

# Table of Contents

## Pretest

Pretest Questions	1
Pretest Answers	7

## Chapter 1: Measurement and Units of Measurement

Writing Numbers in Scientific Notation	11
Significant Figures and Rounding Off Numbers	13
Significant Figures in Calculations	16
The Metric System	19
Density	26
Measuring Temperature	28
Energy and the Measurement of Heat	30
Chapter Problems and Answers	33
Supplemental Chapter Problems	36

## Chapter 2: The Classification of Matter, Elements, Compounds, and Mixtures

Solids, Liquids, and Gases	39
Properties and Changes	41
The Elements	42
The Periodic Table of the Elements	44
Atoms and Molecules of the Elements	48
Compounds	48
Chemical Formulas	51
Naming Molecular Compounds	52
Mixtures	55
Chapter Problems and Answers	56
Supplemental Chapter Problems	59

## Chapter 3: Atoms I—The Basics

Dalton's Theory of Atoms	63
Electrons, Protons, and Neutrons	64
The Nuclear Atom	64
The Atomic Number and Mass Number	65
Isotopes of the Elements	68
The Atomic Mass (Atomic Weight) of the Elements	70
Ions from Atoms	73
Chapter Problems and Answers	77
Supplemental Problems	82

<b>Chapter 4:</b> Formulas and Names of Ionic Compounds, Acids, and Bases	
Formulas of Binary Ionic Compounds	85
Naming Binary Ionic Compounds	88
The Polyatomic Ions	92
Formulas of Ionic Compounds with Polyatomic Ions	94
Naming Ionic Compounds with Polyatomic Ions	96
The Common Acids and Bases	98
Chapter Problems and Answers	101
Supplemental Chapter Problems	105
<b>Chapter 5:</b> The Mole—Elements and Compounds	
The Mole and Avogadro's Number	110
Molar Mass	110
Elements and the Mole—Molar Mass	111
Compounds and the Mole	118
Chapter Problems and Answers	127
Supplemental Chapter Problems	132
<b>Chapter 6:</b> Percent Composition, Empirical and Molecular Formulas	
Calculating the Percent Composition of Compounds	135
Percent Water in a Hydrate	139
Empirical and Molecular Formulas	141
Chapter Problems and Answers	150
Supplemental Chapter Problems	155
<b>Chapter 7:</b> Chemical Reactions and Chemical Equations	
Writing Chemical Equations	157
Balancing Chemical Equations	160
Types of Chemical Reactions	165
Predicting Reactants and Products in Replacement Equations	173
Balanced Equations and the Mole	177
Chemical Reactions and Heat	177
Chapter Problems and Answers	181
Supplemental Chapter Problems	187
<b>Chapter 8:</b> Calculations Using Balanced Equations	
The Meaning of the Balanced Equation	191
Mole-to-Mole Conversions	193
Mole-to-Mass and Mass-to-Mole Conversions	197
Mass-to-Mass Conversions	201
The Limiting Reactant	204
Percent Yield of Reactions	209

Chapter Problems and Answers	211
Supplemental Chapter Problems	218
<b>Chapter 9: Atoms II—Atomic Structure and Periodic Properties</b>	
The Bohr Model of the Hydrogen Atom	222
The Quantum Mechanical Atom: Principal Shells, Subshells, and Orbitals	227
Electron Spin	231
The Electronic Configuration of Atoms	234
Electronic Configuration and the Periodic Table	239
Properties of Atoms and the Periodic Table	246
Chapter Problems and Answers	250
Supplemental Chapter Problems	255
<b>Chapter 10: Chemical Bonding—The Formation of Compounds</b>	
Ionic Bonding—Ionic Compounds	259
Covalent Bonding—Covalent Compounds	265
Polar and Nonpolar Covalent Bonds	271
Electronegativity of Atoms	272
Lewis Structures	274
The Shapes of Molecules	278
VSEPR Theory—Predicting Molecular Shape	280
Chapter Problems and Answers	285
Supplemental Chapter Problems	292
<b>Chapter 11: Gases and the Gas Laws</b>	
Pressure	296
Temperature	297
The Gas Laws	297
Standard Temperature and Pressure	305
Stoichiometry of Reactions Involving Gases	315
The Kinetic-Molecular Theory of Gases	319
Chapter Problems and Answers	320
Supplemental Chapter Problems	327
<b>Chapter 12: The Forces between Molecules—Solids and Liquids</b>	
Polar Bonds—Polar Molecules	331
The Intermolecular Forces of Attraction	334
Phase Changes	339
The Molar Heat of Fusion and Vaporization	340
Liquids	343
Solids	349
Chapter Problems and Answers	351
Supplemental Chapter Problems	355

<b>Chapter 13: Solutions and Solution Concentrations</b>	
Factors Affecting Solubility	358
Solution Concentrations	362
Solution Stoichiometry	370
Properties of Solutions	373
Chapter Problems and Answers	381
Supplemental Chapter Problems	388
<b>Chapter 14: Acids, Bases, and Neutralization</b>	
The Arrhenius Concept of Acids and Bases	394
The Hydronium Ion	394
The Bronsted-Lowry Concept	395
The Strength of Acids and Bases	398
Neutralization and Net-Ionic Equations	402
Chapter Problems and Answers	405
Supplemental Chapter Problems	408
<b>Glossary</b>	411
<b>Customized Full-Length Exam</b>	419
<b>Index</b>	427
