

# Contents at a Glance

---

<b><i>Introduction</i></b> .....	<b>1</b>
<b><i>Part I: Creating 3D Content for Games</i></b> .....	<b>5</b>
Chapter 1: Getting Started with 3D Game Animation .....	7
Chapter 2: Game and Art Design, and Creating Storyboards .....	19
Chapter 3: Starting with Traditional Animation Basics .....	29
<b><i>Part II: Creating Interfaces, Modeling Scenery, and Texturing Backgrounds</i></b> .....	<b>39</b>
Chapter 4: Creating Game User Interfaces .....	41
Chapter 5: Modeling Scenery and Props .....	59
Chapter 6: Adding Details with Materials .....	87
Chapter 7: Mapping Textures .....	97
Chapter 8: Creating Effective Lighting .....	115
<b><i>Part III: Designing, Modeling, and Animating Game Characters</i></b> .....	<b>131</b>
Chapter 9: Techniques for Modeling Characters .....	133
Chapter 10: Discovering the Basics of 3D Animation .....	173
Chapter 11: Animating Characters .....	193
Chapter 12: Animating Facial Movements .....	209
Chapter 13: Automating Reactions with Dynamics .....	217
<b><i>Part IV: Animating Game Cut Scenes</i></b> .....	<b>227</b>
Chapter 14: Animating Scene Elements .....	229
Chapter 15: Animating with Particles .....	241
Chapter 16: Rendering an Animation .....	253
<b><i>Part V: The Part of Tens</i></b> .....	<b>265</b>
Chapter 17: Ten Types of Tools Used by Game Companies .....	267
Chapter 18: Ten Creative Jobs in the Animation Industry .....	279
Chapter 19: Ten Ways to Land a Job as a 3D Game Animator .....	287

<i>Appendix A: Using Game Engine Tools .....</i>	<i>305</i>
<i>Appendix B: Glossary of Animation Terms .....</i>	<i>337</i>
<i>Appendix C: Directory of Animation Schools .....</i>	<i>351</i>
<i>Index .....</i>	<i>355</i>

# Table of Contents

<b><i>Introduction</i></b> .....	<b>1</b>
About This Book .....	1
Conventions Used in This Book .....	2
Foolish Assumptions .....	3
How This Book Is Organized .....	3
Part I: Creating 3D Content for Games .....	3
Part II: Creating Interfaces, Modeling Scenery, and Texturing Backgrounds .....	3
Part III: Designing, Modeling, and Animating Game Characters .....	4
Part IV: Animating Game Cut Scenes .....	4
Part V: The Part of Tens .....	4
Icons Used in This Book .....	4
<b><i>Part I: Creating 3D Content for Games</i></b> .....	<b>5</b>
<b>Chapter 1: Getting Started with 3D Game Animation</b> .....	<b>7</b>
This Whole Place Is Full of 3D — Identifying 3D Game Elements .....	8
User interfaces .....	8
Backgrounds .....	9
Scenery and props .....	10
Characters .....	10
Cut scenes .....	11
Opening the Toolbox — the Tools Used to Create 3D Game Animations .....	11
Modeling, rendering, and animation software .....	12
Paint and texturing software .....	15
Compositing software .....	15
Hardware requirements .....	15
Creating 3D Games — Slightly More Complicated Than a Connect-the-Dots Puzzle .....	16
Game design .....	16
Art design .....	17
Integration .....	17
Testing .....	17
Learning the Big Picture .....	17
<b>Chapter 2: Game and Art Design, and Creating Storyboards</b> .....	<b>19</b>
Documenting the Game Design: What Exactly Does This Game Do? .....	20
Brainstorming .....	20
Gathering feedback .....	20

Writing a Game Design Document .....	21
Adding flowcharts .....	21
Obtaining approval .....	23
Growing Ideas into Design — Beginning the Art Design Phase .....	23
Sketching inspirations: You didn't throw away your pencils, did you? .....	23
Compiling reference materials .....	24
Fleshing out details, and producing final designs .....	25
Labeling details .....	25
Creating Storyboard Documents .....	25
Types of storyboards .....	26
Specifying logical flow paths .....	26
Storyboarding cut scenes .....	27
Creating a master storyboard .....	27
Who's Talking Now? Adding Dialogue .....	27

