<i>Introduction</i>	1
About This Book.....	1
Conventions Used in This Book	2
What You Don't Have to Read	2
Icons Used in This Book.....	2
Foolish Assumptions	3
How This Book Is Organized.....	4
Part I: Accessing Both Ends: Getting Data In and Info Out	4
Part II: Creating Effective Queries	4
Part III: Building Really Useful Forms	4
Part IV: Designing Great Reports.....	4
Part V: Way Cool Advanced Queries, Forms, and Reports.....	5
Part VI: The Part of Tens	5

<i>Part I: Accessing Both Ends: Getting Data In and Info Out</i>	7
---	----------

Chapter 1: Getting to Know Forms and Reports	9
---	----------

Finding Forms Fascinating	9
Streamlining data input with forms.....	11
Entering data with the Form Wizard	12
Editing information with forms	13
Viewing data by using forms	14
Recognizing Why Reports Rock	14
Using reports to show results.....	14
Using reports to present data in a professional format	15
Using reports to show data analysis.....	16
Using reports to preserve the moment	16
Seeing Why Both Forms and Reports Have a Place.....	17
Understanding the Value of Queries	18
Introducing the query concept.....	18
Using queries to enhance forms and reports	19
Queries, Forms, and Reports Basics You Need to Know	20
Access Add-Ons and Extra Cool Tools	21

Chapter 2: Getting Started with Queries	23
--	-----------

Understanding the Types of Queries	23
Introducing select queries.....	24
Getting to know crosstab queries	26

Make-table queries	27
Using update queries	28
Introducing append queries	29
Getting to know delete queries	30
Creating Queries Using a Wizard	31
Why you should be off to see the wizards	31
Understanding the limitations of the wizards	32
Creating your first query with the wizard	32
Creating Queries in Design View	36
Getting to know the Design View	36
Creating an example query in Design View	38
Modifying Queries for Better Results	40
Deleting a query	41
Modifying an existing query	41
Rearranging and deleting fields in a query	41
Chapter 3: Creating Simple Forms	43
Creating Forms with the Help of a Wizard	43
Meeting the Form Wizard	44
Befriending the Form Wizard	45
Knowing what the wizard can't do	48
Building Forms the Hard Way: Using Design View	49
Introducing Design View tools	49
Starting a form in Design View	52
Associating a table to your form in Design View	53
Adding fields to the form	55
Modifying Forms You've Created	57
Aligning objects on a form	58
Setting consistent sizes	60
Spacing horizontally and vertically	61
Shrinking a big form down to size	63
Chapter 4: Building Basic Reports	65
Getting to Know the Types of Access Reports	65
Introducing simple reports	66
Using reports that group data	67
Using reports to summarize information	67
Creating Reports by Using a Wizard	68
Using the Report Wizard	68
Understanding what the wizard doesn't know	72
Designing Reports from Scratch	73
Understanding the report bands	73
Setting up the report page	75
Choosing your tables	79
Selecting the fields	81

Modifying Report Layouts	82
Deciding what needs to be done	82
Moving and formatting those pesky labels	83
Pulling the layout together to save paper	85
Adding Data from External Linked Tables.....	87
Choosing a method for accessing external data	87
Importing or linking external data	88
Part 11: Creating Effective Queries	91
Chapter 5: Creating Multi-Table Queries	93
Understanding Multi-Table Queries.....	93
Understanding the benefits of multiple tables	94
Establishing relationships between multiple tables	95
Adding Multiple Tables to Queries	96
Selecting multiple tables up front	96
Adding the tables you forgot about to your query	98
Choosing the fields to use.....	99
Making Access use the correct table	100
Linking to External Databases in Your Queries.....	101
Understanding the types of external data you can use.....	101
Linking to tables in another foreign database format	103
Knowing what you can and can't do with a linked external database	104
Understanding Relationships in Queries	105
Getting to know how tables are related.....	105
Making sure that you choose the right relationships.....	106
Setting up table relationships	107
Chapter 6: Modifying Data with Queries	111
Understanding What You Can Modify with a Query.....	111
Knowing what you can modify	112
Knowing what you can't modify.....	113
Called to Action: Data-Modifying Queries	113
Creating New Tables with Queries	115
Why you would want to create new tables	115
Creating your first table with a make-table query	116
Updating Data by Using Queries	119
Creating an update query example	119
Understanding the update query results	123
Deleting Data with Queries	123
Adding New Data with Queries.....	126
Using an append query.....	126
Combining make-table and append queries	129

