Preface	ix
<b>Chapter 1 Introduction</b>	<b>1</b>
Background	1
Framework for Understanding Digital Data	2
Stakeholders in the Planning and Design Process	7
Digital Tools for the Land Planning Process	13
<b>Chapter 2 Gathering Digital Data</b>	<b>19</b>
The Need for Valid Data	20
Database Management System Software	23
Geospatial Data	25
Democratization of Data	42
Mining for Data	50
Digital Terrain and 3D Landforms	51
Site Surveys	60
Global Positioning System Technology	63
Data Acquisition, Costs, and Management	70
Conclusion	72
<b>Chapter 3 Sharing, Storing, and     Managing Data Networking</b>	<b>73</b>
Networking	74
Wireless Technology	76
Storage and Backup	79
Disaster Recovery Planning	83
Managing CAD Data	83
Case Study: Sasaki Associates	90
Case Study: Geller Devellis, Inc.	93
<b>Chapter 4 Processing Digital Data</b>	<b>99</b>
Management and Production	99
Importance of the Internet to the Design Community	112
Visualizing the Land	114
Case Study: Burlington Project	131
Conclusion	137

<b>Chapter 5 Integrating Digital Data</b>	<b>139</b>
Creating Maps	140
CAD/GIS Integration	165
Processing Images	173
Tools for Urban Planning	177
Case Study: Using Google Earth to Share Geospatial Information	181
Community Mapping	187
Interactive Web Technology: Public Participation in Cyberspace	196
Dynamic Graphics	201
Case Study: Sasaki Strategies	203
Integrating Scientific Modeling and Simulations	205
Case Study: Geller Devellis	208
Conclusion	214
<b>Summary</b>	<b>215</b>
Trends	215
Conclusion	218
<b>Web Resources</b>	<b>219</b>
<b>References</b>	<b>223</b>
<b>Index</b>	<b>225</b>
