

Index

A

- A. B. Dick Company, 125
- Accounting system, 113–115
- Amberol phonograph cylinders, 151
- America, mid-nineteenth-century: boys and young men in, 5–6, 7, 14–16; communications revolution in, 6–7; transportation revolution in, 6–7
- Analogy, process of invention by, 23–24, 125–126, 130–136
- Anthracite experiments, 84–85, 141
- Armat, T., 135, 149
- Armat projectors, 135, 149
- Assets, investing in, 47
- Astronomy, 65
- Atomic energy, 17–18, 82
- Autographic Printing, 124–125, 155
- Automatic Telegraph Company, 144
- Automation, 91
- Automobiles and automobile industry:
 - demand for rubber and, 57; electric *versus* gasoline, 10, 36, 150; Ford's mass production of, 54, 59, 194, 199–202

B

- Baldwin, N., 120
- Barnum, P. T., 58
- Batchelor, C., 55
- Battery electrode, 95–96. *See also* Storage battery
- Battle of Shiloh, 72
- Beethoven, L. van, 30
- Bell, A. G., 21–22, 37, 51–52, 59, 126
- Bell telephone. *See* Telephone
- Big-picture thinking, 62–63, 82–83
- “Black Maria” motion picture studio, 149
- “Blue Amberol” cylinder records, 152
- Boston, Edison in, 7, 75, 76–77, 144
- Bottom-up approach, 18–19

- Branding, 79–80
- Brooklyn Institute of Arts and Sciences, 149
- Bug trap, 43
- Bugs, 104
- Business: accounting system for, 113–115; innovation as, 50–51, 63–64, 113–115; lessons in management and, 103–115; profit motive and, 100, 101. *See also* Cost management; Customers; Entrepreneurship; Investment; Management; Market headings; Revenue production
- Business-to-business markets, 74, 78

C

- Cadmium, 95–96
- Calahan's Gold and Stock Telegraph Company, 94, 144
- Capitalism, 100
- Carbon button transmitter invention:
 - anthracite experiments and, 85; compressed carbon and, 22–24; cut-and-try process in, 21–22; date of, 9, 145; patent for, 156; process of, 51–53, 59–60, 126. *See also* Electric incandescent light invention
- Carman, W., 114
- Catnapping, 113
- Celluloid, 131, 133–134
- Cement. *See* Portland cement
- Civil War era, 7, 15, 72, 119, 120
- Clancy, J., 20
- Clarke, C., 107
- Collecting: designs, 83–84; materials, 53–54
- Columbia University, 106
- Commercial viability: of Bell telephone, 59–60; importance of, 8, 60; logistics and, 103; production cost considerations in, 95–96; timing and, 65–66, 69; vote

recorder failure and, 7–8, 122. *See also* Competitive advantage; Failure; Market positioning; Market research; Success

Commitment, in experimentation, 41–42

Communications industry: Edison's inventions related to, 124–126; nineteenth-century revolution in, 6–7

Competitive advantage: of doing it better, 123; of improvement *versus* radical new technology, 94; of innovation itself, 77–79; market management for, 46–47; offering an edge and, 75–76, 78; persistent experimentation and, 64; timing and, 65–66, 69. *See also* Commercial viability; Customers; Market positioning; Success

Complaints, capturing and analyzing, 35, 112–113

Components: designing, 83–84; as parts of a whole, 136–137

Compressed carbon, 22–24. *See also* Carbon button transmitter invention

Confidence, inspiring, 58–59, 61–62, 77–78

Control, over entire process, 101–102, 105–106

Cornaro, L., 89

Cost management: accounting system for, 113–115; commercial viability and, 50–51, 103; importance of, 95–96; modeling and prototyping for, 47–49, 95, 117–118. *See also* Economics; Investment

Cotton picker, 56

Craftsmanship: culture of, in Edison's invention factories, 107–109, 110–112; in Menlo Park laboratory-workshop, 49–50, 107–109, 110–112

Creativity: balancing reliable income with, 50–51; materials for, 53–54; myths about, 107; as predictable process, 50, 107–109. *See also* Innovation; Credit, taking, 59–60, 61

Curiosity, 5–6

Customers: business-to-business, 74, 78; capturing and analyzing complaints of, 35, 112–113; educating, 70–71; lessons in creating, 69–80; offering an edge to, 75–76. *See also* Marketing

