Acknowledgments	viii
Introduction	xxv
Chapter 1: Getting Started with Macromedia Flash	1
Introducing the Development Environment	1
Tools Panel	2
Properties Panel	2
Timeline	3
Keyframes and Animation	3
About the Library and Symbols	4
Working with Buttons	5
Working with Movie Clips	7
About Layers, Depth, and Levels	8
Setting Up Your Scripting Environment	8
Introducing the Actions Panel	8
Exploring ActionScript Preferences	9
Automatic Indentation	9
Tab Size	10
Code Hints	10
Font	10
Color	11
ActionScript 2.0 Settings	11
Exploring Auto Format Preferences	12
Publishing a Project	13
The Flash Tab	14
The HTML Tab	15
The Image Tabs	15
Options for Detecting the Flash Player	16
Summary	18
Exercises	18
Chapter 2: Getting Started with ActionScript 2.0	19
Understanding Statements	19
Using Simple Statements	19
Using Compound Statements	20

Contents

Understanding Operators	20
Using Operator Precedence	22
Exploring Operator Associativity	22
Understanding the Common Operators	23
Using White Space	25
Using Comments	26
Introducing Variables	27
Assigning Data to a Variable	28
Viewing the Contents of a Variable	28
Passing Data from Variable to Variable	29
Naming Variables	29
Introducing Constants	30
Using Strong Variable Typing	30
Exploring Data Types	33
Distinguishing Primitive and Composite Data Types	34
Passing by Value Versus Pass by Reference	35
Duplicating Data for Composite Types	36
Using Dot Syntax	37
Discerning Special Variables and Keywords	38
_root	38
_level0	39
_global	39
this	39
Working with Collections of Data	40
Understanding Arrays	40
concat()	42
join()	43
push()	43
sort()	43
splice()	45
Exploring Associative Arrays and Objects	45
Viewing the Object Class as a Container	46
Revisiting the Associative Array	47
Summary	50
Exercises	51
Chapter 3: Understanding ActionScript Expressions and Loops	53
Making Decisions	53
Expressions	54
Building Expressions	55
Using if..then..else	59
Using switch..case	60

Understanding Loops	66
The for Loop	66
The for..in Loop	69
The while Loop	70
The do..while Loop	72
Dealing with Loop Errors	76
Off-by-One Errors	76
Infinite Loops	77
Summary	80
Exercises	80
Chapter 4: Exploring ActionScript Functions and Scope	83
<hr/>	
Functions	83
Functions in Action	86
An Alternate Syntax	87
Passing Functions as Arguments	88
Variable Scope	92
Managing Variable Scope	95
Side Effects	96
Summary	98
Exercises	99
Chapter 5: Getting Started with Coding	101
<hr/>	
Introduction to Object-Oriented Programming	101
Defining Object-Oriented Programming	101
Classes Versus Objects	103
Class Inheritance	106
Goals of Object-Oriented Programming	106
Coding Best Practices	107
Understanding Variable Naming	107
Making Variable Names Readable	107
Making Boolean Variables into Questions	108
Avoiding Reserved Words	108
Distinguishing Variable Names from Class Names	110
Variable Typing	110
Type Casting	112
Commenting	116
Formatting Code	118
Understanding Variable Scope	119
Declaring All Global and Timeline Variables in One Place	119
Creating an Object Just for Data	120

Contents

Creating Access Functions	120
Managing Data with Custom Classes	121
Accessing Variables in Another Timeline	122
Creating Your Own Functions	129
Strongly Typing Function Arguments	129
Avoiding Hard-Coded Movie Clip References	130
Declaring Return Values	130
Avoiding Oversized Functions	131
Avoiding Entanglement	131
Avoiding Duplication	133
Summary	140
Exercises	141
Chapter 6: Setting Up Flash Projects	143
Setting Up the Library	143
Working with Bitmap Images	144
Keep Images Organized on the Desktop	145
Keep Images Organized in the Library	145
Embed Images into Movie Clips	145
Nesting Sections within a Movie Clip	148
Using Keyframes to Manage Application State	149
Keeping Code in External Files	151
Using Script to Manage Application State	153
Summary	157
Exercise	157
Chapter 7: Controlling Movie Clips	159
The Movie Clip Revealed	159
MovieClip Class Methods	160
attachBitmap()	161
attachMovie()	162
beginFill()	162
clear()	163
createEmptyMovieClip()	163
createTextField()	163
duplicateMovieClip()	163
endFill()	164
getBytesLoaded()	164
getBytesTotal()	165
getURL()	166
gotoAndPlay()	167
hitTest()	167

