| | |
|--|-------------|
| Foreword | xvii |
| Acknowledgments | xix |
| Introduction | xxi |
| Chapter 1: Hello Web 2.0 World | 1 |
| Introducing BuzzWatch | 1 |
| Charting the Landscape | 4 |
| Exploring Behind the Scene | 6 |
| Making BuzzWatch a Better Web Citizen | 24 |
| Making BuzzWatch More Maintainable | 28 |
| Applying the Final Touch | 33 |
| Conclusion | 35 |
| Chapter 2: Page Presentation | 37 |
| Creating Clean and Simple Pages | 37 |
| Producing Valid HTML | 38 |
| Using Cascading Style Sheets | 40 |
| Choosing Appropriate Elements | 41 |
| From HTML to XHTML | 42 |
| XHTML 1.0 | 43 |
| XHTML 1.1 | 43 |
| Why Use XHTML? | 44 |
| Differences from HTML | 45 |
| The Document Object Model | 47 |
| DOM Levels | 49 |
| DOM API Overview | 49 |
| DOM API Reference | 51 |
| Cascading Style Sheets | 51 |
| Rounded Corners | 52 |
| Tabs | 54 |
| Tools | 55 |
| The DOM Inspector for Firefox | 55 |
| The Web Developer Toolbar for Firefox | 57 |
| The Internet Explorer Developer Toolbar | 58 |
| DevBoi for Firefox | 59 |
| Summary | 60 |

Contents

Chapter 3: JavaScript and Ajax **61**

JavaScript: Understanding Lesser-Known but Crucial Features **61**

The undefined Value and Type 62

The === Operator 64

Iterating with for-in 65

Functional Programming 66

Function Arguments 67

JavaScript Optimizations **69**

Reducing JavaScript Download Time 69

Keep DOM Updates to a Minimum 70

Ajax **70**

It's All About the User Experience 71

XMLHttpRequest History 71

XMLHttpRequest Example 72

Yahoo! UI Library 75

Google Web Toolkit 78

Handling Memory Leaks 79

Summary **81**

Chapter 4: Design Principles **83**

Common Design Issues **84**

Bookmarks 84

Navigation 88

Minimizing Traffic 89

Support for Down-Level Devices 93

Accessibility Requirements and Guidelines 94

Summary **109**

Chapter 5: What's Next for Web 2.0? **111**

XSLT and XPath **111**

XSLT Hello World Example 112

More XSLT 114

XSLT Styles 117

More XSLT 119

Using XSLT in a Browser 122

SVG **124**

SVG Hello World Example 126

Styling SVG 130

More SVG 132

| | |
|--|------------|
| XForms | 142 |
| XForms Hello World Example | 143 |
| Styling XForms | 147 |
| More XForms Examples | 151 |
| What's Next for HTML | 161 |
| The W3C Proposals | 162 |
| The WHATWG Counterproposals | 163 |
| Comparing XHTML 2.0 and HTML 5 | 164 |
| Summary | 165 |
| | |
| Chapter 6: Rich Client Alternatives | 167 |
| <hr/> | |
| From Browsers to Rich Clients | 167 |
| Browser Drawbacks | 168 |
| A Solution — Rich Clients | 169 |
| Rich Clients Today | 169 |
| Comparing Rich Client Frameworks | 169 |
| OpenLaszlo | 170 |
| XUL | 179 |
| XAML | 186 |
| Summary | 190 |
| | |
| Chapter 7: HTTP and URIs | 193 |
| <hr/> | |
| How the Web Was Won | 193 |
| Web 1.0: HTML, URLs, and HTTP | 194 |
| Under the Hood | 195 |
| URLs and URIs | 196 |
| Dangers of Hidden Code | 199 |
| What Does a Web Server Really Do? | 199 |
| The Web Is Two-Way | 200 |
| The Web Model and REST | 200 |
| Resources | 201 |
| Representations | 201 |
| State | 202 |
| Transfer: Using HTTP Methods | 203 |
| Considerations for Building an HTTP Service | 204 |
| Media Types | 205 |
| Resources of Interest | 205 |
| Required Representations | 206 |
| Server Response | 207 |