### **Chapter 3: Starting with Traditional Animation Basics . . . . . 29**

Layering Images — the Simplest Animation Technique .....	30
Look at the Birdie and Smile — Focusing the Audience's View .....	30
Avoid complex motions .....	31
Displaying anticipation of intended motion .....	31
Emphasizing motion with exaggeration .....	32
Making foreground objects stand out .....	32
Do You Have a Good Stopwatch? Controlling Timing and Pacing .....	32
Establishing correct timing .....	33
Establishing pacing .....	34
Do I Need to Draw Every Frame? Accomplishing Efficient Animation Techniques .....	34
Posing characters and in-betweening .....	34
Using animation loops .....	35
Panning images .....	35
Animating Realistic Motions .....	36
Animating physically realistic reactions .....	36
Making realistic motion with primary and secondary motion .....	36
Developing a Unique Style .....	37

## ***Part II: Creating Interfaces, Modeling Scenery, and Texturing Backgrounds . . . . . 39***

### **Chapter 4: Creating Game User Interfaces . . . . . 41**

Understanding the Basics of Interface Design .....	41
Identifying interface information .....	42
Defining interface backgrounds .....	43
Using interface fade in and fade out .....	43

Making the interface easy to navigate .....43  
 Including sounds .....44  
 Making the game area as big as possible: Maximizing  
 interface real estate ..... 44  
 Starting with a Layout: The Process of Interface Design .....44  
 Importing drawing files .....45  
 Building a 2D layout .....45  
 Adding 3D Effects .....54  
 Enhancing with 3D objects .....54  
 Embellishing with 3D text .....55  
 Beveling the interface border .....57

**Chapter 5: Modeling Scenery and Props ..... 59**

Discovering 3D Space All Around You .....60  
 Moving about 3D Coordinates .....60  
 Selecting scene views .....61  
 Navigating scene views .....62  
 Using coordinate values .....64  
 Exploring the Various Modeling Types .....65  
 Polygon modeling for man-made models .....65  
 NURBS modeling for natural flowing surfaces .....65  
 Patch modeling for curved surfaces .....66  
 Moving, Rotating, and Scaling Objects .....66  
 Transforming objects .....66  
 Snapping objects into place .....67  
 Aligning objects .....70  
 Using pivot points .....72  
 Learning the Art of Modeling .....73  
 Using the easiest way to model .....73  
 Starting with building blocks .....75  
 Editing primitives .....77  
 Building surfaces from curves and splines .....78  
 Creating Lo-Polygon Models That Won't Choke a Game Engine .....83  
 Tips for reducing polygon count .....83  
 Automating polygon reduction .....85

**Chapter 6: Adding Details with Materials ..... 87**

Defining Materials .....87  
 Color .....88  
 Transparency .....88  
 Reflectivity .....88  
 Refraction .....88  
 Luminosity .....88  
 Specularity .....88  
 Bump map .....89

Assigning Material Properties to Objects .....	89
Changing the view shading .....	89
Using preset materials .....	90
Creating unique materials .....	93
Assigning Material Properties to Object Parts .....	95

## **Chapter 7: Mapping Textures ..... 97**

Wrapping Texture Maps about Objects without Messy Glues .....	98
Positioning Textures with UV Coordinates .....	100
Offsetting a texture .....	100
Scaling a texture .....	101
Rotating a texture .....	101
Tiling a texture .....	101
Creating Seamless Textures That Tile Together:	
Look Ma, No Seams .....	103
Creating noisy tiles .....	104
Filling a solid tile .....	104
Matching opposite edges .....	104
Creating Raised Texture with Bump and Displacement Maps .....	106
Using bump maps .....	106
Using displacement maps .....	107
Creating Realistic Environments with Textures .....	107
Using reflection maps .....	108
Adding a background image .....	109
Creating a skybox for backdrops .....	110
Painting on Textures to Add Dirt and Grime .....	111
Efficiently Coloring Objects with Vertex Colors .....	113
Baking Textures for Quick Model Loading .....	113

