Introduction	xxiii
Part I: XNA Framework Basics	1
Chapter 1: Introducing XNA	3
Introduction to the XNA Framework	3
XNA Game Studio Express	4
Application Model	5
Content Pipeline	8
Get the Free XNA Game Studio Express	9
Requirements	10
Installing	10
What About Visual Studio 2005 Professional?	12
Configuring Your Xbox 360	13
Getting Started	15
Your First Project	15
F5 and Go	16
Changing the Code	17
Notes about XNA	21
Important Links	21
Is C# Good for Game Development?	22
Getting Used to the Content Pipeline	23
Differences with MDX	24
Additional Tools and Tips	24
Changes in XNA 2.0	25
Troubleshooting	27
Summary	28
Chapter 2: Creating Your First Game: Pong	29
Game Ideas	30
Write Down Your Ideas!	30
Agile Methodology	32
Solving Initial Difficulties	33
Creating Some Textures	34

Contents

Let's Write Pong	35
Sprites	35
Unit Testing in Games	37
Adding the Ball and Paddles	41
Handling Player Input	44
Collision Testing	47
Adding Sound	53
How This Looks on the Xbox 360	56
Challenge: Improve the Pong Game	57
Troubleshooting	58
Summary	59
Chapter 3: Helper Classes	61
Managing the Content Pipeline	62
Supported File Formats	63
Advantages and Disadvantages	64
Handling Content Directories	65
Importing and Accessing Content	66
Logging Error Messages	68
Unit Testing in XNA	69
NUnit and TestDriven.Net	70
Starting Unit Tests	71
Golden Rules	73
RandomHelper Class	73
Generate Random Vectors	74
StringHelper Class	74
Extracting Filenames	75
Writing Lists	76
Other Helpers	77
SpriteHelper Class	77
EnumHelper Class	79
ColorHelper Class	80
The Breakout Game	80
Unit Testing in Breakout	82
Breakout Levels	83
The Game Loop	85
Drawing Breakout	86
Collision Testing	88
Challenge: Improve the Breakout Game	89
Summary	90

Contents

Chapter 4: Game Components	91
The Game Class	92
Game Components	93
More Helper Classes	95
TextureFont Class	95
Input Class	97
Sound Class	98
Tetris, Tetris, Tetris!	99
Rendering the Background	100
Handling the Grid	101
Block Types	102
Gravity	105
Handling Input	107
Testing	110
Challenge: Create the NextBlock Game Component	111
Summary	111
Part II: Basic Graphics Engine	113
Chapter 5: Writing Your Own XNA Graphics Engine	115
What Should Your Engine Be Able to Do?	116
The Engine Unit Test	117
3D Models	119
Rendering of Textures	121
Line Rendering	123
3D Programming	127
Model Unit Test	131
Testing Other Models	135
Plugging in More Game Components	136
Simple Camera Class	137
ScreenshotCapturer Class	139
Making Sure Games Run on the Xbox 360	140
Downloading the XNA Game Launcher	140
Xbox 360 Setup and Deploying Games	141
Console Debugging and Tools	142
Challenge: Write a Game Component	143
Summary	143

Contents

Chapter 6: Shader Management	145
Shader Overview	146
History	146
Shaders Everywhere in XNA	147
Example Games	148
Step-by-Step Shader Tutorial	150
FX Composer	151
FX File Layout	153
Parameters	155
Vertex Input Format	158
Vertex Shader	159
Pixel Shader	162
Importing the Shader into Your Engine	164
Compiling Shaders	165
Using Parameters	166
Vertex Formats	167
Rendering with Shaders	167
Testing the Shader	169
Challenge	170
Summary	170
Chapter 7: Realism Through Normal Mapping	173
Adding Detail to Objects	174
Problems	177
Asteroids! Wrong Game or What?	178
So How Do Shaders Work?	182
Vertex Shaders and Matrices	185
Pixel Shader and Optimizations	187
ShaderEffect Class	189
TangentVertex Format	191
Normal Mapping Unit Test	193
Adding Tangent Data with a Custom Processor	195
Final Asteroid Unit Test	199
More Shaders	201
Offset Mapping	201
Glass Shader	202
Reflection and Water	203
Challenge: Add Parallax Mapping	204
Summary	205

