### Preface XI

<b>1</b>	<b>Raw Material Resources</b>	<b>1</b>
1.1	Primary Raw Materials	1
1.2	Availability	1
<b>2</b>	<b>Production</b>	<b>3</b>
2.1	From Ore to Copper Concentrate	3
2.2	From Copper Concentrate to Refined Copper	3
2.3	Secondary Copper Production	5
2.4	Energy Consumption	5
2.5	Recycling	6
2.6	Environmental Protection	8
<b>3</b>	<b>Classification of Copper Materials</b>	<b>11</b>
3.1	Wrought Copper Materials	11
3.1.1	Copper	11
3.1.2	Low Alloyed Wrought Copper	13
3.1.3	Wrought Copper–Zinc Alloys	15
3.1.4	Wrought Copper–Tin Alloys	15
3.1.5	Wrought Copper–Nickel Alloys	18
3.1.6	Wrought Copper–Nickel–Zinc Alloys	18
3.1.7	Wrought Copper–Aluminum Alloys	18
3.2	Copper Casting Materials	20
3.2.1	Copper and Copper–Chromium Casting Materials	20
3.2.2	Copper–Zinc Casting Alloys	22
3.2.3	Copper–Tin Casting Alloys	22
3.2.4	Copper–Tin–Lead Casting Alloys	25
3.2.5	Copper–Aluminum Casting Alloys	25
3.2.6	Copper–Manganese–Aluminum and Copper–Nickel Casting Alloys	25
3.3	Composites	27
3.4	Powder Metallurgical Materials	28

<b>4</b>	<b>Wrought Copper Materials</b>	<b>29</b>
4.1	Manufacture of Semi-finished Products	29
4.1.1	Smelting and Casting	29
4.1.2	Hot Forming	29
4.1.3	Cold Forming	30
4.1.4	Production of Sheet and Strip	30
4.1.5	Wire Production	31
4.1.6	Production of Rods and Profiles	31
4.1.7	Production of Tubes	32
4.1.8	Forging	32
4.1.9	Powder Metallurgical Forming (Sintering)	33
4.2	Shapes and Dimensions	33
4.2.1	Strips, Sheets and Plates	34
4.2.2	Tubes	35
4.2.3	Rods	36
4.2.4	Wires	37
4.2.5	Drawn and Extruded Profiles	38
4.2.6	Forgings	38
4.2.7	Special Shapes	38
4.3	Classification and Designation	39
4.3.1	Designation by Material Number	39
4.3.2	Designation According to Chemical Composition	40
4.3.3	Designation of the Condition of the Material	41
4.3.4	Product Designation	42
4.3.5	Designation of Powder Metallurgical (Sintered) Materials	43
<b>5</b>	<b>Copper Casting Materials</b>	<b>45</b>
5.1	Casting Procedures	45
5.1.1	Lost Mold Casting	46
5.1.1.1	Sand Casting	46
5.1.1.2	Precision (Investment) Casting (Lost-wax Process)	46
5.1.1.3	Exact Casting (Other Processes)	47
5.1.2	Permanent Mold Casting	47
5.1.2.1	Die Casting	48
5.1.2.2	Pressure Die Casting	48
5.1.2.3	Centrifugal Casting	49
5.1.3	Continuous Casting	49
5.1.4	Composite Casting	50
5.2	Shapes and Dimensions	50
5.3	Classification and Designation	51
5.3.1	Designation by Material Number and Chemical Composition	52
5.3.2	Designation of the Casting Process and the Product	53

<b>6</b>	<b>Properties of the Copper Materials</b>	<b>55</b>
6.1	Physical Properties	55
6.2	Mechanical and Technological Properties	58
6.2.1	Strength Properties at Room Temperature	58
6.2.1.1	Rolled Products	60
6.2.1.2	Extruded Products	61
6.2.1.3	Drawn Products	67
6.2.1.3.1	Rods	67
6.2.1.3.2	Tubes	67
6.2.1.3.3	Wires	68
6.2.1.4	Forgings	69
6.2.1.5	Castings	70
6.2.1.6	Composites	70
6.2.1.7	Sintered Materials	72
6.2.2	High Temperature Strength and Creep Properties	72
6.2.3	Relaxation	74
6.2.4	Behavior at Low Temperatures	74
6.2.5	Behavior under Dynamic Load	75
6.2.6	Behavior under Cyclic Load	75
<b>7</b>	<b>Working with Copper Materials</b>	<b>79</b>
7.1	Mechanical Processing	79
7.1.1	Non-cutting Treatment	79
7.1.1.1	Forming Sheets and Strips	80
7.1.1.2	Solid Forming	84
7.1.2	Machining	85
7.1.2.1	Turning	88
7.1.2.2	Milling	89
7.1.2.3	Drilling	89
7.1.2.4	Cutting	90
7.1.2.5	Fine Finishing (Polished Turning, Grinding, Engraving, Thread Production)	90
7.1.3	Chemical Machining, Chemical and Electrochemical Polishing	92
7.1.4	Electrical Discharge Machining	93
7.1.5	Thermal Cutting	93
7.2	Joining	94
7.2.1	Soldering and Brazing	94
7.2.1.1	Soldering	95
7.2.1.2	Brazing	96
7.2.2	Welding	97
7.2.2.1	Arc Welding and Shielding Gas Welding (TIG and MIG Welding)	98
7.2.2.2	Resistance Welding	99
7.2.2.3	Recent Welding Processes	100
7.2.3	Plating	101

