

CONTENTS

PREFACE	xiii
ACKNOWLEDGMENTS	xvii
1 INTRODUCTION	1
1.1 Why Statistics and Sampling? / 1	
1.2 What Are Special about Spatial Data? / 6	
1.2.1 MAUP—The Modifiable Areal Unit Problem / 7	
1.2.2 Spatial Autocorrelation / 9	
1.3 Spatial Data and the Need for Spatial Analysis/Statistics / 11	
1.4 Fundamentals of Spatial Analysis and Statistics / 13	
1.4.1 Scales of Measurement / 13	
1.4.2 Mathematical Notations / 22	
1.4.3 Scale, Extent, and Projection / 25	
1.5 ArcView Notes—Data Model and Examples / 28	
1.5.1 Data Model Used in ArcView GIS / 30	
1.5.2 Random Sampling—the Generic Way / 30	
1.5.3 Random and Systematic Point Sampling—an Extended Function / 35	
References / 41	
Exercises / 42	

PART I	CLASSICAL STATISTICS	45
2	DISTRIBUTION DESCRIPTORS: ONE VARIABLE (UNIVARIATE)	47
2.1	Measures of Central Tendency / 47	
2.1.1	Mode / 48	
2.1.2	Median / 50	
2.1.3	Mean / 52	
2.1.4	Grouped or Weighted Mean / 55	
2.2	Measures of Dispersion / 56	
2.2.1	Range, Minimum, Maximum, and Percentiles / 57	
2.2.2	Mean Deviation / 58	
2.2.3	Variance and Standard Deviation / 60	
2.2.4	Weighted Variance and Weighted Standard Deviation / 63	
2.2.5	Coefficient of Variation / 65	
2.3	ArcView Examples / 65	
2.3.1	Descriptive Statistics / 66	
2.4	Higher Moment Statistics / 69	
2.4.1	Skewness and Kurtosis / 69	
2.5	ArcView Examples / 74	
2.5.1	Additional Statistics / 81	
2.6	Application Example / 84	
2.7	Summary / 91	
	References / 91	
	Exercises / 91	
3	RELATIONSHIP DESCRIPTORS: TWO VARIABLES (BIVARIATE)	93
3.1	Correlation Analysis / 94	
3.2	Correlation: Nominal Scale / 97	
3.2.1	Nominal Scale and Binary: Phi Coefficient / 97	
3.2.2	Nominal Scale and Polychotomous: Chi-Square Statistic / 100	
3.3	Correlation: Ordinal Scale / 103	
3.4	Correlation: Interval/Ratio Scale / 105	
3.5	Trend Analysis / 108	
3.5.1	Simple Linear Regression Models / 108	
3.5.2	Coefficient of Determination / 111	
3.5.3	Empirical Examples / 112	
3.6	ArcView Notes / 115	

- 3.7 Application Examples / 122
- Reference / 124
- Exercises / 124

4 HYPOTHESIS TESTERS

127

- 4.1 Probability Concepts / 128
- 4.2 Probability Functions / 130
 - 4.2.1 Binomial Distribution / 131
 - 4.2.2 Poisson Distribution / 133
 - 4.2.3 Normal Distribution / 136
 - 4.2.4 ArcView Notes / 140
- 4.3 Central Limit Theorem and Confidence Intervals / 141
- 4.4 Hypothesis Testing / 143
 - 4.4.1 ArcView Notes / 146
 - 4.4.2 Types of Error / 146
- 4.5 Parametric Test Statistics / 146
 - 4.5.1 Difference in Variances / 147
 - 4.5.2 ArcView Note / 148
- 4.6 Difference in Means / 153
 - 4.6.1 Small Sample Size / 153
 - 4.6.2 Large Sample Size / 156
 - 4.6.3 ArcView Note / 157
- 4.7 Difference Between a Mean and a Fixed Value / 163
 - 4.7.1 ArcView Note / 164
- 4.8 Significance of Pearson's Correlation Coefficient / 164
 - 4.8.1 ArcView Note / 165
- 4.9 Significance of Regression Parameters / 168
 - 4.9.1 ArcView Note / 169
- 4.10 Testing Nonparametric Statistics / 172
 - 4.10.1 Chi-Square Statistic / 172
 - 4.10.2 ArcView Note / 173
 - 4.10.3 Spearman's Rank Correlation Coefficient / 175
 - 4.10.4 ArcView Note / 176
 - 4.10.5 Kolmogorov-Smirnov Test / 176
 - 4.10.6 ArcView Note / 178
- 4.11 Summary / 178
 - References / 179
 - Exercises / 179

