	Foreword	xxv
	Preface	xxvii
	Acknowledgments	xxxiii
	Introduction	xxxv
PART I	Basic Concepts of GIS	1
CHAPTER 1	Some Concepts that Underpin GIS	3
	OVERVIEW	3
	You Ask: “What Is GIS About?”	3
	You Ask Again: “What Is GIS About?”	4
	EXERCISE 1-1 (PROJECT)	
	Finding a Site by Manual Means	5
	More of What GIS Is About	8
	Next Steps: Seemingly Independent Things You Need To Know	10
	Determining Where Something Is: Coordinate Systems	11
	Determining Where Something Is: Latitude and Longitude	13
	Geodesy, Coordinate Systems, Geographic Projections, and Scale	14
	Projected Coordinate Systems	15
	Geographic vs. Projected Coordinates: A Comparison	16
	Two Projected Coordinate Systems: UTM and State Plane	17
	Physical Dimensionality	19
	Global Positioning Systems	21

Remote Sensing	21
Relational Databases	22
Another Definition of GIS	27
Computer Software: In General	29
Computer Software: ArcGIS in Particular	29
STEP-BY-STEP	31
EXERCISE 1-2 (PROJECT)	
Developing a Fast Facts File for the Information You Learn	31
Understanding the File Structure for the Exercises	32
EXERCISE 1-3 (MINOR PROJECT)	
Getting Set Up with ArcGIS	33
EXERCISE 1-4 (PROJECT)	
Looking at the ArcCatalog Program	34
Anatomy of the ArcCatalog Window	34
Setting Some Options	36
The Catalog Tree	38
Connecting to a Folder	40
The Toolbars and the Status Bar	42
Exploring Basic GIS Data Storage Models	45
EXERCISE 1-5 (MAJOR PROJECT)	
Exploring Data with ArcCatalog—Fire Hydrants in a Village	46
Copying Data over to Your Personal Folder	46
Examining the Table	50
Deriving Information from the Table	51
Sorting the Records	51
Finding Values in a Table	52
Identifying Geographic Features and Coordinates	53
Looking at GeoGraphics	54
Tics and Ticks: Tying Geographic Data to the Real World	56
A First Look at Metadata	56
Using ArcCatalog to Place Data in ArcMap	58

EXERCISE 1-6 (PROJECT)

A Look at Some Spatial Data for Finding a Site for the Wildcat Boat Facility	59
Using the Area on the Disk for Your Own Work	60
Copying Data over to Your New Folder	60
Searching for GIS Data	61
Exploring Soils	64
But Something Is Missing	66
Is the Newly Found Data Applicable?	67
Making a Personal Geodatabase Feature Class from a Coverage	68
Looking at the Landcover Personal Geodatabase	68
Further Examining the Wildcat Boat Facility Area Data Sets	70
Looking at Wildcat Boat Data with ArcMap	73
Seeing the Results of the Join	74

EXERCISE 1-7 (PROJECT)

Understanding the ArcGIS Help System	75
A Button for Instant Help: What’s This?	75
The Help System and Documentation	76

EXERCISE 1-8 (DULL STUFF)

Using ArcCatalog for Mundane Operations	78
--	-----------

EXERCISE 1-9 (REVIEW)

Checking, Updating, and Organizing Your Fast Facts File	79
What’s Next?	81

CHAPTER 2 Characteristics and Examples of Spatial Data 83

OVERVIEW	83
The Original Form of Spatial Data: Maps	83
Moving Spatial Data from Maps to Computers: Forces for Change	84
Spatial Data	88
Limiting the Scope	89
Databases—What’s Meant by “Relational”	89

Contents

Spatial Data for Decision Making	91
Sets of Spatial Data: The Database	91
Spatial Databases: Inherent Difficulties	92
Information Systems	97
Uses for a Geographic Information System	99
STEP-BY-STEP	109
EXERCISE 2-1 (MOSTLY OUTSIDE)	
Appreciating Geographic Space and Spatial Data	109
EXERCISE 2-2 (SETUP)	
ArcMap Toolbar Examination and Review	110
EXERCISE 2-3 (MAJOR PROJECT)	
Exploring Different Types of Geographic Data	112
The Basic Difference Between ArcCatalog and ArcMap	112
Exploring Data from the NAVSTAR Global Positioning System (GPS)	113
Preliminary	113
Seeing the GPS File in ArcMap	113
Looking at the GPS Track in the Context of a Variety of GIS Data	118
A Potpourri of Types of Geographic Data	118
Displaying Layers from Vector-Based Data Sets	119
Housekeeping: Saving a Map	122
Selecting: Both Map Data and Attribute Data	123
Using the Measure Tool	125
County Boundaries	126
TIGER/Line Files	127
The Table of Contents: Display vs. Source vs. Selection	128
EXERCISE 2-4 (MAJOR PROJECT)	
A Look at Raster Data	130
Digital Raster Graphics and Cell-Based Files	130
Experimenting with Different Ways of Seeing the Data	135
Digital Orthophotos	138
More TIGER/Line Files	140
Another Tie Between Attributes and Geographics	142