Cut-and-try process, 21–22

Cutting-edge work, 140–141

Cynics, 81

D

Dally, C. M., 151

Davy, H., 127

Deafness, Edison's, 17–18, 29–30, 33–35, 60, 79

Delegation, 108–109, 110–112

Designs: collecting, 83–84; redesigns and, 94

Details: big-picture thinking and, 62–63; exploiting, 97–98; paying attention to all, 26–27

Detroit Free Press, 6, 15, 72–73, 119

Diamond Disc phonograph, 152

Diary entries, Edison's, 24–25, 26, 130–131

Dick, A. B., Company, 125

Dickson, W.K.L., 149

Dictation machines, 88

Diet, 89

Diplex telegraphy, 31–32

Disabilities, exploiting, 29–30, 33–35

Discouragement, 41

Dissatisfaction, creating, 70, 80

Distraction, inviting, 64–65, 86

Doing, learning through, 19–20, 24–26.
See also Hands-on approach

Duplex telegraphy, 31–32

Dust protection solution, 136, 160

Dyspepsia, Edison's, 13–14

E

Eastman, G., 134

Eastman Dry Plate and Film Company, 134

Economics: balancing technical requirements with, 95–96; of electric lighting system, 97–98. *See also* Cost management; Investment

Edge, offering a, 75–76

Ediphone business dictation machines, 88

Edison, C. (son), 148

Edison, M. (daughter), 148

Edison, M. E. (daughter), 144

Edison, S. (father), 81

Edison, T. A.: biographies of, 5; birthdate of, 5; birthplace of, 5; boyhood of, 5–7, 14–16, 20; as businessman, 63–64; chronology of, 143–153; cutting-edge work of, 140–141; deafness of, 17–18, 29–30, 33–35, 60, 79; death of, 153; diary entries of, 24–25, 26, 130–131; dyspepsia of, 13–14; education of, 15, 19–20; films about, 5, 19, 118, 119–120; as inventor, overview, 7–11, 123–126; as inventor *versus* scientist, 56, 67–68, 140–141; life history of, 5–11, 143–153; marriages of, 8, 9, 144, 148; popular mythology about, 5–6, 16, 19–20, 33, 58–59, 60–62, 118–121, 126–127; as prodigious

- prodigy, 123–126; public image and self-promotion of, 58–59, 60–62, 77, 79–80, 90, 126–127; as railroad news butcher, 6, 14–15, 29–30, 71–73, 75, 118–119, 143; as railroad newspaper printer, 6, 15–16, 118–121, 143; reading of, 20, 69, 81–82, 89, 99; as telegrapher, 7, 16, 30–31, 33–35, 42–43, 74, 98–99, 143; visionary predictions of, 82–83 *See also* Inventions and innovations; Patents
- Edison, T. A., Jr. (son), 80, 145, 151
- Edison, T. M. (son), 150
- Edison, W. L. (son), 146

