Introduction	xxi
Chapter 1: Your Map, Your World	1
What Is a Map API?	1
The Four Types of Map APIs	2
Understanding Map Technology	2
Common Map Features and API Tools	3
Map and Satellite Imagery	3
Zooming	4
Panning	5
Geo-coding	6
Markers and Custom Markers	6
Overlays	7
Navigation	7
Summary	8
Chapter 2: Developing with Yahoo! Maps	9
What Is a Mashup?	9
XML	10
REST	10
RSS and GeoRSS Feeds	11
Prime Mashup Sources	12
Flickr	12
Upcoming.org	13
HotJobs	13
Weather	14
Traffic	14
Local Search	15
Yahoo! Developer Support	15
Developer Network	15
Message Group	15
Maps Application Gallery	16
Summary	16

Contents

Chapter 3: The Ajax API	17
What the Ajax API Is	17
Ajax in Greater Depth	18
Applications You Know That Use Ajax	18
Fundamentals of JavaScript	19
Fundamentals of CSS and DHTML	23
Benefits of the Ajax API	24
Summary	25
Chapter 4: Get Started with the Ajax API	27
Get an Application ID	27
Software Requirements	28
Integrating the Ajax API	29
Including the API Classes	29
Setting Initial Map Parameters	31
Summary	34
Chapter 5: Ajax API Basics	35
Basic API Methods	35
The YEvent Class	36
Map Zoom Methods and Events	36
Map Type Methods and Events	40
Map Positioning Methods and Events	41
Summary	46
Chapter 6: Ajax API Advanced Features	47
Working with Markers	47
Marker Methods and Classes	48
Working with Tools	52
Control Methods	52
Working with Overlays	55
Overlay Methods and Classes	55
Summary	61
Chapter 7: The Ajax Mashup	63
Time to Mash Up	63
The Big Idea	63
Planning an Approach	64

The Flickr API	64
How Flickr Photos Are Geo-Tagged	64
API Authentication	65
API Methods	66
Understanding JSON	67
Build the Mashup	68
Code the Mashup	69
Enhancing the Mashup	73
Summary	74
Chapter 8: The JS-Flash API	75
<hr/>	
What Is the JS-Flash API?	75
Fundamentals of JavaScript	76
Fundamentals of CSS and DHTML	79
Benefits of the JS-Flash API	80
Summary	81
Chapter 9: Get Started with the JS-Flash API	83
<hr/>	
Get an Application ID	83
Software Requirements	84
Transitioning Between APIs	85
Integrating the JS-Flash API	85
Including the API Classes	85
Setting Initial Map Parameters	88
Summary	90
Chapter 10: JS-Flash API Basics	93
<hr/>	
Basic API Methods	93
Map Zoom Methods and Events	93
Map Type Methods and Events	97
Map Positioning Methods and Events	101
Summary	107
Chapter 11: JS-Flash API Advanced Features	109
<hr/>	
Working with Markers	109
Marker Methods and Classes	110
Working with Tools	115
Tool Methods and Classes	115

Contents

Working with Widgets	119
Working with Overlays	120
Overlay Methods and Classes	121
Summary	125
<hr/> Chapter 12: The JS-Flash Mashup	<hr/> 127
Time to Mash Up	127
The Big Idea	127
Planning and Approach	128
The Yahoo! Travel API	128
How Travel Content Contains Location	128
API Authentication	129
API Methods	130
Understanding JSON	131
Build the Mashup	133
Code the Mashup	133
Enhancing the Mashup	139
Summary	140
<hr/> Chapter 13: The AS-Flash API	<hr/> 141
What Is the AS-Flash API?	141
Flash in Greater Depth	142
The Flash IDE	142
Fundamentals of ActionScript 2	145
Variable Types	147
Classes	148
Methods	148
Components	149
Events	150
Benefits of the AS-Flash API	150
Summary	151
<hr/> Chapter 14: Get Started with the AS-Flash API	<hr/> 153
Get an Application ID	153
Software Requirements	154
Downloading and Installing Components	154
Adding the Map API	155
Adding to the Stage	156
Initialization	159
Adding with ActionScript	161
Summary	164

