

# INDEX

## A

Activism, 65  
Advocacy, 189–190; and associations, 311–317; current roles of health education associations, 315–317; evolving role of in health education, 314–315; examples, 326–328; organizational considerations, 312–314  
Age: and health disparities, 324–325  
Aging, 20  
AIDS, 260–261; advocacy, 327–328  
Alcohol, 19, 122; advocacy, 327  
Alienation, 203  
Allergies, 159  
American Academy of Pediatrics, 24  
American Association for Health, 122  
American Association of Retired Persons, 59  
American Association of School Administrators, 8–9  
American Child Health Association, 122–123  
American Child Hygiene Association, 122  
American Physical Education Association, 122  
American Public Health Association, 24  
Annan, Kofi, 276, 285  
Anticipatory grieving, 281  
Arguing effectively, 223  
Argumentation model, 302  
Association for the Advancement of Health Education, 24, 87  
Associations: and advocacy, 311–317; future challenges, 317  
Asthma education, 63  
Autonomy, 219

## B

Barriers to health, 52  
Behavior, 5–6  
Behavior change, 80, 81, 82, 84–88, 135–136

Behavior modification, 50–51  
Behavioral change, 69–70  
Behavioral health, 72, 139–143  
Behavioral medicine, 72  
Behavioral science: contribution to health education, 69–70  
Being able, 17  
Biomedical science: contribution to health education, 71  
Biotic communities, 228  
Bodily functioning, 209  
Bodymind, 148, 151, 162. *See also* mind-body connection  
Borysenko, Joan, 153, 155  
Brainstorming, 103  
Bush, George W., 285

## C

Cause and effect: view of, 43  
Celebrated life, 17  
Center for Health Promotion and Education, 24  
Change, 56–57  
Character, 41  
Child Health Organization, 122, 123  
Child restraints, 19