More Housekeeping: Shutting Down and Restarting ArcMap	143
Digital Elevation Model Files	144
Comparing the DEM and the DRG	147
Contour Line Files	148
EXERCISE 2-5 (MAJOR PROJECT)	
Triangulated Irregular Network Files	149
TINS Are Three-Dimensional Data Sets	153
EXERCISE 2-6 (PROJECT)	
Geodatasets of Soils, Rocks, and Land Use	154
The Summarizing Procedure	154
Some Geological Data	157
A GRID of Land Use Data	158
Next Steps on Your Own	159
EXERCISE 2-7 (REVIEW)	
Checking, Updating, and Organizing Your Fast Facts File	159
CHAPTER 3 Products of a GIS: Maps and Other Information	163
OVERVIEW	163
GIS and Cartography—Compatibility?	163
Products of a Geographic Information System	164
Overall Requirements for Utility	164
Classification of GIS Products	165
Documenting Products	167
Thoughts on Different Types of Products	168
STEP-BY-STEP	173
The Data View and the Layout View	173
EXERCISE 3-1 (WARM-UP)	
Templates	174
EXERCISE 3-2 (PROJECT)	
Templates That Contain Data	176
Controlling Your View of the Map: Zooming	178

Contents

Understanding the Panning and Other Controls	179
Adding Other Map Elements	180
EXERCISE 3-3 (PROJECT)	
<hr/>	
Data Frames	181
Adding Data to Data Frames	182
A Summary of the Graphic Indicators	184
Tinkering with the Map—Scale Bars	184
Legends	186
EXERCISE 3-4 (MINI PROJECT)	
<hr/>	
Looking at the Plethora of Mapmaking Tools and Options	187
EXERCISE 3-5 (MAJOR PROJECT)	
<hr/>	
Making a Map of the Wildcat Boat Data Sets	191
EXERCISE 3-6 (MAJOR PROJECT)	
<hr/>	
Enhancing Communication: Styles, Layer Files, Reports, Charts, and Graphics	192
Layer Files	192
Styles	195
Adding and Using a Style	196
Reports	197
Charts	199
Graphics	202
Making Graphics out of Geographic Features	206
EXERCISE 3-7 (REVIEW)	
<hr/>	
Checking, Updating, and Organizing Your Fast Facts File	207
CHAPTER 4 Structures for Storing Geographic Data	209
<hr/>	
OVERVIEW	209
Why Is Spatial Data Analysis So Hard?	209
How the Computer Aids Analyze Spatial Data	210

Complexity of Spatial Data	210
Structures for Spatial Data	211
Storage Paradigms for Areal Data	212
Fundamental Bases of Geographic Data Models	212
Raster Data Model	213
Vector Data Model	216
A Multiplicity of “Storadigms”	216
Vector-Based Geographic Data Sets—Logical Construction	217
Zero-Dimensional Entities in a Two-Dimensional Field: Points	217
One-Dimensional Entities in a Two-Dimensional Field: Lines	218
Two-Dimensional Entities in a Two-Dimensional Field: Polygons	219
Coverages	220
The Coverage Data Model in Detail	220
Arcs, Direction, and Handedness	221
Coverage Defined	222
Coverages and Attributes	222
Arcs and Linear Features	223
Arcs Defining Polygons	223
Arcs and Polygons Together	223
Feature Attribute Tables	226
Coverage Topology	227
Other Tables Relating to Coverages	231
Polygons Within Polygons—Perimeter and Area Calculations	231
Coverage Topology—More Details	232
Regions (in Coverages)	233
Coverages—Layout in the Computer	234
Geodatabases	235
The Geodatabase Data Model (Personal Geodatabases)	235
Geodatabases—Layout in the Computer	235
Geodatabases—Logical Construction	236
Geodatabases—Feature Shape	237
Nested Polygons in Geodatabases	238
Geodatabases and Attributes	239