PART II	SPATIAL STATISTICS	183
5	POINT PATTERN DESCRIPTORS	185
5.1	The Nature of Point Features / 185	
5.2	Central Tendency of Point Distributions / 187	
5.2.1	Mean Center / 189	
5.2.2	Weighted Mean Center / 192	
5.2.3	Median Center / 195	
5.3	Dispersion and Orientation of Point Distributions / 197	
5.3.1	Standard Distance / 198	
5.3.2	Standard Deviation Ellipses / 203	
5.4	ArcView Notes / 208	
5.5	Application Examples / 214	
	References / 215	
	Exercises / 216	
6	POINT PATTERN ANALYZERS	218
6.1	Scale and Extent / 219	
6.2	Quadrat Analysis / 221	
6.2.1	General Concepts in Quadrat Analysis / 222	
6.2.2	Comparing Observed and Expected Distributions Using the K-S test / 226	
6.2.3	Comparing Observed and Expected Patterns Using the Variance-Mean Ratio / 232	
6.3	Ordered Neighbor Analysis / 237	
6.3.1	Nearest Neighbor Statistic / 239	
6.3.2	Testing for Pattern Using the Nearest Neighbor Statistic / 243	
6.3.3	Higher-Order Neighbor Statistics / 246	
6.3.4	Boundary Adjustments of the Nearest Neighbor Statistics / 248	
6.4	K-Function / 253	
6.5	Spatial Autocorrelation of Points / 260	
6.5.1	Measures for Spatial Autocorrelation / 261	
6.5.2	Significance Testing of Spatial Autocorrelation Measures / 264	
6.6	Application Examples / 270	
	References / 275	
	Exercises / 277	

7 LINE PATTERN ANALYZERS 280

- 7.1 The Nature of Linear Features: Vectors and Networks / 280
- 7.2 Characteristics and Attributes of Linear Features / 283
 - 7.2.1 Geometric Characteristics of Linear Features / 283
 - 7.2.2 Spatial Attributes of Linear Features: Length / 284
 - 7.2.3 Spatial Attributes of Linear Features: Orientation and Direction / 286
 - 7.2.4 ArcView Example: Linear Attributes / 287
- 7.3 Directional Statistics / 289
 - 7.3.1 Exploring Statistics for Linear Features / 290
 - 7.3.2 Directional Mean / 294
 - 7.3.3 Circular Variance / 299
 - 7.3.4 ArcView Example: Directional Statistics / 302
- 7.4 Network Analysis / 304
 - 7.4.1 Spatial Attribute of Network Features: Connectivity or Topology / 304
 - 7.4.2 Assessing Connectivity Level / 306
 - 7.4.3 Evaluating Accessibility / 309
 - 7.4.4 ArcView Example: Network Analysis / 312
- 7.5 Application Examples / 314
 - 7.5.1 Length Attribute Analysis of Linear Features / 315
 - 7.5.2 Application Example for Directional Statistics / 317
 - 7.5.3 Application Example for Network Analysis / 319
- References / 324
- Exercises / 324

8 POLYGON PATTERN ANALYZERS 327

- 8.1 Introduction / 327
- 8.2 Spatial Relationships / 328
- 8.3 Spatial Dependency / 330
- 8.4 Spatial Weights Matrices / 334
 - 8.4.1 Neighborhood Definitions / 335
 - 8.4.2 Binary Connectivity Matrix / 336
 - 8.4.3 Stochastic or Row-Standardized Weights Matrix / 339
 - 8.4.4 Centroid Distances / 341
 - 8.4.5 Nearest Distances / 343
 - 8.4.6 ArcView Example: Spatial Weights Matrices / 345
- 8.5 Spatial Autocorrelation Statistics and Notations / 349

- 8.6 Joint Count Statistics / 353
 - 8.6.1 Free Sampling / 355
 - 8.6.2 Randomization Sampling / 361
- 8.7 Spatial Autocorrelation Global Statistics / 367
 - 8.7.1 Moran's I / 367
 - 8.7.2 Geary's Ratio / 373
 - 8.7.3 General *G*-Statistic / 376
 - 8.7.4 ArcView Example: Global Statistics for Spatial Autocorrelation / 382
- 8.8 Local Spatial Autocorrelation Statistics / 387
 - 8.8.1 Local Indicators of Spatial Association / 388
 - 8.8.2 Local *G*-Statistic / 393
- 8.9 Moran Scatterplot / 395
 - 8.9.1 ArcView Example: Local Spatial Autocorrelation Statistics and Moran Scatterplot / 399
- 8.10 Bivariate Spatial Autocorrelation / 405
- 8.11 Application Examples / 409
- 8.12 Summary / 412
 - References / 415
 - Exercises / 416
