Preface V

List of Contributors XI

- 1 The Evolution of Organisms: A Synopsis** 1
Francisco J. Ayala
- 1.1 Biological Diversity and Evolution 1
1.2 Evolutionary Theory 4
1.3 The Evidence for Evolution: Paleontology 4
1.3.1 Comparative Anatomy, Biogeography, Embryology 6
1.3.2 Molecular Biology 9
1.4 Genetics of Evolution 11
1.4.1 Variation and Mutation 12
1.4.2 Genetic Equilibrium and Genetic Change 13
1.5 Natural Selection 15
1.6 Sexual Selection and Kin Selection 17
1.7 The Origin of Species 18
1.7.1 Adaptive Radiation 20
1.7.2 Rapid or Quantum Speciation 21
1.8 Evolutionary History 21
1.9 Punctuational Evolution 23
1.10 Molecular Evolution 24
- 2 The Evolution Controversies: An Overview** 27
Michael Ruse
- 2.1 Introduction 27
2.2 The History of Evolutionism 28
2.3 Origin of Life 31
2.4 Natural Selection 34
2.5 Human Sociobiology 37
2.6 The Creationist Controversy 40

Handbook of Evolution, Vol. 2: The Evolution of Living Systems (Including Hominids)
Edited by Franz M. Wuketits and Francisco J. Ayala
Copyright © 2005 Wiley-VCH Verlag GmbH & Co. KGaA, Weinheim
ISBN: 3-527-30838-5

VIII | Contents

- 2.7 Conclusions 43
- 2.8 References 43

- 3 The Effects of Complex Social Life on Evolution and Biodiversity 47**
Edward O. Wilson

 - 3.1 Introduction 48
 - 3.2 Sociality and Rate of Evolution 48
 - 3.3 Sociality, Success, and Dominance 51
 - 3.4 References 55

- 4 The Theory of Biological Evolution: Historical and Philosophical Aspects 57**
Franz M. Wuketits

 - 4.1 Introduction 57
 - 4.2 “Forerunners” of Darwin 58
 - 4.3 What is an Evolutionary Theory and Who was the First Evolutionary Theorist? 63
 - 4.4 Obstacles to Evolutionary Thinking 67
 - 4.5 Charles Darwin (1809–1882): The Theory of Natural Selection 73
 - 4.6 Darwin and After Darwin 78
 - 4.7 References 81

- 5 Evolutionary Developmental Biology 87**
Gerd B. Müller

 - 5.1 Introduction 87
 - 5.2 Historical Roots 89
 - 5.3 Agenda and Concepts 92
 - 5.3.1 The Origin of Developmental Systems 93
 - 5.3.2 Evolution of the Developmental Repertoire 93
 - 5.3.3 The Evolutionary Modification of Developmental Processes 94
 - 5.3.4 The Patterns of Phenotypic Variation 95
 - 5.3.5 The Origin of Phenotypic Novelty 95
 - 5.3.6 The Organization of the Phenotype 96
 - 5.3.7 The Environment–Development–Evolution Interaction 97
 - 5.4 Research Programs and Methods 97
 - 5.4.1 The Comparative Morphology Program 98
 - 5.4.2 The Epigenetic and Experimental Program 98
 - 5.4.3 The Evolutionary Developmental Genetics Program 99
 - 5.4.4 The Theoretical Biology Program 101
 - 5.5 Practical and Theoretical Integration 103
 - 5.6 Prospects 105
 - 5.7 References 106

6	Human Biological Evolution	117
	<i>Winfried Henke</i>	
6.1	Summary	117
6.2	Introduction to the Issue	118
6.3	Human Biological Evolution: a Current Review	131
6.3.1	Emergence of Primates	131
6.3.2	The First Hominins: <i>Ardipithecus</i> , <i>Australopithecus</i> , <i>Paranthropus</i>	142
6.3.2.1	Historical Outlines of Discovery and Fossil Evidence	142
6.3.2.2	Chronological and Geographical Distribution	148
6.3.2.3	Morphological Patterns, Phylogenetic Relationship, and Paleoecology	150
6.3.3	The Earliest Evidence of the Genus <i>Homo</i>	160
6.3.3.1	<i>Homo rudolfensis</i> and <i>Homo habilis</i> (s. str.)	161
6.3.3.2	Chronological and Geographical Distribution	162
6.3.3.3	Morphological Patterns, Phylogenetic Relationships, and Paleoecology	165
6.3.4	Lower and Middle Pleistocene <i>Homo</i>	168
6.3.4.1	<i>Homo erectus</i> (incl. <i>Homo ergaster</i>)	168
6.3.4.2	Geographical and Chronological Distribution	170
6.3.4.3	Morphological Patterns, Phylogenetic Relationships, and Paleoecology	174
6.3.5	Upper Pleistocene Human Evolution	181
6.3.5.1	How Many Species?	181
6.3.5.2	Geographical and Chronological Distribution	181
6.3.5.3	Multiregional Model versus Recent African Origin	184
6.3.6	Morphological Patterns and Paleoecology	188
6.3.7	The Role of the Neanderthals	192
6.3.7.1	Geographical and Chronological Distribution	192
6.3.7.2	Characteristic 'Neanderthal' Morphology	193
6.3.7.3	Paleoecological Remarks on the Neanderthals	197
6.3.7.4	Neanderthal aDNA Sequences and the Origin of Modern Humans	199
6.3.8	Molecules and the Origin of Recent Humankind	201
6.4	Concluding Remarks	207
6.5	References	207
7	Evolution on a Restless Planet: Were Environmental Variability and Environmental Change Major Drivers of Human Evolution?	223
	<i>Peter J. Richerson, Robert L. Bettinger, and Robert Boyd</i>	
7.1	Introduction	223
7.2	The Evolution of Cenozoic Environments	225
7.3	Climate and the Evolution of Large Brains and Cultural Artifacts	227
7.4	Learning and Social Learning as Responses to Variability Selection	230
7.5	Internal Constraints on the Evolution of Human Culture	232
7.5.1	Time	232
7.5.2	Preadaptations	232
7.5.3	Functional Constraints	233
7.5.4	Cultural Diversification	233

x | Contents

7.6	Cultural Evolution in the Late Pleistocene and Holocene	234
7.6.1	Holocene Climates and the Origins of Agriculture	234
7.6.2	Geographic Regulation of Rates of Holocene Progress	234
7.6.3	Collapses of Civilizations and Other Holocene Events	235
7.7	Anthropogenic Effects on Climate Evolution	236
7.8	Conclusions	237
7.9	References	238
8	The Human Impact	243
	<i>Bernhard Verbeek</i>	
8.1	Introduction	243
8.2	How an Extraterrestrial Would Perceive Modern Humans	244
8.3	Pre-established Harmony	246
8.4	The Progress of Civilization	248
8.5	Ecology and the Human Being	249
8.6	Evolution of Sustainability	252
8.7	Back to the Past	253
8.8	Culture: Evolution at a Meta Level	255
8.9	Genome and Culture	256
8.10	How Do We Learn Culture?	260
8.11	Evolutionarily Formed Learning Dispositions	262
8.12	The Ecological–Social Dilemma	264
8.13	Sustainability Through Faka-Tonga	265
8.14	Cultural Comparison	266
8.15	The Power of Constraints	268
8.16	Critical Phase of Evolution	269
8.17	References	270
	Index	273