## **Chapter 8: Creating Effective Lighting ..... 115**

Starting with a Basic Three-Point Lighting Configuration .....	116
Exploring the Different Light Types .....	117
Point light .....	117
Area light .....	117
Direct light .....	117
Ambient light .....	117
Spot light .....	117
Creating Lights .....	118
Changing Light Properties .....	120
Using light color .....	120
Changing light intensity .....	120
Enabling shadows .....	122
Setting falloff .....	124
Using Light Special Effects .....	124
Adding lens flares .....	124
Adding fog .....	126
Making glowing lights .....	126

Creating Realistically Lighted Scenes with Raytracing,  
 Radiosity, and Global Illumination .....128  
     Raytracing .....128  
     Radiosity .....129  
     Global illumination .....129  
 Creating a Prelighted Map for Quick Scene Loading .....130

***Part III: Designing, Modeling, and Animating  
 Game Characters ..... 131***

**Chapter 9: Techniques for Modeling Characters .....133**

Modeling Methods .....134  
     Knowing when to buy instead of build .....134  
     Creating low-polygon models .....134  
     Using symmetry .....134  
     Using a default stance .....134  
     Using mesh smooth features .....135  
 Modeling the Torso .....135  
     Chamfering edges .....137  
     Sculpting muscles .....137  
     Cutting limb holes .....141  
 Creating and Attaching Limbs .....142  
     Tapering limbs .....144  
     Lofting limbs .....146  
     Connecting limbs .....146  
     Bridging limbs .....148  
 Modeling Hands and Feet .....148  
     Extruding fingers .....148  
     Adding a thumb .....150  
     Modeling shoes .....151  
     Creating toes .....153  
     Adding nails .....153  
     Connecting hands and feet .....153  
 Mirroring the Body .....155  
 Making the Body Proportional .....156  
 Getting “Ahead”: Creating a Head .....158  
     Extruding a neck .....159  
     Using Booleans .....160  
     Modeling the windows to the soul: Creating eyes .....161  
     Creating a nose .....164  
     Creating ears .....166  
     Creating a mouth .....166  
     Adding facial hair .....168  
     Sculpting the head .....168

Creating Hair .....	170
Adding Accessory Props .....	170
Modeling clothes .....	170
Dressing a head .....	171
Adding jewelry .....	171
Embedding weapons and props .....	171
<b>Chapter 10: Discovering the Basics of 3D Animation .....</b>	<b>173</b>
Pacing an Animation with Frame Rates: What's the Going Rate? .....	174
Changing the frame rate .....	175
Setting the total number of frames .....	176
Moving the Time Slider to select a frame .....	176
Creating Simple Animations with Keyframes .....	177
Animating an object by creating position keyframes .....	177
Animating an object with rotation and scale keyframes .....	179
Creating an attribute keyframe .....	181
Locating keyframes with the Animation Controls .....	183
Copying and pasting keyframes .....	184
Automating the creation of keyframes with Auto Keyframing .....	184
Moving an Object Along a Path .....	184
Animating an object moving along a path .....	185
Tracking an object's motion with trajectories .....	185
Ghosting objects to get a sense of their motion .....	186
Using Animation Editors .....	187
Viewing animation graphs .....	187
Synchronizing animation keys .....	188
<b>Chapter 11: Animating Characters .....</b>	<b>193</b>
Rigging Characters to Move Realistically .....	194
Creating a skeleton that lies under the character .....	194
Setting constraints so the object doesn't move when it shouldn't .....	198
Controlling character motion with kinematics .....	199
Creating a Realistic Skin .....	201
Skinning a character .....	201
Setting a bone's influence .....	202
Adding deformations to create muscle bulges .....	203
Animating with Bones .....	204
Integrating Motion Capture for the Ultimate in Realistic Motion .....	207
Lots of dots: Motion capture hardware .....	207
Unique motion capture systems .....	208
Buying motion .....	208
<b>Chapter 12: Animating Facial Movements .....</b>	<b>209</b>
Creating Morph Targets: The Character of a Thousand Faces .....	210
Working on a clone .....	210
Creating a blend control .....	211

