

# Contents

<i>Introduction</i> .....	<i>xix</i>
<b>Chapter 1 • Windows Server 2008 Architecture</b> .....	<b>1</b>
Understanding the System's Roots .....	1
System Overview .....	2
Windows 2000/NT Architecture .....	3
Architecture for Windows Server 2008 .....	5
Windows Server 2008 SP1 and the 64-Bit Architecture .....	13
Virtualization and the Hypervisor .....	13
Summary .....	17
<b>Chapter 2 • Deploying Windows Server 2008</b> .....	<b>19</b>
Stand-alone Server Installation .....	20
Server Deployments .....	23
Windows Preinstallation Environment .....	25
The Windows Imaging Format .....	28
Windows Automated Installation Kit 3.01 .....	30
Managing Images and Libraries .....	33
The Application Compatibility Toolkit 5.0 .....	36
Migrating User Data .....	38
Automated Deployment .....	40
Business Desktop Deployment Solution .....	42
BDD Deployment Scenarios .....	45
The Microsoft Solutions Framework .....	47
Windows Deployment Services .....	49
Lite Touch Installations .....	50
Zero Touch Installations .....	50
Summary .....	52
<b>Chapter 3 • Network Services</b> .....	<b>53</b>
Next Generation TCP/IP Stack .....	53
Architecture .....	54
TCP/IP Configuration .....	57
Why Use IPv6? .....	60
The Road to Teredo .....	61
HTTP Driver Enhancements .....	62
Storage Networking .....	63
Storage Explorer .....	63
iSCSI .....	64
Multipath I/O .....	65
Summary .....	67

<b>Chapter 4 • Active Directory</b> .....	<b>69</b>
Introducing Active Directory .....	69
Objects and Schema .....	70
The Landscape .....	71
Distribution and Replication .....	71
Directory Auditing .....	72
Creating a Domain Controller .....	76
Active Directory Roles .....	79
Public Key Infrastructures .....	79
Metadirectories .....	81
Customized Active Directory Versions .....	81
Integrated Authorization .....	82
Read-Only Domain Controllers .....	84
Domain Topologies .....	85
Restartable Active Directory .....	87
Summary .....	88
<b>Chapter 5 • Policies and System Management</b> .....	<b>91</b>
Group Policies and Active Directory .....	92
Administrative Template Files .....	93
The Group Policy Engine .....	94
Policy Management Tools .....	97
The Group Policy Management Console .....	98
The Group Policy Object Editor .....	100
Policy Scopes .....	101
Local Group Policy Objects .....	103
Group Policy Preferences .....	104
New Policy Settings .....	109
Network Location Awareness .....	113
The Network Access Protection Policy .....	114
Device Management Policies .....	116
User Account Control Policies .....	118
Quality of Service .....	120
Summary .....	123
<b>Chapter 6 • File System Enhancements</b> .....	<b>125</b>
The Windows NT File System .....	125
Disk Management .....	126
Full-Volume Encryption .....	128
Self-Healing NTFS .....	129
Transactional NTFS .....	129
File Services Role .....	130
File Server Resource Manager .....	130
Volume Management .....	131
Distributed File System .....	143
SMB 2.0 .....	145
Microsoft Services for Network File System .....	146
Summary .....	146

<b>Chapter 7 • Server Management</b> .....	<b>147</b>
Command-Line Tools .....	147
The Initial Configuration Tasks Console .....	152
Microsoft Management Console .....	155
Server Manager .....	156
Device Manager .....	159
Windows System Resource Manager .....	159
Reliability and Performance .....	161
Storage Manager .....	165
The Event Viewer .....	166
Task Scheduler .....	172
WMI Control .....	175
Summary .....	177
<b>Chapter 8 • PowerShell</b> .....	<b>179</b>
Getting Familiar with PowerShell .....	180
Distributed Services .....	181
Installation .....	182
Cmdlets .....	186
Syntax .....	187
Command-Line Services .....	189
Accessing WMI Providers .....	191
Command Guide .....	191
Aliases .....	197
Execution Policies .....	199
Scripts .....	199
Summary .....	201
<b>Chapter 9 • Security</b> .....	<b>203</b>
Security Overview .....	203
What's New in Security .....	204
The Security Configuration Wizard .....	205
Role-Based Services .....	206
Network Security .....	209
Registry Settings .....	211
Audit Policy .....	213
Completing the SCW .....	214
Windows Firewall with Advanced Security .....	215
Network Connection Security .....	217
Access Control List Security .....	218
Summary .....	219
<b>Chapter 10 • Clients, Interoperability, and Printing</b> .....	<b>221</b>
Windows Server 2008 and Vista: "Better Together" .....	221
Better Management .....	221
More Features Readily Available .....	222
Faster Communications .....	222
Down-Level Compatibility .....	222

Mobile Clients .....	223
Macintosh Interoperability .....	224
Unix Interoperability .....	225
Identity Management for Unix .....	226
Subsystem for Unix Applications .....	227
Network Printing .....	229
The XPS Print Architecture .....	229
Add a Printer .....	230
Print Services Role .....	230
Summary .....	233
<b>Chapter 11 • Performance Enhancements .....</b>	<b>235</b>
The Windows System Resource Manager .....	235
High Availability and Fault Tolerance .....	239
Network Performance and the TCP Offload Engine (TOE) .....	240
Network Load Balancing and NLBS .....	240
Fail-over Clusters .....	245
Virtualization and Scaling .....	250
Virtual PC and Virtual Server .....	250
Virtual Server 2007 .....	251
Windows Server Virtualization .....	254
Dynamic Systems Initiative .....	259
Summary .....	260
<b>Chapter 12 • Terminal Server .....</b>	<b>261</b>
Footprints of the Past .....	261
The Citrix Contribution .....	262
Not So Thin Anymore .....	263
How Terminal Server Works .....	265
Core Improvements .....	266
The Single Sign-On .....	269
Large Monitor Support .....	270
Monitor Spanning .....	270
Managing Terminal Server with Windows System Resource Manager .....	271
Themes and Desktop Experience Pack Support .....	272
Terminal Service Remote Applications .....	274
Active Directory RemoteApp Deployment .....	275
Remote Connections .....	276
RemoteApp Configuration .....	276
RemoteApp Security .....	279
Terminal Services Web Access .....	280
The Terminal Server Gateway .....	281
Gateway Connections .....	281
Gateway Requirements .....	283
Network Access Protection Policies .....	284
The Terminal Server Gateway Console .....	285
Session Broker .....	286
Terminal Server Licensing .....	287
Summary .....	288

<b>Chapter 13 • Internet Information Services</b> .....	<b>289</b>
Core IIS Changes .....	289
Sites and Applications .....	290
IIS Modular APIs .....	291
Windows Process Activation Service .....	291
Configuration Store .....	293
Modules .....	293
Security .....	301
Install and Setup .....	302
Management .....	303
The IIS Services Manager .....	303
Summary .....	308
<b>Chapter 14 • Server Core</b> .....	<b>309</b>
Server Core Basics .....	309
Installing Server Core .....	314
Server Core Management .....	316
Command Prompt Management .....	316
Enable Remote Connections .....	318
Network Settings .....	319
Hostname and Domain .....	321
Server Core Roles .....	322
Setting Up a Print Server .....	324
Microsoft Management Console Management .....	325
Command-Line Commands .....	326
Summary .....	333
<i>Index</i> .....	335
