Foreword xxvii
Duncan A. Joiner

I Introduction: Building Performance Evaluation (BPE) Process Model 1

1 Introduction to Building Performance Evaluation: Milestones in Evolution 3
Shauna Mallory-Hill, Wolfgang F. E. Preiser and Chris Watson
1.1 Enhancing building performance 3
1.2 Emergence of person–environment research 4
1.3 Maturation of Post-Occupancy Evaluation (1975–1985) 6
1.4 POE as a distinct discipline (1985–1995) 7
1.5 Feeding forward: from POE to BPE (1995–2005) 9
1.6 Ongoing global efforts in BPE (2005 +) 11
1.7 Conclusion 12
References 14
Further reading 18

2 A Process Model for Building Performance Evaluation (BPE) 19
Wolfgang F. E. Preiser and Ulrich Schramm
2.1 Introduction 19
2.2 Description of the process model for BPE 19
2.3 The performance concept and the building process 25
2.4 Conclusion 29
Acknowledgements 30
References 30

II Design Processes and Evaluation 33

3 The Integrative Design Process 35
Rodney C. McDonald and Sonja Persram
3.1 Introduction 35
3.2 Origin, evolution and definitions of IDP 36
3.3 Highlights of others’ work: systems thinking in IDP and a unitive process 39
3.4 The means to motivation: engaging clients in sustainability prior to IDP 43
3.5 The integrative regulatory process 45
3.6 Conclusion 46
References 47

4 Participatory/Collaborative Design Process 48
Henry Sanoff
4.1 Introduction 48
4.2 Background 49
4.3 Community participation 51
4.4 Conclusion 57
References 59
Further reading 59

5 Enhancing Design Programming: The Case of Detroit Collaborative Design Center and Detroit Hispanic Development Corporation 60
Sheri Blake
5.1 Introduction 60
5.2 Participatory design process and intent 61
5.3 Enhancing the process 69
5.4 Conclusions 72
References 74

6 Patterns in Post-Occupancy Evaluation 75
Chris Watson
6.1 Introduction 75
6.2 Principles 75
6.3 Communities of interest 77
6.4 Process 77
6.5 Evaluating environmental impact 78
6.6 Pattern language format 79
6.7 Recurring findings 79
6.8 Communicating stakeholders’ experience of architecture 85
6.9 Conclusion 85
References 86

III Case Studies 87

7 The Changing Meaning of Workspace: Planning Space and Technology in the Work Environment 89
Jacqueline C. Vischer
7.1 Introduction 89
7.2 The ‘X’ organization – building for the future 90
7.3 Involving users for better workspace design 91
7.4 Building and workspace outcomes 94
11.5 Re-deploying the survey to measure post-occupancy success 137
11.6 Conclusion 137
References 138

12 Assessing Qatar University’s Campus Outdoor Spaces: Design Intentions Versus Users’ Reactions 139
Ashraf M. Salama
12.1 Introduction 139
12.2 Overview of the literature on campus outdoor spaces 140
12.3 Campus features – architect’s statements 141
12.4 Assessing outdoor spaces: a multilayered methodology 142
12.5 Key findings 147
12.6 Conclusion 150
Acknowledgements 151
References 151

13 Building Performance Evaluation (BPE) and the Role of Perceived Values in Heritage Preservation – A Research Case for Italy 152
Carlotta Fontana
13.1 Introduction 152
13.2 Background 152
13.3 A performance-based approach for sustainable reuse 154
13.4 Counseling for communities: a performance-based approach at different scales 154
13.5 Conclusions 161
Acknowledgements 161
References 162

IV Research Methods and Tools 165

14 Evaluating the Impact of Green Building on Worker Productivity and Health: A Literature Review 167
Shauna Mallory-Hill and Anna Westlund
14.1 Introduction 167
14.2 Background 168
14.3 Literature review method 168
14.4 Performance indicators and data collection techniques 169
14.5 Conclusions 174
References 176

15 Quantitative (GIS) and Qualitative (BPE) Assessments of Library Performance 179
Wolfgang F. E. Preiser and Xinhao Wang
15.1 Introduction 179
15.2 Background 179
15.3 Project design and methodology 180
| 19.4 State-of-the-art | 226 |
| 19.5 Quality assurance of simulation based decisions | 229 |
| 19.6 Conclusion | 232 |
| References | 232 |
| Further reading | 233 |

| 20 Incorporating Occupant Perceptions and Behavior into BIM | 234 |
| *Clinton J. Andrews, Jennifer A. Senick and Richard E. Wener* |
| 20.1 Introduction | 234 |
| 20.2 BIM and the design process | 235 |
| 20.3 Linking BPE and BIM | 235 |
| 20.4 Simulating behavior | 236 |
| 20.5 Metrics | 238 |
| 20.6 Illustrative simulation model | 238 |
| 20.7 Conclusions: implications for emerging practice | 244 |
| Acknowledgements | 244 |
| References | 244 |

| V Education | 247 |

| 21 Post-Occupancy Evaluation in Brazil: Its Impact on Professional Practice | 249 |
| *Sheila W. Ornstein, Rosaria Ono, César Imai, Ana J. G. Limongi França and Maria Beatriz Barbosa* |
| 21.1 Introduction | 249 |
| 21.2 POE methodology | 250 |
| 21.3 Case studies | 252 |
| 21.4 Conclusions | 257 |
| References | 258 |

| 22 Building Performance Evaluation (BPE) in the Construction Project Management Curriculum | 259 |
| *Ulrich Schramm* |
| 22.1 Introduction | 259 |
| 22.2 The school and its programs | 259 |
| 22.3 BPE in the curriculum | 261 |
| 22.4 Outline of selected lectures and seminars | 263 |
| 22.5 Employment opportunities | 272 |
| 22.6 Conclusions | 274 |
| References | 275 |

| 23 Evaluation Research and Inquiry Based Learning (IBL) in Architecture and Urbanism: Consumption Versus Production of Knowledge | 277 |
| *Ashraf M. Salama* |
| 23.1 Introduction | 277 |
23.2 Idiosyncrasies on knowledge delivery and acquisition 278
23.3 Evaluation research and inquiry based learning (IBL) 279
23.4 Evaluation research: a paradigm for utilizing the built environment as an open textbook 280
23.5 Conclusion: Evaluation research and seeking a new form of pedagogy 284
References 285

24 Post Tower Evaluation: User-Needs Analysis (UNA) in German Student Education 286
Rotraut Walden
24.1 Introduction 286
24.2 Background 286
24.3 Preliminary studies 287
24.4 Stakeholder questionnaire 288
24.5 Data collection – the walkthrough 292
24.6 Results 292
24.7 Conclusions 296
Acknowledgements 296
References 297

25 Ethnographic Methods in Support of Architectural Practice 299
Eleftherios Pavlides and Galen Cranz
25.1 Introduction 299
25.2 The nature of the student research is ethnographic 300
25.3 Two kinds of findings 303
25.4 Benefits of student research projects 307
25.5 Conclusion 310
Endnotes 310
References 311
Further reading 311

VI Epilogue 313

26 Reflections on Stage M: The Dog that Didn’t Bark 315
Francis Duffy
26.1 Introduction 315
26.2 Background 315
26.3 Stage M feedback on meeting client objectives 316
26.4 Conclusions 319
Endnotes 319
References 320