lineStyle()	168
lineTo()	169
loadMovie()	169
moveTo()	170
play()	170
removeMovieClip()	170
setMask()	171
startDrag()	171
stop()	172
stopDrag()	172
swapDepths()	173
unloadMovie()	173
MovieClip Class Properties	174
MovieClip Class Events	176
Creating Movie Clips On-the-Fly	178
Attaching Movie Clips from the Library	181
Loading External Movies	184
Loading Movies into Levels	184
Loading Media into Existing Movie Clips	185
Fully Qualified, Absolute, and Relative URLs	186
Using Movie Clips as Masks	190
Improving Movie Clip Performance	196
Bitmap Caching	196
Transparency	196
Filters and Blending Modes	197
Full Screen	197
Summary	197
Exercises	198
Chapter 8: Pre-Loading Movies	199
<hr/>	
Using a Custom Pre-Loader	199
Polling with onEnterFrame() Versus setInterval()	204
Understanding the MovieClipLoader Class	205
MovieClipLoader Class Events	205
MovieClipLoader Class Methods	206
addListener()	206
getProgress()	207
loadClip()	207
removeListener()	208
unloadClip()	208
Implementing the MovieClipLoader Class	209

Contents

Examining the Loader and ProgressBar Components	212
Loader Component Method, Properties, and Events	212
ProgressBar Component Method, Properties, and Events	213
Implementing the Loader and ProgressBar Components	215
Strategies for Using Pre-Loaders	217
The Monolithic Movie Approach	217
The Split-Up Movie Approach	221
Summary	225
Exercises	226
Chapter 9: Working with Components	229
New to Version 2.0	229
Exploring Components	230
Data Components	230
FLV Playback and FLV Playback Custom UI Components	231
Media Components for Flash Players 6 and 7	233
User Interface Components	233
Placing Components Manually	234
Placing Components on the Stage with Script	237
Scripting Components	242
Summary	245
Exercises	245
Chapter 10: Interacting with the User	247
Handling Events	247
Creating a Listener Object	247
Variation of Creating a Listener Object	254
Creating a Listener Function	255
Which Listener Technique Should You Use?	257
Attaching Multiple Listeners to Multiple Components	262
Organizing the Listeners	263
Handling Events from Multiple Sources	264
Manually Invoking Events in a Component	270
Summary	271
Exercise	272
Chapter 11: Controlling Components	273
Introducing the Component Inspector Panel	273
Creating Data Bindings between Components Using the Bindings Tab	275
Using an XML File as a Data Source	277

Controlling Component Appearance	281
Using setStyle() to Change Component Styles	282
Setting Styles Globally	282
Setting Styles for a Component Type	283
Setting Styles Using Custom Classes	283
Style Search Order	283
Available Styles	284
Alert Style Names	286
Custom Date Classes	287
Skinning Components	290
Summary	294
Exercises	295

Chapter 12: Debugging Debugged **297**

Types of Bugs	297
Compile-Time Bugs	297
Logic Bugs	298
If Statement Logic Errors	298
Uninitialized Variables	299
Off-by-One Errors	301
Fence Post Errors	301
Infinite Loops	302
Numerical Precision Errors	302
Develop to Debug	303
Make Your Code Readable	303
Develop in Small Chunks	304
Use Small Functions	304
The Science of Debugging	305
Develop a Theory	305
Run an Experiment	306
Using the Built-In Debugger	306
Using the Trace Statement	311
Commenting Out Code	312
Analyze the Results	313
Summary	314
Exercises	314

Chapter 13: Working with Vector Graphics **319**

Using the Drawing API	320
Tools for Drawing Vectors with ActionScript	320
lineStyle()	320
beginFill()	322

Contents

beginBitmapFill()	322
beginGradientFill()	323
endFill()	324
moveTo()	324
lineTo()	325
curveTo()	325
clear()	325
Drawing Vectors with ActionScript	325
The Matrix Object	334
Summary	334
Exercises	334
Chapter 14: Applying Filter Effects	335
DropShadowFilter	336
BlurFilter	337
GlowFilter	337
BevelFilter	338
GradientGlowFilter	339
GradientBevelFilter	339
ConvolutionFilter	340
ColorMatrixFilter	343
DisplacementMapFilter	345
Cloning Filters	346
Applying Multiple Filters	346
Applying Blending Modes	352
Summary	353
Exercises	353
Chapter 15: Working Directly with Bitmap Data	355
The Bitmap Object's Methods	356
applyFilter()	356
clone()	356
colorTransform()	356
copyChannel()	357
copyPixels()	357
dispose()	357
draw()	358
fillRect()	358
floodFill()	358
generateFilterRect()	359