Learning to Talk: Speaking the Basic Phonemes .....213  
 Syncing Facial Movements with a Soundtrack .....213  
 Building Controls for Handling Eye Movements .....214

**Chapter 13: Automating Reactions with Dynamics .....217**

Incorporating Physics: I'm Glad I Don't Have to Calculate  
     This by Hand .....217  
         Soft and rigid body objects .....218  
         Special object types .....218  
         Making objects immovable .....218  
 Defining Physical Properties Such as Gravity and Friction .....220  
     Defining object properties .....221  
     Defining forces .....221  
     Using constraints .....223

***Part IV: Animating Game Cut Scenes .....227***

**Chapter 14: Animating Scene Elements .....229**

Using Cut Scenes: All the Stuff That Happens Between  
     Game Levels .....230  
         The pregame show .....230  
         Introducing the game .....230  
         Explaining the game .....231  
         Tell a story with animation .....231  
 Presenting High-Resolution Images: What to Do After  
     the Animations Are Finished .....231  
         Rendering backgrounds .....231  
         Rendering a title screen .....231  
         Rendering marketing materials .....231  
 Animating Cut Scenes: No Limits .....232  
     Modeling for cut scenes: I can use NURBS! .....232  
     Animating cameras: I finally have a chance to control  
         the camera! .....234  
     Animating lights (and not just a flashlight) .....236  
     Animating textures: Just like television .....237

**Chapter 15: Animating with Particles .....241**

Creating Special Effects with Particles: A Treat for All  
     the Pyromaniacs .....241  
         Creating smoke and dust .....242  
         Creating fire .....242  
         Creating clouds .....242  
 Pinpointing a Particle's Starting Location with Particle Emitters .....244  
     Using emitter types .....244  
     Using an object as an emitter .....245

Configuring Particle Systems: Randomness Is the Name of the Game .....	246
Setting particle rate .....	246
Setting particle life span .....	247
Setting particle shape and size .....	247
Spawning new particles .....	247
Changing particle materials .....	247
Creating a Blizzard: Combining Particles with Dynamics .....	249
Creating a Custom Particle with Instanced Objects: When Simple Shaped Particles Aren't Enough .....	251

## **Chapter 16: Rendering an Animation .....253**

Creating Test Renders: Try It before You Buy It .....	253
Using the Render View window .....	254
Rendering an area .....	255
Selecting a view and range .....	256
Making animation previews .....	256
Exploring the Rendering Options .....	257
Selecting a format .....	258
Setting resolution .....	258
Using network rendering .....	258
Adding Effects at the Last Minute .....	258
Enabling anti-aliasing .....	259
Using the depth of field effect .....	259
Adding atmospheric effects .....	260
Adding motion blur .....	260
Raytracing Images for Realism .....	261
Cartoon Rendering: Saturday Morning Will Never Be the Same .....	262

## **Part V: The Part of Tens .....265**

### **Chapter 17: Ten Types of Tools Used by Game Companies .....267**

Introducing Your New Best Friend: 3D Modeling, Rendering, and Animation Tools .....	268
Maya .....	269
3ds max .....	269
Softimage XSI .....	269
Lightwave .....	270
Remembering Your Old Friends: 2D Painting and Drawing Tools .....	270
Photoshop .....	271
Illustrator .....	271
Painter .....	271
Z-Brush .....	271

