# INDEX

## A

Abysmal science, 81  
Active plan for cost savings, 11  
Administrative business functions, 5  
Airline passenger reservation systems, 84  
Airlines, 162  
Alternate dispute resolution (ADR), 30  
Asking the wrong question, 74  
Associations and agencies, 3  
Assumptions, 9, 97  
Audit concerns, 16  
Auditors' comments, 103

## B

Backup, 19  
Backup computer hot sites, 72  
Backup computer hot sites, warm sites and cold sites, 79  
Banks and communications providers, 161

Benefits of a good program development methodology, 98  
Boards of Directors, 70  
Boards of directors and workplace violence, 25  
Building codes, 70  
Building evacuation, 70  
Business as usual, 13, 74  
Business continuity, 97  
Business continuity concerns, 1  
Business impact analysis, 124

## C

Cash flow, 111  
Characteristics of a good program methodology, 99  
Characteristics of a sound program, 9  
Clarify program expectations, 96  
Common contingency planning problems, 72

- Common disaster recovery plan problems, 8
  - Communicate corporate contingency program strategy, 100
  - Communicate policy, strategy, and methodology to senior management, 95
  - Compliance audits, 97
  - Computer disaster recovery plans, 72
  - Computer hot-site costs, 74
  - Computer processing alternatives, 140
  - Computer processing fallback strategy, 6
  - Conceptual business continuity strategies for loss of computer operations, 189
  - Consulting firms, 83
  - Containing program development costs, 14, 96
  - Contingency planning process, 13
  - Contingency program building blocks, 90
  - Contingency program components, 76
    - Prevention, 76
    - Incident recovery, 76
    - Interim processing, 76
  - Contingency program objectives, 108
  - Contingency program phases
    - Prevention, 86
    - Incident recovery, 86
    - Interim processing, 86
    - Resume normal operations, 86
  - Contingency program policy statement, 78
  - Contingency programs must be preventive and forward focused, 75
  - Continuing education and preparedness reviews, 168
  - Convincing others
    - Organizational needs, 119
    - Personal needs, 119
  - Corporate benefits, 152
  - Corporate contingency program, 9
  - Corporate headquarters, 75
  - Corporate issue, 85
  - Cost benefits, 150
  - Cost-conscious executives, 19
  - Cost-effective, 69
  - Cost-effective contingency programs, 85
  - Cost-reduction opportunities, 10
  - Critical incident stress debriefing, 31
  - Current plan may not work, 8
  - Customer service, 112
- D**
- Damage assessment, 15
  - Data center restoration, 16
  - Department managers, 17
  - Department managers, 94

Department/functional managers, 79

Detecting profile behavior patterns that could lead to workplace violence, 76

Develop *what if* interim processing strategies, 95

Developing a contingency program,  
 How much market share will it cost you?, 81  
 Management's responsibility, 81  
 Protect against what?, 82

Developing contingency programs at multiple locations

Documentation standards, 182

Organization, 174

Standards for developing interim processing strategies, 179

Standards for implementation, 176

Developing interim processing strategies, 79

Discretionary expense, 89

Distribution centers, 75

Distribution facility, 82

Distributors, 3

**E**

Education program components, 128

Emergency response, 70

Employee attitude surveys, 75

Employee training for workplace violence, 29

Employee-related programs to protect workplace violence, 78

Employer liability, 21

Ensure a practical approach, 96

Essential business functions, 137

Establish a corporate contingency program policy and strategy, 95

Executive briefings, 122

**F**

Facility contingency planning, 82

Financial service organizations, 2

Fire protection, 70

Fire resistance and endurance, 70

First responders role, 77

First-line managers, 89

Focus on strategies instead of detail, 96

Foreign Corrupt Practices Act, 10, 71

Functional managers are the architects, 97

**G**

- Game plan, 94
- Guidelines for developing contingency programs at multiple locations, 173

**H**

- Healthcare, 162
- Hot-site subscription fees, 15
- How much detail?, 115
- How to contain program development costs, 12
- How wide an area?, 91
- Human Resources department, 75,78

**I**

- Implementation, 154
- Implementation process, 160
- Incident recovery, 77, 87
- Incident response, 31
- Incident response plan, 9
- Incident response team training, 30
- Increased technology dependence, 84
- Insurance considerations, 112
- Insurance premium rate considerations, 113
- Interim processing, 88, 89
- Interim processing period, 78
- Interim processing strategies, 10, 77, 82, 94

- Interim processing strategies approval, 77
- Inventory control manager, 74

**L**

- Limit the time periods, 92
- Line managers, 69, 73
- Long range strategic planning, 82
- Loss of access to facilities, 85
- Loss of communications, 85
- Loss of computer processing, 79
- Loss of computer processing capability, 85
- Loss of efficiency, 97
- Loss of facilities or production equipment, 79
- Low probability, 97
- Low probability of a disaster, 19

**M**

- Maintenance and testing, 167
- Major steps in program development, 95
- Manufacturing, 163
- Manufacturing plants, 75
- Manufacturing support functions, 3

Market share, 112  
Mind-set, 83  
Mission-critical facilities, 75

**N**

National Construction Safety  
Team Act, 34  
National Institute of Standards  
and Technology (NIST),  
34  
Need for cost-effective solu-  
tions, 18  
New contingency program para-  
digm, 69  
New methods of fire-resistant  
design of structures NIST  
recommendations,  
44  
Education and training NIST  
recommendations, 65  
Enhanced fire endurance of  
structures NIST recom-  
mendations, 39  
Improved active fire protec-  
tion NIST recommenda-  
tions, 48  
Improved building evacua-  
tion NIST recommenda-  
tions, 52  
Improved emergency  
response NIST recommen-  
dations, 57  
Improved procedures and  
practices NIST recommen-  
dations, 61

Increased structural integrity  
NIST recommendations,  
36

**O**

Old paradigm, 71  
Operating without computer  
processing capabilities, 2  
Organized response, 110  
OSHA, 21

**P**

Pentagon, 70

offenders, 71  
Program documentation sec-  
tions, 144

Protecting employees against workplace violence, 27  
 Prototype programs, 103

## Q

Quality control procedures, 7

## R

Reduce program maintenance and testing costs, 96  
 Reduce the number of issues to be addressed, 96  
 Reducing exposure to workplace violence, 26  
 Regulatory agency reporting, 129  
 Responsibility of corporate executives, 72  
 Role of a steering committee, 155  
 Role of department managers, 156  
 Role of first-line supervisors, 157  
 Role of outside specialists, 158  
 Role of senior management, 155

## S

Second-choice production alternatives, 7

Security, 22  
 Selecting a program development methodology, 98  
 Setting the stage for success, 133  
 Stabilization, 93  
 Stabilization period, 87  
 Starting point, 74  
 Strategies versus plans, 69  
 Strategy for replacing computer hardware, 78  
 Structural integrity, 70  
 Supervisors, 89  
 Supervisory training for workplace violence, 29  
 Surgical process, 93  
 Survival, 13  
 Systemic problems, 74

## T

Telephone communications, 1  
 Terrorism, 20, 69  
 Terrorist incidents, 70  
 Testing, 15  
 Threat detection and communications, 77  
 Transitioning to the new contingency program paradigm, 78  
 Types of disasters  
   Environmental, 106  
   Incited, 106  
   Natural, 106

**V**

Vital facilities, 6

**W**

Warning signs of violence, 28  
Ways to compensate for loss of efficiency, 110  
*What if* interim processing strategies, 16 84,139  
What impacts insurance premiums, 114  
Where to look for cost reductions, 14  
Which types of disaster?, 91  
Why cost-reduction opportunities exist, 11