getColorBoundsRect()	359
getPixel()	359
getPixel32()	360
hitTest()	360
loadBitmap()	360
merge()	361
noise()	361
paletteMap()	362
perlinNoise()	362
pixelDissolve()	363
scroll()	364
setPixel()	364
setPixel32()	364
threshold()	365
The bitmapData Object's Properties	365
Converting a Movie Clip into a Bitmap Image	366
Manipulating Bitmap Data	366
Summary	368
Exercises	368
Chapter 16: Using ActionScript for Animation	369
Scripted Versus Non-Scripted Animation	369
Creating Animations Using Keyframes	370
Creating Animations Using ActionScript	372
Moving a Movie Clip Using onEnterFrame()	372
Moving a Movie Clip Using setInterval()	374
Frame-Based Versus Time-Based Animation	376
The Effect of Movie Frame Rate on Animation	376
Which Technique Should You Use?	379
Choosing a Frame Rate or Update Interval	379
Creating Animation with Movie Clips	380
Animating Multiple Movie Clips	381
Adding Random Behavior	382
Introducing Easing and Acceleration	387
Easing Out	387
Easing In	391
Summary	402
Exercises	402

Chapter 17: Automated Transitions	403
The Tween Class	403
Absolute Versus Relative Tweens	404
Built-In Easing Classes and Methods	404
Tween Class Methods	405
continueTo()	406
forward()	407
nextFrame()	407
prevFrame()	408
resume()	408
rewind()	409
start()	409
stop()	409
yoyo()	410
Tween Class Properties and Events	410
Playing Tweens in Parallel	414
Playing Tweens in a Sequence	417
Animating with the Drawing API	425
Summary	432
Exercises	432
Chapter 18: Handling Text	433
Creating Text Fields with ActionScript	434
Field Instance Names Versus Field Variable Names	434
System Fonts and Embedded Fonts	434
Creating a Text Field On-the-Fly	434
Working with Text Display Properties	436
antiAliasType	436
sharpness	437
thickness	437
Rich Text Formatting Options	439
Using TextFormat	439
New Text Format Options for Flash 8	440
Justification	440
letterSpacing	440
Kerning	441
A Note about setNewTextFormat()	445
Displaying HTML	446
Image and SWF Support in HTML Text Fields	448
Font Support	450
Hyperlinks and the ASFunction Method	452

Using Cascading Style Sheets	453
Creating a Cascading Style Sheet Object	454
Associating a StyleSheet with a Text Field	454
Define Styles Directly on a StyleSheet Object	456
How to Define Tags, Class, and Properties	458
Using CSS with XML	459
Scroll Text Options	461
Scrolling Text Using the TextArea Component	462
Scrolling Text Using the ScrollBar Component	463
Summary	469
Exercises	470
Chapter 19: Using ActionScript for Media	471
<hr/>	
Managing Images	471
Smart Preloading	473
Using the MovieClipLoader to Preload an Image	473
Managing Sound	474
Sound Class Methods	474
Sound Class Events and Properties	476
Creating a Sound Object	477
Loading Library Sounds	477
Loading External MP3 Files	478
Using ID3 Tags	478
Available Properties in the V2 Tags	478
Streaming MP3 Audio	480
Starting, Stopping, and Tracking Sound	480
Event Sounds	483
Controlling Volume, setPan, and setTransform	483
Volume	483
Pan	483
Transform	483
Working with the Microphone	489
Microphone Class Methods	489
Microphone Class Properties and Events	490
Microphone Activity	492
netStream	494
Summary	494
Exercises	495
Chapter 20: Managing Video	497
<hr/>	
Terms, Technology, and Quality	497
Data Rate	497
Progressive — HTTP	498
	xix

Contents

Streaming — Flash Communication Server	498
Video Keyframes	498
Variable Bit Rate	499
Interlacing	499
Frame Rate	499
Creating Flash Video	500
Converting a Video	500
Loading an External Video	503
Exporting to Video	503
Loading an External FLV File	504
The netStream Class	504
The Video Class	506
clear()	506
attachVideo()	506
Video Class Properties	506
Controlling Video Position	508
Using Transparency within Video	510
Working with Video Quality	513
Deblocking and Deringing	513
Scaling and Transparency	514
Working with a Camera	515
The Camera Class Methods, Properties, and Events	515
Creating a Camera Object	516
Displaying a Camera Feed as Video on the Stage	517
Security Pop-Up Considerations	522
Summary	522
Exercises	522
Chapter 21: Using ActionScript to Communicate with a Server	523
External Data and Usability Concerns	523
Data Latency: Asynchronous Communication	524
Using LoadVars	524
Ampersand-Delimited Data	525
LoadVars Class Methods	525
Creating a LoadVars Object	527
LoadVars Event Handlers	529
onData()	529
onLoad()	529
Loading and Parsing Raw Text	531
Summary	534
Exercises	534