Getting a Little Extra Realism: 3D Rendering Systems .....272  
     Brazil Rendering System .....272  
     Mental Ray Rendering System .....272  
 Putting All the Pieces Together: Compositing Packages .....272  
     After Effects .....273  
     Combustion .....273  
     Digital Fusion .....273  
 Removing What Shouldn't Be There: Video Editing Tools .....273  
     Premiere .....274  
     Final Cut Pro .....274  
 Taking Your Designs Online: Web Creation Tools .....274  
     Flash .....274  
     GoLive .....274  
 Making Your Voice Heard: Audition, an Audio Editing Tool .....275  
 Animating Characters the Easy Way: Motion Capture Systems .....275  
     Vicon Motion Systems .....275  
     Motion Analysis .....276  
 Animating a Talking Face: Lip Synching Systems .....276  
     LifeStudio: HEAD .....276  
     LipSync .....276  
 Speaking the Programmers' Language: 3D Programming Tools .....276  
     DirectX .....277  
     OpenGL .....277

**Chapter 18: Ten Creative Jobs in the Animation Industry . . . . .279**

    Producer/Director .....280  
     Game Designer .....280  
     Game Artists .....281  
     3D Modeler .....282  
     Lighting Director .....283  
     Animator .....283  
     Special Effects Artist .....284  
     Tester .....284  
     Grunt .....285  
     Trainer .....285

**Chapter 19: Ten Ways to Land a Job as a 3D Game Animator . . . .287**

    Gaining the Necessary Experience: First Things First .....288  
         Developing software skills .....288  
         Getting involved in creating games .....289  
         Studying games .....290  
     Finding Animation Programs and Schools .....290  
         Knowing which degree to earn .....291  
         Knowing which courses to take .....292

Showing Off: Creating an Awesome Demo Reel .....	293
Creating a demo reel .....	294
Labeling a demo reel .....	295
Sending out demo reels .....	295
Establishing a Web Presence .....	295
Securing a domain name .....	296
Building an amazing Web site .....	296
Adding your work to an online gallery .....	297
Getting Feedback and Exposure .....	298
Entering Web animation contests .....	298
Entering animation festivals .....	299
Improving Your Skills .....	299
Learning from books .....	299
Training by video .....	300
Using Web tutorials .....	300
Attending workshops .....	300
Joining a user group .....	300
Attending Animation Conferences .....	300
Joining a Professional Organization .....	301
Knowing the Right People .....	302
Working Your Way Up .....	302
Getting your foot in the door .....	302
Getting on a beta test team .....	303
Starting as a junior animator .....	303
Making an internal move .....	304
Being Persistent .....	304

## ***Appendix A: Using Game Engine Tools .....305***

Selecting a Game Engine .....	305
Using Game Engine Tools .....	308
Creating a User Interface .....	308
Accessing the GUI Editor .....	309
Creating a new GUI page .....	310
Adding controls and commands to a GUI page .....	312
Using the Mission Editor .....	313
Accessing the Mission Editor .....	315
Creating a terrain .....	316
Adjusting the Terraform .....	318
Texturing the terrain .....	319
Populating the environment .....	321
Moving objects .....	323
Defining the Scene Environment .....	323
Loading Maya Files into the Game Engine .....	326
Installing a DTS Export Utility .....	326
Changing default units .....	327

Exporting a Maya object .....328  
 Viewing exported objects .....329  
 Exporting textured objects .....330  
 Exporting animation sequences .....332  
 Making models available in the Mission Editor .....333  
 Creating Interiors .....334

***Appendix B: Glossary of Animation Terms .....337***

***Appendix C: Directory of Animation Schools .....351***

The Art Institutes .....351  
 Ringling School of Art and Design .....351  
 Full Sail .....352  
 California Institute of the Arts .....352  
 Vancouver Film School .....352  
 Sheridan College .....352  
 Savannah College of Art and Design .....352  
 DigiPen Institute of Technology .....353  
 Parsons School of Design .....353  
 Digital Media Arts College .....353  
 Ex'pression College for Digital Arts .....353  
 Vancouver Institute of Media Arts .....353  
 Academy of Art University .....354  
 Gnomon, School of Visual Effects for Film, Television and Games .....354  
 Oregon3D .....354

***Index.....355***
