Numbers & Symbols

- (decrement) operators, 326, 423
- # (crosshatch) character, 180
- # (pound) sign, 245
- % (percent sign), 193
- % (remainder) operators, 324, 326
- & (ampersand) character, 494
- & operator, 344, 345–346
- && operator, 344, 345–346
- & editor, HTML, 181
- &apos editor, HTML, 181
- > editor, HTML, 181
- < editor, HTML, 181
- " editor, HTML, 181
- * (multiplication) operators, 326
- *= operator, 425
- @ (at symbol), 558
- @id parameter, 558
- @page directive, 295
- [] (brackets), 415
- ^ operator, 344
- _ (underscores) character, 494
- { (opening brace), 306
- } (closing brace), 256, 310
- | operator, 344, 346–347
- || operator, 344, 346–347
- ~ (tilde) character, 743
- + (addition) operators, 326
- + (plus sign), 49, 193
- ++ (increment) operators, 326, 423
- += operator, 425
- < operator, 334, 433
- <%# %> tags, 575–578
- <%# and #> symbols, 519
- <%#XPath(“num”)%> statement, 214
- <= operator, 334, 433
- <staticconnections> tag, 818
- = (equals) sign, 187, 253, 311, 329
- != (relational operator), 345
- != operator, 334
- /= operator, 425
- \= operator, 425
- = operator, 425
- != operator, 433
- = operator, 433
- == (equality operator), 334, 379
- > (closing bracket), 187
- > operator, 334, 433
- >= operator, 334, 433
- \ (backslashes), 289
- : (colon), 253
- / (division) operators, 326
- . (dot) character, 622
- / (forward slash), 743
- (minus sign), 193
- ; (semi-colon), 254
- (subtraction) operators, 326
- ... (ellipsis button), 249
- ! operator, 344–345

A

- absolute positioning, 194–197
- Absolute radio button, 250
- access modifier, 417, 445
- Access provider
 - building, 733–737
 - compiling Dynamic Link Library (DLL), 734–735
 - configuring Web for Access provider, 735
 - creating test page for Access provider, 735–737
 - creating Visual C# project, 734
 - installing starter kit, 733
 - overview, 733
 - obtaining, 733

- access rules for pages
 - allowing access to one user, 695–696
 - allowing anonymous users access to root, 693–694
 - denying access for all users, 694–695
 - overview, 693
 - reviewing access rules, 696–697
- accessors, 387
- AccessProfileProvider, 735, 736
- action attribute, 183, 223
- Active Server Pages (ASP classic), 189
- ActiveStepChanged event, 156, 157
- ActiveStepIndex property, 156
- ActiveViewIndex attribute, 150
- Add() method, 217, 261, 263, 287, 666, 669, 678, 751
- Add button, 49
- Add Field dialog box, 537
- Add New Access Rule page, 693, 695, 707
- Add New Item dialog box, 69, 167, 688
- Add operation, 638
- Add property, 660
- Add Style Rule dialog box, 256
- <add> element, 718
- AddAfter method, 672
- AddBefore method, 672
- AddDays function, 639
- AddFirst method, 674
- AddHours function, 639
- addition (+) operators, 326
- AddMilliseconds function, 639
- AddMonths function, 639
- Address property, 170
- Address table, 530
- AddSeconds function, 640
- AddTicks function, 640
- AddYears function, 640
- ADO.NET
 - adding security to SQL statements, 504–506
 - connections, 495–498
 - database commands, 498–501
 - calling statements that return no data, 498–499
 - calling statements that return one data item, 500–501
 - calling stored procedure, 499–500
 - overview, 498
 - displaying data on Web page, 501–503
 - overview, 479
 - relational databases, 480–485
 - foreign keys, 483–484
 - indexing data, 484–485
 - overview, 480
 - primary keys, 482–483
 - rows and columns, 481
 - tables, 480–481
 - retrieving data from table, 503–504
 - SQL statements, 494–495
 - Structured Query Language (SQL) and databases, 485–493
 - CREATE TABLE, 486–489
 - DELETE, 493
 - DROP TABLE, 489–490