Contents

| | |
|--|------------|
| What's on the Wire? | 208 |
| Reference Toolkit | 208 |
| An HTTP Example | 208 |
| More Representations | 212 |
| Content Negotiation | 214 |
| Watching Messages with HTTPTracer | 215 |
| Summary | 219 |
| | |
| Chapter 8: XML and Its Alternatives | 221 |
| | |
| XML | 221 |
| The Basics of XML | 221 |
| XML Namespaces | 225 |
| Unicode and Character Encodings | 227 |
| Dealing with Binary Data | 229 |
| Features of XML You Usually Won't Need | 230 |
| Datatypes | 231 |
| Schema Languages | 232 |
| XSLT and XPath | 233 |
| Other XML Technologies | 234 |
| Existing Data Formats and Protocols | 235 |
| APIs | 235 |
| Alternatives to XML | 235 |
| JSON | 236 |
| JavaScript | 238 |
| HTML | 238 |
| Other Formats | 240 |
| Summary | 241 |
| | |
| Chapter 9: Syndication | 243 |
| | |
| Some Syndication Basics | 243 |
| Microcontent | 244 |
| The Feed | 244 |
| The Syndication Process | 246 |
| Syndication Formats | 246 |
| RSS 2.0: Simple Content | 247 |
| RSS 1.0: Resource Description | 251 |
| RSS 1.0 Specifications and Modules | 256 |
| Atom: Best of Both Worlds? | 257 |
| Atom Specifications and Extensions | 261 |

| | |
|--|------------|
| Comparing Elements Across Formats | 261 |
| Enclosures and Podcasting | 262 |
| Summary | 263 |
| Chapter 10: Microformats | 265 |
| <hr/> | |
| The Basics of Microformats | 266 |
| CSS and Microformats | 267 |
| Semantic HTML | 269 |
| Content, Presentation, and Data | 269 |
| Disambiguation | 269 |
| Coverage | 271 |
| Standards Org 2.0 | 273 |
| Creating Microformat Documents | 275 |
| Example: Events Timeline | 275 |
| Summary | 285 |
| Chapter 11: Combining Protocols to Build Web Services | 287 |
| <hr/> | |
| Clarifying Web Services | 287 |
| REST Services | 288 |
| A Sample Application | 288 |
| The Atom Publishing Protocol | 292 |
| REST Services in the Wild | 292 |
| More Resources on REST | 294 |
| WS-* Services | 295 |
| WS-* Services and SOAP | 295 |
| WS-* Services and WSDL | 299 |
| The WS-* Stack | 301 |
| REST versus WS-* | 303 |
| SOAP | 303 |
| WSDL | 304 |
| Tool Support | 305 |
| Summary | 307 |
| Chapter 12: Serving XML over HTTP | 309 |
| <hr/> | |
| How Is Serving HTML Different? | 309 |
| Media Types | 309 |
| Character Encoding | 310 |
| Serving Well-Formed XML | 310 |
| Serving Static Content | 310 |