Chapter 22: Reading XML	535
Using the Built-in XML Class	535
All Wrapped Up in Tags	535
CDATA and Character Formats	537
The Flash XML Class	537
XML Class Methods	538
XML Event Handlers	541
onData()	541
onLoad()	542
ignoreWhite: A Special Property	542
Loading External XML Files	542
Measuring Bytes	545
A Note about Security and Locality	545
getBytesTotal Isn't Working!	548
Understanding the Parent-Child Node Relationship	549
Navigating an Example Node Tree	549
Using Attributes	552
Using the XML Socket Connection	552
The XML in the XMLSocket Class	553
Null Bytes	553
XMLSocket Class Methods and Events	553
sendAndLoad	556
Using HTTP GET and POST	557
Apples and Oranges	558
How Will You Know?	558
Using the XML Component	559
Explaining Cross-Domain Security	562
Understanding Why Flash Uses Domain Policies	563
Knowing When Policy Files Are Required	564
Setting Up Policy Files	564
I'm Offering Web Services; I Want to Allow Any Domain!	567
Considering HTTPS	567
Load a Policy File from a Subfolder	568
Using a Policy File with an XML Socket, without HTTP	569
Using Shims and Proxies	570
Proxies: Forcing Data Access	570
Shims: Allowing Script Access	571
Summary	573
Exercises	574

Chapter 23: Communicating Between the Macromedia Flash Plug-in and the Browser **577**

LocalConnection	577
Creating a localConnection Object	579
Security	581
Storing Data Locally with Shared Objects	582
Acceptable Data Types	584
Using Shared Objects as Cookies	585
Working with the User	587
Managing Disk Space	587
Sharing SharedObjects	588
Giving a Flash Movie Data on Startup with FlashVars	588
Introduction to Flash Object and Embed Tag Parameters	589
Adding FlashVars	590
Creating FlashVars with JavaScript	591
Passing FlashVars via a Servlet Page	593
Summary	594
Exercises	594

Chapter 24: Putting JavaScript to Work **595**

Changing Security Settings	595
Calling JavaScript from within Flash	597
Introduction to getUrl()	598
Creating a JavaScript Command with Nested Variables	598
Considering Limitations	602
Calling JavaScript Functions Using fscommand	602
Calling Flash from JavaScript	604
Basic JavaScript Methods and Events	606
Using the Flash JavaScript Integration Kit	607
Setting Up the Integration Kit	608
Calling JavaScript Functions from ActionScript	608
Calling ActionScript Functions from JavaScript	609
Using the External API	612
ExternalInterface Class Methods	612
addCallback()	612
call()	614
Calling ActionScript Functions and Methods	615
Calling an ActionScript Function from JavaScript	615
Calling an ActionScript Method from JavaScript	616
Calling JavaScript Functions from ActionScript	617
Opening a Browser Window	618
Setting and Getting Data Using ActionScript	619

Opening Browser Windows	629
Using getURL() to Create Pop-Up Windows	629
Use ExternalInterface to Create Pop-Up Windows	630
Calling a JavaScript Wrapper Function	630
Defining Browser Window Parameters	631
Summary	635
Exercise	635
Chapter 25: Uploading and Downloading Files	637
<hr/>	
FileReference Class Methods	637
Using browse()	638
Using cancel()	638
Using download()	639
Using upload()	639
FileReference Class Properties	640
Downloading Files	641
Uploading Files	645
Summary	651
Exercise	651
Chapter 26: Communicating between the Flash Plug-in and the Operating System	653
<hr/>	
Using the System Object to Retrieve System Information	653
System Object Limitations among Player Versions	655
The setClipboard Method	655
Projectors, Flash Executables, and Other Executables	656
Limitations	656
Using fscommand to Call Projector Functions	656
SDK	658
Third Parties	658
Summary	659
Exercises	659
Chapter 27: Creating Custom Classes	661
<hr/>	
Working with Classes	661
Defining the Class	661
Public Versus Private	663
Defining the Constructor	665
Passing Startup Data	666
Defining Methods	669

Contents

Defining Properties	675
Working with Getters and Setters	676
Implications of Getters and Setters	676
Adding Functionality to Existing Classes	681
Subclassing	681
Static Library	682
Composition	686
Summary	695
Exercises	695
Appendix A: Exercise Answers	699
Appendix B: Flash Keyboard Shortcuts	759
Tools Panel	759
Integrated Script Editor Shortcuts	760
File Menu	760
Edit Menu	761
View Menu	761
Tools Menu	761
Control Menu	762
Actions Panel Shortcuts	762
Drawing IDE Shortcuts	763
File Menu	763
Edit Menu	763
View Menu	764
Insert Menu	765
Modify Menu	765
Text Menu	767
Control Menu	767
Window Menu	768
Help Menu	769
Index	771
