| Preface .....   | xi        |
| <b>1 What is Real-Time Processing?</b>                                | <b>1</b>  |
| 1.1 Characteristics of Real-Time Systems .....                        | 2         |
| 1.2 Scheduling Issues .....   | 3         |
| 1.3 Real-Time Design Issues .....                                     | 5         |
| 1.4 What is Real-Time Image Processing? .....                         | 6         |
| <b>2 Basic Hardware Architecture</b>                                  | <b>11</b> |
| 2.1 von Neumann Architecture .....                                    | 11        |
| 2.2 Architecture Classification System .....                          | 19        |
| 2.3 SISD Processors .....   | 21        |
| 2.4 MISD Processors .....   | 23        |
| 2.5 SIMD Processors .....   | 25        |
| 2.6 MIMD Processors .....   | 25        |
| <b>3 Linear Image Processing Algorithms</b>                           | <b>29</b> |
| 3.1 Convolution .....   | 29        |
| 3.2 Linear Noise Suppression .....                                    | 31        |
| 3.3 Linear Edge Detection .....                                       | 45        |
| 3.4 Linear Matched Filtering .....                                    | 48        |
| 3.5 Convolution Algorithm .....                                       | 52        |
| <b>4 Compression by Matrix Transforms</b>                             | <b>59</b> |
| 4.1 Hadamard Transform .....  | 60        |
| 4.2 Discrete Fourier Transform .....                                  | 67        |
| 4.3 Discrete Cosine Transform .....                                   | 72        |
| 4.4 Quadtree Compression .....  | 77        |
| <b>5 Nonlinear Image Processing Algorithms</b>                        | <b>81</b> |
| 5.1 Boolean Functions .....   | 82        |
| 5.2 Increasing Boolean Functions .....                                | 83        |
| 5.3 Nonlinear Noise Suppression Using Increasing Binary Filters ..... | 87        |
| 5.4 Noise Suppression Using Nonincreasing Binary Filters .....        | 97        |
| 5.5 Matched Filtering Using Nonincreasing Binary Filters .....        | 98        |
| 5.6 Suppression of Noise by Gray-Scale Median .....                   | 100       |

|   |            |
|---|------------|
| 5.7 Threshold Decomposition .....                                 | 103        |
| 5.8 Nonlinear Edge Detection Via the Morphological Gradient ..... | 110        |
| 5.9 Fast Granulometric Filters .....                              | 111        |
| <b>6 Parallel Architectures</b>                                   | <b>119</b> |
| 6.1 Pipelining .....  | 119        |
| 6.2 Dataflow Systems .....  | 121        |
| 6.3 Systolic Array Processors .....                               | 121        |
| 6.4 Wavefront Array Processors .....                              | 132        |
| 6.5 Linear Array, Mesh, and Hypercube Processors .....            | 133        |
| 6.6 Associative Memory .....                                      | 137        |
| <b>7 Programming Languages</b>                                    | <b>141</b> |
| 7.1 Parameter Passing Techniques .....                            | 142        |
| 7.2 Recursion .....   | 143        |
| 7.3 Dynamic Memory Allocation .....                               | 144        |
| 7.4 Typing .....  | 144        |
| 7.5 Exception Handling .....                                      | 145        |
| 7.6 Modularity .....  | 146        |
| 7.7 Object-Oriented Languages .....                               | 148        |
| 7.8 Survey of Commonly Used Languages .....                       | 149        |
| <b>8 Optimization Techniques</b>                                  | <b>155</b> |
| 8.1 CPU Utilization Estimation .....                              | 155        |
| 8.2 Execution Time Estimation .....                               | 156        |
| 8.3 Basic Optimization Techniques .....                           | 157        |
| 8.4 Combination Effects .....                                     | 164        |
| 8.5 Scaled Numbers .....  | 165        |
| 8.6 Look-up Tables .....  | 167        |
| 8.7 Imprecise Computation .....                                   | 168        |
| 8.8 Memory Optimization .....                                     | 169        |
| <b>Glossary</b>   | <b>171</b> |
| <b>Bibliography</b>   | <b>191</b> |
| <b>Index</b>  | <b>195</b> |
