

# Index

- Absolute error, 3, 64
- Adaptive Monte Carlo, 33, 35
- Adaptive stochastic approximation, 33, 35
- Air traffic, 1, 193, 208–211
- Analytic techniques, 2, 148
- Antithetic variates, 152, 154–155
- Approximation techniques, 2, 171
- Asymptotic optimality, *see*
  - Logarithmic efficiency
  
- Balanced failure biasing, 133, 138
- Berry–Esseen bound, 75
- Biological systems, 2
- Birth-and-death process, 28
- Bounded normal approximation, 75, 132
- Bounded relative efficiency, 71
- Bounded relative error, 21, 65, 79–80, 90, 94, 113, 132, 138, 139
- Bounded relative variance, *see*
  - Bounded relative error
  
- Central limit theorem, 2
- central limit theorem, 52, 54
- Change of measure, 5, 6
  - optimal, *see* Zero-variance
- Chernoff bound, 92, 189
- Conditional Monte Carlo, 107
- Confidence interval, 3, 64
  - reliability, 4, 72–83
- Confidence level, 3
- Cross-entropy, 36, 157, 158, 164
  
- Dependability, 1, 66, 125–140, 145–166
- Differential equations, 243, 245, 247–248
- Dynamic importance sampling, 131
  
- Entrance distribution, 44, 54–55
- Exponential efficiency, 177, 187
  
- Failure biasing, 66, 72, 133
- Feynman–Kac distributions, 54
- Fully polynomial randomized approximation, 176–178, 180, 187
  
- Genetic algorithms, 149, 150
  
- Importance function, 40, 43, 48–49, 58, 229, 237–238
- Importance sampling, 4–8, 17–120, 127, 131–132, 152, 172, 173, 175, 180, 181, 187, 250–253
- Insurance, 2, 87
- Interacting particle systems, *see*
  - Splitting
- Inverse failure biasing, 133
  
- Large deviations, 88, 93, 94
- Legendre–Fenchel transform, 92, 94, 101
- Likelihood ratio, 5, 19, 30, 48, 77–79, 219
- Logarithmic efficiency, 69, 89, 93, 101, 103, 106, 108, 109, 111

- Loss networks, 118
- Lyapunov inequality, 111, 113
- Markov chain, 6, 9, 24, 42, 125, 194, 219, 245
- Markov chain Monte Carlo, 172, 173, 178, 180, 181, 189
- MCNP, 215, 218, 219, 227, 235
- Mean time to failure, 125, 127, 129
- Measure-specific dynamic
  - importance sampling, 131
- Moment generating function, 91
- Monte Carlo transport code, *see* MCNP
- Nuclear plants, 1
- Particle transport, 215–240
- Partitioning techniques, 253–255
- Queuing network, 58, 74, 79, 87–120
  - fluid, 116
- Recursive variance reduction, 161–165
- Regenerative simulation, 129–132
- Relative error, 3, 6, 10, 64
- Robustness, 4, 83
- Ruin, 2
- Russian roulette, 40, 47–48, 229, 234
- Selective failure biasing, 135
- Sensitivity analysis, 139
- Sequential Monte Carlo, *see* Splitting
- Simple balanced likelihood ratio, 134
- Splitting, 8–10, 39–59, 90, 127, 158, 194–211, 229
  - fixed, 45, 52–54, 57
  - fixed effort, 45, 51, 57
  - fixed probability of success, 46
  - fixed success, 46
  - multilevel, 40, 43
- Stiffness, 2, 243, 248
- Strong efficiency, 177
- Supremum, 94–95
- Systems biology, 243–261
- Tau-leaping, 255–261
- Telecommunications, 1, 87, 145, 149
- Transportation systems, 1, 145, 149
- Unavailability, 125, 127, 129
- Variance estimator, 3, 64, 217
- Weight window, 48, 221, 229–231
- Work-normalized analysis, 50, 51, 53, 70–71
- Work-normalized logarithmic efficiency, 71
- Zero-variance
  - change of measure, 6, 8, 18, 21, 25–28, 136–137, 182
  - approximation, 32–37
  - estimator, 6, 21
