author's account information, retrieving

(`blogger.getUserInfo`), 259

deleting entry (`blogger.deletePost`), 257

described, 255–256

entry, storable or publishable

(`blogger.newPost`), 256

list of weblogs, retrieving

(`blogger.getUsersBlogs`), 258

replacing existing entry

(`blogger.editPost`), 257

retrieving one or more recent entries

(`blogger.getRecentPosts`), 257–258

client software, connecting to Movable Type, 253–254

data, importing from other weblogs, 18

described, 247–249

Metaweblog API calling methods

described, 260–261

new entry (`metaweblog.newPost`), 261

recent entries, retrieving

(`metaweblog.getRecentPosts`),

262–263

replacing entry (`metaweblog.editPost`),

262

retrieving entry (`metaweblog.getPost`),

262

uploading files to Web server

(`metaweblog.newMediaObject`), 263

Movable Type API calling methods

defined categories, retrieving

(`mt.getCategoryList`), 264–265

entry categories, setting or removing all

(`mt.setPostCategories`), 265–266

entry's assigned categories, retrieving

(`mt.getPostCategories`), 265

filters, supported

(`mt.supportedTextFilters`), 267

methods, supported

(`mt.supportedMethods`), 267

rebuilding files (`mt.publishPost`), 264

titles, retrieving entry

(`mt.getRecentPostTitles`), 266–267

trackback pings, retrieving

(`mt.getTrackbackPings`), 266

request, sending, 249–251

response, receiving, 251–253

server, Movable Type's, 254–255