Contents

Geodatabases and Precision	240
Objects—First Acquaintance	241
Shapefiles	241
Summarizing Vector Data Set Features	243
Summary of Logical Structures of Vector-Based GIS Data Sets	243
Raster-Based Geographic Data Sets—Logical Construction	244
Raster-Based Geographic Data Sets—Layout in the Computer	245
TINs	247
TIN-Based Geographic Data Sets—Layout in the Computer	248
Spatial Reference	248
STEP-BY-STEP	251
EXERCISE 4-1 (WARM-UP)	
Meet ArcToolbox	251
EXERCISE 4-2 (WARM-UP)	
A Look at Some Trivial Personal Geodatabase Feature Classes	253
More Help	254
EXERCISE 4-3 (WARM-UP)	
A Look at Some Trivial Coverage Feature Classes	255
Placing X- and Y-Coordinates in a Coverage	257
EXERCISE 4-4 (WARM-UP)	
Making an ArcInfo Coverage Named GENWARMUP	258
The GENERATE Tool Input Text File Specification	258
Creating the Coverage from the Text File	260
Making a Folder Connection and Looking at the Coverage with ArcCatalog	260
Building Node and Arc Topology	261
Labeling Features	261
Building Polygon Topology	263
AREAs and PERIMETERS	263

EXERCISE 4-5 (QUICK QUIZ)

Areas and Perimeters	264
-----------------------------	------------

EXERCISE 4-6 (PROJECT)

Making an ArcInfo Coverage for a Foozit_Court	265
--	------------

Looking at the Coverage with ArcCatalog	267
---	-----

Creating Attribute Tables Using ArcToolbox	267
--	-----

EXERCISE 4-7 (PROJECT)

Making an Olympic Foozit Court	268
---------------------------------------	------------

Seeing a Coverage with Arc Workstation	270
--	-----

Using the Workstation GENERATE Command	271
--	-----

Using the Generate Module to Add Features to Foozit_Courtn	272
--	-----

BUILD? No? CLEAN? Yes.	272
------------------------	-----

Examining the ArcGIS Coverage Directory (Folder) Structure	274
--	-----

Looking at the Association Between the Files in the Info Folder and the Coverages	274
---	-----

EXERCISE 4-8 (EXPLORATION)

Understanding a Couple of Things That Don't Look Right	274
---	------------

EXERCISE 4-9 (PROJECT)

Geodatabase Topology	278
-----------------------------	------------

Creating a New Topology	279
-------------------------	-----

What Moves When Features Are Adjusted: Rank	279
---	-----

Topology Rules	280
----------------	-----

Validating Topology	280
---------------------	-----

A Warning: Changes Made Through Topology Are Permanent	283
--	-----

EXERCISE 4-10 (REVIEW)

Checking, Updating, and Organizing Your Fast Facts File	283
--	------------

CHAPTER 5	Geographic and Attribute Data: Selection, Input, and Editing	285
	OVERVIEW	285
	Concerns About Finding and Collecting Data	285
	Looking for Data on the Internet	286
	Steps in Developing the Database	286
	GPS and GIS	291
	Anatomy of the Acronym: “Global Positioning System”	292
	What Time Is It?	295
	STEP-BY-STEP	297
	EXERCISE 5-1 (WARM-UP)	
	Looking at Areal Representations of the Real World	297
	Looking at Reference Systems	298
	Looking at Coordinate Systems	299
	Using the Reference System to Discover the Boundary Coordinates of a State Plane Zone	301
	Primary Lesson	302
	EXERCISE 5-2 (PROJECT)	
	Looking at Geographic Data on the Web	303
	EXERCISE 5-3 (PROJECT)	
	Digitizing and Transforming	303
	A Plan for Digitizing and Transforming	304
	Getting Started	305
	Loading an Image File as a Layer in ArcMap	305
	Loading the New, Blank Shapefile into ArcMap	306
	Adding Line Features to a Shape File by Using the Editing Facility in ArcMap	306
	EXERCISE 5-3A (PROJECT)	
	Converting a Shapefile to a Geodatabase Feature Class and Giving It Real-World Coordinates	310
	Converting the Shapefile to a Geodatabase Feature Class	311
	Moving the Foozit_Court Feature Class into the Real World	311

