 153
  - Distributed option, 154, 155
  - Excel 2007 equivalents to Excel 2003
    - Formatting toolbar buttons, 39
  - Fill option, 154
  - General option, 153
  - horizontal, 153–154
  - Increase Indent button, 141, 142
  - Justify horizontal option, 154
  - Justify vertical option, 154
  - Left option, 141, 142, 153
  - Merge and Center option, 141, 143
  - Middle option, 141, 142
  - Orientation option, 141, 143
  - Right option, 141, 142, 154
  - tools on Excel 2007 Home tab,
    - 141, 142–143
  - Top option, 141, 142, 154
  - vertical, 154–155
  - Wrap Text button, 39, 141, 143, 154, 155–156
- Allow Users to Edit Ranges dialog box
  - Excel 2007 equivalent to Excel 2003 command, 35
  - in protected spreadsheets, 447, 449–450
- alphabetic labeling of columns, 21
- Alt key, 19, 20
- Alt+F4 keystrokes, 31
- AMORDEGRC function, 382
- AMORLINC function, 382
- ampersand (&), 302, 303, 304, 430–431
- Analysis ToolPak
  - date functions, 363
  - defined, 75
  - financial functions, 381–384
  - installing, 405–406
  - statistical functions, 405–406
- AND logical function, 337, 338, 631

- angle brackets (<>), 302, 304
- ANOVA, 298, 405, 406
- Answer report, Solver add-in, 676
- Apply Names dialog box, 327–329
- area charts, 527, 552–553
- AREAS function, 419
- arithmetic operators, 302, 304
- Arrange command, Excel 2007
  - equivalent to Excel 2003 command, 36
- Arrange Windows dialog box, 254–255
- array formulas
  - creating, 316–319
  - defined, 315
  - editing, 319
  - in one-variable data tables, 656–659
  - overview, 315–316
  - in two-variable data tables, 660–661
- arrow keys, 23, 24, 99. *See also* cell cursor
- ascending sort order, 43, 601
- asterisk (\*), as multiplication operator, 302, 304
- at sign (@), Lotus 1-2-3, 72, 92, 298
- auditing formulas, 341–353
- Authenticode, 708–709
- Auto Footer option, 285–287
- Auto Header option, 285–287
- AutoCalculate indicator, Status bar, 27, 303
- AutoComplete feature
  - enabling/disabling, 64, 101
  - entering formulas by using, 64
  - entering function names by using, 309
  - overview, 100–101
- AutoCorrect dialog box
  - AutoCorrect tab, 65, 102, 511
  - AutoFormat As You Type tab, 65–66, 511
  - Smart Tags tab, 66, 511
- AutoCorrect feature
  - adding entries to replacement list, 101–102
  - changing correction options, 65–66
  - Excel 2007 equivalent to Excel 2003 command, 35
- AutoFill feature
  - copying formulas by using, 309–310
  - creating custom lists, 62, 109–111
  - filling series with increments other than one unit, 107–109
  - illustration, 106
  - overview, 104–107
- AutoFilter feature
  - applying to ranges in tables, 139, 140
  - basic filtering, 615–617
  - Date Filters feature, 615, 618–619
  - Number Filters feature, 615, 619–621
  - overview, 615
  - in pivot tables, 688–691
  - Text Filters feature, 615, 617
  - Top 10 AutoFilter dialog box, 620–621
- AutoFit feature, 134
- AutoFormat As You Type option, 65–66
- AutoFormat command, Excel 2007
  - equivalent to Excel 2003 command, 35
- Automatic calculation option, 332
- Automatic Except Data Tables option, 332, 658
- Automatic Except for Tables option, 63
- Automatic Updates option, 53
- Automatically Insert a Decimal Point option, 69, 103–104, 104
- AutoRecover feature, 66–67, 120, 121
- AutoSum feature
  - adding Sum button to Quick Access Toolbar, 43
  - building other formulas, 303

AutoSum feature (*continued*)

    - removing, 473, 476
    - viewing certificates, 473
    - visible, adding to workbooks, 471–474
  - digital stamps, 474
  - DISC function, 382
  - Distributed horizontal alignment option, 154, 565
  - Distributed vertical alignment option, 155, 565
  - #DIV/0! error value, 313, 336, 338–340
  - division operator (/), 302, 304
  - DMAX function, 633
  - DMIN function, 633
  - Document Information Panel, 468–469, 734–735
  - Document Inspector, 468
  - document management servers, 519
  - document recovery feature, 66–67, 120, 121
  - document workspaces, 519
  - dollar sign (\$)
    - in absolute cell references, 313, 314
    - in custom number format codes, 149
    - when inputting data into cells, 94
  - DOLLARDE function, 383
  - DOLLARFR function, 383
  - double-declining balance (DDB) depreciation function, 379, 380
  - doughnut charts, 527, 555
  - downloading
    - add-ins, 73
    - Smart Tags, 512–513
    - templates, 52, 80, 84–86
  - DPRODUCT function, 633
  - drag-and-drop
    - as method for embedding Excel worksheet data in Word documents, 500–501
    - as method of moving and copying, 203–204
  - Drawing button, 38, 43
  - drawing graphic objects, 573–584
  - drivers, 643
  - DSTDEV function, 633
  - DSTDEVP function, 633
  - DSUM function, 633–634
  - DURATION function, 383
  - DVAR function, 633
  - DVARP function, 633
- 
- ## **E**
- 
- e-mail, attaching workbooks to messages, 495–496
  - E-mail button, Excel 2007 equivalent to Excel 2003 Standard toolbar button, 37
  - EDATE function, 363–364
  - Edit Custom Lists option, 62
  - Edit Data Source dialog box, 533–534, 535
  - Edit menu, Excel 2007 equivalent to Excel 2003 commands, 33
  - Edit mode, using to edit formulas, 300
  - Edit Source Data dialog box, 530
  - EFFECT function, 383
  - elapsed dates, calculating, 357–358, 363–364

- elapsed times, calculating, 358–359
- Eliminate Duplicates feature, 600–601
- embedding
  - creating charts, 526–530
  - cutting and pasting worksheet cell data into Word documents, 502
  - defined, 498
  - dragging and dropping worksheet cell data into Word documents, 500–501
  - vs.* separate charts, 526
  - when to use, 499
- Enable Content command button, 708
- Enable Live Preview option, 61
- End indicator, Status bar, 24
- End key, 23, 24
- End of Month function, 364
- End+arrow keystrokes, 230
- engineering functions, 307
- Enter button, Formula bar, 21, 98, 188
- Enter key
  - for completing data entry, 99
  - vs.* Enter button on Formula bar, 188
  - for moving cell cursor, 103
  - setting cursor direction, 69
- EOMONTH function, 364
- equal sign (=), 302, 304
- error bars, chart, 537
- error checking
  - adding alert messages for data validation, 113–115
  - background, 64, 65, 349
  - changing options, 349–350
  - in formulas, 347–348
- Error Checking command, Excel 2007 equivalent to Excel 2003 command, 35
- Error Checking command button, 342, 348
- error-trapping formulas, 338–341
- error values
  - defined, 335
  - #DIV/0!, 313, 336, 338–340