- Education: to create dissatisfaction, 70; of customers, 70–71; designing, 106–107; Edison’s, 15, 19–20; Edison’s views on, 24–25, 70, 87–88; for electrical engineering, 106–107; formal *versus* informal, 19–20; hands-on approach to, 24–26; motion pictures for, 87–88
- Elaboration *versus* replacement, 137–138
- Electric arc light, 127–130, 137, 157
- Electric car technology, 10, 36
- Electric generators, 127–130, 137, 146
- Electric incandescent light invention: commercial manufacture of, 147; cut-and-try process in, 21; dates related to, 9, 146, 147, 153; electric power system and, 9, 62, 63, 137, 139–140; exhaustive approach in, 31, 94–95, 99–100, 146; patents for, 156, 157, 160; story of, 126–130
- Electric meter, 140, 146, 156
- Electric motors, 98
- Electric pen, 124–125, 145
- Electric power system and industry: invention of electric lighting and, 9, 62, 63, 137, 139–140; mass marketing of, 139–140; opening of, in lower Manhattan, 9, 107, 140, 147; patents related to, 156, 157, 158, 159, 160; paying attention to details in, 97–98; schools created for, 106–107; Standardizing Bureau for, 109–110; voltage regulators for, 86
- Electrical engineering school, 106–107
- Electrocution, 148
- Electromagnetic ore extractor. *See* Iron ore separator
- Electromagnetic pickup, 37–38
- Electromotograph phenomenon, 145
- Empirical approach, 33
- Employees, Edison’s: for accounting, 114; as craftsmen, 50, 85–86, 107–109, 110–112; credit-sharing with, 61; delegation and empowerment of, 108–109, 110–112; qualities of, 45–46, 107–108
- Empowerment, 108–109, 110–112
- Energy conversion, 82–83, 140–141
- English as a second language, 81
- Entertainment industry, 87–88. *See also* Motion pictures; Phonograph
- Entrepreneurship: lessons in, 55–68; of nineteenth-century boys, 14–16, 119; shaping markets and, 71–73; specialized, 73–74; spirit of, 14–16; of young Edison, 14–16, 71–73, 118–120
- Entropy, 140
- Etheric force, 66, 145
- Everything: being a collector of, 53–54; discovery and, 81–82; experimentation with, 13–14; lessons on how to use, 29–43; recycling and conserving, 10, 38–40, 65, 84–85
- Evolution *versus* revolution, 138–139
- Excellence, drive for, 101
- Executive: Edison’s style as, 108–109; qualities of ideal, 45–46
- Exhaustive approach, 31–32, 94–95
- Experimentation: concrete knowledge from, 16–17, 27–28; with diet, 89; with everything, 13–14; individual, 89–90; learning from failed, 40–42, 84–85; maintaining materials for, 53–54; persistence in, 64, 94–95, 99–100. *See also* Trial-and-error approach

F

- Facsimile telegraph system, 145, 147, 159
- Factotum, 14

Failure: continuum of success and, 32;
embracing problems and, 35; of imagination, 17–18, 87; learning from, 8, 40–42, 84–85, 102; timing and, 65–66, 69; using, as opportunity, 10, 38–40. *See also* Commercial viability

Faraday, M., 141

Farmer, M., 128–130

Filament invention: cost concerns in, 103; cut-and-try process in, 21; dates of, 146; exhaustive approach in, 31, 94–95, 99–100; as improvement *versus* new invention, 123; patents for, 157, 158; trial-and-error approach in, 47–48

I

Icon: concept of, 118; Edison as, 118–121

Ideas, capturing and recording, 30–31, 83–84, 104–105

Ignorance, value of, 32–33

Imagination: failure of, 17–18, 87–88; of the future, 66–67, 82–83

Imitation, 121–123

Improvement *versus* new creation, 35, 94, 136–140

Incandescent lamp. *See* Electric incandescent light invention

Incentives, for inventing, 100–101

Industrial revolution, 30, 49, 78

Innovation: as business, 50–51, 63–64, 113–115; creating customers for, 69–80; economic and technical requirements for, 95–96; entrepreneurial spirit and, 14–16; entrepreneurship and, 55–68, 71–73; experimentation and, 13–14, 16–17; imitation and, 121–123; invention *versus*, 38, 43, 56–57, 92–93; investing and, 45–54; lessons in faking genius in, 117–141; limited demand for, 78–79; management of, 103–115; rain-making and, 81–88; real-world, hands-on approach to, 13–28; redesign and, 94; selling, 77–78; trends and, 16, 69, 121; using everything in, 29–43; work of, 89–102

Internal combustion engine, 10

Intuition, 104

Invention: by analogy, 23–24, 125–126, 130–136; of entire systems, 62, 63, 136–137; innovation *versus*, 38, 43, 56–57, 92–93; maintaining focus on, 56–57; making improvements *versus*, 35, 94, 136–140; multiple-track approach to, 96–97; myth of accidental, 41–42, 63, 107; science and, 67–68; unlimited incentive for, 100–101

