Introduction

xx

Part I	Discovering eBay Web Services	1
Chapter 1	Learning about eBay Web Services	3
	Understanding the eBay Web Services	4
	What Is a Web Service?	4
	How Do Web Services Work?	6
	Considering the Usage Requirements	7
	What Is Sandbox Mode?	9
	Discovering Uses for the eBay Web Services	9
	Buying Products	10
	Selling and Relisting Products	10
	Determining Product Facts	11
	Discovering Product Payment and Shipping Methods	12
	Giving and Receiving Feedback	12
	Learning about a Store	13
	Working with User Information	13
	Performing Research	13
	Creating an Offline Archive	14
	Downloading and Installing the Kit	15
	Determining Which Licensing Level Is Best	15
	Becoming an eBay Developer Program Member	17
	Obtaining Your License	18
	Performing the Download	18
	Installing the Kit	18
	System Setup Considerations	20
	Understanding Connectivity Requirements	20
	Programming Setups for the Non-Developer	21

	Considering the User	22
	Using Multiple Test Devices	23
	Emulating the Real World	24
	Your Call to Action	24
Chapter 2	Using eBay Web Services to Your Advantage	25
	Knowing What to Expect As Output	26
	Limitations of eBay Web Services Output	26
	Making Sensible Queries	29
	Defining Static and Dynamic Data	30
	Understanding the Certification Requirements	31
	Creating a Test User	32
	Working in Sandbox Mode	34
	Getting Your Application Certified	35
	Working with Some Simple Examples	37
	Understanding the Example Types	37
	Using a Browser Example	38
	Viewing the XSLT Example	39
	Viewing the Desktop Example	40
	Viewing the Pocket PC Example	41
	Manipulating Data to Meet Specific Needs	42
	Understanding Data Transformation Requirements	43
	Viewing the eBay Examples	44
	Using the PERL Example	44
	Your Call to Action	46
Chapter 3	Defining a Search	47
	Performing a Typical Search	48
	Adding Search Conditions	50
	Using an Advanced Search	50
	Using Other Special Search Techniques	52
	Considering the URL Search Form	55
	Understanding the Developer Search Options	58
	Changing the Presentation	59
	Localizing the Information	60
	Your Call to Action	60

Chapter 4	Working with Web Service Data	63
	Understanding XML Basics	64
	Defining the Parts of an XML Message	65
	Viewing XML Data in Your Browser	66
	Getting XML Data Tools	68
	Sending Special Characters Using URL Encoding	72
	Learning More about XML	75
	Using XSLT for Presentation	76
	Using a Script to Call an XSLT Page	76
	Understanding How XSLT Works	78
	Writing a Simple XSLT Page	80
	Learning More about XSLT	81
	Using the eBay API Test Tool	82
	Creating Messages for eBay Using XML	86
	Determining Where XML Fits into eBay Web Services	87
	Understanding Privacy Issues	88
	Privacy Required by the eBay License	89
	General User Privacy	90
	Understanding Security Issues	90
	General Security Issues	90
	Using SSL to Contact eBay	91
	Security Required by the eBay License	91
	Your Call to Action	92
Part II	Writing eBay Web Services Programs	95
Chapter 5	Starting the Development Process	97
	Choosing a Communication Method	99
	Choosing between the API and SDK	99
	Using XML over HTTPS	100
	Using XSLT	101
	Defining the Common Communication Elements	102
	Getting a User Token	103
	Selecting a Platform	109
	Writing Desktop Applications	109

	Writing Small Form Factor Applications	112
	Writing Mixed Environment Applications	114
	Selecting a Development Language	115
	Choosing a Language that Meets Specific Needs	115
	Considering Your Skills and Abilities	116
	Defining Language Limitations	116
	Understanding Internationalization Issues	117
	Learning the Limits of Translation	117
	Considering the User's Location	119
	Using the SiteId to Your Advantage	119
	Your Call to Action	119
Chapter 6	Writing Browser-Based Applications	121
	Using JavaScript to Access eBay Web Services	122
	Understanding the Basic Access Technique	123
	Modifying the Basic Technique to Use XSLT	127
	Modifying the Basic Technique to Perform Authentication	129
	Performing a Category Search	136
	Developing the Basic Category Search	136
	Augmenting the Category Search with XSLT	139
	Your Call to Action	140
Chapter 7	Writing Applications Using VBA	143
	Understanding the Benefits of Using VBA	143
	Resources for Learning VBA	144
	Understanding Scripting of Web Services	145
	An Alternative to VBA	145
	Using the eBay API Test Tool to Authenticate a User	147
	Using the Microsoft and eBay Examples	148
	Developing with Microsoft Excel	154
	Developing an Application with the SDK	155
	Developing an Application with the API	160
	Using Microsoft Access as a Database	164
	Caching as a Practical Performance Enhancing Technique	165
	Creating a Cached Application	166
	Your Call to Action	169