Chapter 7: Expanding Queries with SQL	131
Getting the Scoop on SQL	131
Understanding the “S” in SQL	132
Putting SQL in its place (at the heart of all Access queries)	133
Understanding How SQL Can Help	134
Going beyond the automated query functions.....	134
Creating an indexed table with SQL.....	135
Modifying a table with SQL	137
Viewing the SQL You’ve Already Created and Didn’t Know About	138
Switching to Design View	138
Changing to SQL View.....	138
Seeing the results in Datasheet View	140
Going back to Design View	141
Getting Your Feet Wet with Simple SQL Statements	142
Making Useful SQL Statements.....	144
Updating records with SQL	145
Creating and filling tables using SQL	145
Summarizing values using SQL.....	146
Deleting records using SQL	147
A Nod to VBA Programmers	147
Chapter 8: Dealing with Quarrelsome Queries	151
Troubleshooting Queries That Don’t Quite Work.....	151
Understanding the clues Access gives you.....	152
Locating the problem.....	153
Using Datasheet View as a troubleshooting tool.....	155
Troubleshooting Sassy SQL.....	158
Figuring out what went wrong.....	159
Trying Design View	160
Things to watch out for in SQL queries.....	160
Simplifying your SQL to find the problem.....	161
Avoiding Improper Relationships	162
Understanding how bad relationships can mess you up	162
Making sure your relationships make sense.....	164
Correcting relationships that don’t work.....	164
Junking Joins That Don’t Join.....	165
Understanding why default joins may not work	165
Correcting your joins	166
Steering Around Empty Query Results	167
Understanding some of the causes of empty query results	167
Correcting a query that doesn’t return any data	167
Preventing Data Destruction	168
Beginning by backing up	168
Avoiding destructive query results.....	169
What to do if your database seems to be kaput.....	169

Part III: Building Really Useful Forms 171
Chapter 9: Building Better Forms by Using Controls173

Getting to Know the Controls	173
Common Controls You Can Use	174
List box controls.....	175
Option button controls.....	176
Check box controls	177
Adding Controls to Your Forms.....	177
Adding list boxes to your forms.....	178
Adding option groups	181
Using check boxes on forms	184
Adding labels to toggle buttons	185
Incorporating ActiveX Controls	186
Modifying the Characteristics of Controls.....	189
An example of setting default values	189
Blocking access to certain controls	191
Improving controls by using tab order.....	192

Chapter 10: Using Multiple Tables in Forms193

Understanding Forms and Subforms.....	194
Understanding the need that subforms fill	194
Getting to know the subform place.....	194
Adding Fields from Multiple Tables to Your Forms	196
Verifying relationships and adding fields.....	196
Adding subforms with the Form Wizard	197
Adding a subform after the fact.....	198
Choosing the Best Subform View.....	198
Making the switch from Datasheet view to another subform view.....	199
Introducing your subform view options.....	201
Adding Multiple Subforms	202
Navigating Records in Multi-Table Forms	203
Choosing the right navigator bar	203
Finding records with filters	204

Chapter 11: Fixing Form Faults207

Preventing Invalid Data with Input Masks	207
Setting up an input mask with the wizard.....	208
Making an input mask from scratch.....	209
Limiting a User to Specific Values with Validation Rules	211
Setting up your own validation rules.....	211
Remembering Access validation rules	214
Quick validation rules you can use.....	214
Preventing Users from Changing Records	215

Looking Out for Poorly Formatted Data.....	216
Knowing what not to do	216
Formatting data on forms.....	218