Contents

| | |
|--|------------|
| Serving Dynamic Content | 312 |
| Principles | 312 |
| Serving XML with Java | 313 |
| Serving XML with ASP.NET and C# | 317 |
| Serving XML with Ruby on Rails | 321 |
| Serving XML with PHP, Perl, Python, and More | 322 |
| Using Server-Side XSLT | 322 |
| Using an XML Platform | 325 |
| XQuery and XML Databases | 328 |
| Serving XML with eXist | 329 |
| WebDAV and Subversion | 331 |
| Serving JSON | 332 |
| Summary | 332 |
| | |
| Chapter 13: Databases and Non-XML Sources | 333 |
| | |
| Dealing with Non-XML Sources | 333 |
| Converting Relational Data to XML | 334 |
| Server-Side Transformation Using SQL Server | 339 |
| Client-Side Transformation Using ADO.NET | 343 |
| Using Oracle XSQL | 348 |
| Converting Binary Data to XML | 358 |
| A Manual Conversion | 358 |
| Automating the Conversion | 363 |
| Summary | 370 |
| | |
| Chapter 14: Creating Syndication Channels | 371 |
| | |
| A Simple Atom Service | 371 |
| User Interfaces | 372 |
| Application Architecture | 374 |
| Abdera Atom Toolkit | 374 |
| Code Overview | 375 |
| Running the Application | 388 |
| Compiling and Deploying the Application | 388 |
| Considerations for Going Live | 389 |
| Adding E-mail Support | 389 |
| Understanding the Mail Support Architecture | 391 |
| Setting Up a Local Mail Server | 391 |
| Using the MailClient Class | 393 |
| The MessageReader Interface | 396 |
| MailEntryCollector | 396 |
| Summary | 400 |

| | |
|--|------------|
| Chapter 15: Mashups, HTML Scraping, and Web Services | 401 |
| Popular Examples: Mapping Mashups | 402 |
| Why Use Mashups? | 404 |
| The Business Model of Mashups | 406 |
| Screen Scraping | 407 |
| Benefits and Drawbacks | 407 |
| Playing Fair | 408 |
| Downloading the Page | 408 |
| Analyzing the Page | 409 |
| A Simple Screen Scraping Example | 410 |
| Creating Feeds | 411 |
| Deploying on Your Server | 414 |
| Deploying Through an External Service | 415 |
| Mapping and Badges | 415 |
| Badges | 416 |
| Google Maps | 417 |
| Summary | 419 |
| Chapter 16: Implementing and Maintaining Your URI Space | 421 |
| Future-Proofing Your URIs | 422 |
| Technology Agnosticism | 422 |
| Hierarchies and Collections | 423 |
| Trailing Slashes and Location Independence | 424 |
| Managing Change in Your URI Space | 425 |
| The Basics of HTTP Redirection | 425 |
| Permanently Redirecting Resources | 426 |
| Temporarily Redirecting Resources | 426 |
| Redirection Methods You Should Not Use | 427 |
| Server-Side Redirection | 428 |
| Your URI Mapping Toolbox | 428 |
| Java Servlets | 428 |
| Apache mod_alias and mod_rewrite | 429 |
| ASP .NET and IIS | 433 |
| Summary | 433 |
| Chapter 17: Podcasting and Serving Multimedia | 435 |
| The Formats Labyrinth | 436 |
| Descriptive Formats | 436 |
| Container and Encoding Formats | 447 |

Contents

| | |
|---|------------|
| Protocols | 454 |
| Multicast | 455 |
| Unicast | 455 |
| Choosing a Protocol | 456 |
| Summary | 457 |
| | |
| Chapter 18: Security | 459 |
| | |
| What Is Security? | 459 |
| Resource Security | 459 |
| Message Security | 460 |
| Lessons Learned from History | 461 |
| The Layered Approach | 461 |
| Authentication and Authorization | 462 |
| Authentication and Authorization in IIS and ASP.NET | 462 |
| Different Authentication Methods in IIS and ASP.NET | 464 |
| Authentication and Authorization in Apache | 466 |
| Message Encryption | 467 |
| Symmetric Encryption | 467 |
| Public Key Infrastructure | 468 |
| Message Digests | 469 |
| Digital Certificates | 469 |
| Secure Sockets Layer | 470 |
| The Stages of in an SSL Communication | 471 |
| Setting Up SSL in IIS | 471 |
| Setting Up SSL in Apache | 475 |
| Code Security | 479 |
| General Principles | 479 |
| Web Services Security | 482 |
| Using Web Services Security | 483 |
| How the Web Service Works | 485 |
| Adding Policy | 486 |
| Adding the Custom Authentication | 487 |
| Creating a Client | 490 |
| Improving Security | 493 |
| Summary | 494 |
| | |
| Index | 495 |