Chapter 8	Writing Applications Using Visual Studio	171
	Using Web Services from Any Visual Studio Version	172
	Resources for Learning Visual Studio	172
	Using Visual Studio 6	173
	Using Visual Studio .NET	173
	Using the eBay Visual C++ Example	175
	Developing with Visual Basic 6	178
	Using the eBay Visual Basic 6 Example	178
	Adding a Microsoft XML Reference to Visual Basic 6	179
	Using the API Technique with Visual Basic 6	180
	Developing with Visual Basic .NET	184
	Using the eBay Visual Basic .NET Examples	185
	Using the API Technique with Visual Basic .NET	188
	Developing with Visual C# .NET	192
	Using the eBay C# Examples	192
	Using the SDK Technique with Visual C# .NET	194
	Using SQL Server as a Database	196
	Using the eBay Sample Selling Application	197
	Getting the Category List and Storing It	202
	Your Call to Action	213
Chapter 9	Writing Applications Using PHP	215
	Resources for Learning PHP	216
	Downloading and Installing PHP	217
	Using the eBay PHP Example	220
	Developing a PHP Application	222
	Using the API Technique	222
	Using the SDK Technique	228
	Using MySQL as a Database	229
	Writing a PHP Application with Database Support	230
	Setting Up the Database	231
	Writing the Sample Application	232
	Your Call to Action	236

Chapter 10	Writing Applications Using Java	239
	Understanding the Benefits of Using Java	240
	Resources for Learning Java	241
	Understanding Java Browser Issues	243
	Viewing the eBay-Supplied Code	245
	Performing the Required Setup	245
	Running the Example	246
	Examining the Code	247
	Developing a Simple Java Application	248
	Configuring the JCreator Editor	249
	Writing the Application	252
	Writing a Java Application Using the eBay Request Library	256
	Your Call to Action	259
Chapter 11	Writing Applications for Mobile Devices	261
	Understanding Mobile Device Limitations	262
	Special Add-ons	262
	Networking	262
	Operating System	263
	Screen Size	264
	Color	264
	User Interface	265
	Working with Emulators	265
	Visual Studio .NET Built-in Emulator	267
	Microsoft eMbedded Visual Tools	268
	Openwave SDK	268
	Designing for Local or Remote Data Management	269
	Developing for a Pocket PC	270
	Using the .NET Compact Framework	270
	Using Older Microsoft Products	274
	Developing for a Cellular Telephone or Palm-type Device	277
	Creating the ASP.NET Application	277
	Using the ASP.NET Applications in this Book	279
	Your Call to Action	279

Part III	Refining Your eBay Web Services Program	281
Chapter 12	Crafting Your Application	283
	Considering Performance Issues	283
	Addressing Speed Concerns	284
	Addressing Efficiency Concerns	286
	Considering Reliability Issues	287
	Considering the Data Refresh Requirements	289
	Working with eBay's Data	289
	Working with Your Data	290
	Working with Buyer Data	291
	Using Offline Storage Effectively	291
	Choosing the Correct Offline Storage Strategy	292
	Selecting a Database that Suits Your Needs	292
	Considering Database Storage Alternatives	293
	Your Call to Action	294
Chapter 13	Considering User Needs	297
	Targeting a Specific User Type	298
	Designing Flexible Interfaces	299
	Addressing Users with Special Needs	302
	Adding Hints for Desktop Applications	302
	Adding Hints for Web Applications	305
	Using the GetMyEBay Call	307
	Sorting the Data	307
	Writing the Code	308
	Your Call to Action	311
Chapter 14	Other Refinements You Should Consider	313
	Designing for Privacy Issues	314
	Adding Feedback to Your Application	318
	Designing User Feedback	319
	Developing Automated Feedback	322
	Using the GetShippingRates Call	323
	Using the GetSuggestedCategories Call	327
	Your Call to Action	329

Appendices		331
Appendix A	Helpful Third Party Resource Sites	331
	eBay Web Services–Specific Web Sites	332
	Demonstration Web Sites	332
	Web Sites That Provide Other Facts You Should Know About	333
	Microsoft Office 2003 Add-on	334
Appendix B	eBay License Checklist	337
	Addressing Certification Requirements	338
	Considering eBay User Requirements	339
	Understanding the User Agreement Essentials	339
	Getting All the Facts	340
	Reading Your Individual.PDF	341
	Understanding the Main Section	342
	Understanding Appendix B	343
	Understanding Appendix C	344
Appendix C	Late Breaking eBay Web Services News	345
	A Few Words about SOAP	345
	Determining Which SOAP Standard to Use	346
	Understanding the Parts of a SOAP Message	347
	Understanding How WSDL Fits In	350
	Creating an Application Using SOAP	351
	Creating a Java SDK Application	353
	Working with Single User Authentication	356
	Reading and Using the eBay Developer News	356
	Working with PayPal	357
