Acknowledgments from the Editors	xix
Principles of the ROI Methodology	xxi
<b>Chapter 1: The Importance of Isolating the Effects of Programs</b>	<b>1</b>
Challenges in Understanding a Program's Impact	2
Case Study: What Caused the Improvement?	2
Preliminary Issues in Isolating Program Effects	5
The Need to Isolate Program Effects	6
Chain of Impact: Initial Evidence of Program Effects	8
Identification of Factors Other Than the Program:	
A First Step	10
Final Thoughts	12
<b>Chapter 2: Use of Control Groups</b>	<b>15</b>
Control Group Design	15
Threats to Validity	15
Basic Control Group Design	17
Ideal Experimental Design	18
Posttest-Only Control Group Design	20
Which Design to Choose	21
Issues When Considering Control Groups	22
Viability	22
Practicality	22

xiv Contents

Ethical Considerations	23
Potential Problems with Control Groups: A Case Example	24
Feasibility	29
Control Group Example 1: Retail Merchandise	
Company	31
Setting	31
Audience	32
Solution	32
Measures That Matter	32
Selection Criteria	33
Size of Groups	33
Duration of Experiment	33
Control Group Example 2: Federal Information	
Agency	34
Setting	34
Audience	34
Solution	35
Measures That Matter	35
Selection Criteria	35
Size of Groups	36
Duration of Experiment	36
Control Group Example 3: Midwest Electric, Inc.	36
Setting	36
Needs Assessment	37
Audience	38
Solution	39
Measures That Matter	39
Selection Criteria	39
Size of Groups	40
Duration of Experiment	40
Control Group Example 4: International Software	
Company	41
Setting	41
Audience	41
Solution	41
Measures That Matter	41
Selection Criteria	42

Size of Groups	42
Duration of Experiment	42
Final Thoughts	43

***Chapter 3: Use of Trend Lines and Forecasts*** **45**

Trend Lines	46
Forecasts	50
Trend Line Analysis Example 1: Micro Electronics	53
Setting	53
Audience	53
Solution	53
Measures That Matter	54
Conditions Test	54
Trend Line Analysis Example 2: Healthcare, Inc.	54
Setting	54
Audience	55
Solution	55
Measures That Matter	56
Conditions Test	56
Trend Line Analysis Example 3: National Book Company	57
Setting	57
Audience	57
Solution	57
Measures That Matter	58
Conditions Test	58
Final Thoughts	59

***Chapter 4: Use of Expert Estimates*** **61**

Participants' Estimates of Program Impact	62
Using Focus Groups to Obtain Participant Estimates	63
Using Questionnaires to Obtain Participant Estimates	68
Using Interviews to Obtain Participant Estimates	74
Advantages and Disadvantages of Participant Estimates	75

xvi Contents

Case Study	76
Setting	76
Audience	76
Solution	77
Measures	78
Estimates Provided	78
Credibility Check	78
Methodology	79
Immediate Managers' Estimates of Program Impact	80
Senior Management's Estimates of Program Impact	82
Customers' Estimates of Program Impact	83
Experts' Estimates of Program Impact	84
Determining the Impact of Other Factors	84
Estimate Example 1: Global Financial Services	85
Setting	85
Audience and Solution	86
Measures	86
Estimates Provided	87
Estimate Example 2: Cracker Box	87
Setting	87
Audience and Solution	88
Measures	88
Estimates Provided	89
Estimate Example 3: Public Bank of Malaysia	89
Setting	89
Audience and Solution	89
Measure	89
Estimates Provided	90
Estimate Example 4: Multi-National, Inc.	90
Setting	90
Audience, Solution, and Measures	91
Estimates Provided	91
The Power of Estimates	92
Research	92
A Demonstration	92
Participant Reaction	93
Management Reaction	94
The Wisdom of Crowds	94

Key Issues in Using Estimates	95
Final Thoughts	96
<b>Chapter 5: Use of Isolation Techniques</b>	<b>99</b>
Matching Exercise: Isolating the Effects of a Program	99
Case Study: National Computer Company	102
Why Isolation Is a Key Issue	105
Other Factors Are Always There	105
Without It, There Is No Business Link: Evidence Versus Proof	105
Other Factors and Influences Have Protective Owners	106
To Do It Right Is Not Easy	106
Without It, the Study Is Not Valid	106
Isolation Myths	107
Build Credibility with the Isolation Process	109
Selecting the Technique	109
Using Multiple Methods	110
Building Credibility	111
Final Thoughts	112
Index	113
About the Authors	119