EXERCISE 5-3B

From Shapefile to Coverage to Real World to Geodatabase Feature Class	316
Creating and Transforming a Coverage Based on a Shapefile	316
Building Topology for the Coverage	316
Verifying the Correctness of the Coverage	317
Making a New, Blank Coverage, Called REAL_COV, Using the Tics of DIG_COV	317
Updating the Coordinates of the Ticks in REAL_COV to “Real-World” Coordinates	318
Transforming the Features of DIG_COV to Make REAL_COV	318
Converting the Arc Component of a Coverage into a Personal Geodatabase Feature Class	319

EXERCISE 5-4 (PROJECT)

Digitizing Directly into a Real-World Coordinate System in a Geodatabase	320
Preliminaries	321
Making the Feature Class That Will Be Digitized into Georeferencing	321
Moving the Sketch to UTM Zone 2	322
Digitizing the Line Boundaries of the Islands	324
Making Polygons of the Digitized Lines	324
Making Multipart Polygons	324
Merging Multipart Polygons	325

EXERCISE 5-5 (WARM-UP)

Digitizing Geodatabase Polygons and Coping with Topology	326
Making Copies of the Feature Class	328
Using CLIP to Remove Overlaps from the Feature Class	328
Using Topology to Remove Overlaps from the Feature Class	329

EXERCISE 5-6 (PROJECT)

Learning Some Editor Fundamentals	331
The Concept of the Edit Sketch	331
Making Sketches with Snapping	331

Contents

Experimenting with Editing and Polygons	334
Experimenting with the Editor's Union	334
Experimenting with the Editor's Intersect	334
Experimenting with the Editor's Buffer	335
Using Undo, Copy, and Cut	335
Working with Editing Lines Again	335
EXERCISE 5-7 (FOLLOW-ON)	
<hr/>	
Adding the Sixth Island	335
Creating a 3-D Feature	338
EXERCISE 5-8 (PROJECT)	
<hr/>	
Obtaining Field Data and Joining Tables	339
A Discussion of the Project	339
Organization	340
Environment and Measurements (Spatial Data)	340
Measurements (Nonspatial Data)	340
Recording Data	341
Team Assignments	341
Undertaking the Data Entry Process	342
Making a Table That Will Contain the Student Data	342
Populating the Student_Info Table with Data	343
Joining the Two Tables to Make a Single Table	343
Seeing the Results of the Join	343
EXERCISE 5-9 (REVIEW)	
<hr/>	
Checking, Updating, and Organizing Your Fast Facts File	344
<hr/>	
PART II Spatial Analysis and Synthesis with GIS	347
<hr/>	
CHAPTER 6 Analysis of GIS Data by Simple Examination	349
<hr/>	
OVERVIEW	349
Information	349
Computer Hardware—What a Computer Does	351

Continuous and Discrete Phenomena	354
Some Implications of Discrete Representation for GIS	357
Scientific Notation, Numerical Significance, Accuracy, and Precision	357
Precision vs. Accuracy	358
Basic Statistics	360
Putting Values into Classes	362
Measurement Scales	363

STEP-BY-STEP 365

EXERCISE 6-1 (PROJECT)

Reviewing and Learning More of ArcMap	365
Examining the Toolbars	366
Pointing at Records	367
Two Windows Are Available for Selecting	368
Selecting Records (and, Thereby, Features)	369
Looking at the Other Capabilities of the Options Menu	370
Selecting Features (and, Thereby, Records)	370
Quick Selection of Features	371
Selecting by Location	371
Reviewing and Understanding Actions on the Table of Contents	373
Layers and the Data Frames	373
Changing Layer Properties	374

EXERCISE 6-2 (PROJECT)

Categorization and Symbolization	377
Thinking About Maps Again	377
Classification (or Categorization) and Symbolization	378
User Selection of Classes	379
A More Careful Look at Equal Intervals	381
Defined Interval	381
Quantiles	381
Standard Deviation	381
Natural Breaks	382
Normalization	382