Chapter 15: AS-Flash API Basics	165
Basic API Methods	165
Map Set Methods	165
Map Get Methods	173
Component Methods	180
Summary	181
Chapter 16: AS-Flash API Advanced Features	183
API Classes in Depth	183
Advanced Map Objects and Methods	184
Working with Events	184
Working with Widgets	189
Widget Methods	189
Widget Classes	189
Working with Tools	195
Tool Methods	195
Tool Classes	196
Working with Markers	201
Marker Methods	201
Marker Classes	202
Working with Overlays	211
Overlay Methods	212
Overlay Classes	212
Summary	222
Chapter 17: The AS-Flash Mashup	223
Time to Mash Up	223
The Big Idea	224
Planning and Approach	224
Setting the Stage	225
The Layout	225
Coding the Mashup	228
Exploring the HotJobs Web Service	229
Architecting the Mashup	231
Loading the XML	231
Parsing the XML	234
Handling User Interaction	237
Displaying the Data on the Map	239
Enhancing the Mashup	241
Summary	242

Chapter 18: Yahoo! Maps and Flex 2	243
Finding Out About Flex	243
The History of Flex	244
How Yahoo! Maps Works in Flex	245
Getting Flex 2	246
Flex Builder 2: The Flex Authoring Tool	247
Fundamentals of MXML	249
Coding with MXML and ActionScript	250
Benefits of Using Flex 2 and the AS-Flash API	252
Summary	253
Chapter 19: Get Started with Yahoo! Maps and Flex 2	255
Get an Application ID	255
Software Requirements	256
Download and Install the AS-Flash API	257
Create the Flash Client of the Application	258
Adding the AS-Flash API to the Stage	258
Adding ActionScript to the Flash Client Side	260
Create the MapConnector Class	262
Coding the MapConnector Class in ActionScript	262
Create the Flex Client of the Application	264
Writing the MXML	264
Summary	266
Chapter 20: Basic Methods: Flex 2 Using the AS-Flash API	269
Basic API Methods	269
Map Set Methods	270
Map Get Methods	279
Summary	285
Chapter 21: Advanced Features: Flex 2 Using the AS-Flash API	287
Advanced AS-Flash API Classes	287
Reviewing Objects and Methods	288
Reviewing Events	288
Working with Widgets	289
Widget Methods	289
Widget Classes	289

Working with Tools	290
Tool Methods	290
setActiveTool(tool)	290
removeTool(tool)	290
Tool Classes	291
Working with Markers	291
Marker Methods	291
Marker Classes	292
Working with Overlays	298
Overlay Methods	298
Overlay Classes	299
Summary	304
Chapter 22: The Flex 2 Mashup	305
<hr/>	
Time to Mash Up	305
The Big Idea	305
Planning and Approach	306
The Flex Client	307
Architect the MXML	307
The Data	307
The Layout	308
Coding the Controls	309
Handling User Interaction	309
Completing the MXML	310
The Local Connection	312
Coding the MapConnector Class	312
Making the Video	314
Converting Media to Flash Video	314
The Flash Client	316
Architect the ActionScript	316
Importing the Classes	316
Create the Local Connection	316
Add the Event Listeners	317
Field Map Instance Events	317
Field Local Connection Events	318
Completing the ActionScript	318
Finalize the Mashup	320
Enhancing the Mashup	321
Summary	322

Appendix A: API Method Comparison Chart	323
Basic Set Methods and Classes	323
Basic Get Methods	325
Tools and Widgets	325
Markers and Overlays	326
Appendix B: API Example and Mashup Index	329
Ajax API Examples	329
JavaScript Flash API Examples	330
ActionScript Flash API Examples	331
AS-Flash/Flex 2 API Examples	332
Index	335