Contents

Chapter 8: Post-Screen Shaders and the Rocket Commander Game	207
Handling Post-Screen Shaders	208
Pre-Screen Sky Cube Mapping	208
Writing a Simple Post-Screen Shader	214
Improvements	217
Implementing Post-Screen Shaders	219
RenderToTexture Class	220
PostScreenDarkenBorder Class	221
Unit Test Result	224
More Post-Screen Shaders	225
Motion Blur	227
Color Correction	228
Menu Effects	231
Rocket Commander Game	232
Performance in XNA	232
Moving from MDX to XNA	234
Using Threads to Improve Performance	235
Result and Screenshots	235
Challenge: Write an Edge Detection Shader	237
Summary	239
Part III: Improving Your Game Engine	241
Chapter 9: Adding Sound with XACT	243
No DirectSound	244
Handling .wav Files	245
Using XACT	248
Creating Projects	249
Creating Your Wave Bank	250
Compressing Music Data	252
Sound Banks	254
Cue Variables	256
Other Effects	257
Changes in XNA 2.0	259
Sound Class	260
Rocket Motor Sound	263
Whoosh, What Was That?	264
Menu Sounds	265
Challenge: Create Your XACT Project	265
Summary	266

Contents

Chapter 10: Player Input and the User Interface	267
Input Class	268
The Update Method in the Input Class	271
Mouse Rectangles	272
Entering Text in XNA	275
Game Screens	277
Help Screen	280
In-Game User Interface	281
Tips	286
Cameras	287
Space Camera	289
Challenge: Write a Free Camera Class	292
Summary	293
Chapter 11: Creating XNA Shooter	295
Putting It All Together	296
Sounds	297
User Interface	298
Textures	300
3D Models	301
Animated Textures	303
Billboards	305
Landscape Rendering	308
Base Texture and Normal Map	308
Height Map	310
Adding Objects	312
XNA Shooter Game	315
Game Logic	317
3D Effects	319
Unit Class	320
Projectile Class	323
Item Class	325
Final Screenshot	327
Challenge: Write a Game with Your Engine	327
Summary	329

Part IV: Writing a Racing Game	331
Chapter 12: Generating Landscapes and Tracks	333
Game Comparisons	334
Gran Turismo	335
Need for Speed	335
Trackmania	336
XNA Racing Game	337
Landscape Rendering	338
Textures	339
Rendering	340
Optimizing Tips	345
Tracks	349
Unit Testing to the Rescue	349
Interpolating Splines	352
More Complex Tracks	354
Importing the Track Data	356
Generating Vertices from the Track Data	358
Final Result	363
Challenge: Create a New Unit Test Track	365
Summary	366
Chapter 13: Physics	369
Newton's Laws of Motion	370
Keep It Simple	372
Gravitation	376
Physics Engines	379
Ageia PhysX	381
Havok	382
ODE	383
Other	383
Implementing Physics	385
Handling Loopings	385
Spring Physics	388
Collision Detection	391
PhysicsAsteroidManager	392
Car Collision	395
Challenge: Figure Out the Road Collision	398
Summary	400

Contents

Chapter 14: Fine-Tuning and “Modding” the Racing Game	401
Game Concept	403
Game Idea	405
Additional Features	407
Game Screens	409
Splash Screen	410
Main Menu	413
Game Screen	414
Highscores	417
Final Unit Testing and Tweaking	418
Tweaking the Track	421
Shadow Mapping	422
Final Testing on Windows	428
Final Testing on the Xbox 360	430
Additional Ideas	433
More Cars	433
Online Highscore List	433
More Shaders and Effects	434
More Game Modes	435
Multiplayer Mode	436
Challenge: Write Your Own Mod!	437
Example Game: Speedy Racer	438
Summary	442
Part V: Writing Multiplayer Games	445
Chapter 15: Multiplayer and Xbox Live	447
What’s New in XNA 2.0	448
Overview About Networking in XNA 2.0	449
TCP Versus UDP	450
Firewalls and Punching Through NATs	453
Network Architecture	455
Sending UDP Data	458
Connecting Two Players	462
Network Messages	464
Server Game List	470
Writing a Chat Application	474
Game Screens	474
Handling Chat Messages	479
The Final Chat Application	482

Contents

Challenge: Write a Multiplayer Application	483
Summary	484
Chapter 16: Role-Playing Games	485
Types of Role-Playing Games	486
“Hack and Slash” Role-Playing Games	487
Massively Multiplayer Role-Playing Games	491
Designing Dungeon Quest	493
Ideas	494
Scenario	494
Story	496
Characters	498
Enemies	501
Weapons and Items	506
Abilities and Spells	506
Abilities	507
Spells	508
Leveling System	510
Challenge: Improve the Leveling System	513
Summary	514
Chapter 17: Dungeon Quest	517
Creating the Engine	518
Changes to the Graphic Engine	519
Using Collada Model Files	522
Handling Many Point Lights	526
Adding AI	530
Path-Finding	530
Alert-System via Cries	531
Multiplayer Support	532
Network Messages	533
Xbox LIVE Support	535
The Dungeon Quest Editor	539
Summary	544
Appendix A: Resources	545
Index	557