Contents

	Using Charts and Graphs	383
	Making a Layout	383
	EXERCISE 6-3 (SHORT PROJECT)	
	Comparing Data Sets: Medically Underserved Areas (MUAs) and Health Professional Shortage Areas (HPSAs)	384
	Geographically Comparing Two Data Sets	385
	EXERCISE 6-4 (PROJECT)	
	Combining Demographic and Geographic Data	388
	Getting TIGER-Based Street and Block Shapefiles from ESRI	388
	Obtaining Data from the U.S. Bureau of the Census	390
	Converting the Data Spreadsheet to dBASEIV Format	390
	Assessing What We Have and What We Need to Solve the Problem	393
	Converting the Relevant Files to Cartesian Coordinates	395
	Finally	396
	EXERCISE 6-5	
	Determining Proximity of Points to Points and Lines	397
	EXERCISE 6-6 (REVIEW)	
	Checking, Updating, and Organizing Your Fast Facts File	399
CHAPTER 7	Creating Spatial Data Sets Based on Proximity, Overlay, and Attributes	403
	OVERVIEW	403
	Generating Features Based on Proximity: Buffering	403
	Generating Features by Overlaying	405
	Overlaying with Line and Point Feature Classes	408
	Spatial Joins in General	410
	Deriving Geodata Sets by Selecting Attributes: Extraction	410
	STEP-BY-STEP	
	EXERCISE 7-1 (WARM-UP)	
	Making a Trivial Buffer Around a Trivial Coverage	413
	Examining the TICTACTOEBUF Polygon Attribute Table (PAT) with ArcInfo Workstation	414

EXERCISE 7-2 (PROJECT)

Exploring PGDBFC Buffers with the Wildcat Boat Data	415
Using ArcMap to Make Buffer Zones Around the Roads	416
Variable-Width Buffers	416

EXERCISE 7-3 (PROJECT)

Overlaying One Coverage with Another Using UNION	418
Making a New Coverage from a Subset of Polygons: Extract	421
More Complex Queries—ANDs and ORs	423
Other Spatial Joins: INTERSECT and IDENTITY	424

EXERCISE 7-4 (PROJECT)

Using Overlay with Trivial Point and Line Coverages	424
Intersect and Identify Operations Used with Line Coverages	426

EXERCISE 7-5 (PROJECT)

Using Buffer and Overlay with Geodatabases	427
The Getrich Saga	427
Deriving Information by Combining Tables	430
Overlaying the Feature Classes	432

EXERCISE 7-6 (PROJECT)

Building a Model of the Getrich Project Solution	433
---	------------

EXERCISE 7-7 (MINOR PROJECT)

Making Buffers for Solving the Wildcat Boat Problem	438
--	------------

EXERCISE 7-8 (PROJECT)

Finding a Site for the Wildcat Boat Facility	438
---	------------

EXERCISE 7-9 (PROJECT)

Solve a Revised Wildcat Boat Problem	442
Understanding Dissolve	443
Making New Sites Including the COST_HA Field	444
Considering the Eccentricity Criterion	444

EXERCISE 7-10 (PROJECT)

Making a Model of the Wildcat Boat Solution 446

EXERCISE 7-11 (REVIEW)

Checking, Updating, and Organizing Your Fast Facts File 447

CHAPTER 8 Spatial Analysis Based on Raster Data Processing 449

OVERVIEW 449

A Different Storage Paradigm 449

Facts About Rasters 451

Coordinate Space 452

Rasters with Integer Cell Values 452

Rasters with Floating-Point Values 456

What Is Raster Storage and Processing Good For? 456

Rasters and Features 457

Rasters: Input, Computation, and Output 458

Where Raster Processing Shines: Cost Incurred Traveling
over a Distance 458

Proximity Calculation with Rasters 459

Human Activity, Cost, and Distance 459

Euclidian Distances on the Grid 460

Euclidean Distance and the Spatial Analyst 461

Proving Pythagoras Right 462

Multiple Source Cells 462

Finding the Closest of Many Source Cells 463

Excluding Distances Beyond a Certain Threshold 463

Other Factors That Influence Cost 464

The Cost-Distance Mechanism 464

The Cost-Distance Calculation 465

Path Calculation in Euclidian Distance and Cost Distance 466

Understanding How Total Costs Are Calculated 467

Getting More Information: Paths and Allocations 468

Direction and Allocation Grids for Euclidian Distance 468

Direction and Allocation Grids for Cost Distance 469

A Major Application of Raster Processing: Hydrology 470

Basic Surface Hydrology	470
How Spatial Analyst Performs Hydrologic Analysis	471
Basic Surface Hydrology Concepts	471
Calculating Flow Direction	472
The Ultimate Destination of Water Is off the Raster Area	473
Flow Accumulation: Drainage Delineation and Rainfall Volume	473
Calculating the Length of a Potential Linear Water Body	476
Assigning Identities to Streams	476
Vector vs. Raster Representation	478
Assigning Orders to Stream Links	478
Watersheds and Pour Points	478

STEP-BY-STEP 481

EXERCISE 8-1 (PROJECT)

Basic Raster Principles and Operations	481
The Raster Calculator—Integer Rasters	484
Arithmetic Calculation	485
Boolean Operations	485
Floating-Point Rasters	486