Part IV: Designing Great Reports.....221

Chapter 12: Adding Fancy Touches to Reports223

Adding Descriptive Titles to Your Reports	223
Getting title basics down.....	224
Modifying existing titles	225
Formatting your report titles	226
Getting Dynamic with Your Titles	227
Understanding how to use expressions in your titles	227
Using expressions to create dynamic titles	228
Using properties to control your expressions.....	230
Getting rid of the .mdb document extension.....	231
Coming Up with Page Title Ideas	231
Adding Dates and Page Numbers.....	233
Choosing the right place for dates and numbers.....	233
Getting fancy with date displays	233
Discovering some neat page number tricks	234
Making Records Easier to Read with Alternating Bands of Color.....	236
Step 1: Picking colors and translating them to hex	236
Step 2: Writing code to apply your color bands.....	238
Making Records Stand Out.....	240

Chapter 13: Creating Reports That Summarize Data245

Discovering How to Group Records	245
Understanding your record-grouping options.....	246
Creating your first report grouping.....	247
Making sure you get the right groups.....	251
Adding Subtotals and Totals.....	253
Understanding how subtotals and totals work	253
Adding totals to groups and reports.....	254
Using Some Advanced Summarizing Methods	256
Going beyond simple math	256
Converting string values	259
Finding the largest, smallest, and average values.....	259
Trimming off extra spaces.....	260
Rounding numbers.....	260

Chapter 14: When Reports Go Wrong263

Troubleshooting Reports	263
Figuring out whether the report is really wrong	264
Figuring out what's wrong with the report	264

- Avoiding Bad Report Layouts266
 - Considering the purpose of your report266
 - Avoiding text box data overflow267
 - Avoiding page overflow268
 - Formatting data in reports269
- Eliminating Unnecessary Labels for Tighter Reports.....270
 - Deciding whether you really need all those labels271
 - Deleting labels271
 - Moving labels to headers272

Part V: Way Cool Advanced Queries, Forms, and Reports273

Chapter 15: Tricks for Finding Data with Queries275

- Finding Just the Data You Need.....275
 - Getting to know the operators.....276
 - Selecting a range of records.....277
 - Finding data that’s close but not exact282
- Creating Queries That Ask What to Find.....284
 - Understanding parameter queries284
 - Building your very own parameter query.....285
- Excluding Data You Don’t Want286
 - Eliminating duplicates from results287
 - Finding duplicates with SQL queries287
 - Modifying join properties to get the results you want288

Chapter 16: Tricks for Updating with Queries291

- Creating New Fields with a Query.....291
 - Deciding whether using a query to add fields is worth it292
 - Adding your first field with a query.....292
- Adding Default Values by Using a Query.....294
 - Getting to know what you can add294
 - Adding default values to your very first field295
 - Making sure you don’t override real data295
- Performing Calculations.....296
 - Determining whether to use a query for your calculations.....296
 - Writing your first query calculations.....297
- Updating Records by Using Data from Another Table299
 - Choosing the right type of query for your updates300
 - Updating data in one table with data from another
 - without any conditions300
 - Making sure the right data is updated.....304

Chapter 17: Killer Ways to Improve Forms	305
Prequalifying the Data Entered	305
Crafting Forms That Are Easier to Use	313
Chapter 18: Expert Methods for Sharing Reports	327
Sharing Data with Microsoft Excel	327
Sending Reports to Microsoft Word	328
Using OLE Objects in Reports	331
Chapter 19: Making Reports Look Better	339
Enhancing the Appearance of Important Information	339
Printing on Standard Labels	345
Keeping Related Data Together	347
Adding Your Logo to Reports	350
Chapter 20: Adding Efficiency with Great Tools	353
Using Cool Tools to Document Everything	354
Souping Up Your Database	357
Using Software to Share Stuff	359
 Part VI: The Part of Tens	 365
Chapter 21: Ten Great Access Sites Online	367
Chapter 22: Ten Things to Know about Queries (That Also Help You with Forms and Reports)	373
 Index	 377
