# TABLE OF CONTENTS

---

Foreword	xxi
Preface	xxiii
<b>1 Human Ecology on Spaceship Earth</b>	<b>1</b>
1.0 Introduction / 1	
1.01 Axiom 1 / 2	
1.02 Axiom 2 / 5	
1.03 Axiom 3 / 6	
1.04 Philosophical Questions for the Quest / 9	
1.1 Development of Human Ecology / 9	
1.11 Major Ages in Human History / 10	
1.12 The Biosphere: “Spaceship Earth” / 10	
1.13 Limits to Growth / 11	
1.2 Summary / 13	
References / 14	
<b>2 The Unending Quest for Abundant Energy</b>	<b>16</b>
2.0 Historical Perspective / 16	
2.1 Characteristics of an Industrial Nation / 17	
2.11 Flow of Abundant Energy / 20	
2.12 Capital and Income Energy Resources / 22	
2.2 Exponential Growth Dynamics / 24	
2.21 Linear Growth / 24	
2.22 Exponential Growth / 25	
2.23 Doubling Time / 26	
2.24 Exponential Growth Scenarios / 27	
2.25 Calculation of Growth Rates by Regression Analysis / 29	
2.3 Current Growth in Energy Consumption / 31	

- 2.31 Trends in Energy Consumption / 31
- 2.32 Energy Intensity / 33
- 2.33 Projections of Energy Intensities / 35
- 2.34 Projections of Future Primary Energy Consumption / 35
- 2.4 Summary / 38
- References / 38

**3 The Fossil Fuel Era 40**

- 3.0 Historical Perspective / 40
  - 3.01 Fossil Fuel Consumption in the United States since 1900 / 41
- 3.1 Fossil Fuels / 42
  - 3.11 Coal / 43
  - 3.12 Heating Value of Coal / 43
  - 3.13 Crude Oil / 44
  - 3.14 Natural Gas / 45
- 3.2 Forecast of U.S. Energy Consumption through 2025 / 46
- 3.3 How Long Will Fossil Fuels Last? / 48
  - 3.31 Estimation of Fossil Fuel Reserves / 48
  - 3.32 The McKelvey Diagram / 49
  - 3.33 Production of a Finite Resource / 52
  - 3.34 The Logistic Production Curve Method / 53
- 3.4 Growth of Fossil Fuel Demand for Generation of Electricity / 59
- 3.5 Summary / 60
- References / 61

**4 Sustainability of Energy Resources 63**

- 4.0 Sustainable Economic Development / 63
  - 4.01 Indicators for Sustainable Energy Development / 64
  - 4.02 Sustainable Energy Supply / 65
- 4.1 Sustainability of Electric Energy Demand / 65
  - 4.11 The Electronic Way of Life / 66
  - 4.12 A Continental Superconducting Grid / 66

- 4.13 The Hydrogen Fuel Era / 68
- 4.2 Natural Gas in Sustainable Energy Supply / 69
  - 4.21 Petrochemical Use of Natural Gas / 70
  - 4.22 Growth of Natural Gas Consumption in the United States / 71
  - 4.23 Forecast of Natural Gas Consumption through 2025 / 73
  - 4.24 Natural Gas Supply and Reserves / 73
- 4.3 Natural Gas Commitment for Electric Power Generation / 75
- 4.4 Sustainability of Natural Gas as an Energy Resource / 77
- 4.5 Nonfossil Energy Resources / 80
  - 4.51 Growth of Alternative (Nonfossil) Energy Use / 80
  - 4.52 Forecast of Nonfossil Energy Supply / 81
- 4.6 Summary / 82
- References / 83

## **5 Environmental Impact of Energy Consumption 84**

- 5.0 Historical Perspective / 84
- 5.1 Basics of Environmental Impact / 85
  - 5.11 Relationship between Magnitude and Severity / 86
  - 5.12 Consequences of Environmental Threat / 86
  - 5.13 A Hypothetical Example of Magnitude-Severity Analysis / 87
- 5.2 The Saga of the Greenhouse Effect / 90
  - 5.21 Components of the Saga / 91
- 5.3 Local Air Pollution from Automobile Exhaust / 101
  - 5.31 Environmental Impact of Smog / 103
  - 5.32 Nitrogen Oxides in Photochemical “Smog” / 104
  - 5.33 Magnitude-Severity Aspects of Nitrogen Oxides / 106
- 5.4 Value of Air Quality Improvement in Transportation / 106
- 5.5 Some Data for the Los Angeles Air Basin / 108