- Invention factory: accounting system at, 114; building of, 58–59; concept of, 9, 10–11, 49–50; creative method and, 107–109; materials for, 53–54. *See also* Laboratory-workshops
- Inventions and innovations, Edison: chronologies of, 144–153, 155–163; historical overview of, 7–11; imagination in, 66–67; niche, 73–74, 75, 125; notable failures in, 10, 38, 117; range of, 50–51, 123–126's. *See also* Innovation; Patents
- Inventor, Edison's definition of, 67–68
- Inventory, reverse, 55
- Investment: in assets, 47; insuring the permanency of, 46–47; lessons in, 45–54; recycling and converting, 10, 38–40, 65; scale modeling and, 47–49, 117–118. *See also* Cost management; Economics
- Iron ore separator: conversion of investment in, to Portland cement manufacture, 10, 38–40, 65; dates related to, 146, 147, 148; dust protection solution and, 136; failure of, 10, 38–39, 117; patent, 156
- Israel, P., 84
- ## K
- Kaleidoscopic approach, 96–97
- Kellogg, W. K., 89
- Kiln, for Portland cement manufacture, 39–40, 92, 161
- Kinetograph, 9–10, 135, 148, 160
- Kinetophone, 152
- Kinetoscope: Edison's vision for, 87; exhibitions of, 149; invention of, 9–10, 132–136, 148
- Knowledge. *See also* Learning: funneling, 22; gaining concrete, 16–17; importance of memory and, 45–46; of the known, 90; of properties, 22–24; speed in acquiring, 99; starting with existing, 138; theory and, 16–18, 22–24, 27–28; value of ignorance and, 32–33; of what's inside, 27–28
- Koster and Bial's Music Hall, 149
- Kruesi, J., 146
- ## L
- Laboratory-workshops: craftsman culture of, 49–50, 107–109, 110–112; "invention factory" concept and, 9, 10–11, 49–50; Menlo Park, New Jersey, 8–9, 49–50, 95, 105, 107–109, 110–112, 114, 147; Newark, New Jersey, 8, 55, 104–105; public image of, 58–59; self-containment of, 105–106; stocking of, with stuff, 53–54; support for, 50–51; West Orange, New Jersey, 9–10, 58–59, 91, 133, 148, 152
- Langley, S. P., 23
- Lantern slides, 132, 136
- Lathrop, G. P., 66, 148

 Parker, R., 20
 Patents, Edison's: average annual, 50; chro-
 nology of, 155–163; communications-
 related, 124–126; control and, 101–102;
 for electric lighting system, 137; first, 7–8;
 last, 153; niche, 73–74, 75, 125; range of,
 123–126; total number of, 10, 123. *See*
 also Inventions and innovations, Edison's
 Persistence, 64, 93
 Phantoscope, 149
 Phonograph: as analogy for motion picture
 device, 131, 132, 134, 135; dates related
 to, 9, 146, 152; Edison's marketing of,
 70–71, 78–79; invention and improve-
 ments on, 9, 37–38, 78, 126, 138–139,
 145, 151, 152; patents related to, 156,
 158, 159, 160, 162
 Photographic emulsions, 131, 132, 133
 Physics, 20
Physiologie du mouvement (Marey), 133–134
 Platinum, 103
 Play, 67, 109, 112
 Plodding, 99–100
 Plumbago, 53
 Port Huron, Michigan, 5, 6, 7, 14–15, 72,
 98–99, 119
 Porter, E. S., 151
 Portland cement: business success of, 65–66,
 151; conversion of ore-separating enter-
 prise to manufacture of, 10, 38–40, 65;
 dates related to, 150, 151; kiln design for,
 39–40, 92; patents for, 161, 162, 163
 Post, C. W., 89
 Press coverage, taking advantage of, 58–59,
 60–62, 90
 Pricing, competitive, 46–47
 Printing devices, 94, 155
 Problems: defining, 130; embracing, 35; as
 opportunities, 35–37, 126–130, 136;
 parallel approach to, 98; persistent
 working on, 93
 Prodigious prodigy, Edison as, 123–126
 Profit motive, 100, 101
 Projectoscope, 149. *See also* Kinetoscope
 Prometheus, 68; Edison compared to, 9, 58,
 61, 68

- Proof-of-concept step, 49
 Proofing press, on Grand Trunk Railroad, 6, 15–16, 118–121, 143
 Properties, knowledge of, 22–24
 Prototyping: exhaustive, 95; gaining knowledge through, 27–28; to minimize risk and cost, 47–49; in top-down and bottom-up methods, 19; trial-and-error approach and, 47–48
 Public image: branding and, 79–80; inspiring confidence with, 58–59, 61–62, 77–78; self-promotion and, 60–62, 78, 79–80, 90, 126–127
 Publications, reading, 69, 99
 Puskas, T., 103–104
 Pyromagnetic generator, 84–85, 140–141, 158
- Q**
- Quadruplex telegraph, 8, 43, 47, 144, 157, 158