7.2.4	Bonding	102
7.3	Heat Treatment	102
7.3.1	Homogenization	103
7.3.2	Soft Annealing (Recrystallization)	103
7.3.3	Thermal Stress-relieving	104
7.3.4	Age-hardening (Precipitation Hardening)	106
7.4	Surface Treatment	108
7.4.1	Pretreatment	108
7.4.1.1	Cleaning, Degreasing	108
7.4.1.2	Pickling and Etching	109
7.4.1.3	Chemical and Electrochemical Polishing	110
7.4.1.4	Pretreatment for Soldering, Brazing or Welding	110
7.4.1.5	Pretreatment for Bonding	111
7.4.1.6	Pretreatment for Coating	111
7.4.1.7	Shot Peening	111
7.4.2	Surface Design	112
7.4.2.1	Mechanical Processes for Surface Treatment	112
7.4.2.2	Non-metallic Coatings, Metal Coloring	112
7.4.3	Metallic Coatings	112
7.4.3.1	Electroplating	113
7.4.3.2	Electroless (Chemical) Deposition	114
7.4.3.3	Hot-dip Coating	114
7.4.3.4	Thermal Spraying	114
7.4.3.5	Deposition Welding	114
7.4.3.6	Roll-cladding	115
7.5	Safety Measures	115
7.6	Health Care	115
<b>8</b>	<b>Design Notes</b>	<b>117</b>
8.1	Design for Material	117
8.2	Design for Recycling	119
8.3	Limits of Application	120
8.4	Tolerances and Machining Allowances	120
<b>9</b>	<b>Application</b>	<b>123</b>
9.1	Areas of Application	123
9.2	Examples for Application	123
<b>10</b>	<b>Usage Properties</b>	<b>127</b>
10.1	Corrosion Behavior	127
10.1.1	Basics of Copper Corrosion	127
10.1.2	Types of Corrosion	128
10.1.3	Corrosion Behavior of Copper Alloys	130
10.1.4	Corrosion in Gases	132
10.1.5	Corrosion Protection	132

10.2	Strips for Electrical Engineering and Electronics	133
10.3	Plain Bearings	137
10.4	Reliability	142
10.5	Repairability	143

**References** 145

**Appendix: Standards and Specifications** 149

A.1	EN-Standards	149
A.1.1	Basic Standards	150
A.1.2	Testing Standards	150
A.1.3	Refinery Copper	151
A.1.4	Flat Rolled Products	151
A.1.5	Tubes	151
A.1.6	Rods, Profiles and Wires	152
A.1.7	Forgings and Forging Stock	152
A.1.8	Semi-finished Products for Electrical Engineering	152
A.1.9	Scrap, Master-alloys, Ingots and Castings	153
A.1.10	Bearing Materials	153
A.1.11	Soldering, Brazing and Welding	153
A.1.12	Other Technical Rules for Copper Materials	154
A.2	US-Standards (ASTM)	154
A.2.1	Basic Standards	154
A.2.2	Testing Standards	154
A.2.3	Refinery Copper	156
A.2.4	Flat Rolled Products	156
A.2.5	Tubes	157
A.2.6	Wires	159
A.2.7	Rods, Bars and Shapes	160
A.2.8	Forgings and Extruded Profiles	162
A.2.9	Products for Electrical Engineering	162
A.2.10	Master Alloys, Ingots and Castings	163
A.2.11	Bearing Materials	164
A.2.12	Soldering, Brazing and Welding	164
A.2.13	Coatings	164
A.3	Japanese Standards (JIS)	165
A.3.1	Basic Standards	165
A.3.2	Testing Standards	165
A.3.3	Refinery Copper	165
A.3.4	Flat Rolled Products	165
A.3.5	Tubes	166
A.3.6	Wires	166
A.3.7	Rods, Bars and Shapes	167

A.3.8	Master-alloys, Ingots and Castings	167
A.3.9	Soldering, Brazing and Welding	167
A.3.10	Products for Electrical Engineering	167
A.3.11	Coatings	167