- 5.6 Summary / 109
- References / 109

**6 The Nuclear Energy Era 111**

- 6.0 Historical Perspective / 111
- 6.1 Basic Elements of Nuclear Science / 112
  - 6.11 The Atomic Nucleus / 113
  - 6.12 Isotopic Composition and Abundance / 113
  - 6.13 Atomic Mass / 114
  - 6.14 Equivalence of Mass and Energy / 115
  - 6.15 Binding Energy / 116
  - 6.16 Nuclear Stability / 118
  - 6.17 Types of Radioactive Decay / 119
  - 6.18 Properties of Radionuclides / 120
- 6.2 Basic Elements of Nuclear Power / 121
  - 6.21 Nuclear Fission / 122
  - 6.22 Available Energy from Uranium Fuel / 123
  - 6.23 Nuclear Power Reactors / 125
  - 6.24 The Light-Water Uranium Fuel Cycle / 126
  - 6.25 Generation IV Nuclear Reactors / 129
  - 6.26 Nuclear Safety / 130
  - 6.27 Nuclear Waste / 131
- 6.3 The Oklo Natural Nuclear Reactors on Earth / 132
- 6.4 Thermonuclear Fusion / 133
- 6.5 Summary / 135
- References / 135

**7 Renewable Energy Resources 137**

- 7.0 Renewable Energy / 137
  - 7.01 Types of Renewable Energy / 137
  - 7.02 Consumption of Renewable Energy / 138
- 7.1 Hydroelectric Power / 140
- 7.2 Solar Energy / 142
  - 7.21 The Solar Constant / 144
  - 7.22 Solar Energy “Reserves” / 145
  - 7.23 Solar Electricity / 146
- 7.3 Wind Energy / 150
  - 7.31 Wind Power Rate / 153

7.32	Wind Turbine Conversion Efficiency /	154
7.33	The Wind Energy Resource /	156
7.34	Estimated Cost of Wind Power /	156
7.4	Biomass Energy /	158
7.41	The Solar Biomass Resource /	159
7.42	Biomass Conversion Processes /	160
7.43	Environmental Aspects of Bioenergy Fuels /	161
7.5	Other Renewable Resources /	163
7.51	Tidal Energy /	163
7.52	Geothermal Energy /	164
7.6	Summary /	166
	References /	167

## **8 Hydrogen as an Energy Carrier** **169**

8.0	Historical Perspective /	169
8.01	Physical Nature of Hydrogen /	170
8.02	Chemical Nature of Hydrogen /	171
8.03	Energetics of Hydrogen /	173
8.1	Hydrogen and Electricity as Parallel Energy Carriers /	173
8.11	Why Hydrogen? /	173
8.12	Competitive Uses for Hydrogen /	174
8.2	The Hydrogen Energy Fuel Cycle /	175
8.21	Hydrogen Production /	176
8.21a	A Wee-Bit of Electrochemistry /	177
8.22	Hydrogen Storage /	188
8.23	Distribution of Hydrogen /	191
8.24	End Uses for Hydrogen Fuel /	192
8.25	Cost Factors of Hydrogen Fuel /	194
8.3	Summary /	196
	References /	198

## **9 Hydrogen as a Transportation Fuel** **200**

9.0	Historical Perspective /	200
9.01	Hydrogen Fuel in Aviation /	200
9.02	Hydrogen Fuel in Marine Technology /	201
9.1	Hydrogen Fuel Cells in Vehicle Transportation /	202
9.11	Just What Is a Fuel Cell? /	202

- 9.12 A Wee-Bit of Thermodynamics / 204
- 9.13 Aspects of Hydrogen as a Transportation Fuel / 207
- 9.14 Hydrogen Fuel Vehicles by Application Type / 208
- 9.2 Hydrogen Fuel-Cell Vehicles / 209
  - 9.21 Characteristics of Alternative Fuels for Fuel Cells / 211
  - 9.22 Methanol as a Fuel for Fuel Cells / 212
  - 9.23 Natural Gas as a Transportation Fuel / 213
- 9.3 What More Is Needed? / 214
- 9.4 Summary / 215
- References / 216

## **10 The Hydrogen Fuel Era**

**217**

- 10.0 Perspective on an Era / 217
- 10.1 Potential for Air Quality Improvement / 218
  - 10.11 Emission Standards / 218
  - 10.12 Factors That Affect Vehicle Emissions / 220
  - 10.13 History of California Emission Standards / 221
- 10.2 Modeling Health Benefit from Hydrogen Fuel Transportation / 222
  - 10.21 Model Development for the Three-City Hydrogen Air Quality Study / 223
  - 10.22 The Metropolitan Tokyo Air Quality Study / 226
- 10.3 Electric Energy Requirement for Hydrogen Fuel / 230
  - 10.31 Extrapolation of Historical Transportation Fuel Data to 2010 / 231
  - 10.32 Growth of Demand for Hydrogen Fuel and Electric Energy: 2010–2050 / 234
- 10.4 Prospects for the Future of a Sustainable Energy Supply / 236
  - 10.41 Potential Distribution of Energy Resources / 238
  - 10.42 Possibilities to Resolve the Impasse / 240
- 10.5 Wrap-Up / 242
- 10.6 Summary / 242
- References / 242