EXERCISE 8-2 (PROJECT)

Solving the Original Wildcat_Boat Problem	487
Setting the General and Raster Environment	488
Converting Features to Rasters	489
Creating Rasters for Sewers, Streams, and Roads	491
Buffering with Spatial Analyst (Maybe)	493
Buffering—Plan B	494
Reclassifying the Data	495
Adding the Rasters with the Raster Calculator	496
Converting Zones to Regions	497

EXERCISE 8-3 (PROJECT)

Solving a Wildcat_Boat Problem with Different Requirements	498
---	------------

EXERCISE 8-4 (DEMONSTRATION)

Making Surfaces with IDW, Spline, Trend, Nearest Neighbor, and Kriging **500**

Points and Density 502

Thiessen, Voronoi, Dirichlet (and, of course, Decartes) 503

EXERCISE 8-5 (PROJECT)

GRIDS: Distance and Proximity **504**

Making a Grid Showing Straight-Line Distances to a Single Place 504

Examining Many Source Cells and the Capping Distance 507

Developing a Grid with Cost Distance 508

Creating Direction and Allocation Grids 510

Using Cost Distance to Make Direction and Allocation Grids 511

Calculating a Least-Cost Path 514

EXERCISE 8-6 (PROJECT)

Putting the Tools Together: Site a Regional Park **515**

Setting Things Up 515

Preparing to Create a Cost Surface 517

Building a Cost Surface 518

Improving the Understandability of the Map 519

EXERCISE 8-7 (PROJECT)

Watershed Analysis **520**

Examining the surface with Various Spatial Analyst Tools 521

Determining the Stream Channels 523

Calculating Stream Order 523

Numbering Each Stream Individually 524

Identifying Basins 524

Finding Pollution Culprits 524

EXERCISE 8-8 (REVIEW)

Checking, Updating, and Organizing Your Fast Facts File **525**

CHAPTER 9	Other Dimensions, Other Tools, Other Solutions	527
	Ignored Third Dimensions: The Vertical Spatial and the Temporal	527
	THE THIRD SPATIAL DIMENSION: OVERVIEW	528
	3-D: 2-D (Spatial) Plus 1-D (Spatial)	528
	ArcScene	528
	ArcGlobe	529
	THE THIRD SPATIAL DIMENSION: STEP-BY-STEP	530
	A New Software Package: ArcScene	530
	EXERCISE 9-1 (PROJECT)	
	<hr/>	
	Experimenting with 3-D	530
	ArcScene	531
	What's 3-D and What's Not	532
	Viewing 3-D Data with Animation	535
	Two-and-a-Half-D: Calculating Volumes	538
	Calculating a Volume with ArcGIS	539
	Other Neat Stuff You Can Do with 3D Analyst:	
	Viewshed and Hillshade	541
	Adding Data to ArcGlobe	543
	THE TIME DIMENSION: OVERVIEW	546
	3-D: 2-D (Spatial) Plus 1-D (Temporal)	546
	THE TIME DIMENSION: STEP-BY-STEP	548
	EXERCISE 9-2 (PROJECT)	
	<hr/>	
	Looking at Infrastructure Changes Occurring over Time	548
	ADDRESS GEOCODING: OVERVIEW	552
	A Second Fundamental Way of Defining Location	552
	TIGER/Line Files	553
	Precision of the Geographic Coordinates in TIGER Files	555
	Address Locators	556

ADDRESS GEOCODING: STEP-BY-STEP	557
EXERCISE 9-3 (PROJECT)	
Experimenting with Addresses and Coordinates	557
Finding the Geographic Position of an Address “Manually”	558
Making an Address Locator	559
Finding the Geographic Position of an Address “Automatically”	560
TIGER Files and Zip Codes	560
More to Know—More Information Available	560
ANALYSIS OF NETWORKS: OVERVIEW	562
ANALYSIS OF NETWORKS: STEP-BY-STEP	563
EXERCISE 9-4 (PROJECT)	
Experimenting with Routes and Allocations	563
Finding the Shortest Route to a Facility	567
Allocating Territories to Facilities	567
LINEAR REFERENCING: OVERVIEW	570
LINEAR REFERENCING: STEP-BY-STEP	572
EXERCISE 9-5 (PROJECT)	
Experimenting within Linear Features	572
Intersecting Route Events	575
What’s Not Covered Here	577
EXERCISE 9-6 (REVIEW)	
Checking, Updating, and Organizing Your Fast Facts File	578
Afterword: From Systems to Science	581
Index	583
